List of Passengers.

PASSENGERS INWARD.

By this mail.—For Southampton: Capt. Loos, Mr. Fraser, Assistant Surgeon, Messrs. B. S. Hobson, R. Stratten, T. White, boatswain; Mr. Phipps, stoker; and T. Hearn, ordinary; T. Wright, sailmaker, and T. Vine. For Marseilles: Commodore C. K. Stribbling, U. S. N.; Captain Radford, Messrs. J. Camino, A. Elsinger, and C. Miza. For Singapore: Mr. and Mrs. D. L. Immenk, Messrs. F. Diers, W. G. Hale, W. Howard, J. Bailey, H. Miles, and T. Bisonquet.

PASSENGERS OUTWARD.

Per P. and O. str. Ceylon, 4th Sept., from Southampton to Hong Kong: Messrs. Ramsay, F. Blackhead, A. Brown, H. R. Shaw, R.N., J. Cann, A. Wright, J. Mc L. Brown, G. P. Thomson, Capt. and Mrs. Wood, — Winstanley, W. Hase, J. G. Murray, and H. J. Allen. To Shanghai: Mr. K. C. Dow, Mr. R. A. Jamieson, Mr. J. M. Beatty, Mr. E. D. Jones. To Singapore: Governor-General of Dutch Possessions, lady and son, Mr. T. T. S. de Bech, daughter, Miss de Bech, Miss Scheefmaker and two servants. From Suez to Singapore: Mr. and Mrs. R. W. Thomson and servant. From Marseilles, 12th Sept., to Hong Kong: Mr. W. Maxwell, Mr. A. K. Johnston, Messrs. Inde, Azcarraga, and R. G. Caldecon, Mr. and Mrs. Heira.

Per P. and O. str. Delta, 12th Sept., from Southampton to Hong Kong via Bombay: Mr. James Holt, R. M. From Marseilles, 20th Sept., to Hong Kong, via Bombay: Mr. Dixwell. To Shanghai: Mr. W. Watson.

Per P. and O. str. Mooltan, 27th Sept., from Southampton to Singapore: Mr. J. Price. To Shanghai: Mr. H. B. Dalziel. From Marseilles, 5th October, to Hong Kong, via Bombay: Mr. Francis Porter, Mr. Mourilyan. To Penang: Mr. F. S. Brown and Son.

Per P. and O. str., 4th Oct., from Southampton to Hong Kong: Mrs. Fox, Dr. Smith (Bishop of Victoria) and Mrs. Smith, Mr. T. H. Thompson, Mr. Lawrence, Mr. J. W. Powell, Mr. Gilman, Mr. H. B. Lemann, Mr. Frank Heald, Lieut. Col. Moody, R. E., and Mrs. Moody. To Shanghai: Mr. Garrett. From Gibraltar to Hong Kong: Don Jose de Aquilar. From Marseilles, 12th October, to Singapore: Admiral and Mrs. May. To Shanghai: Mr. and Mrs. Winchester, Mr. M. L. Kniffler. To Hong Kong: Mr. W. H. Overton.

Per P. and O. str., 20th Oct., from Marseilles to Singapore, via Bombay: Mr. J. G. Knox. To Shanghai: Mr. Hartmans, Mr. Beizier.

Per P. and O. str., 20th Oct., from Southampton to Shanghai: Mr. H. Cope, Mr. R. Elias.

Per P. and O. str., 29th Oct., from Southampton to Hong Kong, via Bombay: Mr J. Carravagal. From Marseilles, 6th Nov., to Singapore, via Bombay: Mr. and Mrs. J. A. Stok and infant, 2 children, and 2 servants, Mr. and Mrs. J. M. Tiedemann and native female servant.

Per P. and O. str., 4th Nov., from Southampton to Singapore: Dr. Treacher. From Alexandria to Singapore: Mr. and Mrs. J. J. Blankenhagen, T. Blankenhagen and native female servant. From Suez to Hong Kong: Mr. W. Preston. From Marseilles, 12th Nov., to Singapore: Mr. J. F. Arnold, Mr. C. T. Deines.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong.—From England per mail steamer Ganges, Capt. Eagle, Capt. Mc Instrey, Dr. Lockhart, Messrs. Shephard, Palmer, and Hayward. From Singapore: Mr. and Mrs. Whampoa, Messrs. A. Donaldson, W. Evans, H. Harmer and Louss. Per Alby from Bombay: Mr. Resonque. From Singapore: Mr. Stratton and 20 Chinese. Per Jupiter from Melbourne: Messrs. Wilkin, Mossman, Webster, and 200 Chinese. Per John Matthie from Calcutta: Mr. Woodford, wife and child and 21 Chinese.

Summary of News from the Far East.

THE OVERLAND EXPEDITION TO INDIA.

This expedition, in which so much interest has been felt, has, we are sorry to say, proved a comparative failure. It will be remembered that a number of gentlemen started from Shanghai in the month of February last, intending to proceed to India through China and Thibet. From time to time we have recorded the details of their progress. In our last report* this "great overland party" had reached Kwei-Chow-Fu, a distance of 1,200 English miles from Shanghai. From thence we learn, by this mail, that they proceeded to Wan, from whence, being unable to obtain coolies or animals, they continued their course by the river to Chun-King, which they reached on the 28th April. Here the Tartar General refused to see them, and the French Bishop, who has been a resident in the Province of Sechuen for twenty-five years, warned them that there was a plot on foot to murder them. However, through his assistance they were enabled to procure a guard, but no assistance whatever was rendered them, and they were compelled to submit to great extortions. It appears that in this part of the country nothing had been heard of the Treaty.

They now passed several large cities, all more or less closed from fear of the rebels, and arrived at Sui-chow on the 18th of May. Here they found an army of braves encamped outside the city, nominally for its protection, but such was the insubordination of the soldiers that they were actually fighting among themselves, and the gates were closed against them. The travellers, too, could not gain admission, but were informed by the Prefect that if they wished to see him they would have to be pulled over the walls in baskets—an honour which they declined. To add to the unpleasantness of their position, the Prefect informed them that they could not possibly proceed either by land or by water, as the whole country was in the hands of the rebels.

Their only chance now was to reach Ping-shan, and find to some outlets from thence, but on arriving at that place on the 25th May, they could neither obtain coolies, animals, or boatmen, and on requesting permission to remain there until they could receive a reply to a letter they had despatched to the Viceroy at Ching-tu, relating to their difficulties, the people declared that if they did not clear out within a certain time they would fire on them. The next day they returned them the letter to the Viceroy which they would not forward, and carried their threat into execution, without, however, doing any damage. That night the city was attacked by rebels, and the travellers were fired at and attacked. They then retreated to Sui-chow, and finding the obstacles to their journey insuperable in the present disturbed state of the country, they returned to Shanghai, which they reached on the 9th July.

The object of the expedition has not, therefore, been accomplished, but there can be no doubt that much valuable information has been acquired, which will turn to good account in the future, and we shall await with considerable curiosity a longer and fuller account of this important expedition.

London and China Telegraph, July 29.

JAPAN.

Mr. Alcock has carried out his determination, as mentioned in our last issue, to make the overland journey from Nagasaki to Kanagawa. It is satisfactory to know that the enterprise has been in the highest degree successful. Mr. Alcock was accompanied by Mr. de Witt, Netherlands Consul-General; Mr. G. S. Morrison, British Consul at Nagasaki; Mr. Gower, of the Legation; and last—not least—the artist of the *Illustrated London News*.

In spite of all the warnings the travellers had received of the perils of the journey, it was accomplished safely and pleasantly, notwithstanding a slight annoyance from the Yakonins who accompanied them on their route. For this, however, the magnificent scenery through which they passed must have afforded ample compensation. Several towns and villages were visited which presented, in appearance at least, every sign of prosperity and contentment. The most interesting of these was Osaka, which is described as "the Paris and London of Japan, the seat of trade and luxury; an enormous town, intersected throughout with large canals, lined with magnificent warehouses, and spanned by innumerable bridges." Twenty miles from Osaka is the flourishing port of Hiogo, "with a splendid beach frontage for foreign warehouses, pretty country for villas, and ample space for exercise and recreation." The *North China Herald*, from which we have quoted, adds that the opening of Hiogo and Osaka will be the key to the trade of Japan, and to intimate association with the people.

CHINA.

PEKING.

There is little news of any importance from the metropolis of China.

The efforts of the Prussian Minister to negotiate a treaty with China have proved unsuccessful. The mission, it is said, has "retired from the capital under embarrassment."

According to the *Peking Gazette*, the Imperialists have been gaining more victories, and several thousands of the insurgents have been slain, but it is very doubtful how much truth there is in this statement.

A memorial appears in the *Peking Gazette* wherein Tan Foke, prays the Emperor to remit the amount due for Customs at Tien-tsin last year; and this for the reason that from the fourth month, when the French and English appeared in the vicinity, even until the second month of this year, the total amount received was only 2,252 taels, whereas in ordinary years the return was at least 40,000 taels. Many of the native vessels were pressed into the service of the Allies, it is affirmed, and while such was the state of things the prints of merchants' footsteps could not be seen on the soil.

TIEN-TSIN.

In consequence of the departure of General Jamin for France, General O'Malley has assumed the command of the French troops here, and will for the present also fill the post of Commander-in-Chief of His Imperial Majesty's forces in China. General O'Malley arrived in China as Colonel of the 102nd Regiment, and was promoted for acts of bravery and ability during the campaign.

The Russian caravan reached Tien-tsin on the 26th June, too late a date for any further information respecting it to be received by this mail.

Chinese reports state that the native Exchequer at this port is in a state of bankruptcy.

THE YANG-TSE-KIANG.

By the latest advices trade was reviving at Hankow, in which city confidence was being restored. A number of foreign vessels were in port, which presented a cheerful appearance of bustle. The insurgents have been warned not to approach the city. The prosperity of Hankow, if it prove permanent, will soon begin to be felt in the commercial world, especially at Canton.

Some difficulty has arisen at Hankow of a kind not new to English merchants in China. Attempts are being made on the part of the Chinese there to conduct business on the old "Hong" system, and the Consul has, therefore, issued a notification stating that by the fifth article of the Treaty of Nanking, the Emperor abolished the practice by which British merchants trading at Canton had been compelled to deal exclusively with the Hong merchants, and enjoining all British merchants to abide by the treaty.

No communications of any interest have been received from Kiu-kiang or Chin-kiang. The latter place looks, it is said, quite forlorn and deserted.

SHANGHAI.

Trade is reported as very dull at this port, and this is probably owing in great measure to the incursions made by the Rebels on the surrounding neighbourhood, the country they hold being a complete desert. The Imperial soldiers were said to be quite unable to cope with them, but the latest report under date of July 18, states that they have retired to Chiating, upwards of twenty miles to the west.

The comet, which has lately excited so much interest in Europe, was first seen at Shanghai, on July 3rd, at 7 P.M., near the small star *h* in the Constellation of Ursa Major, with a tail reaching over 60 deg. of the heavens. By 11 P.M. of the 5th, it had reached a point in Declination 66 deg. 53m. N., Right Ascension 11h. 28m. 34s., with a length of tail of 47 deg. to the south. At 8 P.M., July 12th, it had reached the Declination of 57 deg. N. and Right Ascension 14h. 5m., near *n* in Ursa Major, thus having travelled through 2,346 miles of Right Ascension and 591 of Declination in a west and southerly direction in seven days.

The *North China Herald* states that certain Europeans were reported as lying off Sung-kong in a precarious state, from wounds received in an engagement between the Rebels and Imperialists, and that H.M.'s gunboat *Flamer* having gone in quest of them had returned without success.

NINGPO.

An attack of the Rebels was constantly dreaded here by the Chinese officials. No improvement has been effected in the Custom House arrangements and the carrying trade was fast being transferred to native bottoms.

A body of Imperial troops, about 2,000 strong, ill-conditioned, and badly equipped, had arrived at Ningpo.

HONG KONG.

The Governor of Hong Kong started on the 17th July with Vice-Admiral Hope, on a trip to the North of China and to Japan, and was not expected to return for two or three months. The Hon. Mr. Mercer acts as Deputy-Governor during his absence.

The American squadron has been recalled by the United States Government, and Flag Officer Stribling, being a Southerner, has been superseded.

The trial of the seven deserters from H.M.'s 99th Regiment, on two distinct indictments for murder, took place on the 19th July. On the first charge, which was that of blowing out the brains of a shopkeeper who remonstrated with them on robbing his premises, one of the prisoners named Irving has been convicted of manslaughter, and sentenced to four years' imprisonment, while his comrades are acquitted. The second charge is the murder of a mandarin, who, in an attempt, on the part of some villagers, to capture these deserters, rushed out to prevent a disturbance, was shot through the heart. The prisoners were declared "not guilty" on this second count; a strange decision, if we may judge from the details of the evidence; but as deserters they will be brought before a court martial for their military offences.

The *Overland Register* defends the collection of the Imperial Customs' revenues by foreign agency, on the grounds that it will be the means of protecting our merchants, by putting down smuggling, and also that thus only shall we be able to reimburse ourselves for the money which we have expended upon the late wars in this quarter of the world in order to induce our Chinese neighbours to listen to common sense.

From the same journal we extract the following:—

"The following is an approximate account of the present distribution of the missionaries of Protestant Societies in China. Beginning south in Canton province, we find seventeen at the provincial city, one at Shaoukung-foo, five at Swatow, and five or six German missionaries in the districts of San-on and Tung-kun, lying to the north-west of Hong Kong, and about twenty-eight at five or six principal stations in this province. Amoy comes next as we travel northward. Ten men are there whose labours extend to various large cities in the south part of the Fukkeen province. At Foo-chow eight are in active work amongst 600,000 inhabitants, with extensive tracts of country open to their efforts; say eighteen in the Fukkeen province—then in the Chi-kiang province at Ningpo ten or twelve are to be found. In the Kiang-su province, about twenty-three are to be found at Shanghai. In the newly-opened province of Shan-tung, five are already at Chefoo and two at Tang-chow. The province of Chi-li has six at Tien-tsin. To Hankow in Hoo-peh two have recently gone, and one is at Nanking. Thus seven or eight provinces have been entered

Digitized by Google

already. Calm reasoners on passing events will not hastily charge Protestant missionaries with lack of effort in scattering themselves in various directions throughout China. Yet the latter should aim at every province, and if Protestant churches have not their agents in every province of China before five years have passed away, they will not come up to the full measure of faithfulness to the Redeemer, whose name may now be proclaimed everywhere in this land. It devolves on missionaries to point out to their respective societies how they can disperse themselves with advantage over this greatest of all mission fields."

A notice appears in the Government *Gazette* that on the departure of Mr. P. Campbell from China, the Directors of the Corporation have appointed Mr. William Lamond until further notice, to be Acting Manager and Principal Officer of the Oriental Bank Corporation in China, and Mr. John McDouall to represent the Bank at Shanghai as Acting Agent there.

Mr. W. H. Alexander has been appointed acting Chief Magistrate.

The following announcements in reference to firms have been made:—Mr. W. B. Varco has established himself at Honam as Tea Inspector, and Mr. G. Simpson at Canton. Mr. Jahangheer Framjee Buxey has joined the firm of R. H. Camajee and Co.

The barque *Napoleon* was sold by auction on 9th July, to Messrs. S. P. Hall and Co., for the sum of $3,750. With her various stores the amount became about $5,000.

CANTON.

Preparations for the withdrawal of the troops in garrison at Canton are in active progress. Already the artillery are beginning to remove their guns.

The Poon-yu magistrate at Canton has been sentenced to forty days' imprisonment and subsequent banishment from that city by the Allied Commissioners, for express disobedience of their orders warning him against the employment of cruel practices. The revolting facts of the case are very simple of narration. Three men who had endeavoured to escape from gaol, were by the magistrate's orders submitted to the Kok-wai torture, which consists in smashing the ancle bones, and in the perpetration of other excruciating practices; and it so happened that the poor wretches were discovered in their agonies by the commandant of constabulary. An attempt was made to obtain the remission of the punishment, and several petitions in his favour were forwarded to the Allied Commissioners. They therefore issued a proclamation to the people of Canton, giving the details of the case, stating that the use of torture is not only revolting to the minds of all civilised people, but also opposed to the laws of China; that the orders they had issued on the subject had been disregarded by the magistrate, and that they were determined to inflict on him a punishment sufficiently exemplary to deter others from following his example.

The *Friend of China* has a long article on this proclamation, and avers that, notwithstanding the greatness of the provocation, the propriety of punishing the Pwan-yu is doubtful, since it may lead to recrimination at a time when we are not in a position to resent its effects.

SIAM.

BANKOK.

The Kalahome, or Prime Minister of Siam, left Bankok with his suite in three steamers on the 18th July for Singapore, where they arrived on the 29th. The visit was not of an official character, but simply a pleasure excursion. The steamers contained a number of Siamese notabilities and several ladies, and the Singapore papers inform us that the noble visitors have been making extensive purchases, and that the ladies have been gratifying their taste for millinery. The second and fifth sons of His Majesty the First King of Siam are among the voyagers.

The *Singapore Free Press*, has the following:—

"Any one familiar with Bangkok in 1856, when the English Treaty came into force, and revisiting it in 1861, when the trade has been open for five years, cannot fail to see great changes and some improvements. Spacious foreign stores and neat foreign houses ornament the part where most of the foreigners reside; the British consular buildings look imposing, if not handsome; a huge ungainly building, brisk jets of steam and the whirr of wheels reveal the one steam rice mill, and this, with numbers of little steamers rushing noisily about, shows that steam has gained some footing in the country. There is more traffic and stir in the river, and there is doubtless a freer circulation of money among the common people, as might be expected from the fact that the quantity of rice sent from the country has increased from an average of about 200,000 piculs a year before 1856, to nearly 1,500,000 piculs already in 1861. But the actual improvement of the country is not so great as these signs would indicate, and far short of what might reasonably be expected from the marvellous fertility and other natural advantages of the country, and from the freedom of trade conferred by the foreign treaties. The foreign premises look prosperous, but the number of firms has latterly been reduced, and those who remain tell of diminished business and smaller profits.

"The British Consulate ought to exercise a powerful and beneficent influence in the country, but at present its chief functions seem to be those of restraining unruly Jacks and settling small squabbles between dusky British subjects.

"With miles of paddy fields all round, the one steam rice mill cannot be kept constantly going for want of the grain to work on. The steamers which to the uninitiated would bespeak vast commercial activity, are for the most part mere toys. There is among the nobles a steamer mania, but it might as well be a tulip mania, for all the benefit the country derives from their multiplication—they are the playthings of the nobles, not the tools of the country's work.

"The cultivation of rice has been greatly extended, but there is no corresponding increase of other products. Sugar, pepper, cotton and cocoanut oil are either stationary or are falling off fast. In the case of sugar it is an ascertained fact that the prices obtained this year are not remunerative to the manufacturers. If we inquire as to the causes of this real backwardness, amid apparent advancement, we find that the chief hindrance to the country's prosperity is that the people are ground to the earth with taxes, and that these taxes are so contrived as to press most overpoweringly on the poorest classes. There are market taxes, taxes on boats, taxes on fireplaces, taxes on every conceivable thing. Every article a poor man uses, every act of his life pays toll to the taxgatherer. He is not allowed to catch prawns in the river, he must buy them from the farmer, and it is said that there is now a tax on shaving! When to the universality and the all-pervading character of the taxes imposed, is added the extortion of the farmers of the revenue, it may be imagined how hard it is for the poor tax-payer to live, how utterly impossible it is that he should become rich. The worst feature of this oppression is that the most vexatious of the taxes have been recently imposed.

"It is not for us to pronounce how far the foreign consuls would be justified in protesting against the imposition of new taxes as being opposed to the spirit of the treaties and even to the letter of the British Treaty, which states in Article VIII—'Articles of export, from the time of production to the date of shipment, shall pay one impost only, whether this be levied under the name of inland tax, transit duty, or duty on exportation;' and, further, 'it is distinctly agreed that goods or produce, which pay any description of tax in the interior, shall be exempted from any further payment of duty on exportation;' but it seems to be quite within their province to urge on the King and on the Government the deep injury inflicted, not only on trade, but on the country itself and on the very revenue by oppressive taxation; and it is confidently believed in Bangkok that such a representation, even from the British Consul alone, would have immediate effect. They might also do something towards the modification of the Corvée by which three months of the year must be given by every labourer to the service of the King without a cent. of remuneration. Failing success in these matters, the Consuls might urge on the Government that if it is to deserve the name it should do something more than impoverish the people.

"At present the only purpose of public utility on which the revenue appears to be expended is in the building of war steamers. This is so far good. But there is already force enough (as our readers may see for themselves, when the small fleet arrives in Singapore, which, by last accounts, was about to start from Bangkok to convey the Prime Minister), to enable the Siamese to overawe the subject states in the Malay Peninsula, and against European nations the friendly commercial relations which will spring from a liberal policy will be a better security than a host of gunboats.

"Beyond these efforts for the defence of the country and the support of courts of justice, none of the acknowledged duties of a Government are performed. No public works are in progress. The bar at the mouth of the river, which experienced men say might, with comparatively little outlay, be rendered passable by vessels of any size, still prevents any but the smallest craft from taking their cargoes on board in the river; the present channel is not even buoyed, and a lighthouse at the entrance of the river is talked of but not built.

"The creeks which intersect the country, which were made in darker times, by less civilised Governments, and which, by affording cheap water-carriage, form one of the great sources of the country's wealth, are allowed to fill up and the traffic is impeded. The bridges are neglected, and are, in many places, in ruin. Roads cannot yet be said to exist, but the excellent paved footpaths, built and carefully kept in order by former Governments, are often, even in the neighbourhood of Bangkok, almost impassable, to the great inconvenience of the poorest inhabitants who cannot afford to use boats for their small errands.

"By attending to these matters, by looking to the breeding of the buffaloes, owing to the scarcity of which, caused by the late murrian, much rice land has to be uncultivated, and by granting every facility and encouragement to those who would introduce European machinery, and so obviate the scarcity of Siamese labour, the Siamese Government would increase its revenue, promote the well-being of its people, and give real prosperity to the country; and by introducing such measures the King would confirm the reports of his liberality and enlightenment which have reached distant countries."

BORNEO.

LABUAN.

Dates from Labuan are to the 1st August, by H.M.'s ship *Charybdis*. The works in the mines are progressing rapidly, and small quantities of coal have been already obtained.

SARAWAK.

The Chinese and Malay traders were busy fitting out every available boat for the purpose of proceeding to Muka and Oya for Sago. Sir James Brooke was expected to return to Sarawak from Muka at the end of July.

Digitized by Google

The *Singapore Free Press* gives the following account of pirates on the coast of Borneo:—"As the Sarawak gunboat. *Badger*, was proceeding from Muka to Sarawak she observed four large Lanun prahus, each towing a large sampan. They evidently mistook the *Badger* for a trading craft, as the sampans were cast off and gave chase. They were allowed to come within a short distance, when a few rounds from the *Badger's* twelve pounder caused them to discover their error, and they lost no time in rejoining the larger prahus, which then bore away in the direction of Tanjong Sirik. These prahus had white cloth sails, shaded like the latteen sails used by trading craft, instead of brown sails as formerly, and the change is evidently intended to entrap unwary traders by inducing them to think the pirates are peaceful trading vessels like themselves."

JAVA.

Dates from Java are to the 1st August. The heavy and continued rains were producing much damage on the sugar estates, and not less to the second crops of rice, rendering the efforts which were being made in the previously inundated districts to avert the threatened scarcity by replanting the fields of no avail. The numerous planters in the interior cannot send down their sugar and coffee to the coast from the complete absence of the means of transport. The rice which the Government wishes to send to those places where a total want of food prevails can scarcely be taken there from the same cause; and even when this difficulty is overcome, in some cases the cost of transport is equal to the value of the article conveyed. It has been proposed to apply the unexpended portion of the subscriptions for the relief of these districts in purchasing draught cattle and carts, in order to facilitate the transport of provisions for the next few months, when the famine may be expected to be most severe.

The rebellion in Banjermassing has not been put down, and accounts state that Major Schuak's expedition against Antassari, the leader of the insurgents, has proved unsuccessful. Out of ninety men of whom the column was composed, six were killed and upwards of thirty wounded. On the difficult return march the diminished column for the last two days were entirely without food. The cause of this misfortune is not attributable to Major Schuak or his brave band, but only to the chiefs of Kutei and Becompay having withheld the assistance which they had promised. A great fault in the operations in Banjermassing is said to be made in scattering the troops in parties in isolated posts, so that no movable army can be formed ready at any moment to take the field.

MALACCA STRAITS.

SINGAPORE.

The first exhibition of the Singapore Agri-Horticultural Society took place on the 27th July. The tent containing the plants was well filled, and was gaily decorated with bouquets of cut flowers from the Society's garden and from exhibitors. Among the contributions of the latter were several very tastefully-arranged vases, containing orchids and other rare and showy varieties of flowering plants. There was a good display of plants in pots, a number of which were sent by natives. The dahlias and chrysanthemums were in full flower and very healthy. The vegetables exhibited were good, and consisted of cabbages, lettuce, endive, celery, capsicums, cucumbers, and pumpkins. Two collections of English green peas were on the table, and were quite equal to home grown. A pot of fine parsley also testified to what can be done in the way of growing English vegetables in the tropics. Under date of August 6, the *Singapore Free Press* has the following:—"The appearance of the Siamese steamers, now in Singapore, off the coast of the peninsula, must no doubt have greatly alarmed the Rajah of Tringanu, as he is at present in a state of incipient rebellion against the King of Siam, who claims to be suzerain of that State. The cause of the difference we understand to be the following. Some time ago the ex-Sultan of Lingga addressed a letter to the King of Siam, which he requested the Rajah of Tranganu to forward to Bankok. The Rajah declined to comply with this request, and the letter was forwarded direct by the ex-Sultan, no doubt accompanied by a report of the refusal of the Tranganu chieftain to take charge of it. Some high Siamese officers were then sent to Tranganu with a letter demanding an explanation. The Rajah is said to have received the officers very cavalierly, while he put the letter aside without opening it and sent no answer to it. This conduct naturally gave great offence to the Siamese Court, and hence, no doubt, the rumours we have lately heard of hostile proceedings being meditated by the Siamese against Tranganu."

Intelligence had reached Singapore that the pretender to the throne of Pahang, Inchi Wan Ahmet, has been totally defeated and driven from his fortified position at Kwanton.

Considerable excitement has been caused at Singapore in connection with an inquest held on the body of Mr. Thomas, a clerk in the service of the P. and O. Co. The jury returned a verdict of natural death, and the corpse was duly interred. For some reasons not very clearly defined, it is stated that the Resident Councillor ordered the body to be exhumed for post-mortem examination by three medical men in the service of the Government, who confirmed the verdict of the jury.

PENANG.

The Mohurrum passed off quite quietly, the adverse parties never once coming in direct collision. This ever-irritating contact was cleverly evaded in various directions by the vigilance and judicious arrangements of the police, who, accompanied by the Deputy Commissioner of Police, paraded the town all night, and in all directions. Just at one spot, in the vicinity of the Chowrusta Police-station, the partisan animosities of the followers of the Prophet broke loose, and bricks and bottles whistled in the air, but there was not much damage done.

On the 21st July a daring act of piracy was committed by some Malays off Pulo Reemoo. On that night a Chinaman, residing at Permatang Dammerlout, accompanied by his servant, was returning in his boat to that place from town, when off Pulo Reemoo, a Malay boat with seven men in it, came down upon and boarded the Chinaman's boat. Two men held the servant down whilst the rest attacked his master, wounding him in the neck and side. They then decamped with all the property on board, after depriving the Chinamen of their sails and oars, and anchoring their boat in the vicinity of the island, with the intent, no doubt, of preventing them from going ashore and giving the alarm to the police. At three on the following morning the Chinaman's servant saw and hailed a Chinese boat which came to the rescue and took the Chinaman ashore. The wounded man was immediately taken to his home where he lingered for a day, and then died. The attacked party had no arms, whilst the Malays were all armed with knives and krisses.

The *Penang Argus*, in relating this affair thinks it advisable that a vessel should immediately have been despatched to Pulo Reemoo to show the "promptitude of the authorities," and adds, by way of encouragement, that "the scenery is remarkably picturesque."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BARRAS—At Shanghai, on the 12th July, the wife of Mr. J. R. Barras, of twins, a son and daughter.

DUGDALE—On the 27th ult., at Irwell Bank, near Manchester, the wife of John Dugdale, jun., Esq., of a daughter.

FORBES—On the 31st ult., at Whitchurch, Oxon, the wife of Alexander C. Forbes, Esq., of a son.

HARGREAVES—On the 3rd inst., at 6, Cleveland-square, Hyde-park, the wife of Henry Hargreaves, Esq., of a daughter.

JACK—At Hong Kong, on the 27th July, the wife of Dr. R. G. Jack, of a daughter.

MARRIAGES.

ASHTON—KILBY.—On the 12th inst., at St. Pancras Church, London, by the Rev. Thomas Prescott, Thomas Knight Ashton, Esq., of Foo-chow-Foo, China, to Eliza Herbert, youngest daughter of Thomas Kilby, Esq., of Fenchurch-street, City.

CHAPMAN—BLACK.—On the 28th ult., Thomas A. Chapman, Esq., of Foo-chow, China, to Margaret, second daughter of W. H. Black, Esq., F.S.A., of London.

DENT—COLLINSON.—On the 3rd inst., at St. James's Clapham, by the Rev. Carr J. Glyn, Thomas Wilkinson John Dent, of Lincoln's-inn, barrister-at-law, to Sophia Amelia, eldest daughter of the Rev. George John Collinson, incumbent of St. James's, Clapham.

HANZEN—SYMONS.—At Singapore, on the 30th July, by the Very Rev. Father Beurel, at the Church of the Good Shepherd, Mr. J. F. Hanzen, manager Mission Press, to Miss Virgine Symons.

MILES—ALLEN.—At Singapore, on the 31st July, at the Church of the Good Shepherd, Mr. J. Miles to Miss Allen, daughter of Apothecary Allen.

PENNEFATHER—MANN.—At Singapore, on the 20th July, by the Rev. Mr. J. Matheson, Mr. A. P. Pennefather, to Miss Margaret Rebecca Mann, youngest daughter of the late John Mann, M. M., of Singapore.

SULLIVAN—BELL.—On the 17th ult., at the Cathedral, Gibraltar, by the Rev. Thomas Sleeman, Francis William Sullivan, Esq., Commander of H.M.S. *Greyhound*, to Agnes, daughter of the Hon. Mr. Sydney Bell, one of Her Majesty's judges at the Cape of Good Hope.

TYERS—TUTTLE.—On the 25th July, at the First Presbyterian Church, Fifth Avenue, New York, by the Rev. W. W. Phillips, D.D., Richard R. Tyers, of Shanghai, China, to Sarah Louisa, youngest daughter of the late James N. Tuttle, of New York.

DEATHS.

CROWELL—On the 19th July, at the residence of Capt. Anderson, River Valley Road, Capt Crowell, of the American barque *Robin Hood*.

ENDICOTT—At Whampao, on board his vessel, on the 16th July, John Endicott, master of the river steamer *Spark*.

Digitized by Google

HERNANDEZ—At Singapore, on the 19th July, Mr. James Hernandez, of Equestrian celebrity, aged 27 years.

HEWETT—On the 31st August, at Buraledon, near Southampton, Emily, aged 8 years, the beloved daughter of Mr. William Hewett, of 18, Fenchurch-street, London.

JONES—At Shanghai, on the 4th July, Gertrude Selina Johnson, daughter of Mrs. Treasure Jones.

LAMB—At Singapore, on the 19th July, Mrs. Lamb, the beloved wife of Captain Lamb.

MOODIE—At Saigon, on board the str. *Granada*, John Moodie, late chief engineer in P. and O. S. N. Co.'s service, aged 37 years.

NIEMANN—At Shanghai, on the 13th July, J. B. Niemann, apothecary of the hospital, aged 38 years.

SPETZLER—In the silk districts, China, of sun-stroke, on the 24th June, J. A. Spetzler, a native of Hamburg, aged 25 years.

COMMERCIAL REPORT.

CHINA—EXPORTS.

SHANGHAI.—TEA.—Black: There is nothing of interest to report in this market, and only 600 chests of common to very low kinds of Congou have been settled during the fortnight at 16½ to 23 taels. The stock consists of about 3,000 chests Hoochow and common Congous, and 1,000 low flowery Pekoes. Greens: About 4,500 half-chests of the new Pingsueys, which appear to be of good quality, have arrived, though buyers are disinclined to make offers or give them much attention at present on account of the teamen asking the very high rate of 38 to 40 taels proportion. Settlements for the fortnight are 2,834 half-chests China and 568 half-chests Japan teas, and the stocks 2,500 half-chest old and 4,500 half-chests new China tea, and 2,500 half-chests Japan tea.

FOO-CHOW-FOO.—The rates for common sorts, which were rather at a downward tendency by our previous advices, have since been nearly recovered, as a few days after the mail left buyers came forward, and a good business has been done during the fortnight. Prices for medium and good kinds have been fully maintained. Settlements: Congou, 21,200 chests, 13,100 half-chests, 1,000 boxes, at 6 to 13.4 taels; ordinary and broken leaf, 14.5 to 20 taels; good common to flavoury, 21 to 29 taels; Souchong kinds to good. Souchong sales 3,700 chests, at 19 to 34 taels for common to fine—stock 13,700 chests. Oolong sales, 2,000 half-chests at 14.5 to 22 taels for inferior to fine cargo—stock 46,000 half-chests. Pekoe sales, 770 chests at 20.5 to 38 taels for common to finest—stock 2,200 chests. Scented tea sales, 5,300 boxes at 19 to 30 taels for common to fine—stock 4,000 boxes. Total arrivals, settlements, and stock of new season's Congou to date are, market teas 164,900 chests, sales 100,300 chests, stock 64,600 chests, contract teas 18,600 chests; total 183,500 chests, against 150,300 chests last season.

AMOY.—Since the departure of last mail Congous have opened a prices about $2 under those of last year, and in consequence of an active demand, rates have advanced $1 to $2 per picul, but we scarcely think they will be maintained. A few chops of Orange Pekoes have been taken at previous rates; there is no competition for this description, and rates are not likely to advance. Oolong and Ankois have not opened yet. We quote Congou common to fair at $16 to $18, fair to good $18 to $22½. Orange Pekoe common to medium $12 to $15½, fair to good $16 to $18½. Arrivals, exclusive of a few contract chops, Orange Pekoe, 8,459 half-chests; Congou, 12,302 half-chests; Oolong, 10,342 half-chests; Ankoi, 8,321 half-chests. Settlements to date, Congou 4,204 half-chests; Orange Pekoe, 5,336 half-chests.

CANTON.—Prices have been raised 1 to 1½ taels all round, in consequence of the new teas not coming down so freely as expected, although after the departure of last mail there was a dulness in the markets, and lower rates wer e hoped for. About 90 to 93 chops of first crop Oonams and Oopacks have arrived, and about 40 more are expected. The second crop, it is not certain as to whether it will come here or be shipped from Hankow. Tayshan Congous are plentiful, but appear to be directed to Macao, to avoid the Custom House. Scented teas are dull, none but fine being saleable. Little has been done in Green teas. Canton-made Gunpowders continue to command high rates. Settlements for the fortnight are:—Congous, 38 chops Oonams and Oopacks at 26½ to 35 taels. Souchong, 1 chop old at 35 taels. Scented teas, 15,000 boxes Orange Pekoe at 23 to 34 taels, and 2,000 boxes Caper at 22 to 29 taels. Country Greens, 600 packages 22½ to 55 taels. Canton Greens, 4,000 boxes. Gunpowder at 20 to 25 taels, and 140 half-chests Young Hyson at 21 taels. Leaving an unsold stock of 23 chops Congou, 1,000 packages new Oolong, 500 chests old Flowery Pekoe, 3,000 boxes plain Caper, and 1,000 packages. Country Greens, besides Canton-made teas in various stages of preparation.

RAW SILK.—Shanghai: The demand of the past fortnight has been on middling qualities, they being decidedly cheaper in comparison. Of No. 3 Tsatlee only a small quantity has been settled at 410 taels per picul. Settlements of the fortnight (including 400 bales from Japan) are estimated at 4,000 bales. The season is expected to be exceedingly small for really good fine silks, as of the musters shown few would bear out this character. There has been a plentiful supply of the new crop silks as compared with that received up to same date in previous seasons; the direct arrivals are estimated at 13,500 bales, and from Ningpo fully 1,500 bales have arrived. Reports being current as to a recent attack by the Rebels on Lingho, it may possibly interfere with further immediate supplies from that district. The total settlements to date for the present season are 5,500 bales, against 5,000 bales at same time last season, and 2,000 bales the season before. The comparative amount of unsold stock being 10,000 bales, 1,500 bales, and 3,000 bales respectively, at—Tsatlees, No. 3, 390 to 410 taels per picul; No. 4, 365 to 385; No. 5 and com., 330 to 360. Yuenfa, No. 1, 380 to 400 taels per picul; No. 2, 350 to 370; No. 3, 310 to 300; No. 4 and com., 280 to 300. Tysaams, No. 1, 360 to 370 taels per picul; No. 2, 320 to 335; No. 3, 290 to 300; Nos. 4. 5, and com., 235 to 270. Hongchow Tsatlee, 350 to 370 taels per picul; Sewhings, 290 to 320 ditto; Laeyongs, 240 to 260 ditto; Throwns, old silk, 300 to 360 ditto.

CANTON.—The yield of the third crop will be considerably less than anticipated, on account of the heavy rains having injured it. About 150 piculs Loongkong and Cowkong have been settled during the month at $390 to $405 for No. 1 and 2, re-reeled. Cumchook quoted $440.

DRUGS AND OTHER EXPORTS.—In consequence of the action of the foreign inspectorate, the trade in these articles continues to be driven to Macao. The following is the report upon that market. Cassia lignea. $15. 50c. to $15. 75c.—(sales 2,000 piculs, stock 1,000 piculs, price tending up). Cassia oil, $215 (stock 50 piculs). Cassia buds, $40, nominal. Star aniseed, $14. 50c. to $15 (stock, 100 piculs). Anniseed oil, $145 to $147 (stock, 100 piculs), about 200 piculs sold lately at $135 to $145. There is not anything doing in vermillion or galls. Rhubarb: None on the market. Camphor: Scarce and wanted. Last sales $29.

JAPAN.—KANAGAWA.

EXPORTS.—Tea: The past month has again been one of little activity, and prices have been reduced $2 to $3 per picul, owing to the bad news from home, and the poor kinds of tea in the market. The fine kinds are steadily kept back. Settlements in June are about 600 to 800 piculs, mostly common. Shipments 74,582 packages since June 1 last. Stock about 500 to 600 piculs. The ruling prices are, for ordinary to common old leaf $1½ to $4; good common, $7½ to $10 old leaf; fair to good, $13 to $17 old leaf good to fine new leaf $18 to $25 per picul; 2 chops of finest new were settled some time ago at $28.

SILK.—Holders have been forced to move off their heavy stocks at reduced prices, as the new crop is near at hand, and the available stocks have now dwindled down to about 100 piculs, which are held at an advance of $20 to $30 per picul, and foreigners are slow to pay for the indifferent kinds offered, and transactions are therefore nominal at present. Settlements in June about 500 piculs, stock 100 piculs, mostly indifferent. Shipments 11,008 bales since July 1 last. The rates paid were for Dyepst, namely:—Maibattre in hanks mixed lots No. 1 to No. 3 $460 to $490. No. 4 to inferior, $410 to $440. Bricks, namely—Eiro in books No. 1 none; inferior, $340 to $420. Soday in books, $360 to $420 for No. 1 to No. 3. Common, $300 to $340. Orshio, $288 to $320 for No. 1 to 3. Oshio or re-reeled No. 1 to 3, $300to $350 inferior; $280 per picul.

SUNDRIES.—Copper wire neglected, $20½; plate $18 to $19½ per picul, good stock. Shipments for June 993 packages, iron in bars, $3 per picul. Rapeseed oil, new $6 to $6½ per picul; large arrivals to be expected in August if not sooner; inferior old $5 to $5½. Fish Oil, $3 to $4 per picul, nom. Rapeseed $1.90 to $2 per picul for new. Flour, $2 to $2.20 per picul Beans, $160 to $180. Gallnuts, $6½ per picul, few purchases. Isinglass, in quills, in demand at $20 to $22 per picul for best. Mushrooms, $18 to $22 per picul for best—shipments 146 packages. Cuttle fish, $8½ to $9 per picul—shipments 841 packages. Prawns, $16 per picul. Shark fins, $13 per picul for best shipments, 203 packages. Cut seaweed, $3.3½ per picul, shipments 1,609, in demand. Striped seaweed, $1½ to $2½ per picul. Fokling root, $2½ to $3 per picul. Ginseng, $1½ to $8 per catty. Vermicelli, $3 per picul. Arrowroot, $2½ to $3½ per picul. Cassia bark, $3½ per picul. Saltpetre, $10 to $13½ per picul for best—shipments 713 packages, in good demand. Vegetable wax, $10 to $13 per picul—shipments 106 packages. Beeswax, $35 to $40 per picul, nominal. Camphor, $23 to $25 per picul.

IMPORTS.—The arrivals have brought supplies rather freely, and camlets are the principal articles inquired for. Other sorts sales slow. Grey shirtings: 39 in. 40 yards, 5½ to 6 catties, $2.30 to $2.45 per piece; Eagle or Lion Chop are best; 6½ to 7 catties, $2.70 to $2.85 per picul. Eagle or Lion chop, 7½ catties, none. Table Cloths: 32 in. 24 yards, $1.85 for best heavy. White Shirtings: 36 in. 40 yards, $2.30 to $2.40 per picul. White spotted Shirtings: $2.85 to $2.95 per piece. Camlets: 31 in. 56 yards best assortments; S. S., $22.75 to $23.90; S., $24½ to $25; B. B., $24 to $25½; B. B. B., $28 per piece. Lastings: $15½ for assorted. Spelter: $8 to $8¼ per picul. Straits Tin: $35 to $40.

NAGASAKI.

IMPORTS.—No cash sales are reported; but a fair business has been done in barter. The inquiry for piece goods for Miaco has revived, but at prices below importers' demands. The following are the quotations in barter against produce at market rates:—Grey shirtings, 5½ catty, $2.30 to $2.40; 6½, $2.70 to $2.85; white shirtings, $2.60 to $3.20; white spotted shirtings, $2.60 to $2.70; dyed spotted shirtings, $3.50 to $3.65; camlets B. B. B., $22; long ells, $8.50.

EXPORTS.—There is still remaining on the market a large stock of old tea, estimated at 3,500 bales. Settlements for the new crop have been made to about 200 bales at $16 to $21 for good descriptions. The quality of what has come to hand seems to be superior to that of last year. In vegetable wax there is a large stock of common at $11 to $11.50. Gall nuts are scarce at $6.50 to $7.50. Iron is plentiful at $2.80 to $3.10. Isinglass, No. 1, small stocks, at $21 to $22; common, large stocks, at $17 to $20. Coal, $4.50 per ton.

CHINA—IMPORTS.

SHANGHAI.—The market continues depressed, and sales of Grey Shirtings have been made at a reduction of 2 to 4 can per piece. The only manufactured goods enquired for are T-Cloths, Dyed Brocades, and Lastings; all others are quite nominal. The quotations are for:—Shirtings: grey, piece, 1.5.0. to 2.3.5.; white, common to best, piece, 1.6.0. to 2.3.0.; T-Cloths, piece, 1.1.0. to 1.3.0; American drills, piece, 2.5.0. to 2.70; jeans, piece, 2.2.0. to 2.3.0; sheetings, piece, 2.4.0 to 2.7.0; spotted shirtings, piece, 1.8.2. to 2.6.0.; brocades, piece, 1.8.0. to 2.6.0.; damasks, piece, 4.0.0. to 4 5.0.; handkerchiefs, dozen, 0.4.0. to 0.6.0.; chintzes, piece, 1.3.0. to 1.7.0.; dimities, piece, 1.2.5. to 1.4.5.; Spanish stripes, yard, 0 6.0. to 0.9.0.; long ells: H H. scarlet, piece, 7.0.0.; camlets: S., piece, 15.5.0.; B. B. B., piece, 18.0.0.; lastings, piece, 9.5.0. to 10.5.0. The deliveries and stock are asfollows:—Shirtings, grey, 53,520 pieces; white, 12,700 pieces; T-cloths, 11,690 pieces. American Goods.—Drills, 13,675 pieces (stock, 283,765 pieces); sheetings, 1,020 pieces (stock, 10,175 pieces); Jeans, 1,300 pieces (stock, 11,520 pieces); spotted shirtings, 1,600 pieces; blue shirtings, 300 pieces; brocades, 1,000 pieces; chintzes, 2,230 pieces. Woollens.—Span, stripes, 72 pieces; L. ells, 500 pieces. There is but very little demand for metals, and the stock of window glass is large.

Digitized by Google

CANTON.—The Canton market still continues dull, and with no improvement in prices, with the exception of cotton, for which staple there is a good demand, and if holders will continue firm, higher prices are expected. There have been rather large sales of yarns, but at lower rates, and principally of lower numbers. The greater part of the goods sold in Hong Kong have again been damaged parcels put up to auction, and bought by foreigners for speculation on account of low prices; otherwise deliveries still continue very small. In metals and Straits produce there is not anything doing. The deliveries for the past fortnight are—Cotton yarn, 1,050 bales; shirtings (grey), 4,750 pieces; white, 1,000 pieces; T-cloths, 664 pieces; lead, 500 piculs; quicksilver, 370 flasks; mangrove bark, 650 piculs; iron, 2,250 piculs, with a slight improvement in price.

FOO-CHOW.—There has not been so much doing during the last fortnight. Sales are reported as follows:—Grey shirtings, 7¼lbs., 4,500 pieces at $1. 85c. to $1. 90c. per piece. White shirtings, 500 pieces at $2. 74c. per piece. T-Cloths, 6 to 7 lbs., 16,000 pieces at $1. 66c. to $1. 85c. per piece. Spanish stripes, 800 pieces at 90c. per yard. Lead, small pig, 8,000 piculs at $9. 80c. to $9. 50c. per picul.

HONG KONG.—Deliveries are reported as follows:—Cotton yarn, 50 bales and 100 bales to foreigners on speculation on account of the low prices:—Grey shirtings, 5,000 pieces and 10,000 to foreigners. T-cloth, 400 pieces and 6,000 to foreigners. Coloured shirtings, 500 pieces. Woollens: H scarlet long ells, 500 pieces; lead, 400 piculs. In provisions, &c.: Flour appears inclined to improve, but other articles coming under this heading continue superabundant and are continually being forced off at auction. There is no prospect of improvement.

MANILA.—There have been no further arrivals of manufactured goods, stocks of which are, however, heavy; and but little has been done towards reducing them during the last fifteen days. What change there is to report in produce is in favour of shippers, the quotations for some articles being lower, whilst a further decline has occurred in the rate of exchange. Sales are as follows:—White shirtings: 5,000 pieces at from $2.37½ up to $3.68¾ per piece of 40 yards. Grey shirtings: Only 300 pieces sold at $2.62½ to $2.95, for 6½ to 6¾lbs. goods. Grey longcloth: 690 pieces, 9 lbs. cloth have been placed at $3.25 to $3.31½ per piece of forty yards. In exports they have been: Sugar, current clayed, about 8,000 piculs have been sold at $5 per picul, and 12,000 piculs have been contracted for at $4.87½, deliverable next month. Unclayed sugars have been taken at $3.06¼ per picul for Taal, and $3.18¾ per picul for Zebu. Coffee: A small sale is reported at $14.45 per picul, a price holders generally will not accept. Hemp has been sold at $3.50 per picul for current quality. Indigo: About 300 quintals of Hocos have been taken at $28 to $32 per qql. Cigars: A sale is announced for the 22nd inst. when they are likely to be procureable at usual Government rates. Rice: A slight advance in price has occurred, the value being $2.83⅛ silver per cavan, but without any export demand.

At SINGAPORE.—In imports a partial demand sprang up for grey goods immediately before the departure of the last mail, and sales to fair extent were made, but the inquiry has since quite died out, and the business done during the past fortnight has been very limited. The supplies of piece goods have not been heavy, but the demand does not seem adequate to take off even what are coming to hand, and at present there seems to be no prospect of immediate improvement. In exports a moderate amount of business has been done in produce, and prices, as a rule, have undergone very little change. The demand for tin is not very active, and price has continued steady at the rate current for last mail. Gambier has been taken freely at last mail's prices, and considerable purchases have been made. Black pepper is not coming to market quite so freely, and nearly all the supplies have been taken up at about last quotations. White has also been rather scarce, and little business has been done. Sago flour and pearl sago continue as before, and notwithstanding the intelligence of the destruction of a large quantity by fire in London, by last mail, prices are without change.

At BANKOK.—The market generally, since our last, has been dull. For rice there is a small demand, and prices have increased. White sugar—moderate enquiry, but supplies trifling; brown—demand moderate, and purchases chiefly for China market. Silk—fair request, principally for Bombay. Sticklac—moderate supplies, and rather less demand at lower rates. Black pepper—prices have declined, the demand being still less than last month.

HANKOW.

IN IMPORTS.—There are signs of revival and greater confidence observable among the Chinese. Several barter transactions have taken place, and in one or two instances it is stated that cash has been paid for some kinds of imports. Some six or seven chops of tea have been settled at 19.2 to 22.5 taels. Up to the present time it is stated that 160 chops have left the tea districts, 115 for Canton and 45 for Hankow. The second picking is now going on, and may be short as compared with last year, in consequence of the heavy rains. Certain compradores have been attempting to impose a tax on all tea bought, equivalent to about 3 per cent.; the Consul is opposing this by every means in his power as being contrary to Treaty.

TIEN-TSIN.

Business has been again revived to a small extent, but at lower prices than before paid, the inquiry being principally for T-cloths. The inland duties imposed by the authorities they still refuse to pay, but foreigners have done so on receiving cash for the goods.

The quotations are:—Shirtings, grey, 5½ to 6 catty, 1.7 tael to 1.9 taels; 6½ to 7, 1.9.5 taels to 2.1.0 taels; 7½, 2.1.5 taels to 2.2 taels; white, 56 reed, 1.8.0 taels; 64, 2.1.0 taels; 70, 2.3 taels; blue, 3.2 taels to 3.3 taels; red, 2.8 taels to 3.4 taels. T-cloths, 4½ to 5½ catty, 1.2.0 taels to 1.4 taels. Spotted shirtings (white), 1.9 taels to 2.0 taels; coloured, 2.5 taels. Chintzes, 28 yards, 1.3 taels. Handerchiefs (blue and bronze), per dozen, 4m. to 6m. Brocades (white), 1.9 taels to 2 taels; coloured, 2.5 taels. Dimities (white), 1.2 taels to 1.3 taels. Damasks (blue), 3.4 taels to 3.6; assorted, 3.2 taels to 3.4 taels. American drills, 2.6 taels to 2.9 taels. Jeans, 2.5.0 taels. Sheetings, 2.6 taels to 2.9 taels. Camlets, Dutch, 20 taels to 21 taels; English, ss, 15 taels. Lastings, 9.5 taels to 10 taels. Long ells, HH, scarlet, 7 taels; assorted, 6 taels. Lead, 6 taels per picul. Tin, 22 taels to 24 taels. Tin plates, 6 taels per box; rattans, white, per picul, 4.5 taels; yellow, 4 taels; inferior, 3 taels; sandalwood, 9 taels to 12 taels; sapanwood, large, 3.5 taels; alum, 6.5 taels to 12 taels; pepper, white, 10 taels to 10.5 taels; black, 6 taels to 6.5 taels; sugar, white, 6 taels to 7 taels; brown, 2.3 taels to 3 taels; candy, 6.5 taels to 7 taels; rice, 1.4 taels. In Exports: Best wool is quoted at 22 taels per picul; medium, 14 taels; common, 10 taels.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 2⅛d. to 6s. 3d.	6s. 3⅛d. to 6s. 3⅛d.

EXPORTS FROM JAPAN.

The total exports from Yokuhama from 1st July, 1860, to 1st July, 1861, to London, has been—Silk, 2,002 packages; tea, 25,197; copper, 2,791; oil, 7,590; gallnuts, 1,131; rapeseed, 544; saltpetre, 41; planks, 560 pieces.

EXPORTS FROM CHINA.

Per Chrysolite, from Shanghai, July 13, to London.—Tea, 575,593 lbs. silk, 11 bales.

Per Sharpshooter, from Shanghai, July 13, to London.—Tea, 511,651 lbs.; silk, 291 bales.

Per Banian, from Foo-chow-Foo, July 8, to London.—Tea, 997,000 lbs.

Per Shakespeare, from Foo-chow-Foo, July 9, to London.—Tea, 580,000 lbs.

Per Victor Emmanuel, from Foo-chow-Foo, July 13, to London.—Tea, 559,500 lbs.

Per Columbian (mail steamer), from Hong Kong, July 12, to London.—Silk, 1,075 bales. To the Continent, 214.

Digitized by Google

Per Kosmos, from Hong Kong, July 13, to Melbourne.—Tea, 50,000 lbs.; sugar, 3,000 piculs; China goods, 4,570 packages.

Per Sardinian, from Hong Kong, July 27, to San Francisco.—Sugar, 2,160 piculs; rice, 2,500; oil, 200; tea, 997 packages; matting, 160 rolls; opium, 46,200 taels; fire crackers, 1,900 boxes; coffee, 1,123 bags; black pepper, 162; white, 21; cigars, 20 cases; nutmegs, 10; silk, 10; grass cloth, 10 bales; hemp, 1,600; gunny bags, 60,000; granite, 146 pieces.

Per Laughing Water, from Hong Kong, July 26, to Port Phillip.—Tea, 60,000 lbs.; sugar, 400 piculs; oil, 500; matting, 717 rolls; China goods, 8,213 packages; prepared opium, 600 taels; grain, 6,000 bags. For Swan River.—Grain, 2,000 bags.

Per Northfleet, from Canton, July 16, to London.—Tea, 1,164,000 lbs.

Per Unrivalled, from Canton, July 16, to London.—Tea, 1,035,300 lbs.; silk waste, 25 piculs; China ware, 65 packages.

Per Maiden Queen, from Canton, July 16, to London.—Tea, 1,064,800 lbs; canes, 40 mil.

Per Chaa Sze, from Canton, July 23, to London.—Tea, 715,800 lbs.; sundries, 11 packages.

Per Canvass Back, from Canton, July 17, to New York.—Tea, 418,979 lbs.; sarsnets, 200 pieces; sewing silk, 1½ piculs; matting, 79 rolls; straw braid, 140 boxes; sweetmeats, 1,059; fire crackers, 500 boxes.

EXPORTS FROM MANILA.

Per J. Victoria, July 7, to Liverpool.—Hemp, 1,650 piculs; sugar, 7,200; cigars, 50 mil.

Per Wild Gazelle, July 20, to Liverpool.—Hemp, 2,200 piculs; sugar, 6,800; sapanwood, 330; tortoiseshell, 19 catties.

Per Ethereal, July 14, to London.—Hemp, 4,000 piculs; sugar, 6,000; sapanwood, 256; mother-o'-pearl shells, 397; cigars, 1,630 mil.

Per Souvenance, July 5, to Havre.—Hemp, 600 piculs; sapanwood, 600; coffee, 9,720; gum mastic, 150; mother-o'-pearl shells, 170.

Per Chatham, July 16, to Cork.—Hemp, 1,200 piculs; sugar, 10,300; sapanwood, 400; cigars, 135 mil.

Per Yarra, July 20, to Falmouth.—Hemp, 3,500 piculs; sugar, 8,000.

Per Shirley, July 15, to New York.—Hemp, 14,500 piculs; cigars, 65 mil.

Per Merrimac, July 20, to New York.—Hemp, 17,050 piculs; tortoise shells, 270 catties.

Per Ocean Pearl, July 20, to Boston.—Hemp, 10,500 piculs; tortoise shells, 200 catties.

Per Antagonist, July 9, to Sydney.—Sugar, 5,500 piculs; cigars, 500 mil.

Per Golden West, July 12, to Sydney.—Sugar, 19,200 piculs; coffee, 620; cordage, 600; cigars, 1,350 mil.

Per Sweepstakes, July 9, to Melbourne.—Sugar, 22,100 piculs; coffee, 180; cordage, 640; cigars, 1,100 mil.

Per Canton, July 12, to Melbourne.—Sugar, 4,400 piculs; coffee, 1,660; cordage, 560; cigars, 600 mil.

EXPORTS FROM SINGAPORE.

Per Burnside, Aug. 2, to Glasgow.—Sago flour, 7,325 piculs; gambier, 457; rattans, 250; gutta percha, 83; buffalo hides, 178; black pepper, 731; pearl sago, 74; sundries, 8 cases and 2 bundles; coffee, 1 bag.

Per Caroline Elizabeth, Aug. 6, to London.—Black pepper, 4,356 piculs; tin, 2,574; gambier, 2,149; coffee, 723; pearl sago, 579; gutta percha, 284; rattans, 185; buffalo horns, 85; cubebs, 65.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Liverpool: July 3, Romeo; 13, Pegasus. From Greenock: 9, Britannia.

At HONG KONG, MACAO, and CANTON.—From Liverpool: July 13, Jessie Beazley. From Newcastle: 18, Metaris. From Toulon, 19, Chene.

At MANILA.—From Cadiz: July 6, Margarita. From Sydney, 11, Tropic.

At SINGAPORE.—From London: July 26, Victor; 29, Gwalior. From Liverpool: August 7, Beatrice. From Hamburg: July 21, Pudel. From Cardiff: 26, Julius Cezard. From Toulon, 21, Golconda; August 6, General de Lourmes. From Glasgow: July 29, Swatow (screw steamer). From Shields: August 6, Palmerston. From Rotterdam: 7, Bantam.

At PENANG.—From London: July 21, Mary Ann.

SAILED.

From SHANGHAI.—For London: July 12, Chrysolite; 14, Sharpshooter.

From FOO-CHOW-FOO.—For London: July 9, Shakespeare; 15, Victor Emmanuel; 17, Invincible.

From HONG KONG, MACAO, AND CANTON.—For London: July 15, Northfleet; 19, Egmont; 21, Maiden Queen; 23, Chaa Sze; 27, West Australian. For Melbourne: 13, Kosmos.

From MANILA.—For London: July 14, Ethereal. For Liverpool: 7, Joaquina Victoria; 20, Wild Gazelle. For Havre: 5, Souvenance. For Cork: 16, Chatham. For Falmouth: 20, Yarra. For New York: 15, Shirley; 20, Merrimac. For Boston: 20, Ocean Pearl. For Sydney: 9, Antagonist; 12, Golden West. For Melbourne: 9, Sweepstakes; 12, Canton.

From SINGAPORE.—For London: August 6, Caroline Elizabeth. For Glasgow: 2, Burnside.

From PENANG.—For London: July 18, Pilgrim.

From BANKOK.—For Falmouth: July 1, Hannah Salkeld.

LOADING.

At NAGASAKI.—For London: Antagonist.

At SHANGHAI.—For London: Challenger, Charlotte Ann, Jubilee, Polmaise. For New York: Aar, Union.

At FOO-CHOW-FOO.—For London: Sir W. F. Williams, Invincible.

At HONG KONG, MACAO, AND CANTON.—For London: Verbena, Coleroon, Primula, Caduceus, Niphon, Prince Alfred. For Melbourne: Seaman's Bride. For San Francisco: Lotus, Lucrezia, Sardinian.

At MANILA.—For Liverpool: Gertrudes. For Falmouth: Bahia. For Cadiz: Concepcion. For Sydney: Tropic.

At SINGAPORE.—For London: Gwalior, Mencius, Pioneer, Victor. For Liverpool: City of Glasgow. For Boston: Rocket.

At PENANG.—For London: Robert and Alexander. For Liverpool: Troy.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London: Tea, £4; silk, £5. The business of the past fortnight has been very bad, there being little or no employment for large or small vessels; and the coast trade has been greatly depressed, owing to the local mandarins imposing (in addition to the duty as per tariff) a squeeze of $1 per bale on cotton, to be paid by the purchaser, and it is expected they will put an extra duty on Japan produce. From these facts there is a superabundance of tonnage in port, and no chance of improvement for some time. The Earl of Chester takes the coast and rivers of China and coast Japan at $1,400 per month, and James Shepherd at $1,100 per month. Osnabruck, to Kelung and back, $3,600. Malabar, to Foo-chow and back, $3,100.

At FOO-CHOW-FOO.—There are only two vessels on the berth for London, which load at £4 per ton and are nearly full. One or two arrivals are shortly expected to be placed for the same destination.

At AMOY.—There is less demand for tonnage, and rates have in consequence declined. The tonnage in port is accumulating fast.

At HONG KONG, MACAO, AND CANTON.—For London, £3. The demand for ships homeward has been good, but the coast trade has been greatly impeded by the action of the Customs under foreign inspectorate, and is greatly complained of at all the open ports where the coast trade is depended on. The demand for small vessels still continues, and such craft is much wanted. Callao is the only emigration port that is calling any attention just now. The United States squadron being all ordered home, large American ships will be at a disadvantage. The settlements are:—Jessie Beazley and Spirit of the North, to London, at £3 per ton; Verbena, with general cargo, for £2,100 in full; City of Carlisle, Runnymede, Napoleon III., and Southern Cross, from Foo chow-foo to London, at current rates; Penguin, to New York, on owner's account; five vessels for Bankok and back, at 45c. to 60c. per picul; Archimedes, to Saigon and back, for four trips, $8,000 in full; Admiral, Grecian, and Lansdowne to Shanghai, at current rates, and Sea Belle at $2,200 in full.

At MANILA.—The Turell has left here for Singapore, in ballast; her flag (American) preventing her getting a cargo, and the Northern Crown is here in the same state. Several vessels might load for England at £2. 10s. to £3 for sugar, and £3. 10s. to £4 for hemp.

At SINGAPORE.—To London, £3. 10s., dead, and £4. light weight. The demand for tonnage here still continues in fair request, and nearly every disengaged ship has been taken up. Amongst the charters reported are:—Victor, from Penang to London, at £3. 15s. to £4. 10s.; Gwalior, same voyage, at £4. to £4. 10s.; Cassock, to Macao, at $5,000 in full; Orion, from Rangoon or Bassein, at £5, to Great Britain; £5. 10s. to the Continent for timber, or £3. 15s. for rice. Francisca, from Padang to New York, with 500 tons coffee, at £5. 10s., and 120 tons light freight, at £5. The Mencius, Palmerston, and Pioneer (from Sarawak) have taken the berth for London at £3. 10s. dead and £4 light freight.

At PENANG.—For London, £3. 10s. dead weight, £4 light, and £4. 5s. measurement freight, at which rate the Robert and Alexander and Mary Ann load.

At BANKOK.—Vessels to load rice for China have been rather more inquired for. No arrivals of seeking ships are reported, and no late charters. 50c. to 55c. is the nominal rate outside the bar to Hong Kong.

CASUALTIES.

A collision occurred on the 17th July between the American ship Harriet and Jessie and the French ship Taffarette, which were both despatched by Messrs. Russell and Co. for Foo-chow-Foo and Shanghai respectively, and resulted in the Taffarette losing jibboom and cathead only, Harriet and Jessie her mainmast broken in two places, mizenmast sprung, fore and main sails torn to pieces, port main rigging cut up very badly, port fore braces and blocks gone, port quarter boat damaged, rail and stanchions, bulwarks on port side carried away, besides the hole in her side. The Taffarette came back into harbour under sail, but the United States steamer Saginaw got under steam and towed the Harriet and Jessie into harbour on the same day. A court of inquiry has been held, and the Taffarette pays all expenses.

PASSED STRAITS OF SUNDA.

From England and Continent to China: July 12, Wagoola, Wellington; 13, Ocean Child, Sea Snake; 18, Solent, Kelso, Lord of the Isles; 19, Julia; 21, Kremlin; 22, Finzel, Joseph Peabody; 23, Collingsburg; 24, Veritas; 26, Kate Carnie, Foam, Carausius. From New York: 12, Maury; 13, Daylight. From Boston: 26, Cushing. From China to England and Continent: 19, Falcon; 21, Golden Eagle; 25, Caribbean. From Batavia to Continent: 7, Alblasserdam; 18, Strattsraad va Houven; 23, Elize Henriette. From England and Continent to Batavia: 13, Cecrops; 17, Kroompius, Ernst August, Christiaan Huigens, Rose Marie Louise; 19, Mary and Hillegonda, Susanna Elizabeth, Bulgersteyn, Welvaart; 21, Hargo Grotius; 24, Germania, Geertruida Maria, Constance; 25, Estafette, Johannes Antonius; 26, Dina; 27, Lizzie Nebitt. From Melbourne: 26, J. W. Sears. From England and Continent to Singapore: 9, Saturnus; 13, Little Edith; 14, Clemens; 18, Jules Cezard; 19, Victor; 21, Thames, Gwalior; 23, Malabar, General de Lownes; 25, Swatow (s.s.). From Singapore to Liverpool: 8, Mayola. To London: 26, Weymouth. From Liverpool to Manila: 13, Gloria de Maria. From Manila to England and Continent: 22, Kate; 24, Roebuck; 25, Victor Emmanuel; 26, Bilbao. To New York: 23, Independence. From Rotterdam to Japan: 17, Gouverneur van Swieten.

Continental Intelligence.

FRANCE.

Despatches have been received at Toulon from Cochin-China. They state that 500 or 600 Annamites had suddenly attacked a French establishment on the frontiers, placed under the protection of M. Vial, a midshipman. This officer having but twenty-five sailors to defend the place entrenched himself in a fortified redoubt, where he made an obstinate defence. The enemy, equally determined, approached so close that the French succeeded in killing two of the most forward chiefs who led the attack. The loss of their leaders produced a panic among the Cochin-Chinese, and they fled, leaving thirty-eight dead and wounded on the ground. The midshipman received a lance wound in the thigh, which is not considered dangerous.

The Government has already sent out *materiel* to Cochin China for the construction of lines of electric telegraph.

Rear-Admiral Bonnard, the new Governor and Commander-in-Chief of the military and naval forces in Cochin China, left Paris on the 8th inst. for Toulon. He will hoist his flag on board the steam frigate *Eldorado*, which will convey him to Alexandria. At Suez the *Forbin* awaits him to convey him to Saigon, where Vice-Admiral Charner will duly instal him. It is said that before proceeding to China he will pay a visit to Batavia.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, Sept. 5.

Accounts from Kiachta state that the newly-appointed Diplomatic Minister at the Court of Peking, Colonel Balasek, aide-de-camp of the Emperor, had crossed the frontiers, and was proceeding to the Chinese capital. According to oriental custom, the act of his crossing the boundary line at the Chinese town of Maimatschin was celebrated in due form. In the suite of the Ambassador was the Governor of Kiachta, and they were accompanied by the officers of their staff, the principal merchants residing there, the division of military invalids doing duty as frontier custom-house guards, and followed by a Ssotnie of Cossacks and a battalion of infantry of the line, with their standard. In front of Maimatschin the procession halted, and the Ambassador reached the Mongolian frontier station, accompanied only by the Governor of Kiachta and the squadron of mounted Cossacks, who soon after returned, leaving the further duty of safely escorting the diplomatic Colonel to Peking to the Chinese local authorities.

The same letters report the departure of the sixth caravan to Mongolia, and the seventh to Ourga. The relations with the Chinese authorities continue to be of the most amicable and satisfactory description, with constant exchanges of little presents, invitations, and the like courtesies.

An Imperial Ukase published in the Russian journals of this city directs the translocation of the frontier custom-house from Kiachta to Irkutzk. The transfer is to take place on the 1st of October next, and a temporary commission is appointed to wind up the outstanding assets and liabilities of the old custom-house at Kiachta.

Admiral Count Putiatine, who was so eminently successful in negotiating and concluding the State treaties with Japan and China, is appointed Minister of Public Instruction, retaining, however, his honourable office of Aide-de-Camp General to the Emperor.

An archimandrite has been hitherto at the head of the Ecclesiastical Mission at Peking, but it is now decided to place it under the care of a Bishop; and Pater Gouri, who has resided a long time in the Chinese capital, is selected for the dignity of being the first Russian bishop in China. The connection formerly existing between the Cossacks who were taken prisoners in the seventeenth century at Albasin, and who formed a distinct and separate troop in the body-guards of the Bogdochan, will now be re-opened with their native country. Some of them were expected to arrive at Kiachta, where they were to undergo a course of religious instruction by the Bishop of Irkutzk, preparatory to their being admitted into the bosom of the Greek Orthodox Church by baptism.

After the 1st of January, 1862, there is to be an alteration of the duties on tea. The present duties for overland tea are seventy-five and forty kopecks per Russian lb., according to quality. These are to be reduced to twenty-five and fifteen kopecks, while the duties for tea introduced by sea to St. Petersburg are to be sixty and thirty kopecks per Russian lb. Notwithstanding the difference of duty, it is anticipated that tea from England, via St. Petersburg, will come cheaper than the overland tea, and this fear was influencing the sale of tea at the Nishni fair. About 12,000,000 lbs. of tea are said to be sent *vid* Kiachta annually, partly by caravan and partly by boat, and are usually six months on the road. The railway from Moscow to Vladimir, about half the distance, is now open. The remaining 220 versts or 130 miles, are in course of construction, and if funds were available might be completed for the fair next year. There is good steam communication on the Volga, as also on the Caspian Sea.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Sept. 9.

In conformity with the Royal Decree published in the *Staats Courant*, the present Session of the States General was closed on the 3rd inst. by the Minister of the Interior in the name of the King.

The new Governor-General of Netherlands India, after a parting audience of the King and the several members of the Royal family, quitted the Hague on the 31st August for his distant post. The *New Rotterdam Courant* of the 1st Sept. says:—"His Excellency, the newly-appointed Governor-General of Netherlands India, Baron L. A. J. W. Sloet van de Beele, accompanied by his family and suite, arrived here this afternoon at two o'clock by train from the Hague, and embarked at half-past five on board the General Steam Navigation Company's steamer *Cologne* for London, *en route* for Southampton, from which port he will proceed by the China mail steamer, on the 4th inst., for Alexandria, and thence by the Overland route to the seat of Government." The Baron has therefore changed his original plan, for it was generally understood to be his intention to embark at Marseilles.

Last week the youthful Prince Willem Alexander Karl Hendryk Frederick of the Netherlands, the youngest son of the reigning Sovereign, was named Knight Grand Cross of the Order of the Netherlands Lion, and at the same time received his commission as Second-Lieutenant of the Rifle Battalion of the Regiment "Grenadiers and Rifles," forming part of the garrison of the Hague. The young Prince was born on the 25th of August, 1851, and has therefore just completed his tenth year.

Mr. P. Bleeker, M.D., first-class medical officer in the East India Service, has received the Royal licence to accept and wear the decoration of Commander of the Order of Philip the Magnanimous, conferred on him by the Grand Duke of Hesse Darmstadt.

The King has appointed the following gentlemen to be officers of the First-Class of the Civil Service in Netherlands India:—W. K. Baron van Dedem, D. Koorders, D. J. Wolterbeck, J. Rousquet, and P. Deketh; and to be officers of the Second-Class of the same service:—Messrs. F. J. Baron d'Aunil de Bourouill, E. L. Elias, E. A. Engelbrecht, J. W. Obdam, N. F. van Stype, H. J. Tydemann, and R. Wichers.

The appointment of Rear-Admiral J. May to be commander-in-chief of the Dutch naval forces in Netherlands India, vice Rear-Admiral G. Vogelpoot, is now officially gazetted.

By Royal Decree of July 8 the following rewards are conferred for the expedition to the South and East Division of Borneo, and the landing in Kapoeas River, on the 28th of April, 1860:—to be Knights of the Fourth-Class of the Military Order of Willem, nine officers and privates of the Infantry, and one private of the Artillery. The Decree to be read in order of the day to all corps of the army both in India and at home.

The *Amsterdam Handelsblad* states as an instance of extremely rapid sailing that the clipper frigate-built ship *Noach*, Capt. P. Wierkx, belonging to the line of Mr. Fop Smit, of Kinderdyke, arrived out at Batavia on the 13th July last, thus performing the voyage from Brouwershaven in seventy-two days.

The Colonial Department gives notice that some second-class engineers are required for the ship-building department at Batavia. The monthly pay is 300fl. (equal to £300 per annum), with a rise of 30fl. per month for every three years' service, till it reaches the maximum of 450fl. Salary to commence at 200fl. per month from the day of sailing till installa-

Digitized by Google

tion in Java, with a gratification of 600 florins for outfit, and an advance of four months' pay, if required. Free passage as first-class Government passenger, with food and accommodation in the principal cabin. They are required to bind themselves to serve for at least eight years. Applications, accompanied with the needful certificates, to be sent to the Colonial Office up to the end of September.

It is asserted here that our neighbours the Belgians have purchased from the British Government the sovereignty of the Solomons Islands, with the intention of forming a penal colony there; for which purpose an expedition has been sent out from Antwerp to make the needful surveys and take the preliminary steps. Many people here pretend that the above-mentioned islands by no means belong to England, and maintain the claim of sovereignty on the part of the King of the Netherlands.

It is now officially notified here that the bi-monthly mail to China and the East will be continued as heretofore, but with increased rates of postage. The latter, however, only applies to letters sent via Southampton, which now cost 1 florin for a single letter, instead of 70 cents as formerly, whilst the charge for correspondence sent by way of Marseilles remains unaltered. At the same time notice is given that in consequence of an alteration in the days of departure of the steamers from Trieste to Alexandria, letters sent that way are now received at the Amsterdam Post-office one day later than hitherto, viz., up to the 7th and 23rd of each month. But even then that route cannot compete with Marseilles for the outward correspondence, as letters by that route need not be posted here before the 9th and 25th of the month.

PASSENGERS ARRIVED.

Per *Ridderkerk*, Capt. Tierlink, at Brouwershaven, from Java: Capt. G. F. Revallet, of the E. I. army, lady and four children, Miss B. and Miss C. Bouricius, Messrs. C. L. Arnold, H. Bouricius, J. Baas, J. A. Kuppens, and one Javanese servant.

Per *Vesta*, Capt. Gerrebrandt, at Brouwershaven, from Padang: Mr. Schaefer, Adjutant E. I. army.

Per *Admiral de Ruyter*, Capt. Stapert, at Nieuwe Deep, from Java: Mr. C. de Wit.

Per *Triton*, Capt. Adrians, at Brouwershaven, from Batavia: Mr. and Mrs. C. Hultmann and family, Mr. and Mrs. van de Ham and family, Mr. and Mrs. van Pers, Mr. and Mrs. V. Walcheren and family, Mr. Schepern, Mr. Coets van Baggen, Dr. J. de Teyter, Mr. W. Stavers, junr., Miss J. Couteren, one Javanese servant, and two military invalids.

Per *Admiral Piet Hein*, Capt. Hazewinkel, at Amsterdam, from Passaroean: Mr. and Mrs. J. C. Hoffman and family, Mr. J. Puit.

PASSENGERS OUTWARDS.

Per *Electra*, Capt. Wegman, from Amsterdam to Java: Capt. Echauzier and family, Mr. and Mrs. Coevorden, Miss Bournan, governess, and Javanese female attendant, Mr. H. T. van Coevorden, Mr. H. J. Bosch, Second Lieutenants H. van Oven, K. de Jongh, A. J. Beck, A. Lamet, and H. W. Roeby, one hundred and fifty men, colonial troops.

Per *Bernhard and Agnes*, Capt. Ordemann, from Amsterdam to Batavia: Mr. A. Thomann, Mr. J. T. Bungener, Miss E. Schlosser.

Per *Magdelena*, Capt. Kooy, from Amsterdam to Sourabaya: Mr. J. Engelenburg.

COMMERCIAL.

COFFEE.—Our markets both here and at Rotterdam exhibit a marked tendency to rise, probably owing to the small quantity at the Company's approaching sale, and the extensive orders partly arrived and more expected. Every transaction reported shows successively higher figures. Thus, among others, 2,574 bags Padang private trade, were sold at 42, 42½, and 43 cents, whilst 800 bags Company's Java fetched 43c. for good ord., and cannot now be had under 43½c. At Rotterdam, 2,500 bags Padang were taken at 42c., and the next day 500 bags were resold at 43c., and 3,000 bags private trade *ex vesto* fetched 42½c.

SUGAR.—Holders of E. I. descriptions appear more disposed to do business at unaltered rates, viz.:—1½ to 2fl. under July sale prices, at which about 5,000 Kranjangs were sold to be received on board, and some parcels in second hands have also been realised. At Rotterdam, the transactions were about the same extent and same figure.

In the Refined market there is a lively enquiry for ready goods, but most of the refiners are so deeply engaged for contracts—some even up to the end of December—that the sales have been but of limited extent. At Rotterdam, the highest quotations were willingly given. Here 400,000 kilos B and H, crushed No. 1, sold at 37¼fl, and No. 2 36½fl., deliverable in December.

RICE in greater demand, on account of the potatoe disease, which continues to spread, and begins to create some alarm of a general failure of that article, which induces the holders of rice to demand higher prices, in consequence of which the transactions have been but limited. All descriptions of East India may be quoted at least ¼fl. higher.

SPICES.—The Company's sale went off as follows:—2,065 casks Nutmegs fetched 71fl. for first quality, 60fl. for seconds, 41 to 43fl. for good, a little worm-eaten, and 32fl. for ordinary, broken, and a good deal worm-eaten; 21 casks Macassar do. No. 1 to 3 fetched from 26 to 66fl.; 820 casks Mace, large leafed, 62fl.; middling 59 to 61fl.; 1,078 casks Amboyna Cloves, good seconds, 20fl.; 2,687 bales Java Cinnamon, good colour and fine quality, 70 to 71fl.; middling, 56 to 59fl.; ordinary and coarse, 55 to 58fl.; 7,343 bags Black Pepper, good quality, 22¼ to 23¼fl.; 159 bags White Pepper, good, 34 to 36fl.; 700 chests Soy (each 3 doz. small bottles) 30 to 31fl. Not only was everything sold, but the demand was much greater than the supply, and since the sale many lots have changed hands at an advance. This was particularly the case with Cloves, which are much in request, and for which 2 and even 3fl. profit have been paid.

A parcel of CASSIA VERA has arrived, but is not yet in the market. RATANS firm; 12,000 bundles were sold at full prices.

A lively business has been done in INDIGO. 265 chests sold at the highest quotations, and at Rotterdam 200 chests realised a decided advance. The Company's Autumn Sales are announced to take place as follows:—

1st October,	993	chests	Java Indigo at Amsterdam.
„ „	326	„	Java Cochenille „
3rd „	792	„	Java Indigo at Rotterdam.

With the reservation of adding 640 piculs of Java indigo, if it arrives in time.

Comparative view of indigo in the Company's sales since 1850:—

1861.....	2,641 chests	1855.....	2,823 chests.
1860.....	3,035 „	1854.....	3,900 „
1859.....	3,070 „	1853.....	2,640 „
1858.....	2,611 „	1852.....	2,200 „
1857.....	2,746 „	1851.....	3,300 „
1856.....	1,800 „	1850.....	4,150 „

TEA.—In this article the market is quiet. The Company's periodical tea sale will be held this year at Rotterdam on the 9th of October, and consist of 23,554 quarter-chests, 1,811 twelfths, and 15 eighths of Java, and 30 chests Japan teas.

P.S.—The Netherlands Trading Company have just announced their sugar sale to take place on the 25th September, and consist of the following:—

8,198 kranjangs	Java,	warehoused at	Rotterdam.
9,403 „	„	„	Amsterdam.
2,052 „	„	„	Dordrecht.
574 mats	„	„	„
1,846 kranjangs	„	„	Schiedam.
22,073 kranjangs and mats.			

Naval and Military.

The *Gazette* contains a notice that preparations are being made for the distribution of the amount awarded for the destruction of pirates in the China seas on the 25th of February, 1858, by Her Majesty's ship *Algerine* and two boats of Her Majesty's ship *Calcutta*.

The *Furious*, 16, paddle, Capt. O. J. Jones, after an official inspection by Capt. H. Broadhead, commanding Her Majesty's ship *Asia* and the Reserve at Portsmouth, was paid off under the superintendence of Capt. R. Cook, of Her Majesty's ship *Victory*. Medals and gratuities for good conduct were given to Sergeant Stephen Palmer, Royal Marine Artillery; John Furlong, chief petty officer, and Charles Murphy, quartermaster. The *Furious*, although many of her crew have been at times invalided, has had but four deaths on board during her commission; and while in the China seas generally showed a lighter sick-list than other vessels on the station. She was commissioned in March, 1857, by Capt. Sherard Osborn, C.B., now commanding the *Donegal*, and sailed from Plymouth Sound on the 4th of May following for Hong Kong, with a convoy of 13 gunboats, two despatch boats, and the *Hesper* screw store-ship.

The 13 gun screw steam ship *Niger*, Capt. Peter Cracroft, from the Australian station, has arrived at Woolwich to be stripped and paid off. The *Niger* was commissioned at Woolwich, in May, 1856, by Capt. the Hon. A. Cochrane, now commanding the *Warrior*, who was invalided home in September, 1858. The *Niger* has been what is termed an exceedingly comfortable ship, but disease has created sad havoc among the officers and crew, 80 of the old hands only having returned to Woolwich. Out of the whole number, 180, 40 have died from the effects of the climate, &c., and 60 were invalided home. The first lieutenant, Arthur J. Villers, and six of the crew now on board, were wounded in the war in New Zealand, and one marine was shot dead. The kindness and consideration of Capt. Cracroft for the invalids and suffering sick is spoken of by all on board in terms of grateful acknowledgment.

The discharge of time-expired men, as well as of those who, from long service in India, China, and the colonies, have been rendered unfit for further service, still continues at Chatham. On the 3rd no less than eighty-four non-commissioned officers and men of various cavalry and infantry regiments, all of whom had previously undergone an examination by the medical staff at Fort Pitt, and had subsequently been inspected by the Commissioners of Chelsea Hospital, left St. Mary's Barracks and received their full discharge from the service. At the same time thirty men of different corps, who had been sent up to Chatham to be discharged, left the invalid establishment, and proceeded to their various depots, the examination of them having satisfied the authorities that they were fit for further military service.

General Lord Clyde, G.C.B., and Major-General H. Eyre, commanding the Chatham district, have proceeded to Prussia forthwith, to be present at the great reviews.

Captain Freeth, R.A., attached to the department of Inspector of Artillery, is under orders to proceed to Jersey, to inspect the guns and fortifications of the Channel Islands. At Alderney the improvements at the mouth of the harbour are progressing satisfactorily. About 800 men are employed in elevating the west breakwater, so as to raise it above 500 feet above high water, and a second breakwater of 1,000 feet in length is about to be commenced to shelter the anchorage from the easterly winds.

Intelligence was received on the 5th instant of the loss of Her Majesty's sloop *Driver*, Commander Horatio Nelson. We are happy, however, in

Digitized by Google

being able to state that the whole of the officers and crew were saved, and it is expected that the guns and other public stores will be recovered. The *Driver* was only commissioned at Woolwich in the month of May last, and finally sailed from England in the early part of June. The *Driver* was a fine roomy vessel of her class. She mounted six guns, was 1,056 tons burden, had a nominal steam power of 280 horses, and had a complement of 170 officers and men. The *Driver* was lost upon one of the numerous keys which surround the Bahama Islands, and which have often proved so destructive to shipping.

The lower masts and yards for the *Black Prince*, iron-cased frigate, are now in course of construction at Portsmouth dockyard. Their principal dimensions are as follows:—Mainmast, length, 120ft. 4in., diameter, 40in.; foremast, length, 117ft., diameter, 38in.: mizenmast, length, 84ft. 8in., diameter, 26in.; bowsprit, length, 72ft., and diameter, 40in. The fore and main lower yards are each 105ft. in length, and 25in. in diameter. The cross-jack yard is 71ft. in length and 17in. in diameter. The mainmast contains 1,235 cubic feet of yellow pine, and 125 cubic feet of oak in its trestle and cross-trees, &c. These spars, notwithstanding their apparently great size, are far below the average for a ship of the *Black Prince*'s tonnage, or for a modern steam line-of-battle ship.

The following alterations have recently taken place in the corps of Royal Engineers, viz.—Col. Nelson returned home from Halifax, Nova Scotia, and unemployed; Lieut.-Col. Robertson, ordered to Canada; Col. Hadden, ordered from Colchester to Ceylon; Lieut.-Col. Brown, C.B., lately returned from the Mauritius, appointed field officer for military discipline at head-quarters, and now on leave: Captain Morrison, from Sandhurst, appointed Surveyor-General at the Mauritius; Captains Grantham, ordered home from the Cape of Good Hope; Gordon, from Shorncliffe to Ireland; Brine, from Belfast to China; Wray, from the Colonial-office to Dover; Barber, from Chatham to Devonport; Hawthorn, from Aldershott to Chatham; Cox, to Aldershott; Pasley and Fisher, on sick leave; Major Longley, ordered from Devonport to the Cape of Good Hope; Lieut. White, appointed to the command of the 25th company at Natal.

The sale of the well-known military and civil institutions, which produced so many distinguished men in the service of the old East India Company, took place at the Auction Mart, by the Bank of England, under the hammer of Messrs. Norton, Hoggart, and Trist, the auctioneers. It was stated that the property consisted of 90 acres, with the well-known residence of Lord Liverpool at Addiscombe, and its College, and 70 acres at Haileybury, with the barracks and other appurtenances. After considerable bidding both properties were declared to be bought by the British Land Company, Addiscombe being sold for £33,600, and Haileybury for £15,200. It is understood that both estates will be converted into freehold land allotments.

A board of survey, ordered by the Lords Commissioners of the Admiralty, have commenced their operations in Woolwich Dockyard, for the purpose of rendering an account of the expenditure necessary for completing the whole of the ships at present under construction in that yard without delay. They are to lay before their Lordships a detailed statement of the stock of timber, and other materials, now in hand, and to give in a specification of the progress of the 91-gun ship *Repulse*, together with a return of the additional sum required in the event of the Government deciding on an alteration of her build by cutting down her upper deck and lengthening her to a 52-gun frigate, which plan is also proposed for the sister ship *Caledonia*. The *Duke of Wellington*, 131, is likewise to undergo the same process to a 91-gun frigate.

Lieut. General Viscount Melville proceeded on the 31st August from Hamoaze into Plymouth Sound, in the gunboat *Redwing*, accompanied by various officers, to witness the practice in the gunboat from Armstrong 100-pounders and 68-pounders, at various ranges up to 2,400 yards. They afterwards landed and witnessed firing from the Staddon Fort Battery, and the Staddon-heights, 182 feet and 310 feet above the level of the sea, at fixed targets, thrown overboard at random outside the breakwater, at distances found by an instrument of simple construction, invented by Captain Jenaingham, to be 1,270 and 1,740 yards, and at a target towed astern of the *Redwing*, at a range of 1,700 and 1,800 yards from the upper battery. The practice at sea, from the lower battery, 182 feet high, was with 68-pounders, smooth bore, and from the upper battery, 310 feet high, with six 32-pounders. It was decisive, both in the gunboat and from the batteries, of the excellence and certainty of the new weapons. On Monday, at an early hour, Lord Melville proceeded to the *Cambridge*, and witnessed the disembarkation of the crew, who were then thrown into mixed companies, to represent casualties likely to arise on service when landing troops covered by seamen-skirmishers. They took up skirmishing order, under cover, as they landed, irrespective of their respective companies, being told off in companies under fire, after which they were put through light infantry and other movements, with bayonet and cutlass exercise. The arms having been piled, a field battery of six guns, four 12-pounder howitzers, and two 12-pounder Armstrongs, was turned out and put through several evolutions, the guns being dragged over the rocks along the shore, and the front frequently changed. The men then embarked, and after dinner went to general quarters on board, firing at targets 1,000 yards off, the ship rolling heavily all the while. Lord Melville spoke in strong terms of satisfaction of all he had witnessed, and expressed to the officers and ship's company when on shore his high opinion of their proficiency.

Colonel Grey, late of the 5th Fusiliers, has taken the command of the Colchester Camp from Colonel the Hon. Alexander Gordon, appointed to an infantry brigade in the Curragh.

We have to record the death of Lieut.-Col. Henry North, at 8, Albemarle-villas, Stoke, Devonport. The deceased officer entered the army as lieutenant July 27, 1799, and became captain August 22, 1804. He served with the 7th Fusiliers in the expedition against Copenhagen in 1807, with the 2nd battalion of the 14th, under Sir David Baird, and was in the retreat of Sir John Moore's army, and at the battle of Corunna, for which he has received the war medal with one clasp. He also accompanied the battalion to Walcheren, and was present at the siege of Flushing. He became major June 4, 1814, and lieutenant-colonel January 10, 1837. He had reached the advanced age of 85.

The *Star of India*, a magnificent East Indiaman, built for the wealthy and celebrated house of Somes Brothers, London, has been launched from the roofed shipway of Messrs. Alexander Stephen and Son, Dundee. She is 1,061 tons register, or 1,800 tons burden. The *Star of India* is the eighth ship built by Messrs. Stephen and Son, all from about 900 to 1,850 tons register, and from 14 to 15 years' class.

In this month's Army List the 19th, 20th, and 21st Hussars are included; also the 101st Royal Bengal Fusiliers, 102nd Royal Madras Fusiliers, 103rd Royal Bombay Fusiliers (a special circular has been issued by the Adjutant-General, intimating Her Majesty's pleasure to designate these three regiments "Royal"); 104th Bengal Fusiliers, 105th Madras Light Infantry, 106th Bombay Light Infantry, 107th Bengal Infantry, 108th Madras Infantry, 109th Bombay Infantry. The officers' names are not yet published, but the usual complement will be appointed. Most probably the names will appear next month. Only the last three regiments are new ones, as the inscriptions on the colours of the others are particularised. It is generally supposed that the Colonels will be appointed from the British Army, though this scarcely seems probable when one looks over the names of general officers at the end of the Army List, at present serving in the Indian Army.

The death of General Francis Moore has occurred since our last publication. He expired on 23rd Aug., having long headed the list of Generals, and being senior to any of the same rank by twenty-one years, as he was raised to the rank of General in 1830, and the present senior General was not appointed till 1851.

It is intended that Commissions in the Corps of Yeomen of the Guard shall not in future be purchaseable, but be obtained only by merit. Those at present in the corps who wish to retire will have the value of their commissions handed to them by the Commander-in-Chief.

The iron steam frigate *Defence*, 22, 600-horse power, steamed into Chatham Harbour on Saturday, from the Tyne. Although without a single spar or an inch of canvas set, she steamed as steadily, and was as easily managed, as a river steamboat. The engines were never once stopped until the Shipwash was reached at 12 P.M. on Friday, twenty-six hours after leaving Tynemouth, the distance run during that time being two hundred and ten miles, the steamer never once being at full speed.

With a view to reducing the deductions from pay to which the soldier is now liable for the renewal of part of his clothing, the Secretary for War has been pleased to approve of the undermentioned additional articles of clothing being issued at home and in the colonies:—One pair of boots annually to the cavalry, one pair of unbooted cloth trousers biennially to all mounted service and Artillery; one pair of serge trousers biennially to the Foot Guards and infantry of the line; one pair of boots annually to every non-commissioned officer and soldier of infantry corps, and Artillery, who now receive only one pair. These articles will be issued in addition to the clothing at present supplied to the several arms of the service. All bootings will in future be supplied biennially only. These arrangements will take effect from the 1st of April, 1862.

Accounts from Toulon state that a telegram had been received there on the 2nd inst. from the Minister of Marine, commanding a complete change in the distribution of the troops and naval stores embarked on board the steam frigates *Ulloa* and *Eldorado*, which were about to sail for Alexandria. The troops were to proceed thence to Cochin China. The orders for sailing were given when the despatch arrived commanding that the departure of the troops should be suspended until further instructions.

The screw steamer *Undine* was launched on the 7th inst. from the building yard of Messrs. T. Wingate and Co., Whiteinch. The vessel was named *Undine* by Miss Lapraik, niece of Douglas Lapraik, Esq., of Hong Kong, one of the owners. This vessel is a fine specimen of marine architecture, and she has more the appearance of a yacht of her tonnage than of a vessel intended for the ordinary purposes of trade. After the launch, the owners and their friends were entertained at an elegant luncheon by Thomas Wingate, Esq. The trial trip took place last Saturday.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, SEPT. 6.

2nd Regiment of Life Guards—Lieut. Alexander Charles Hector Stewart to be capt., by purchase, vice Henry Dalton Wittit Lyon, who retires.

Military Train—Ensign William Laughton has been permitted to retire from the service by the sale of his commission.

4th Regiment of Foot—Paymaster Joseph Hely, from half-pay Cavalry Depot, to be paymaster, vice John Henry Gordon, who resigns.

6th Foot—Lieut. William H. Craven Allen, from half-pay 82nd Foot, to be lieut., vice William Smith, who retires upon half-pay; Ensign Duncan Donald Darroch Cotter to be lieut., by purchase, vice Allen, who retires; Arthur Steffe Crisp to be ensign, by purchase, vice Cotter.

8th Foot—Ensign John Randle Minshull Ford to be lieut., by purchase, vice Frederick George Furlong Moore, who retires; William Geering Clarkson, gent., to be ensign, by purchase, vice Ford; Paymaster Francis William Fellows, from the 52nd Foot, to be paymaster, vice Graham Egerton Huddleston, who exchanges.

11th Foot—Charles Semple, gent., to be ensign, by purchase, vice John Hely, appointed to the 87th Foot.

15th Foot—Staff-Surg. Edward William Bawtree, M.D., to be surg., vice Usher Williamson Evans, M.D., appointed to the staff.

23rd Foot—Ensign Thomas James Bowyer to be lieut., by purchase, vice George Packe, who retires; George Adderley Dawson, gent., to be ensign, by purchase, vice Bowyer.

25th Foot—Ensign Robert William Thomas Dawson to be lieut., by purchase, vice Louis Jones Lambert, who retires; Second Lieut. John Albert Vincent, from Dublin City Artillery Militia, to be ensign, by purchase, vice Coke, promoted; William Henry Hale, gent., to be ensign, by purchase, vice Dawson.

Digitized by Google

52nd Foot—Paymaster Graham Egerton Huddleston, from 8th Foot, to be paymaster, vice Francis William Fellows, who exchanges.

53rd Foot—Alfred Constable Maxwell, gent., to be ensign, by purchase, vice Thomas Blackborne Thoroton Hildyard, appointed to the Rifle Brigade.

61st Foot—Capt. Francis John Green, from 3rd West India Regiment, to be capt., vice Stephen M'Donough, who exchanges.

83rd Foot—The third Christian name of Ensign Blunt is "Emes," not "Ewes," as stated in the *Gazette* of the 6th of August.

86th Foot—Ensign Henry Francis Sneyd, from the 95th Foot, to be ensign, vice John Edmund Monro Sperrin, who exchanges.

87th Foot—Capt. William Hanmer to be major, by purchase, vice James Bailie, who retires; Lieut. George William Marsden to be capt., by purchase, vice Hanmer; Ensign Alfred Herbert Hugh Smith to be lieut., by purchase, vice Marsden; Ensign John Hely, from 11th Foot, to be ensign, vice Smith.

88th Foot—Ensign Henry Griffith Bowen to be lieut., by purchase, vice John D. Garner Dodgin, who retires; Robert Longfield Beatty, gent., to be ensign, by purchase, vice Bowen.

95th Foot—Ensign John Edmund Monro Sperrin, from 86th Foot, to be ensign, vice Henry Francis Sneyd, who exchanges.

Rifle Brigade—Lieut. Edmund Fortescue to be capt., by purchase, vice Arthur Loftus Tottenham, who retires; Ensign the Hon. John Abercrombie to be lieut., by purchase, vice Fortescue; Ensign Thomas Blackborne Thoroton Hildyard, from 53rd Foot, to be ensign, vice the Hon. John Abercrombie.

3rd West India Regiment—Capt. Stephen M'Donough, from 61st Foot, to be Capt., vice Francis John Green, who exchanges.

MEDICAL DEPARTMENT.—Staff-Surg. Major Joseph Ambrose Lawson, M.D., who retires upon half-pay, to have the honorary rank of deputy-inspector of hospitals, under the Royal warrant of the 1st of October, 1858. Surgeon Usher Williamson Evans, M.D., from the 15th Foot, to be staff-surg., vice Surg.-Major Lawson. Frank Simpson, gent., to be staff assistant-surg. The appointment of Assistant-Surg. Dempster, from the 24th Foot, to be vice Martin Joseph Burke, M.D., deceased, and not vice Martin Joseph Burke, M.D., placed upon half-pay, as stated in the *London Gazette* of August 6, 1861.

TO BE HONORARY PHYSICIANS TO HER MAJESTY.—John Forsyth, Principal Inspector-General of Hospitals, Bengal Medical Department; Campbell Mackinnon, M.D., Inspector-General of Hospitals, Bengal Medical Department; Edward Goodeve, M.D., surgeon, Bengal Medical Department; George Pearse, M.D., retired Principal Inspector-General of Hospitals, Madras Medical Department; Duncan Macpherson, M.D., Inspector-General of Hospitals, Madras Medical Department; Benjamin Proctor Rooke, M.D., Principal Inspector-General of Hospitals, Bombay Medical Department.

TO BE HONORARY SURGEONS TO HER MAJESTY.—Alexander Grant, surgeon-major, Bengal Medical Department; John Campbell Brown, C.B., Deputy Inspector-General of Hospitals, Bengal Medical Department; William Abbott Green, Deputy Inspector-General of Hospitals, Bengal Medical Department; Robert Cole, Principal Inspector-General of Hospitals, Madras Medical Department; Charles Morehead, M.D., surgeon-major, Bombay Medical Department; Francis Short Arnott, M.D., C.B., Deputy Inspector-General of Hospitals, Bombay Medical Department.

BREVET.—Lieut.-Colonel and Brevet-Colonel Sir Robert Walpole, K.C.B., rifle brigade, to have the local rank of major-general while commanding a brigade at Gibraltar. The undermentioned retired medical officers of Her Majesty's Indian military forces to have a step of honorary rank, under Clause 14 of the Royal Warrant of 13th of January, 1860:—Deputy Inspector-General of Hospitals Edmund Walter Eyre, retired Madras Medical Department, to have the honorary rank of Inspector-General of Hospitals.

TO HAVE THE HONORARY RANK OF DEPUTY INSPECTOR-GENERAL OF HOSPITALS.—Superintending Surgeon Alexander Davison, M.D., retired Bengal Medical Department; Superintending Surgeon Charles Mackinnon, retired Bengal Medical Department; Superintending Surgeon Donald Butter, retired Bengal Medical Department; Superintending Surgeon John Greig, retired Bengal Medical Department; Surgeon James Kellie, retired Madras Medical Department; Surgeon William Evans, M.D., retired Madras Medical Department; Surgeon Charles Kevin, retired Madras Medical Department; Surgeon Alexander Shewan, retired Madras Medical Department; Surgeon-Major John William Maillardet, retired Madras Medical Department; Surgeon-Major Thomas White, retired Madras Medical Department; Surgeon-Major Alexander Gibson, retired Bombay Medical Department.

THE NAVY.

PROMOTIONS.

COMMANDER.—Samuel P. Townsend.

LIEUTENANTS.—C. Wodehouse, G. C. Masters, A. Jeykyll.

MASTER.—John Richards.

SURGEONS,—E. Loney, G. B. Newton, J. C. Messer, M.D.

PAYMASTERS.—C. J. Card, T. Waterfield, R. Samthill, C. Barrs, W. P. Scott, W. Hamilton (in chief).

CHIEF ENGINEER.—J. Syder in the Rinaldo.

ENGINEERS.—R. Taplin in the Simoom; S. M'Callum in the Immortalité; J. Crossman, acting in the Mutine; T. Parker, acting additional in the Impérieuse; J. Taylor (A) in the Gorgon; H. Leslie, supernumerary, in the Asia; and P. Richmond (acting) in the Liffey.

APPOINTMENTS.

CAPTAINS.—A. H. Gardner to the Orestes; J. Ormsby Johnson to Malacca; R. Jenkins to the Miranda; F. Warren, C.B., to the Cuckoo.

COMMANDERS.—G. J. Malcolm to the Barracouta; W. B. Hobson to the Pantaloon; Hon. W. J. Ward to the Scourge; T. C. Bruce to the Royal Adelaide; Philip Brock to the Pelican.

DEPUTY MEDICAL INSPECTORS.—Robert Beith, M.D., to Plymouth Hospital; John Andrews to Jamaica Hospital.

LIEUTENANTS.—E. W. Warren and F. W. Egerton to the Malacca; R. Sterne to the Adelaide; Lord Arthur P. Clinton, J. B. Solly and E. M. Collier to the Orestes; C. D. J. Odevaine (additional) to the Nile; A. C. H. Paget to the Pelican; L. A. Whimper to the Seringapatam; W. Spratt to the Formidable, for service in the Lizard; A. Wright (for service in the Nautilus), T. S. Gooch, and M. S. L. Peile to the Impregnable; H. Hand to the Hecate; G. C. Sinclair and C. J. Wise to the Pantaloon; W. M. Latham to the Excellent; C. G. F. Knowles to the St. Vincent; J. J. Gregory to the Hogue; T. Stackhouse to the Centurion; D. Boyle to the Revenge; A. R. Owen and A. A. Smith to the Hawke.

MASTERS.—F. Taylor to the Colossus, for coastguard service; Valentine F. Johnston to the Orestes; T. Bowen to the Cumberland for the Phæton; W. R. Cronin to the Pelican; J. Molloy to the Malacca.

CHAPLAINS.—Rev. G. G. W. Clemenger to the Forte; Rev. J. W. Grimes, chaplain and naval instructor, to the Jason; Rev. J. W. Clarke, chaplain, to the Hawke; Rev. T. B. Hamilton, chaplain, to the Hannibal.

SURGEONS.—Gerald Yeo to the Saturn; M. Thomson to the Royal Adelaide; C. E. Playfair to the Orestes.

PAYMASTERS.—H. S. Gibson (additional) to the Hawke; H. M. D. Wilson to the Barracouta, confirmed; T. D. Conconi to the Pelican; C. Saunders to the Malacca; A. Lew to the Orestes.

SUB-LIEUTENANTS.—R. M. Sperling to the Trafalgar; A. L. Trevor to the Edgar; J. G. F. Leacock to the Orestes; B. Moore and A. C. Errington to the Malacca.

ASSISTANT-SURGEONS.—F. A. Brice to the Edinburgh; W. Yarde to the Excellent; C. B. Lambe to the Woolwich Division of the Royal Marines; J. M. Trouson (additional) to the Fisgard; F. H. Rose to the Miranda.

SECOND MASTERS.—E. B. d'Arcy to the Rhadamanthus; R. J. Barrett, to the Antelope; J. T. Hart to be chief officer of the Coastguard, Woodbridge Haven; J. G. Parker to the Orestes.

MASTER'S ASSISTANTS.—F. H. Boys to the Victory; W. W. Browne to the Antelope; A. Wallis to the Pantaloon; A. Hackman to the Orestes; T. E. Martin to the Pelican; E. L. Jackson to the Malacca.

ASSISTANT-PAYMASTERS.—G. M. Blyth, in charge to the Dee; R. C. Beale to the St. Vincent; J. J. Willcocks to the Cornwallis; C. S. Hills to the Cumberland; W. B. Risk to the Hogue; A. N. Wade to the Malacca; J. G. Rickcord to the Ajax; W. H. M. Arnold to the Pantaloon; W. Shott to the Formidable; W. H. P. M. Gilham to the Donegal; F. B. Moore to the Blenheim.

CHIEF ENGINEERS.—W. J. Fabian to the Cumberland, for service in the Arethusa; H. W. Elgar, to the Fisgard, for service in the Rapid; C. P. Turner, to the Indus, for service in the Styx; R. Williamson to the Indus, for charge of the machinery of the Valorous; O. N. Brooker, additional, for the St. Jean d'Acre, on the latter being paid off; G. Rock, to the Fisgard, for the Niger, on the latter being paid off; J. W. German to the Orestes.

ENGINEERS.—E. Lewis to the Cumberland, for the Rosario; S. Matthews to the Pelican, in lieu of Chief Engineer; C. F. Jordan (acting) to the Cumberland, for service in the Bullfrog; J. Hefferman to the Warrior.

ASSISTANT ENGINEERS, FIRST CLASS.—H. Johnson to the Arrogant for service in the Hardy; J. Taplin to the Warrior, to complete complement; W. Williamson to the Revenge, for the Porpoise; W. Melville and T. Potts to the Orestes; T. Hartley to the Cumberland, additional, for charge of the Cochin, vice Melville; W. Stone to the Plover, vice Nurse: J. Fielden to the Pelican; W. Ash to the Asia, for the Blazer. Second Class.—J. J. Finch to the Fisgard, as supernumerary, and granted leave of absence; L. Buckler and J. Gill to the Arrogant, for service in the Hardy; H. Rider, F. Andrew, W. H. G. Webb, W. S. Thompson, J. Baillie, W. G. Paige, to the Indus, as supernumeraries; J. G. Pannett to the Warrior; E. Pointon to the Orestes; W. J. Forster to the Pelican; S. Judd to the Geyser, vice Fielden; G. Duncan to the Impérieuse, as supernumerary.

ACTING ASSISTANT ENGINEERS, SECOND CLASS.—J. G. Cox to the Orestes; G. Blackwell and H. Benbow to the Cumberland, as supernumeraries; J. Adamson to the Pelican; W. B. Rock, W. J. Robinson, J. Flintoff, and W. H. Keats, to the Impérieuse, as supernumeraries; W. Edwards to the Cumberland, as supernumerary; W. H. Moon to the Indus, as supernumerary; Chas. Salmon to the Asia, as supernumerary; Thos. H. Walker to the Cumberland, as supernumerary; A. Stewart to the Cumberland, as supernumerary; W. R. B. Braving to the Indus, as supernumerary; C. Allsopp to the Asia, as supernumerary; H. Brown to the Dauntless, vice Gill; J. Murphy to the Warrior.

VISIT TO ENGLAND OF THE SIAMESE AMBASSADORS.

Since our last issue Phra nai Wai, the second Siamese Ambassador, who in his social grade ranks higher than the first, and Naronwigit, the third, with five of their suite, have paid a two days' visit to England. The visit was quite private, and, we believe, has not been noticed by the press. The Ambassadors stayed at Morley's Hotel, and managed, during their brief excursion, to see several objects of interest. Their attention appears o have been especially attracted by the Arsenal at Woolwich.

JAPANESE PRESENTS FOR HER MAJESTY.

The *Furious*, which lately returned from China, has on board a number of valuable packages—said to be forty—from the Tycoon of Japan, which are intended expressly for Her Majesty, as a mark of esteem, and in some way as an acknowledgment of the yacht which Lord Elgin presented to the Tycoon, in 1858, as a special present from Her Majesty. Until these packages have passed the Royal inspection their contents will not be made public.

A NUMBER of French Jesuits have just been despatched to China.

LONDON, MONDAY, SEPTEMBER 16, 1861.

PROGRESS OF BANGKOK.

THE Siamese Ambassadors in visiting Paris will not have felt satisfied with simply enjoying the amusements and inspecting the "lions" of the French Metropolis. We shall be glad to hear that on returning to their own country the knowledge they may have acquired from their European teachers has been turned to practical account. Yet the obstacles arising from their total ignorance of European customs and languages are too great to lead us to expect any considerable advantage from this visit. Their ambition may be somewhat roused, their faith in Siamese politics a little shaken, but on the whole we suspect that their curiosity has been largely satisfied at the expense of any more valuable result. The chief Ambassador to the French Court has not been at liberty to visit this country, to which his subordinates have paid a flying visit. If from France they might learn much which would be of service to them on their return home, we, of course, as Englishmen, believe that they might have learnt still more, that is of political significancy, from the condition of this country. Their own land has certainly greatly improved since the Treaty with England in 1856, but we agree with the writer of an article in the *Singapore Free Press*, which will be found in another column, that, though much has been done at Bangkok during the last five years, the advance made has been by no means so rapid as we were justified in expecting. "The people," he says, "are ground to the earth with taxes, and these taxes are so contrived as to press most overpoweringly on the poorest classes;" and he suggests, as a remedy, the interference of the Foreign Consuls. Possibly such an interference would prove of service; but, on the other hand, the King might resent any advice from such a quarter as an intrusion, and we could not well blame him if he did. If any action is taken in the matter, the utmost tact and the most conciliatory manner will be required. It is difficult for those who are not on the spot to estimate all the obstructions which surround the path of a Consul in the Far East. We at least will not venture to pronounce dogmatically on the wisest course to be adopted at Bangkok, but the writer of the article to which we have referred deserves our thanks for having drawn public attention to an important subject.

MR. ROBERTS AND THE REBELS.

THE apology for the Chinese Rebels which Mr. ROBERTS, the American Baptist Missionary, has addressed to the public through the columns of the *China Mail*, is extremely unsatisfactory. This missionary has fostered the cause and its leaders from the beginning. We cannot therefore be surprised that he should be anxious to defend it now, when he occupies a stated position in Nanking as a fellow-worker with the arch-revolutionist himself. We will not quarrel with his argument that polygamy is the lesser of two evils, since he acknowledges that it is an evil, and does not deny that it exists in the practice of the Tai-ping King and his followers. But we suspect that some feeling of parallelism lurks in his mind between the practices of the ancient patriarchs with regard to polygamy, and the acts of the Israelites in their wars of extermination, since in both respects he is evidently anxious to excuse the Tai-pings. In attempting to justify the Rebels Mr. ROBERTS perverts Scripture and ignores common sense. He produces texts from the Old Testament about the destruction of those nations that will not serve the LORD; he believes that the Chinese have proved, through a long course of years and centuries, that they will not serve the LORD; therefore, he says, let them be destroyed. "Would it not be "better," he writes, "in the highest sense of the word, for half "the nation to be exterminated, if the other half would thereby "learn righteousness?" If, indeed! but it may well be doubted whether the abominable atrocities committed by the Tai-pings will teach righteousness to a people, and there can be no question at all that we have no authority either for doing evil that good may come, or for defending those who do it. That TEEN WANG'S ravings are utterly blasphemous, we have demonstrated by quotations in our journal, and that the acts of the Rebel Chief are as bad as his principles, is proved from the intelligence that reaches us by every mail. That good may be the final goal of all this ill we will not deny, but we utterly repudiate Mr. ROBERTS'S right as a Christian Missionary, or our own right as a Christian people, to abet the Rebel movement in the hope of this ultimate advantage.

THE APPROACHES TO THE AMOOR.

OUR readers will remember a letter from Captain KRELL, a translation of which appeared in our paper more than two years since, giving a description of the navigable channel leading to the Amoor, and complaining of the inaccuracy of the charts and inefficiency of pilots.* This letter was widely circulated, and, coupled with the loss of several vessels by shipwreck in 1859, induced the insurance companies to increase the premiums upon vessels sailing to the Amoor. At the present time these premiums amount to 6 per cent., and seriously interfere with the development of our trade with the Amoor and Eastern Siberia generally.

Our attention has been called to this subject by a semi-official article which has recently appeared in the *Hamburger Börsenhalle*, and from the facts contained in that article as well as from information derived from other sources, we are convinced that these high premiums cannot with any justice be sustained. The channel leading to the Amoor is scarcely to be called difficult, and is certainly not dangerous. It has now been marked out with buoys and beacons. Excellent charts have been published, and with due precautions accidents have become all but impossible. Even the disasters of 1859 cannot be said to have arisen from difficulties of navigation, but are due to quite different causes, as a consideration of each separate case will show. In that year thirteen vessels arrived out, three of which, the *Melita*, *St. Innocentius*, and *Orus*, were lost by shipwreck, whilst a fourth, the *Theodor and Julia*, suffered damage by being blocked up in the ice.

The American bark *Melita*, Captain POLLIS, arrived in De Castries Bay in July, and after a few days stay continued her voyage to Nikolayevsk. During a strong breeze she was cast upon a sandbank, near the island of Sakhalin, and in the general confusion an anchor was thrown out before the ship had become settled. The waves lifted her up, threw her upon the anchor, and she sprung a leak, and filled with water. All hands were saved. In a report addressed to the Russian Government, it is stated that if Captain POLLIS had not thrown out his anchor prematurely, the ship would not have leaked, and might have been got off the sandbank at high-water. Captain POLLIS, however, to clear himself from blame, ascribed his misfortune solely to the difficulties of navigation.

The Russian bark *St. Innocentius*, Captain LARSSEN, anchored at the end of September in De Castries Bay. The vessel was consigned to the Amoor Company, but they neglected to send an agent to the Bay to point out a safe anchorage, and Captain LARSSEN anchored in an exposed situation. A few days afterwards a violent north-easterly wind blew direct into the bay, the cables broke, and the ship was thrown upon the rocky coast. In this instance, also, no human life was lost. As the *Innocentius* had not proceeded beyond De Castries Bay, its loss can scarcely be charged to the dangerous navigation of the Amoor.

The third case is that of the Russian bark *Orus*, Capt. PRUTZ. The *Orus* arrived in De Castries Bay in the beginning of October, and in spite of the advanced season waited there nearly a month for orders from the Amoor Company, to whom she was consigned. The Company had sent neither clerk nor pilot to receive the ships expected from Europe, a precautionary measure observed by all private merchants established at

* See *London and China Express*, No. 7, 1859.

Digitized by Google

Nikolayevsk, and doubly necessary in this instance, on account of the lateness of the season. At length, Captain PRUTZ resolved to go to Nikolayevsk, to procure the necessary orders. On his arrival, a consultation was held in the house of the Governor, Admiral KAZAKEVICH, and he was ordered to proceed to the Seven Islands, in the Gulf of the Amoor, where the Government steamer *America* would meet him to lighten his vessel. This order was given at a time when ice had begun to form in the Liman. The *Orus*, however, left De Castries Bay, but on nearing the Seven Islands one of the floating ice-blocks cut her bow, and she began to leak. At that critical moment the *America* hove in sight, and towed the sinking vessel upon a sandbank. The damage sustained by the *Orus* caused her, however, to be abandoned. There is not the least doubt that the Company alone were responsible for this loss. Had the advice of competent persons being taken, the *Orus* would have been sent to Hakodade to winter, instead of ordering her to the Liman.

The fourth accident, that of the freezing-in of the Danish brig *Theodor and Julia*, Captain HENZEN, had also nothing to do with the navigation of the Amoor, but must be ascribed to the procrastination of the owners, who detained the vessel for nineteen days before they discharged her, and thus lost the time during which the ship might have got away in safety. The *Theodor and Julia* sustained, however, but trifling damage from the occurrence, and left in the spring for Shanghai with a cargo of ice.

Considering these circumstances, we may well wonder at the high premiums demanded, and at the assertion recently made that it is intended to raise them still higher. The Insurance Companies owe it to the commercial world to publish their reasons for these extraordinary charges. The Russian Government has done much, as we have said before, since the commencement of 1860, to render navigation free from danger, and under these circumstances, all concerned in the Amoor trade are justified in the hope of seeing the rates of insurance lowered.

THE FAR EAST AND THE INTERNATIONAL EXHIBITION.

ALTHOUGH it is yet somewhat early to be able to report definitively what is likely to be done towards the due representation of the products and industry of the Far East six months hence at the International Exhibition, still from the official advices already received we are pleased to learn that some movement has been made, and that those distant countries will not be alone represented, as in 1851, by the chance contributions of a few home exhibitors.

There are, it is true, difficulties in the way of obtaining regular organized collections through officially-appointed Governmental commissions from Siam, China, Japan, &c., as the matter is little understood by nations out of the pale of ordinary civilization. Still, through the aid of our Consuls and Merchants much has already been done in arrangements and preparations since we last noticed the subject. This individual energetic action is the more necessary because the Straits Settlements are not likely else to be represented at all, and the vast eastern trade that centres at the great *entrepôt* of Singapore will have no special collection, unless it be made by the Merchants themselves. Since British India and her dependencies has passed over to the administration of the Crown, such a system of retrenchment has been pursued, that it is scarcely probable that even a grant of a few hundred pounds will be accorded. Old John Company, on the contrary, with all his faults, certainly lost no opportunity of displaying to the public eye the wealth and productive resources of India. In this respect there was no shortcoming on the part of the East India Company, and thousands of pounds were judiciously voted in obtaining samples of manufactures, raw materials, and everything calculated to convey an idea of the resources of our vast Indian Empire. Now the Government are looking only to the economical view of making revenue and expenditure balance, and we can expect no such splendid displays of Indian products and manufactures as graced the Exhibitions of 1851 and 1855. It has been only by the merest chance that the valuable Indian Museum, now on view in Fife House, Scotland-yard, was not consigned with the old India House to the auctioneer's hammer; but though saved from this there is neither chance of development nor due arrangement.

Leaving this subject, we now proceed to give a *resumé* of the information already to hand, indicating the display that will be made of Eastern products. Sir HERCULES ROBINSON, the Governnor of Hong Kong, reports, that he has given publicity to the various papers issued by Her Majesty's Commissioners for the Exhibition, and that he has nominated the following gentlemen a local committee to consider the representation of the Colony, on the occasion:—Mr. MERCER, Colonial Secretary, Chairman; Mr. J. J. MACKENZIE (Messrs. DENT and Co.), Mr. J. D. GIBB (Messrs. GIBB, LIVINGSTON, and Co.), Mr. WALKINSHAW (Messrs. TURNER and Co.), and Dr. KANE. The Governor has also nominated Mr. CAMPBELL, of the Oriental Bank Corporation, as agent for the Colony in London, to whom Her Majesty's Commissioners can refer for information.

Mr. RUTHERFORD ALCOCK, Her Majesty's Envoy Extraordinary and Minister Plenipotentiary at Japan, reports that he has been actively engaged in collecting such objects as he thought best calculated to represent Japan and its actual state of progress in Arts and Manufactures in the Great Exhibition. In this he has been cordially aided by the other members of the Legation and the Consul at Kanagawa. Beyond our own consular establishment, Mr. ALCOCK adds, it seems doubtful how far any effort in this direction can be counted upon. The Merchants are few, and their opportunities very inadequate; their co-operation, has, however, been invited. The extent and importance of the collection to be transmitted by Mr. ALCOCK may be judged of from the fact that it fills about thirty large packing cases. There is a fine collection of porcelain, another of bronzes, and a third of lacquer; many specimens of each class are very large and beautiful. These are, in fact, the three branches of art and industry in which the Japanese more especially excel, in a way to rival the finest works of the same character in Europe. There are in addition smaller specimens of ivory and wood carvings, silks, and other fabrics, imitation leather, books, pictures, toys, workmen's tools, optical instruments, &c., and also a collection of natural products. Mr. ALCOCK has avoided collecting specimens of arms, armour, harness, screens, and such like, conceiving it probable that HER MAJESTY may send presents, received from the TYCOON, which will sufficiently illustrate their progress in such arts. Mr. ALCOCK will probably be in England in time to arrange the interesting collection which he has sent home.

Among the intending exhibitors at home who have applied for space for Eastern products are Messrs. REMI, SCHMIDT, and Co., who will show a very handsome collection of Chinese and Japanese products, including bronze, China silk, and specimens of Chinese art and manufacture, taken during the expedition to Peking, together with numerous varieties of raw silks cocoons, &c. Mr. L. A. MONTEIRO will show Chinese cups and saucers, jewelled. Mr. BENJAMIN SEARE, a beautiful collection of Chinese porcelain, bronzes, wood, lacquer, and silk. Mr. CHAS. COPLAND, Chinese drawings and oil paintings from native sketches, dessert service of engraved mother-o'-pearl shells, which has been much admired by the QUEEN, specimens of Chinese carving and varnishes, in which the Chinese are very superior to other nations, numerous specimens of paper, &c.

The coarse common paper of China is made from the culms of the bamboo; it is usually of a quality unfit for European books and newspapers, but in some places it is manufactured with such care as to answer for those purposes. The bark of the paper mulberry also contributes to the paper demand in China, and so does rice straw. The world of letters, Dr. MACGOWAN tells us, can derive no aid from Chinese rags until leather becomes more abundant in that country. Crispin claims them all for soles; the shoes of China have soles an inch thick, formed of suitably-prepared rags, faced with a thin strip of leather. The very well-prepared artificial leather recently imported from Japan, which far outstrips in appearance and durability the American cloth leather, is made from the paper mulberry bark, and is, in fact, a kind of wax-coated coloured paper. Messrs. Durant and Co., and other brokers, will doubtless show raw silks, while tobacco, copper, and other minerals, with various raw products, will be shown by many individuals. Messrs. W. HEWETT and Co. will also exhibit largely Chinese and Japanese manufactures. Messrs. ELLIOTT and Co. have also applied for space for a collective display of the various arts, products, manufactures, workmanship, and general handicraft of Hong Kong, China, and Japan. Messrs. VEITCH and

Digitized by Google

SON also intend to be exhibitors of Japanese and Chinese products.

All packages of goods intended for exhibition will be brought home by the Peninsular and Oriental Company's steamers, at the reduced freight of £15 per ton of 40 cubic feet, if addressed to H.M.'s Commissioners for the Exhibition of 1862.

MR. ALCOCK'S PAPER ON JAPAN.

At the meetings of the British Association, under the section Geography and Ethnology, a long and interesting account was read of a journey to the interior of Japan by Mr. Rutherford Alcock. It described his ascent of the sacred mountain of Fusiyama and a visit to the hot sulpher baths of Atami. The paper concluded with the remark that "all that was wanted for great commercial development and intercourse with Japan was the neutrality of the native authorities, banking facilities, a regular mail service, and a good survey of the eastern coast."

IMMIGRATION TO THE WEST INDIES.

A SHORT time since we published a letter in this journal from an intelligent correspondent, on the subject of Chinese Immigration to British Guiana.* From a private communication just received from Demerara we extract the following paragraph in allusion to the same topic :—

"The letter which you inserted is true enough. The Chinese are found very useful labourers, though rather difficult sometimes to manage, but they are far more intelligent and industrious than negroes, and more muscular than coolies from Hindostan. This is an admirable land for any one who has mere thews and sinews, with industry and a modicum of intelligence. There are hundreds of Portuguese from Madeira who a few years since landed here in rags, and are now the owners of large stores, drive in their carriages, and, barring the want of education, are gentlemen in colonial society. Some are said to be worth £20,000 or £30,000. The Chinese, I am told, by those who know them, will prove just as thrifty, as industrious, and as apt at money-making when they have worked out their indentures. . . . . No peasantry in Europe, so far as I have seen, are half so happy, physically, as our creoles and immigrant labourers. But the blacks are the most indolent, ignorant, and conceited people in existence, and if it had not been for immigration, all the British colonies in the West Indies (save Barbadoes, which stands by itself,) would long since have been abandoned to negro savagedom."

INDIA AND JAVA.

Under this heading a long letter has been addressed by Mr. Money—with whose work on Java our readers have already been made acquainted—to the editor of *The Times*. We have only space to transcribe the concluding portion of it :—

"The people of England have not yet realised the fact that the transfer of India from the Company to the Crown gave them, besides the government of the country, enormous and most valuable private estates, and that it depends on them whether these estates shall continue unremunerative, as in the Company's hands, or shall give the English people as proportionately large returns as Java does to Holland. This alternative depends—first, on whether land tenures are to be left confused and conflicting in the same land, or to be defined and limited to the sole ownership of a smaller proportionate share of the area; secondly, whether the cultivation of these Crown lands is to be left to the unaided, and, for want of capital and civilisation, incompetent efforts of native peasants; or whether the cultivation of the same land by the same peasants is to be guided by English energy, knowledge, and experience, and assisted by the improved tools and more efficient and remunerative processes secured by the intelligent application of capital.

"In Java Government supplied the capital which would otherwise not have been forthcoming, but the private enterprise and large means of Manchester and London are sufficient, as soon as the subject is understood, to provide all the capital required for India. In Java the Government had always kept landed rights clearly defined and distinct in a *quasi*-freehold form, so that there was no more difficulty in applying the culture system to Java Crown lands than an English freehold proprietor feels in leasing to a farmer the home farm, which the owner has heretofore been himself cultivating, and in making over to the farmer the farm servants, day labourers, and cottage tenants within the limits of the home farm. In India our confused *quasi* copyhold tenure prevents this being done, in like manner as an English lord of the manor could not so deal with his copyhold tenants' holding. But even there our Government is really regarded by the native tenants as their lord of the manor, and, as such, could, without any complaint, lease to English cotton growers any portion of the large wastes adjoining almost every village, so long as sufficient waste was left for the pasturage of the village cattle and the necessary timber required, which are the only interests that the villagers even pretend to in these wastes.

"With regard to village holdings not waste, the remedy in India is the same as in England, enfranchisement, and the reduction of the conflicting copyhold interests to freehold rights in smaller areas, when each, for the first time, acquires the sole and absolute powers necessary to enable him to cultivate his separate share of the formerly joint property in the most profitable manner. As soon as a similar enfranchisement were effected in India large areas of Crown lands, still bearing a dense cottier tenantry of free labourers, would be available, on large portions of which cotton farmers, with Manchester capital, would soon make England independent of any other country for cotton. The other great impediment—difficulty of transit—would vanish before the requirements of a large body of cotton farmers, and India and England would enter into the close business relations and mutual dependence of producer and consumer, both for the raw material and the manufactured article. The experience of Java shows that, while such would be the mutual benefits to the people both of England and India, these Indian Crown lands would be so directly increased in value by similar improved modes and objects of culture that India, in a few years, could hardly help giving a large surplus revenue to England from the profits of Crown lands alone, without the slightest pressure on the Indian people."

* See *London and China Telegraph*, June 14th.

ENGLISH TRADE WITH CHINA.

The week before last Colonel Sykes, M.P., read a paper before the British Association at Manchester, entitled "Notes on the Progress and Prospects of the Trade of England with China since 1833," of which we present an abstract :—

Whether our past policy towards China has been just or not the extension of our commercial relations with the Chinese is sufficiently remarkable. In 1814 the total amount of imports and exports on British account was about £5,750,000. In 1826 the value exceeded £7,000,000, and for the last five years of the East India Company's monopoly the average value of the company's and the private trade in which they permitted their servants to engage approached to £10,000,000. Since the act of 1833, which deprived the company of their monopoly, a rush of competing interests has increased the trade fully fourfold. In 1856 the value, independent of the opium trade with India, amounted to £17,526,198. The exports exceeded the imports by nearly £4,000,000, which must have been paid to China in silver; but as the balance of trade between India and China has always been in favour of India, the silver from Europe found its way to India through China in payment for opium, and this fact assists to account for the silver which pours into India annually and does not leave the country again. If we pass from this comprehensive view of the trade of the five treaty ports in 1857 to an examination of the enormous increase of the exports from Shanghai for a succession of years, without a commensurate increase of imports, facts present themselves which militate against probabilities. From Shanghai in 1844-45 the export of tea was only 3,800,627 lbs., and the bales of silk, 6,433. The very next year the quantity of tea was quadrupled, and the bales of silk rose to 18,192. An increased export both in tea and silk took place annually, and the year the Rebels took possession of Nanking the export of tea rose to 69,431,000 lbs., and the bales of silk to 28,076. In 1853-54, as might have been expected from the confusion consequent upon the subversion of the Tartar authorities, the export of tea fell to 50,343,847 lbs., but singularly enough, the bales of silk rose to 58,319; but still more singularly, the export of tea rose to the greatest amount it had ever exhibited from Shanghai—namely, 30,221,245 lbs. and the silk to 53,965 bales. From that year the export of tea fluctuated from 39,135,939 lbs. in 1858-59, to 53,463,771 lbs. in 1859-60; the silk, nevertheless, maintained very high figures. In 1856-57 it rose to 92,160 bales, the greatest amount exported in one year; and in 1860 the export had not fallen below 67,874 bales. If we contrast the first and the last of the sixteen years, a marvellous progress had been made in the export trade. Tea had increased more than 1,300 per cent., and silk more than 950 per cent. Looking to the destination of the exports in 1860, it is found that Great Britain took more than one-half the tea, 31,621,204 lbs., but only 19,084 bales of silk. The United States took the next greatest amount of tea, 18,299,388 lbs., so that the Anglo-Saxon race, including our American brethren, would seem to be the greatest tea drinkers, for the rest of the world appears to have taken only about 3,000,000 lbs. America took only 1,554 bales of silk, but 47,099 bales went to the continent of Europe and coastwise. Another report comprised the export trade in tea and silk from the treaty ports of China, except Ningpo, from the year 1843-44 to 1857-58 to Great Britain. The greatest amount of tea in any one of those years sent to Great Britain was 91,931,800 lbs., and 50,489 bales of silk in 130 vessels in 1855-56, chiefly from Canton and Shanghai, although Foo-choo contributed 26,764,700 lbs. The next year 61,468,600 lbs. of tea were sent from the same ports, but silk rose to 74,215 bales in 113 vessels, but in neither year did Foo-choo contribute a bale of silk. In 1857-58 the number of vessels engaged in the trade was 149, and they took 76,744,400 lbs. of tea, and 60,736 bales of silks. Another trade report gives the export for the four months of the season 1860-61, and it would appear that the export of tea has diminished as compared with the nine months of the three preceding years, but that the export of silk has increased from 56,076 to 70,305 bales; France taking but 6,586 of the number. Although an important item in the trade with China could not appear in the official trade reports, in consequence of its having been contraband, I must, nevertheless, give it prominent notice from the great value it bore to the whole trade, independently of any considerations for the political, military, and social results which the persistent efforts to force it into China have effected—I mean opium. The Tartar Government, with extraordinary resolution, have resisted the introduction of opium into China, imposing even the penalty of death upon the parties engaged in smuggling, and this is the more remarkable, as the Tartar authorities were quite alive to the very great revenue they might have derived from its legal introduction. They nevertheless chose to forego this advantage, and even risk hostile collision with us rather than admit it; for whatever the pretext for our wars with China, they really originated in the opium complications and our smuggling transactions. Unhappily it was our interest to stimulate a taste for a luxury which once indulged becomes a constitutional necessity. Even when the Tartar Government was almost paralysed by the capture of Nanking, Sir Henry Pottinger could not get a clause inserted in the treaty of Nanking legalising the traffic in opium, and it was only by the capture by Peking and the complete prostration of the Tartar

Digitized by Google

Government that the object was effected. Difficulties have arisen from the operation of the opium clause, and more formidable impediments come from parties with whom we had not previously been in contact, and the result may be that we may be again involved in wasting our blood and treasure to effect that object with the rebels, or Taipings, which it has cost England so dearly to effect with the Tartars. After noticing at some length the nature of the contests between the rebels and the Tartars, the gallant colonel concluded by saying:—I can only consider the question in relation to the prospects of British trade with China. The expenditure of British blood and treasure in three successful wars have extorted from the Tartars all the facilities that the British trader desired to have, leaving, however, in Tartar breasts a burning resentment at the degradation of the Imperial Government, and in Tartar officials a manifest disposition to obstructive subterfuges in carrying out the treaty of Tien-tsin. The Taipings, or Rebels, on their part, issue proclamations professing amity for foreigners, calling them Christian brethren, and inviting them to enter into commercial relations, but with one exception. The traffic in opium they denounce as a religious ordinance, and threaten the penalty of death to those who engage in it. The taxpayers of England will, therefore, have to determine whether we are to tread in our former steps, and for one article of commerce waste life and money to force upon a reluctant people for selfish gain a deleterious product, while at the same time we crush a national movement to throw off a foreign oppression, which under analagous circumstances in Europe has had our warmest sympathy, and at the success of which all free men rejoice.

Literature.

About five years ago M. Sinibaldo de Mas, Minister Plenipotentiary of the Queen of Spain in China, published a small volume or pamphlet entitled "L'Angleterre, la Chine et L'Inde," in which he endeavoured to show that the hatred manifested towards foreigners in Canton and in other parts of China, did not show the real feeling of the Chinese, but was the result of underhand dealing on the part of the Mantchu Dynasty. Many important events have occurred in the Far East since 1857, and the author of this *brochure* judged correctly in thinking that it would be well to take a more extended survey of Eastern politics in their relation to European Powers. The result is the publication in two volumes of a work entitled "La Chine et les Puissances Chrétiennes," which has just reached us. We shall give a notice of it in a future issue: at present we can only say that judging from the table of contents, and from a hasty glance at the work, we expect considerable pleasure in its perusal. It is published at Paris by Hachette and Co.

We have never been able to give that praise to Mr. Atkinson's "Travels in the Regions of the Upper and Lower Amoor" which has been awarded to him in other periodicals. Mr. Atkinson was undoubtedly a man of great energy and ability, and it may seem invidious now that he is gone to disinter his faults. Such a task is not pleasant, but it is, unfortunately, necessary. Many of our leading journals in noticing the death of this enterprising traveller have said that for our knowledge of the Amoor we are indebted principally to his work, and that his personal investigations in that region, while charmingly described, may be thoroughly relied on. In fact, Mr. Atkinson is regarded by these writers as an authority on all matters relating to the Amoor. This opinion, if erroneous, calls for special refutation in our journal, and that it is erroneous we think the following facts will prove. In Mr. Atkinson's imposing volume, scarcely one hundred pages are devoted to the Amoor at all, and these are little better than an extract from Mr. Maack's volume published in 1859, by the Russian Geographical Society.

This, no doubt, is the work referred to in the preface as "recently published by the Russian Government," and the portraits of natives contained in Mr. Atkinson's book are copied from it. This, indeed, he admits; but we find that the group of hunting dogs (p. 499) is derived from the same source, and the frontispiece, purporting to be a view west of the Khingan mountains, by some remarkable coincidence has all the appearance of being compiled from Plates 4, 5, and 11 of Maack's work, representing respectively a view above the Khingan, one below it, and Manguns in a boat. In fact, we find combined here within the compass of a single picture, scenery lying 300 miles apart. The only original feature is a large tree on the left. The two other views referring to the Amoor contained in Mr. Atkinson's volume are not derived from Maack's work; their authenticity, under the circumstances, may, however, be doubted.

The first question to be asked is, when did these alleged "Travels on the Amoor" take place, for, strange to say, Mr. Atkinson has carefully avoided mentioning any dates? In 1858 he published his "Oriental and Western Siberia;" Narrative of Seven Years' Adventures and Explorations." This work gives not a single date, but from the "Travels on the Amoor" we learn that the author was in 1847 at Bisk, preparing to enter the Mongolian steppes, a journey described in his first work. We may conclude from this that the seven years' explorations extended at latest to 1853, that is from 1847 to 1853. According to the route map appended to the first work Mr. Atkinson did not then approach to within 500 miles of the Amoor, nor is it likely he descended the Amoor previous to 1853, for the first Government expedition only started in 1854. It was, however, possible that Mr. Atkinson might have visited the Amoor subsequently to the publication of his first work, that is between 1858 and 1860. It would have been possible in the course of eighteen months to proceed through Siberia, descend the Amoor, and return to Europe by sea. But this supposition is as little tenable as the former. In 1858 the Russians occupied nearly 100 stations along the course of the river, the towns of Blagovesh-chensk, Khabarooka, and Sofyevsk, had been found by Count Muravief, and five steamers and numerous barges navigated the Amoor. Of all this Atkinson tells us nothing. The only stations he mentions are Mariinsk, Mikhailoosk and Nikolayevsk, all of which existed in 1855, that is the time when Maack descended the river. The fact of Mr. Atkinson's account being a mere abstract of Maack, added to in a few instances, but generally to the detriment of the original, is easily perceptible. On page 125 Maack gives a series of meteorological observations; in Mr. Atkinson's work, p. 447, we find the same figures, and not even the date of the month has been changed to the Gregorian calendar. Mr. Maack relates the death of the Romish missionaries de la Bruniere and Venault; Mr. Atkinson follows suit without deeming it worth while to inquire into the truth of this statement, which he might have done easily by reference to the "Annals of the Propagation of the Faith," published in London.

In several instances historical reminiscences dispersed through the work have been embellished by Mr. Atkinson's pen; in others mistakes are made which betoken ignorance or inattention. For instance, in referring to a man named Beiton who played an important part in the early wars between the Russians and Chinese, Mr. Atkinson affirms, "on the best authority" that he was an Englishman, whereas the *best authority* on the point is derived from some old documents brought to light by Muller, which affirm that Breton was a German nobleman in the service of Poland. Another and amusing error into which Mr. Atkinson has fallen is his belief that the word "Tusemtz" stands for a particular tribe, when a reference to a Russian dictionary would have shown him that it means "native." Many other errors more or less important might be added to those we have mentioned, but we have said enough to prove that Mr. Atkinson's book, however well written, can never be looked upon as an authority on the regions of the Amoor.

Spirit of the Press.

THE OPIUM TRADE.

A considerable fall in the opium revenue is anticipated. Sir Bartle Frere estimates the loss in Bengal at £685,000, and in Bombay at £265,000, or a total of £950,000. This has mainly arisen from the cost of cultivation having been increased by one-fourth. In fact, since 1854, there has been a general rise of prices throughout the greater part of India, of which we have the most convincing proof in the military returns—an unusual number of sepoys willingly accepting their discharge, as they could gain more as labourers than they received as pay. The ratio of wages for the culture of the poppy was 6s. 6d. in 1854; it has now risen to 10s., and the tendency is to augmentation. This sufficiently accounts for the decline in the opium revenue, which, excepting for medical purposes, is only grown for exportation to China, and the settlements of Penang, Singapore, and Malacca. Some chests are also purchased by the Dutch Government; and, by a treaty between Great Britain and Siam, opium is imported, free of duty, into that country. The culture of this drug was always a monopoly in the hands of the East India Company, and they retained it after the Charter of 1833, which deprived them of all their commercial and trading privileges, in defiance of the spirit of the Act of 3rd and 4th William IV. The reason assigned was, that it was a source of revenue, and, therefore, a fiscal, instead of a commercial, operation; but this was deemed a sophism by free-traders, whose objections, however, were overruled. The plan was this—the Company advanced money, or, in reality, wages to the ryots, binding them to deliver the juice to the Company, by whose servants it was conveyed to the factories, and there manufactured. Other servants forwarded it to Calcutta, where it was sold by public auction, and the excess of the sale prices over the cost of production constituted the profit, which was estimated as public revenue. Now that the Company is abolished, and India is placed under Parliamentary Government, a question may arise whether this monopoly ought to be continued. Mr. St. George Tucker, a zealous advocate of the Company, in the memorable letter he addressed to Mr. Canning, con-

Digitized by Google

demned the system, observing that "the Chinese are certainly made to pay very dearly for our opium, but they in return make us pay very dearly for their teas;" and it is clear that the British consumers of tea are thus indirectly made to pay an additional price for the article that has become a necessary of life, and is one of the few luxuries of our poorer classes. There is another point of view under which the commerce of this drug is to be considered. The Chinese export to England tea and silk to a large amount, without taking anything approaching to a corresponding amount of British manufacture in return. They receive payment for these exports to a great extent in the 70,000 chests of opium, which, on an average, they annually import. It is, therefore, in reality the British importer of tea and silk who provides the opium, for which he must pay India in merchandise or bullion. The drug, therefore, plays a considerable part in Indian finance, though the amount, of course, fluctuates. Thus, in 1847, the revenue derived from it was £2,700,000; in 1856 it had increased to £4,871,227; and for the financial year ending 30th April, 1860, it amounted to £6,071,022. It is, however, a precarious source of income, tainted with the immorality of illicit traffic—and it led to our first war with China. The drug destroys the health and shortens the life of the smoker, and it is clear that, as its use extends, the money expended on it is a deduction from what would otherwise be laid out in the purchase of our manufactures. That it is a contraband trade is notorious, and the fact of the opium being made up in balls, according to Chinese weights, clearly points to the destination of the commodity.—*Morning Chronicle.*

Monetary and Commercial.

The Bank directors have lowered the minimum rate of discount to 4 per cent., and it is probable that they may have to make another early reduction, as the money market is remarkably easy. The current rate in Lombard-street for good bills is 3⅝ to 3¾ per cent. Although the money market just now is very easy, and likely to be more so, the rate will assuredly go up during the winter, and mercantile difficulties are looked for with uneasy apprehension.

Gold continues to flow into the Bank, swelling its reserves of notes and bullion and preparing the way for the anticipated reduction in the rate. The only drawback is the chance of renewed shipments of gold to America. The general movements of the precious metals, however, are in favour of this country. That commercial and monetary affairs in America are approaching a crisis of considerable magnitude there cannot be a doubt. Business between the North and South is completely suspended, with a repudiation of all debts due by the South to the North. This, with the heavy expenditure of the war, is disorganising both financial and mercantile affairs, and a crash cannot be long delayed.

The spirit of the Northern merchants seems broken, and everyone expresses himself as if the present condition of affairs must soon lead to a convulsion that may alter all the calculations of politicians. The high duties have nearly stopped all business, except such as arises out of the wasteful demands of war, and the credit of the trading community is so much shaken, and the future is considered to be so dark, that there are few who will enter upon any transactions, except for cash. It was expected that the announcement of the Government having succeeded in obtaining a loan of £10,000,000 from the associated banks would for the moment have created a better feeling, but it had wholly failed to do so, and at the departure of the mail everything seemed at the worst. The option granted to the banks to contract for the remaining £20,000,000 that must be obtained before December is not connected with any guarantee that they will actually supply it. The virtual suspension of the *Habeas Corpus* Act has created general alarm, and it is found that no one can leave the country without a passport. Many people are sending money to Europe for safety. Bills on London were in demand, and the leading banking firms had put their rate up to 107¾.

The general rates of discount on the Continent remain without much alteration, except at Paris, where the grain importations have caused money to be in demand at 4¼ to ½ per cent. At Hamburg the charge is 2½ per cent., at Frankfort 2 per cent., at Amsterdam 3 per cent., at Berlin 4 per cent., and at Vienna 5 per cent. At Brussels the bank rate was raised to 4 per cent.

The stock markets are all very much better than of late. The easy state of the money market and the abundance of capital is at last forcing people to find investments on the Stock Exchange. The English funds and railway shares—in fact everything is buoyant, with an active business. Consols have touched 93⅝ ¼ for money and account, being a rise of 3 per cent. for the month. The India Loan touched 104¼ ½. Foreign securities are all more or less better, and railway shares have revived from £1 to £4 and £5.

Cape of Good Hope debentures and all other Colonial Government bonds have been in demand lately at a rise of from 1 to 3 per cent.

The Eastern Steam Navigation Company are about to raise £20,000 on debentures of £50 each, for three years, at six per cent. interest.

BOARD OF TRADE RETURNS.

The first six months of 1860 and 1861 show the totals of exports of British and Irish produce and manufactures to have been to foreign countries and British possessions, respectively, £62,019,989 and £60,143,425; or a falling off to the extent of £1,876,564 in the current years, of which £548,300 is the decrease of exports to British possessions. To the East Indies alone the decrease is £461,463, and to Singapore £291,748, and to Australia, £192,138, whilst British North America, Guiana, Mauritius, &c., show an increase more or less.

To China, the exports during the half-year amounted to £3,204,245; Siam, £14,516; Java, £586,046; Philippine Islands, £473,656 (against £182,110 in 1860); Singapore, £554,224; Ceylon, £309,503, and the East Indies, £7,764,044.

To foreign countries the greatest diminution took place in our exports to the United States, which from £9,366,647 in 1860 fell to £5,295,077 in 1861, being a decrease of £4,071,570. The decrease in our exports to Turkey is £1,257,067 in 1861; to a few other countries the decrease has been trifling, whilst on the other hand the increase has been general to most of them, as to France, £818,520, the total export to that country having been £3,142,185, against £2,329,665 in the first half-year of 1860. Spain, Portugal, Denmark, Holland, and Belgium, even Mexico, &c., have been better customers; but to the Hanse Towns our exports have fallen from £5,252,244 in 1860 to 4,188,818 in 1861, being a decrease of £1,043,426, which, however, is less when we take the total exports to Germany, including Austria, and which amounted in the first six months of 1860 to £6,790,901, and the same period of 1861 to £6,150,271, so that Germany is now, since the falling off in our exports to the United States, with the sole exception of the East Indies, our best customer.

For the seven months ending 31st July the exports of some of the principal British manufactures and produce have been to the Far East, viz., to China:—

Cottons: 177,037,263 yards in 1861, against 102,351,015 yards in same period 1859, and 120,838,790 yards in 1860; valued at £2,284,839 in 1861, against £1,419,569 in 1859, and £1,800,385 in 1860.

Cotton yarn: The exports during the month of July were insignificant as compared with the exports during the same months in 1859 and 1860,—having been only 40,000 lbs. against 1,278,939, and 387,800 in 1859 and 1860. For the seven months, however, we have an increase in the year 1860, the quantities having been in pounds, in 1859, 6,060,639; in 1860, 4,717,462; and in 1861, 5,331,530; valued at £280,801, £231,049, and £240,042.

Lead shows still an increased demand, the quantities exported having been, in tons, in 1856, 2,199, and 3,551, valued at £41,056, £49,773, and £77,934, in 1859, 1860, and 1861.

Woollens show an increase in the quantities but not in the value; the pieces exported were 44,739, 61,221, and 66,450; valued at £209,749, £325,305, and £289,762, in 1859, 1860, and 1861.

Worsted Stuffs have been sent in 1859, pieces, 65,249, against 48,347 and 55,072 in 1860 and 1861; valued at £157,711, £311,490, and £227,658.

The value of these five items is £3,120,235, being more than the total value of annual exports, during any of the years to 1858 inclusive.

To Java the export of cottons has been in yards, 30,479,319, 40,588,925, and 29,554,735, valued at £447,675, £633,560, and £447,572, in 1859, 1860, and 1861.

To the Philippine Islands the increase of the exported cotton goods has been great. We exported in 1859, 1860, and 1861 respectively, yards, 12,501,146, 7,887,217, and 25,541,541, valued at £183,430 £121,178, and £424,432.

To Singapore during the seven months of 1861 we exported cotton goods, yards 28,656,453, valued at £393,710, and cotton yarn, lbs. 1,204,578, worth £77,781; and to Ceylon, cottons, yards 12,493,870, valued at £215,102, and yarns, 106,150lbs., of £8,022 value.

To the British East Indies the cottons exported in 1861 were 410,110,835 yards, valued at £4,979,930, and of yarn the quantity was 13,931,315lbs., worth £814,789.

The total exports of cottons, such as calicoes, cambrics, muslins, fustians, and mixed stuffs, was £21,117,913, of which the countries in the East, abovenamed, took to the extent of £8,745,585 during the first seven months of 1861.

The other cottons exported, such as lace, stockings, counter jeans, and small wares, and thread for sewing, amounted to £815,085; but how much of this went to the East the Board of Trade Returns do not show.

A half-yearly meeting of the Ottoman Bank has been held, Mr. H. A. Bruce, M.P., in the chair, when the report, recommending a dividend at the rate of 8 per cent. per annum, free of Income-tax, was adopted unanimously. It was stated that the past year has been one of great commercial depression, which has especially pressed upon Turkey. In that country there has not only been financial distress, but disturbances both religious and political, and also foreign intervention. The business of the bank has consequently been restricted, and the profits proportionably lessened, but the period has nevertheless been productive of valuable experience.

On the present state of affairs in Mexico the city article of *The Times* has the following:—"The news from Mexico is the most favourable that, under the circumstances, could have been

Digitized by Google

hoped, since it announces that the Mexican Government and Congress, by attempting new acts of spoliation, have at length caused the representatives of France and England to break off diplomatic intercourse, preparatory, it may be assumed, to more vigorous measures. As the Mexican importations this year are believed to have nearly doubled those of 1860, the proportion of the duties belonging to the British creditors would have gone far towards paying the interest of their claims, and it is simply a question whether the robbery of these duties shall continue, or whether the British Government will order the ships of war stationed at Vera Cruz to insist upon their collection. Although the annual loss to this country is £300,000, the indifference manifested by our Foreign-office during the last three years to the personal and pecuniary outrages inflicted on British subjects has been such as to lead the Mexicans to rely upon perfect impunity, and it is probable that but for the determination of France not to tolerate any longer the existing state of affairs, our people would still have clamoured in vain for protection and redress. Hitherto the United States have interfered as far as possible to prevent any concerted action that might place the Republic in a position of respectability and strength, their avowed policy having been to contrive that the nation should 'drink the cup of anarchy to the very dregs,' until it should fall to them without a struggle. But these influences are now at an end, at the very moment when the fruit is ready to drop, and there is good ground to hope that the present year will not close without the removal of the disgrace inflicted on the humanity and civilisation of all the countries of the world by the fact of their permitting the horrors of the last three years to continue. Bad as were the outrages of the Chinese, they never exceeded those which, month by month, have been perpetrated on English subjects and other foreigners in Mexico."

The wise policy of working short time as a precaution against the contingencies of the cotton supply, and of the glutted state of distant markets for manufactured goods, continues to make progress. According to the *Manchester Guardian* several spinning and weaving establishments at Staleybridge, Oldham, Preston, Blackburn, Burnley, and Clitheroe have limited their operations to four days a week.

The amount of bullion by the steamer *Ceylon*, from Southampton, of the 4th inst., was—Gold: To Alexandria, £16,000; Madras, £849. Silver: Hong Kong, £2,900; Foo-chow-Foo, £2,000; Shanghai, £32,160. Total—Gold, £16,849; silver, £37,060.

ARTICLES OF IMPORT.

TEA.—Latterly there has been a marked improvement in the tone of the market, with a slight re-action in prices. The really fine weather, and prospect of a fair out-turn of the harvest, with a further reduction in the Bank rate to 4 per cent., has imparted confidence to the trade, who have bought more freely; whilst of Tayshan Congous, and low to good common qualities, there have been some speculative purchases, which has strengthened the position of these kinds. The sales of low to fair common Congou, at public auction, at prices varying from 7d. to 10d. per lb., led to some inquiry, partly for speculation and partly for export, and a considerable quantity has changed hands. Good common we still quote 10½d. to 11d. per lb., with a moderate demand; fair flavoury kinds have sold irregularly, and at very low prices, from which we now quote a recovery of about ½d. to 1d. per lb. Common to good Ho-Hows have been much depressed, but latterly have been in demand at an advance of about 1d. per lb. Good Ning Chows and second-class Monings and Wopaks are now wanted at fully former prices. Good and fine Kaisows remain much as before; of finest there are but few on offer, and the trade are now looking for the new arrivals, which may be shortly expected. Fine Monings and Wopaks have been in fair demand at former prices. In Tayshan Congous there have been extensive purchases, and prices show an advance of about 1d. per lb. from the lowest point. In Souchong, there has been but little doing. Oolongs of all kinds but fine have been much depressed, and sales made at very low prices. Flowery Pekoes have been sold at public auction at irregular but very low prices, which has led to a speculative inquiry, in the face of the alteration of the Russian tariff, and prices have rallied a little for grades under 1s. 6d. per lb. Low and common Scented Capers have been heavy of sale at the former quotations as also common to fair Scented Orange Pekoes; good and fine, especially Capers, are very scarce, and would command full prices. Foo-Chow kinds show no material alteration. Uncoloured Japan teas were taken freely but at low prices, owing to the great scarcity of Green tea, both for home Consumption and export. Latterly the demand has caused an advance of 1d, to 2d. per lb. Green teas have become very scarce; the demand for export has taken off nearly all on offer at still higher prices than before, and the stock on the market is almost exhausted. The Glencoe has arrived, but her teas are not yet on show, but are expected to realise very extreme prices. There have been four public sales during the month, comprising 76,600 packages, of which 39,300 packages found buyers, including 31,400 packages offered without reserve, and 2,360 packages Assam growth. The stock on the 1st of September of all descriptions of Black was, in London, 50,566,949 lbs., and of Green, 3,127,810 lbs. The total delivery was 49,182,421 lbs. of Black, and 7,069,406 lbs. of Green. The stock at Liverpool was, of Black, 3,554,891 lbs., and of Green, 42,076 lbs. The total delivery of Black was 5,190,100 lbs., and of Green, 406,894 lbs. The imports in London to the 1st of September have been, of Black, 53,759 664 lbs., and 4,084,742 lbs. of Green; at Liverpool, of Black, 6,633,937 lbs., and of Green, 417,983 lbs. According to the Circular of Messrs. Mitchell, Aspinall, and Skipper, the amount of Tea afloat at the present time is 14,589,026 lbs., against 12,365,141 lbs. at the same period in 1860.

SILK.—We have had another fortnight of miserably quiet business in silk—with deliveries even smaller than in July, marking that manufacturers both here and on the Continent continue to diminish their production; still the mills, and even some portion of the looms, are going to some extent, and buyers have so completely used up their stocks, that from day to day they are obliged to come to market for the little they require. Of China silk we have a second steamer with new silk; a small quantity, but more than is taken off. We fear it is rather bad trade than bad quality that prevents the silk being sold. We doubt the silk being worse than last year, and thus far, at any rate, it is finer in size. In Japan silk some considerable parcels have been sold at low prices: this silk still comes forward in very uncomfortably small breaks. Bengal silk, as shown by the deliveries, continues much neglected—Chinese thrown silk entirely so. In Italian silk some few bales are sold occasionally; the low prices, in comparison with former years, inducing manufacturers to try to turn them to account.

SUGAR.—The market during the past fortnight has become rather dull, and prices are without any alteration. 143 bags good brown Penang sold at 31s. 6d. to 32s.; 2,734 bags have since met with only languid biddings, and barely one-third has been sold, brown and low grey 33s. to 34s., low middling yellow 36s. 6d. to 37s.; 1,910 bags Singapore were greater part sold, low to fine brown 29s. 6d. to 33s. 6d.; 243 baskets Batavia were bought in, grey 38s. to 40s., brown 35s. to 36s.

COFFEE.—A firmness for colonial sorts still continues, and parcels on the spot have continued in good request. Common Mysore has been sold at 99s. to 104s., Munzerabad at 80s. to 92s., and Neilgherry at 86s. to 89s.

RICE.—Great firmness is still exhibited in this market, and considerable sales both on the spot, and afloat, have taken place at stiffer prices, particularly for Bengal kinds. 1,500 tons Bassein sold at 10s. 3d. 760 bags fair new were realised at 10s.

PEPPER.—The public sales of Penang has cleared off nearly all the late liberal supply. 332 bags brought firm prices—fair dark, 3¼d. to 3⅜d. 400 bags common Penang and Singapore have also been sold at 5⅜d. to 5½d.

SAGO.—Very firm, and 376 packages at auction sold at 17s. to 19s. per cwt. for ordinary to middling large. Privately, moderate transactions have taken place up to 23s. for fine.

FLOUR.—Quiet. 7,260 bags of recent importation offered at auction, and all retired at 16s. to 16s. 6d. per cwt.; since selling privately at 16s. for middling.

SPICES.—Cinnamon: Trade rather limited at, first 1s. 5d. to 2s. 2d.; seconds. 1s. 1d. to 1s. 6d.; thirds, 11d. to 1s. 3d., and fourth, 8d. to 10d. Cassia Lignea: Quiet, but without further reduction; trade very limited. Of Cassia Vera 322 packages brought to the hammer, and half sold at 55s. to 56s. per cwt. for fine, with flavour. Cassia Buds continue very scarce; stiff prices ruling. Cloves: Steady. 13 cases of Penang at auction, three-fourths sold at 1s. 1¼d. to 1s. 2¼d. per lb. for fair to good. Mace: Rather cheaper. 20 cases Penang sold 1s. 3d. for fair palish, and 7d. to 10d. for low and ordinary red and reddish. Nutmegs: No improvements. Of 40 cases Penang, half sold at 11d. to 1s. 3d.

Digitized by Google

HEMP.—At auction the sales have been unimportant, and privately a limited business has been done at about previous rates.

COTTON.—This market has again been very buoyant, and rates have further advanced ¼d. per lb. The business done has embraced good fair new Broach at 6¾d.; good fair new Dhollera, 6½d.; middling to fully fair old, 5¼d. to 6¼d.; middling fair to good fair new Oomrawuttee, 5⅝d. to 6 5-16d.; middling fair to good fair Compta, 5½d. to 5¾d.; Sawginned, 7d. to 7¼d.

JAPAN WAX.—100 cases at auction were sold at 58s. for good block. Saucer is quoted at 65s. to 72s. 6d.

TOBACCO.—In Java sorts there is very little on sale, and good qualities are wanted.

TIN.—A decided improvement has taken place in the value of this metal: considerable business done at advancing prices. The price of English has been raised £3 per ton.

GAMBIER.—The recent advance has been well maintained, and 17s. 6d. has been paid in some instances. No auctions have been held, but privately considerable operations. CUTCH.—Some improvement: 1,105 bags at auction all placed at 22s. 6d. to 23s. 6d.

MISCELLANEOUS.—India-rubber: Limited business at 1s. 2d. to 1s. 2½d. Camphor: This drug continues quiescent. Sapanwood: Firm; of 71 tons Manila one-third sold at £6. 10s. to £8. Soy: steady; 50 hhds. at auction sold at 2s. to 2s. 1d. Mother-o'-pearl Shells: 97 cases Manila at auction, all retired. Star Anniseed: Very quiet, and no sales. Sticlac: No inquiry, and very scarce. Gum Benjamin: Of 24 cases at auction, half sold at £5. 7s. 6d. to £6 per cwt. for third Sumatra, and 30s. to 50s. low. Damar: Higher prices have been recently obtained for good quality, which is scarce and wanted; 84 cases at auction, chiefly sold at 36s. 6d. to 37s. per cwt. for middling in sorts. Gambouge: Flat. Auctions confined to 12 cases, and those not sold. Rattans: Steady. 22,769 bundles Singapore and Penang sold at 1s. 7d. to 6s. 6d. per 100. Saltpetre: Rates lower, especially for Bengal. Gutta Percha: Slack. Sales at 5d. to 1s. for inferior boiled, to fair genuine. Rape seed: Very firm prices, 6d. to 1s. per quarter higher. Elephants' teeth: No sales. Vermillion: Firm, at 2s. 1d. to 2s. 2d. Galangal root: Still quiet, and no business. Cubebs: Sales at £7. 10s.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. 0d. nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £8. 15s. to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, 11d.; yellow metal, 9¼d.

TIN.—117s. for block; 118s. for bar. Tin plates, best charcoal, I.C., 28s. to 28s. 6d. per box.

LEAD.—English pig, £19. 5s. to £21. 10s.; shot, patent, £23. 5s.; sheet, £20. 5s. to £20. 10s.; spelter, £18. 2s. 6d. to £18s. 5s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA. &c.

MANCHESTER MARKETS.

The market has been rather more inactive, and in various departments the quietude and weakness seem to have increased during the last day or two. In yarns there is rather more pressure to sell in some quarters than was previously the case, and the tendency of prices is towards a decline, but still there is a good deal of firmness on the part of spinners generally, who are not overburdened with stock, and prefer to hold out for full rates rather than consent to any abatement while the cotton market remains so stiff. The sales are of very limited amount, but are mostly at full current prices. The lower qualities of 20's to 28s warps and 32's cop-twist for the home trade are rather more freely offered, and, though the quotations are unaltered, buyers have realised a slight advantage in a few cases. Spinners are turning their attention to short time working. There has been but little inquiry for any description of piece goods. Fabrics adapted for India and China continue to decline in price, the latest telegrams from Bombay and Calcutta reporting unfavourably of those markets and from the interior. For most other kinds of cloth business here is flat, but prices are nominally steady. It is hoped that the market will be beneficially affected by the curtailment of production which has lately commenced.

COMMERCIAL POSTSCRIPT.

CITY, MONDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN THE TABLE.—September 9, at Falmouth, from Akyab, Stanislaus, Bride, Reinhardt; from Rangoon, Evadne; 9, at London, from Akyab, Hurricane; 8, at Liverpool, from Rangoon, Viscount Sandon; 10, at Liverpool, from Singapore, Champion, Crisis; from Rangoon, Kedgeree, Douglas; 8, at Falmouth, from Akyab, Stanislaus, Reinhard, Bride; from Rangoon, Evadne; at Liverpool, from Rangoon, Viscount Sandon; off Beachy Head, from Akyab, Elizabeth; off St. Katherine's Point, from Rangoon, Japan; at Texel, from Samarang, Zee Nimph; 5, at Texel, from Batavia, Lamina, Elizabeth; 6, at Texel, from Akyab, Amalia Augusta; at Brouwershaven, from Batavia, Maarten van Rossem; from Pasaroeang, Victoria; 7, at Ramsgate, from Sourabaya, Maria; off Plymouth, from Maulmain, Kate; 9, at Portsmouth, from Maulmain, Northland; at Helvoet, from Rangoon, d'Elmina; from Batavia, Princess Charlotte; at Falmouth, from Akyab, Douglas; 10, at Liverpool, from Singapore, Champion, Crisis, Skiddaw; from Rangoon, Kedgeree, Douglas; 11, at Helvoet, from Akyab, Albert and Victor; at Queenstown, from Maulmain, Ann Adamson; 12, at Falmouth, from Rangoon, Alt, Meckenberg, Seringapatam; from Akyab, Sarah Scott; off Falmouth, from Akyab, Maleyer; from China, Excelsior; 13, at Falmouth, from Akyab, Eskdale; at Liverpoo, from Akyab, Naomi; 12, off Torbay, from Batavia, Christine and Jeannette; off Falmouth, from Akyab, Alice, Aristides.

DEPARTURES.—September 6, from Cardiff, for Singapore, Gerardus Jacobus; 8, from Cardiff, for Manila, Tornado; 9, from Cardiff, for Singapore, Gerardus Jacobus; from Shields, for Hong Kong, Flatworth; 10, from London, for Hong Kong, Violet; from Singapore, via Sunderland, Cosmo; from Cardiff, for Hong Kong, Havering, Ville de Dieppe; 11, from Cardiff, for Hong Kong, Mary; from Clyde, for Batavia, Fanny; 13, from off Dover, for Batavia, Medea.

The Jan Van Schaffelaar, Verbeck, from Batavia for Holland, which arrived at Mauritius 12th July, had experienced hard gales off the Cape, in which she sprung a leak, damaged her rudder, and sprung her foremast.

The Reinhardt, which arrived at Falmouth, Sept. 8, from Akyab, had thrown part of her cargo (rice) overboard.

The Wilhelmina Lucia, Nolles, which arrived at Mauritius, July 31, from Batavia for Holland, had experienced very bad weather, sprung a leak, lost sails, &c., and sprung fore and mizen masts.

MARIA, from Sourabaya, June 2, 30 S., 42 E.

EXPECTED.

From CHINA.—At London: Chilo, Lady Ann, Northern Cross, Petchelee, Egmont, Strathallan, Shantung, Panic, Ziba, Golden Eagle, Sir Ralph Abercrombie, Carribean, Glenclune, Ellen Rodger, Falcon, Fiery Cross, Flying Spur, Geelong, Beemah, Hafis, Veronica, C. S. Lemon, Banian. At Liverpool: Robin Hood. At Outports: Henry Moore, Eloise, Fadres Minde.

From SINGAPORE.—At London: Robert Small, Peter Symons, Procymatia, Britannia, Granville, Weymouth. At Liverpool: Crisis, Champion, Panic, Excelsior, Primula, Kamehaha IV., Christopher Newton, Mayola, Tigris, Canadian. At Outports: America, Commerce, Elizabeth, Australia.

From MANILA.—At London: Kate, Regina Maris, Zealandia. At Liverpool: G. B. Carr, Julia, Pepita, Soberana, Ashmore. At Falmouth: Nueva, Engracia. At Cork: Roebuck, Victor Emmanuel Marchioness of Londonderry.

From PENANG.—At London: America, Parsee, Sirocco, William and Jane, Norwood, Pilgrim.

From BATAVIA.—At Liverpool: Kerr. At London: Shantung. At England: Therese.

FREIGHTS AND CHARTERS.

Freights continue very depressed, and the amount of tonnage in search of employment considerably exceeds, in most branches of trade, the demand. During the last week a tender was accepted for 140 tons of rope on account of the India-office, at the low rate of freight of 11s. 10d. per ton delivered at Bombay, and goods from Manchester have actually been taken, *via* London, for that port at 20s. per ton, inclusive of railway charges; even at these unusually low rates the highest class of vessels alone are available. The shipment of coals to the East continues on a very limited scale, but vessels can still be placed at our quotations to Bombay, Manila, Penang, and China. There is little doing on the berth to the Australian ports, and rates may be quoted lower than they have been for some time past. The Government Emigrants for Moreton Bay were taken at the very low rates of £12. 18s. 4d. per head. Coal freights are rather lower to the Mediterranean ports, but there is a good demand for tonnage.

Current Rates Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

CASUALTIES.

St. Helena, July 30.—The Johanna Maria Wilhelma, from Batavia to Rotterdam, put in here, July 12, leaky, having experienced bad weather. She has also lost jibboom, &c., and sustained other damage by collision. Part of cargo will be discharged to bring the leak above water, and some temporary repairs effected here. July 31.—About 200 tons of cargo have been discharged, and the leak brought above water.

Amsterdam, August 28.—The Proteus Bakker, which arrived at Texel from Sourabaya, August 25, had sustained damage.

The Schlosser Kahle, from Liverpool for Batavia, put into Rio Janeiro, August 6, leaky.

The T. D. Marshall, from Java for Hamburg, put into Porto Praya August 17, with master (Craigie) and some of the crew sick. The master died, and she proceeded to sea under command of the mate, but was, at the entrance of the port, carried by the current into danger, from which she was extricated by the harbour master and captain of the port, who had the vessel towed from the rocks.

Corunna, August 26.—The Live Yankee, from Cardiff to Shanghai, stranded at St. Coswell, July 5, went to pieces, and the whole of the cargo was lost.

Deal, September 5.—The Canton from Japan, and Jesusa from Havana, arrived in the Downs, came in contact whilst at anchor, and sustained considerable damage; the former lost anchor.

The Sultan Berry, which arrived at New York August 22 from Manila, had experienced very heavy weather for twenty-one days off the Cape of Good Hope, during which she sprung mainmast and maintopmast, split sails, and received other damage, and lost a man overboard.

At ST. HELENA.—July 11, Nieuw Holland, Tak, and sailed 12 for Amsterdam. 12, Victoria, Forss, from Java, and sailed for Rotterdam. 13, Jannetje, Lupeke, from Batavia, and sailed 13 for Rotterdam. 14, Johannes Lodewyk, v. d. Waal, from Batavia, and sailed 16 for Rotterdam; Henrietta Maria, Zjebbes, from Batavia, and sailed 16 for Amsterdam. 15, Prinses Charlotte, Hille, from Batavia, and sailed 18 for Rotterdam; Maarten van Rossem, Byken, from Batavia, and sailed 17 for Rotterdam; Christine and Jeannette, from Batavia, and sailed 17 for Amsterdam; Augusta Sanderberg, from Batavia, and Antoinette Seraphine, Victor, from Sourabaya, and both sailed 18 for Amsterdam. 16, Champion, Mayo, from Singapore, and sailed 17 for Liverpool. 18, Crisis, Wolf, from Singapore, and sailed for Liverpool. 19, Paul Johan, Kooy, from Batavia, and sailed for Schiedam; Shantung, Baldry, from Macao, and sailed 20 for London. 20, G. B. Carr, from Batavia, and sailed 23 for Liverpool; Strathmore, Mann, from Whampoa, and sailed for London. 22, Lord Clarendon, Cameron, from Ningpo. 23, Louis Cezard, Thomas, from Padang, and sailed 24 for Havre; Lammina Elizabeth, Gersen, from Batavia, and sailed for Amsterdam. 24, Shanghai, Uitermark, from Batavia, and sailed 27 for Amsterdam.

At TABLE BAY.—June 30, Glencoe, Hutton, from Shanghai, and sailed July 2 for London. 15, Hankow (s.), Sands, from New York, and sailed 16 for China.

SIMON'S BAY.—June 22, Falcon, Sullivan, sailed for Hong Kong.

HOLLOWAY'S PILLS.—BILIOUSNESS, SICK HEADACHE, LOW SPIRITS.—The stomach becomes deranged from many causes; the consequence is that the bile gets into the blood, and produces nausea, headache, and depression of spirits. These disagreeable symptoms are speedily relieved by Holloway's Pills, which regulate the functions of the stomach, restore the appetite, act healthily on the liver and kidneys, correct every secretion, purify the blood, and expel all unwholesome matter from the system. These excellent Pills ensure the production of healthy gastric juice, without which digestion cannot naturally take place. Thus they remove the foundation of innumerable complaints, acting as gentle alteratives, at the same time giving general tone and renewed vigour both to the muscular and nervous fibres.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street Piccadilly, London.
Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1885.
The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.
Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
THE WORK SOLD BY HINNAM, QUEEN'S ROAD HONG KONG.

"An admirable sewing machine."—Times.

„Ladies will be delighted with it."—Clifton Chronicle. "Five or six pocket handkerchiefs may be hemmed by this unique machine in nearly as many minutes."—Manchester Guardian.

SARSAPARILLA.

WILKINSON'S (LATE BRIDGE'S) ESSENCE OR FLUID EXTRACT OF RED JAMAICA SARSAPARILLA is appreciated for its PURITY and marked superiority, daily prescribed by the Faculty for Impurities of the Blood, AFFECTIONS OF THE LIVER Constitutional Debility, Attenuation of Body, as an Alterative Medicine at the changes of the seasons, and for freeing the system from the effects of mercury. In India and the Colonies it is extensively used to PREVENT taking complaints incidental to tropical climates, and as a renovator of the system after sickness invaluable. "A superior preparation that may always be relied on."—Sir Astley Cooper. "We are in every respect satisfied with it."—Lancet. "We recommend your Sarsaparilla as the best."—Medical Review. "Latterly, in consequence of much debility, &c., subsequent to cholera, I have freely used Bridge's Sarsaparilla myself, with complete benefit and success."—J. Poett, F.R.C.S. Sold in Pints, Half Pints, and Quarter Pints. One Pint is equal to Eight Pints of the ordinary preparations.

IMPORTANT CAUTION!—The public are cautioned against cheap preparations of Sarsaparilla, which, instead of being what they profess, are merely a decoction of common herbs, sweetened with molasses, and flavoured with American winter green. The genuine has "THOS. WILKINSON, LATE BRIDGE & Co., 270, Regent-street, London," engraved on each bottle.

AGREEABLE SEIDLITZ POWDER in one bottle, protected by a case with measure and spoon included. This preparation is highly recommended, not only as a Mild Aperient, but to allay fever, thirst, &c.

AROMATIC TINCTURE of QUINIODINE, for the prevention of Fever, Intermittent or Remittent Ague, and other effects of Malaria. No Person exposed to the influence or predisposing cause of Fevers should be without it, for if taken in small doses daily, the system will become so thoroughly impregnated with its principles, as to be rendered proof against all attacks of Contagion or Malaria. Sold in Pints, Half Pints, and Quarter Pints.

Agents:—Bathgate and Co., Old Court-house-street, F. W. Browne, Old Court-house-street, Calcutta; Treacher, Bombay, Poona, and Kurrachee; Rogers, Bombay; Oakes, Exchange Hall, Madras; Apothecaries' and Medical Halls, Colombo; Apothecaries' and Medical Halls, Kandy; Piters, Point-de-Galle; Little, Singapore Dispensary. J. Roberts and Son, Hong Kong; H. Fogg and Co., Shanghai.

The above articles prepared only by THOS. WILKINSON (late WILKINSON, BRIDGE & Co.), 270, Regent-st., London.

IMPORTANT ANNOUNCEMENT.

METALLIC PEN MAKER TO THE QUEEN, BY ROYAL COMMAND.

JOSEPH GILLOTT begs most respectfully to inform the Commercial World, Scholastic Institutions, and the public generally, that, by a novel application of his unrivalled Machinery for making Steel Pens, and, in accordance with the scientific spirit of the times, he has introduced a New Series of his useful productions, which for excellence of temper, quality of material, and, above all, cheapness in price, he believes will ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; and they are put up in the usual style of boxes, containing one gross each, with label outside, and the fac-simile of his signature.

At the request of persons extensively engaged in tuition, J. G. has introduced his Warranted School and Public Pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold Retail by all Stationers, Booksellers, and other respectable Dealers in Steel Pens. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street; 96, New-street, Birmingham; 91, John-street, New York; and at 37, Gracechurch-street, London.

PUMPING MACHINERY.

GWYNNE AND CO., ENGINEERS, LONDON, manufacture and supply the following machinery, of the most improved construction, and with all the latest improvements:—Portable and Fixed Steam Engines and Boilers of every description; Water-wheels, Windmills, Horse and Hand-Power Machines; Pumping Machinery for the supply of towns, cities, and districts, and for the irrigation of coffee, cotton, indigo, sugar-cane, and rice estates, for pumping out coffer dams, canals, dry docks, reservoirs, &c. They also manufacture and supply the Pumping and other machinery for paper, pulp, and fulling mills, breweries, distilleries, tanneries, starch works, bleaching, dyeing, and calico-printing works, chemical works, silk, cotton, and flax mills, and manufactories in general.

Price Lists and further particulars obtained on application to GWYNNE and CO., Hydraulic and Mechanica Engineers, Essex-street Wharves, Strand, London.

For Dock Work, and large Pumping operations, Gwynne and Co.'s Machinery stands unequalled.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

Among the celebrated articles for the Toilet prepared by J. G. and Co., the following are of the choicest kind, and universally admired:—

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s TREBLE DISTILLED LAVENDER WATER possesses in the highest degree the full fragrance of the flowers.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s MOELLINE, GOLDEN OIL, for the Hair.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON—The obvious utility and improved construction of the Trichosaron Hair Brush adapt it for general use, and render it the most suitable Hair Brush for the Toilet. Sold by all Perfumers, Chemists, &c.

JOHN GOSNELL and Co.'s STEREODESMIC TOOTHBRUSHES, highly recommended by the most eminent Dentists.

JOHN GOSNELL and Co.'s ESSENCE of GINGER.

Merchants and Shippers supplied on liberal terms.

12, THREE KINGS COURT, LOMBARD-STREET LONDON.

"PERFUMERY."

METROPOLITAN LIGHT COMPANY,

447, STRAND, LONDON.

CLARK'S PATENT IMPROVED LAMPS FOR THE CAPE, INDIA, CHINA, AND JAPAN.

THE advantages of CLARK'S PATENT GEM LAMP, are so apparent, and its superiority so unquestionable, that it would be extremely surprising were any one acquainted with its merits to purchase the Lamps hitherto sent abroad.

THE LAMP GIVES DOUBLE THE LIGHT OF THE OLD LAMPS.

It is much more elegant in appearance. It is so simple in construction that it cannot be mismanaged.

The GEM LAMP for Table use is fitted on Bronzed, Lacquered, Cut Glass, Silvered, or Jasper Slate Pillars.

Merchants are respectfully informed that, for many reasons, French or English Moderator Lamps are not suitable for exportation. The size of the glasses for the Gem Lamps being only one-half of those of the old lamps, 50 per cent. is saved in freight and package; their cost and risk of breakage are also considerably less. The Gem Lamp is admirably adapted to burn any of the native oils, such as cocoa-nut, olive, mustard, or rape seed oils.

To show the superiority of CLARK'S PATENT LAMPS, one is always kept burning.

CLARK'S CANDLES for Tropical Climates are the best adapted for the East, as they are entirely free from grease in substance, &c., and do not gutter. They give a most brilliant light, and are unsurpassed by any yet manufactured.

JOHN CLARK, Manager.

MESSRS. LENNY & CO.

CROYDON, AND 9, PARK-LANE LONDON.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *vis* EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, Mauritius, Reunion, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

WITH IMMEDIATE DISPATCH.

FOR SINGAPORE, the fine fast-sailing barque, WEST A 1 13 years, 409 tons per register, coppered and copper-fastened throughout, W. H. HAWKINS, Commander, lying in the St. Katharine Docks. Has superior accommodation for passengers.

For freight or passage apply to the owners, Messrs. Thornton and Wests, Old Swan Wharf; to Rangel, Woollett, and Co., 1, Lime-street-square; or to Douglas and Mills, 23, Billiter-street.

STEAM to SINGAPORE & HONG KONG, the beautiful new screw steam clipper UNDINE, 600 tons register, 200 horse, Captain JOHN BELL (late of s.s. *Scotia*), Commander. This vessel having been built under Lloyd's special survey expressly for the China trade, offers a desirable opportunity to passengers. Her accommodations are unsurpassed, being fitted with the latest ventilating improvements for tropical climates, to which are added the luxury of bath rooms, &c. She will positively sail on 14th September, and, having only two or three cabins disengaged, early application for passage must be made to Messrs. James Morrison and Co., 2, Crown-court, Philpot-lane.

LOADING in GEORGE'S DOCK.—For SHANGHAI, having more than half her cargo engaged, and in course of shipment will receive quick despatch, the splendid new clipper barque J. H. RANSOM, Captain CHAPMAN, 399 tons register. A 1 at Lloyd's for 13 years, very fast, and in all respects a first-rate conveyance.

For freight, &c., apply to Andrew Leighton, 17, Water-street, Liverpool.

FOR SHANGHAI direct, a regular trader, the well-known British-built clipper ship WEYMOUTH, A 1 12 years, 829 tons register, EDWIN E. THOMAS, Commander; loading in the London Docks. This splendid vessel is well known in the China trade, and possesses extraordinary sailing qualities.

Temperleys, Carter, and Darke, 3, White Lion-court, Cornhill.

FOR SHANGHAI, with immediate despatch, the splendid clipper barque HUMPHREY NELSON, A 1 10 years, 454 tons register, JAMES CHELLEN, Commander; West India Docks. This favourite vessel, built at Dundee, is especially recommended to shippers requiring despatch.

For freight or passage apply to Robertson and Co., 5, Newman's-court, Cornhill, London, E.C.; or York-chambers, 55, King-street, Manchester.

FOR HONG KONG, to follow "the Beautiful Star," the HELEN'S BANK, 317 tons register, A 1, 10 years, A. BUNNING, Commander; to load in the London Docks.

For freight or passage apply to W. O. Young, Newman's-court, Cornhill.

WITH QUICK DESPATCH.

FOR HONG KONG & WHAMPOA, the splendid new A1 Aberdeen Clipper ship, BEAUTIFUL STAR, Commander ——, 539 tons register; loading in the East India Docks. This fine vessel, built expressly for the China trade, by William Duthie, Esq., builder of the celebrated ships "Huguenot" and "Rifleman," so well known for their rapid passages, offers a first-rate opportunity to shippers. Excellent accommodation for passengers.

W. O. Young, Newman's-court, 74, Cornhill, E.C.

REGULAR LINE OF PACKET SHIP.

FOR HONG KONG and WHAMPOA, the splendid clipper ship, STAR QUEEN, A 1, 13 years, 769 tons register, A. BARBER, Commander; lying in the East India Docks. This ship has proved herself to be one of the fastest ships afloat, and has very superior accomodation for passengers.

For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange Buildings, E.C.

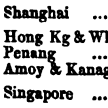
FOR SINGAPORE, the well-known ship SALVADOR PACKET, loading in the London Docks. Will shortly sail.

For freight and passage apply to Robertson and Co., 5, Newman's-court, Cornhill; or York Chambers, 55, King-street, Manchester.

REGULAR LINE OF PACKETS.

FOR BATAVIA & SOURABAYA, the fine Danish clipper barque CONCURRENT, 5-6 in Veritas = A 1, 260 tons per register, coppered and copper fastened, D. DAVIDSON, Commander; lying in the St. Katharine Dock. Has superior accommodation for passengers.

For freight or passage apply to Rangel, Woollett, and Co., 1, Lime-street-square.



ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Stok and infant, 2 children, and 2 servants, Mr. and Mrs. J. M. Tiedemann and native female servant, Mr. Schaaf, lady, son, and 2 daughters. To Shanghai: Mr. Vischer.

Per P. and O. str., 4th Nov., from Southampton to Singapore: Dr. Treacher, Captain J. T. A. McNair. To Hong Kong: Mr. and Mrs. F. Smith. To Shanghai: Mr. Ernest Saton. From Alexandria to Singapore: Mr. and Mrs. J. J. Blankenhagen, T. Blankenhagen and native female servant. From Suez to Hong Kong: Mr. W. Preston. From Marseilles, 12th Nov., to Singapore: Mr. J. F. Arnold, Mr. C. T. Deines.

Per P. and O. str., 13th Nov., from Southampton to Shanghai, via Bombay: Mr. G. Spence.

Per P. and O. str., 20th Nov., from Southampton to Shanghai: Mr. Gore Booth.

PASSENGERS ARRIVED OUTWARD AT HONG KONG.

Per Daylight, from New York: Mr. H. Hudson.

Per str. Emeu, from Bombay, for Shanghai: Messrs. A. J. Whalley, Lucas, Luplaze, S. S. Vander Merten: Mrs. Findlay and children, Major Brabazon. For Hong Kong: Messrs. M. Maintz, J. Imrie, T. G. Saunders, J. Hall, C. Hill, Wood, Broad, Jago, Vincent, W. Green, R. Green, Eckyose, Keith; Ensign Bateman, Dr. E. Bogg, R.N., A. Grieve, R.N., W. Inman, R.M., Ensigns Walsh and Tabb, Miss S. Thompson, Mr. and Mrs. Percival, Mr. C. D. Williams, P. M. Tait, and 13 Chinese.

Per Hero, from London: Mr. Hark, Mrs. Macfarlane, and Miss Carr.

Per Prince Alfred, from London: Mr. Fryer and Captain Mort.

Per Lancefield, from Calcutta: Mrs. Armstrong, Mrs. Jordan and family, Messrs. Semple, Wyngtee Siym, Verole, Anduem, and 4 children.

Summary of News from the Far East.

ATTEMPTED MASSACRE IN JAPAN.

Once more we have to record disturbances in Japan, of so serious a nature, that unless some prompt and decided steps are taken on the part of our Government it may not be long before we are ejected from the country altogether.

On the 5th July, about 2 A.M., the house of the British Ambassador at Yedo was attacked by a band of ruffians, who were, in all probability, hired by some members of the Japanese Conservative party who are opposed to foreign intrusion. The members of the Legation, including at this time Messrs. Oliphant, Russell, (nephew of Earl Russell), and G. S. Morrison, had but lately retired to rest, when they were aroused by a loud knocking at the door, the firing of pistol shots, and the smashing of windows. The account that has reached us of the affair is somewhat confused, as it well may be under the circumstances, but it appears that Mr. Oliphant received a cut in his head, and that Mr. Morrison was wounded in the arm and shoulder. The darkness rendered it difficult for the assailed to see their enemies, and it was this blind fighting in the dark which in all probability saved the lives of our Legation. The six occupants of the building had only two revolvers and two or three swords between them. Happily, a number of Yacunins came to the rescue armed with swords, muskets, and lanterns, and the miscreants, about fourteen in number, on being assailed, retreated by a dark passage, and escaped by the priests' room. Several soldiers were wounded, and five or six Loonings killed. A priest was also cut down, but is doing well. One of the gentlemen present describes very vividly the scene that presented itself on the dawn of day, and the course matters took afterwards. We extract the narrative from the *China Mail*:—

"The long straggling garden was filled with guards and watchmen in every direction, ponies were tied up to the bamboo fence, dead assassins lay about with heads almost severed from their bodies by frightful sword cuts; one Looning, wounded in the head and every limb, was being cross-examined, and the shaved doctors were attending him; he was surrounded by a fine guard, and the scene was quite dramatic. Several beds had been cut about, books and chairs sliced with swords, sliding partitions smashed and covered with blood; a red pool marked the road our two wounded friends had taken, the lanterns began to burn dim as the light of day appeared, disclosing picturesque and soldierlike groups in all directions. The Japanese ministers came at five in the morning to get an audience, which was granted them; at twelve, matters were discussed and pipes were smoked. A despatch had been sent in the night for the *Ringdove*; she arrived at about one o'clock; a guard of marines and some dozen Frenchmen reinforced us, and the various rooms were re-examined. I cannot conceive why they made such a noise, because they might have come in so many ways without disturbing us at all; five of the Loonings were killed, three committed the "happy despatch," and one was severely wounded. Our Yacunins fought like tigers, and certainly saved our lives; seven or eight of them were wounded, one dead—they say five of them, but we saw only those who were on the premises; we went round, and they appeared quite delighted when Mr. Alcock thanked them. Two gatekeepers were very severely wounded for refusing to open the gates, and a groom was killed. It was certainly an awful night, and quite unexpected. I do not know whether we shall ever hear who caused these men to come, though it is said they are the Prince of Mito's retainers."

Digitized by Google

The Americans, as usual, have been uninjured, and the universal feeling that prevails among Prince Mito's party—for we make no doubt that this assault was made by his myrmidons — seems directed solely against the English Embassy.

It is said that the assassins' first effort was to find Mr. Alcock's apartment, and not being able to do so probably discouraged them. Whether our Ambassador has, during his recent overland journey, given any fresh cause for the dislike entertained against him during his recent overland journey, we do not at present feel justified in saying; but the report is rife in China, that he has given great offence to the Japanese princes, in the first place by the expedition itself, and in the next, from his having forced his way into places where the presence of a foreigner was regarded as pollution.

The day after the affair Mr. Alcock addressed the following circular letter to the other resident Ministers:—

"H.M.'s Legation, Yedo, July 6, 1861.

"Sir,—Last night between eleven and twelve o'clock, the British Legation was suddenly attacked, and an entrance effected at several points simultaneously by armed bands of Japanese said by some to be Loonins, and by others the Prince of Mito's men. Two of the members of the establishment, Mr. Oliphant and Mr. Morrison, were met in a passage and both wounded, the first, I am sorry to say, very severely; when a momentary diversion was effected by a shot from Mr. Morrison's revolver, which appears to have taken effect. A few minutes later, the same or another division of the assassins sought to effect an entrance to the apartments occupied by myself, by breaking through and hacking in pieces some glass doors opening on to another suite, having mistaken their way. To this alone, under Providence, we probably owe our lives, for several minutes was thus lost to them, at the end of which some of the Yaconins or Damio's guard appear to have come to the spot, and the assailants were finally driven out of the house, after having penetrated into nearly every room except my own, leaving traces of their presence by slashing at all the beds and furniture. Marks of blood were found in various directions, and a prolonged conflict took place outside in the avenue and approaches to the Legation, with the officers and men on service.

"Such a deed of atrocity perpetrated in the capital of a Government to which Foreign Representatives are accredited by the Western Powers, needs no comment. I only feel it a duty to communicate to my colleagues the facts for their guidance and information; and to acquaint them that, as a temporary measure, I have ordered up H.M.S. *Ringdove*, and caused a guard of men to be landed. What measures it may be expedient to adopt for the further security of this and the other Legations in Yedo, and the maintenance of those international rights and immunities so grievously attacked, becomes a serious consideration; and one, the pressing importance of which, cannot well be overlooked. But on this part of the subject I shall be glad to enter into further communication with you and the rest of my colleagues, should you feel disposed to favour me with your views.—I have, &c., RUTHERFORD ALCOCK."

CHINA.

PEKING.

By the latest dates the Emperor is still in Tartary. The Russian Minister had arrived overland from St. Petersburg. The most important news from Peking is the fact that Prussia has been unable to obtain a Treaty, the point of dispute being how soon the Prussians should be entitled to reside at the capital. The heat is said to have been very great, and much sickness prevailed in consequence among foreigners.

TIEN-TSIN.

News has reached us up to the 25th July. The Russian Minister had arrived overland from St. Petersburg. The heat has been excessive, and the rate of mortality in consequence has been about ten per diem. A disease has been produced called "heat apoplexy." The thermometer has sometimes reached 106 and 108 in the shade.

Trade had assumed great activity; the traders were returning from the fairs in the interior.

The following account of some of the fairs to which foreign goods are taken from Tien-tsin, is obtained from a circular issued from Messrs. Meadows and Co.:—"Kooching temple, in the Ho-keen prefecture, in the province of Chilee, distant from Tien-tsin 350 le, in the 2nd moon of the Chinese year. Maouchow temple, in the Jenkeu district of Chihle province, distant 200 le. on the 4th moon. Yutsie and Tackoo temples, in the Tae-yuen prefecture, in Shan-sé, distant about 1,200 le, in the 5th moon. Kechow temple in the Paouting prefecture, in Chihle, distant 300 le, in the 9th moon. Paouting city, the capital of Chihle province, 360 le, in the 10th moon. Foreign imports are taken to all these fairs from Tien-tsin, and include those Russian goods that are brought from the Russian and Chinese fairs on the borders of the respective countries. Chinese drugs and other products are also taken to these fairs. The other marts in the Northern provinces are not visited by the Tien-tsin traders."

THE YANG-TSE-KIANG.

The following letter from Hankow appears in the *China Mail* of the 12th August:—

"Having lately come up from Shanghai in one of the private steamers now running between ports on the river Yang-tse, you might like to hear of our doings and commercial prospects at this newly opened port; and though present aspects may be dull and unprofitable, yet eventually this place of all others will be the most important. The one and only bar to our success remains, and indeed to all appearance may for some considerable time: I allude to the Rebel movement. Its effect on trade here defies description; no one large Hong here can effect exchange of goods at a profit, and though exchanges are made, one-half has to be in sycee. The Chinese here are anxious to trade, and would if able be only too glad to exchange their teas and silks for our shirtings and woollens; but an alarm of the 'Rebels are approaching,' or the Rebels are seventy *li* (thirty miles) off, sends them away with all their light wares and specie, and leaves trade at a stand-still, with deserted streets to testify to the injurious effects. The steamers are leaving here full, with teas and oil, and are each of them taking down from two to four junks likewise full. This might perhaps lead you to suppose that trade is good, but it is not—all these large cargoes have been purchased at a loss of exchange of cargoes of Manchester goods equally large, and freights for steamers are at present the principal gain, for 20 taels per ton between this and Shanghai is not a bad figure. Let the Rebels either leave this place for good, or take it at once and keep it instead of hovering around and remaining nowhere, and then trade must and will thrive; for as far as the Chinese teamen and traders are concerned, none seem more anxious to go to work.

"In coming up here, the ill effects of this rebellion could be traced everywhere. At one place the river was crowded with Mandarin junks and Imperialists, stopping every trading junk, and in some cases doing the usual squeeze—in others the flag of the Rebel displayed over a half-ruined city, and the country looking the very picture of desolation from the forced cessation from agricultural pursuits. No Chinese dream of sending a junk down the river laden with merchandise; they say she would fall into the hands of either Mandarins or Rebels, and its confiscation would be equally certain in either case. At Nanking, on our way up, we had to get a pass from the head of the Rebels, allowing us to trade, and desiring us to keep our red English ensign flying. Well, having occasion to land a passenger (Chinese) at a city, Nganking, we found it in a state of siege from the Imperialists, and had to run the gauntlet in landing him, the Mandarin junks firing at us though an English flag was flying all the time. This place (Nganking) was expected to fall in a few days after we left, as the besieged were short of provisions.

"At Chinkiang the Imperialists in their turn were the besieged; the Rebels had attacked them about a fortnight ago, but were driven back with loss. To see and understand the injurious effects of these conflicts, you require to be on the spot. Every man, anxious for the welfare of commerce, unites with me in deprecating it, let the successes be on either side. Till some definite and grand step is taken either to concentrate forces and drive the Rebels from here, or the Rebels take all the river in their own charge, nothing will be done, and Hankow, that ought to prove our greatest acquisition, will only be an *ignis fatuus* that flees from our grasp when we attempt to clutch in it the commercial profits we seek to obtain."

The same journal reports that several disasters have occurred to vessels trading between Shanghai and Hankow. The *Manila* has been wrecked on a quicksand eight miles to the north of Starling Island; the *Rajah* was on shore five miles to the west of Nganking; the *Chusan* ran aground on a sandbank near Bush Island; and the *Cosmopolite* is also ashore in the Yang-tse. All these casualties are solely attributable to the late flooding of the river; no blame whatever is assigned to the commanders and officers of the respective vessels. It is worthy of note that three of the steamers above-named were purchased from the P. and O. company. Unfortunately, we must expect to hear of accidents such as these until we have a larger acquaintance with the navigation of this interesting river.

From Newchwang news has been received of the loss of the brig *Emma*, from Shanghai, all hands saved. The native population in the neighbourhood of that port are said to be lawless and intractable. A gentleman attached to the Consulate at Newchang has been assailed and dangerously wounded by three fellows who were engaged in beating a woman, in whose behalf he interposed.

Nganking is invested by the Imperialists, and the garrison is said to be in a starving condition. The Taipings affirm that they have an army in motion for its relief.

NINGPO.

The news by this mail is chiefly confined to the sufferings of the people from the extortion of the authorities, the professed object being to raise funds for the protection of the city. It is said that some of the native merchants and bankers have already paid 10,000 Taels for imaginary protection, and on guns being placed on the ramparts were required to pay 20,000 Taels in addition. Rather than submit to this extortion, fourteen native banks have closed.

SHANGHAI.

The latest news from Shanghai speaks of the Rebels coming gradually nearer the city, and reports their strength at upwards of 100,000. It is remarkable that at the very time

Digitized by Google

when we have succeeded in opening China to British enterprise, the position of the Imperialists and the Rebels should be so antagonistic as in some measure to neutralise our policy. Commerce and war are utterly inimical. The love of life is stronger even than the passion for gain, and if the former is imperilled, the latter becomes dormant. The approach of the Rebels to this important place will bring trade to a standstill, and we need scarcely remark that the stagnation of trade at Shanghai will materially affect the prosperity of the ports which have recently been opened.

The recent innovations of the Customs authorities at Shanghai have given great dissatisfaction to the mercantile community. On this subject the *China Mail* writes as follows :—

"It is most likely that some amelioration of the evils complained of will be made eventually; it is only to be regretted that the abuses have possession of the field, and, on that account, laying aside altogether the delays of official routine, much trouble will be experienced in dislodging them. This is the more to be regretted, since mercantile interests in China must continue to suffer grievously in the meantime, and the free supply of Chinese produce to the English market must be considerably impeded. Exporters from England will also come to feel the disadvantage they are placed at, and commerce will thus receive a blow from which it may take some time to recover. The matter has at length been taken up by the Chambers of Commerce both at Shanghai and Hong Kong, and nothing should prevent its being fully inquired into, with a view to discovering at whose door the blame rests. Some information on this subject will be found at the end of our Summary of News."

The following passage is extracted from the report of the Committee of the British Chamber of Commerce :—

"The Committee cannot but draw the serious attention of the Chamber to the enormous and unreasonable exactions lately levied by the local authorities in excess of Treaty duties upon all branches of the local trade, the weight of which falls almost entirely upon foreign interests. It would appear indeed as if this were simply the mode adopted by the Chinese authorities for collecting from foreign trade those very indemnities which the Government of China is bound to pay to foreign Governments; and, difficult though it may appear for the representatives of foreign countries to interfere in the matter of the native taxation, so clear is the object of these exactions, and so contrary are they in spirit to the Treaties only lately ratified with Foreign Powers, that the Committee urgently suggest a forcible representation of the matter being made to H.M.'s Minister by the Chamber of Commerce.''

On the same subject we quote from the columns of the *North China Herald* :—

"We have recently, and at a great expenditure of blood and treasure, forced a treaty upon the Chinese at the very gates of their capital, which, now that the pressure has been withdrawn, they would seek indirectly to render inoperative. By the spirit and intention of that Treaty it was agreed that, under certain limitations, we should be permitted to enjoy an unrestricted trade with the Chinese. The game opened well and seemed about to be fairly played out; and it is a fact worthy of note, that no impediment was offered in this race of free trade, until the pressure under which this state of things was inaugurated had disappeared.

"The first disagreeable impression of this nature on the minds of foreigners arose from the fact of the Chinese authorities placing a duty, amounting at once to a prohibitory one, on all goods purchased from Europeans by Chinese merchants in the north. It is useless for their apologists to say that the Chinese have the right, that would be conceded to Western nations, of making any fiscal regulations with regard to their own subjects, they pleased. Were this so, the much-lauded Treaty of Tien-tsin would soon be converted into so much useless paper by our celestial friends; and if the system be levelled against the vitality of our commercial understanding with the Chinese, then the sooner such a fraudulent attempt is stamped out the better."

Among other proofs of the system of *squeezing* adopted by the Custom-house authorities, the same journal shows how tea and silk are affected by it :—

"During Rebel disturbances, silk was brought to Shanghai *via* Ningpo, having paid a duty, say, of ten taels per picul. On shipping to Shanghai, an exemption certificate was granted by H.I.M. Customs, freeing it for England. Suddenly the 'human footprint' makes its appearance in the shape of inland duty of five taels extra, for transit dues, at the same time that the order goes forth to withhold exemption certificates, thereby rendering this article liable to a further impost of ten taels here on re-shipment, making in all 150 per cent. more than the former duty of ten taels! In a similar way tea, on the opening of the new ports, came down, subject to the usual two and a-half taels duty, but suddenly the obnoxious 'footprint' is again seen, and a transit duty of one and a quarter taels is squeezed on this article coming from an open treaty port, being no less than 50 per cent. additional duty!"

A new steamer, the *Surprise*, has arrived from St. Francisco to navigate the Yang-tse-Kiang. She was built in New York to compete with the Great Steam Navigation Company of California, was bought out by them, and now is resold under bonds not to run in California waters. She is noted among steamboat men for her speed, and having the usual qualifications of American river boats—very light draft, and much covered space.

We noticed in our last the return of the Overland Party. From an account since received, we learn that the whole surface of an island, which they named St. George, from the day on which they passed it, was covered with poppy, even to the summit of its highest hills, and that for a distance of more than seventy miles scarcely anything but poppy was grown on both sides of the river. The exploring party found the Rebels in force in the province of Se-chuen, and a missionary writing from Chun-khing, affirms that that province is in a deplorable condition.

An inquiry has been held on the loss of the steamer *Manila* in the Yang-tsze-Kiang with the following result :—"The Court having carefully examined the Master and Officers of the Iron Screw Steamer *Manila*, relative to the loss of the said vessel, are of opinion that no blame can be attached to the said Masters and Officers, but that the intricate navigation of the river Yang-tsze and the shifting nature of its banks were the causes of the accident."

FORMOSA.

This new port, which was opened to trade by the treaty of Tien-tsin, has now been dignified by a consular establishment, Mr. Robert Swinhoe, interpreter to the Amoy Consulate, having gone to Tai-wan-foo to take charge. It will be an independent vice-consulate, but communications with head-quarters will pass through H.M.'s Consul at Foo-chow that he may be apprised of what is going on, in case reference is required to the Viceroy of Fokien, under whose authority Formosa is placed.

"Formosa," says the *North China Herald*, "is not so attractive in a mercantile point of view as many other new ports in China where trade is now being so largely developed, but there is an extensive field for enterprise in evolving the resources of that fine and wonderfully productive country, the result of which might be much more lucrative. The country affords great scope to a scientific man, and we doubt not Mr. Swinhoe will find a store of amusement for his leisure hours in that line. The result of his researches in Formosa have already been laid before some of the literary societies."

HONG KONG.

A special meeting of the Hong Kong General Chamber of Commerce was held on the 9th August. Present—Messrs. Percival, McAndrew, Chomley, McKenzie, Gibb, C. Murray, H. Murray, Baldwin, Still, D. Lapraik, M. Pestonjee Setna, G. Sharpe, Cryder, Heard, Parker, Linstead, Newby, Noble, Clinker, Bosman, F. Johnson, Walkinshaw, Nissen, Weise, Reddie.

The meeting had been convened for the purpose of discussing the much-vexed question of the Foreign Inspectorate of Customs, and of devising some remedial measures to be submitted to H.M.'s Plenipotentiary for the grievances which exist under this system of levying revenue.

Mr. Perceval, the chairman of the association, stated the objects of the present meeting. It was called to consider the Inspectorate of Customs; he himself had been one of the original supporters of the system; when he had supported it, however, things were in a very different state from what they are now; the whole working of the system was under the supervision of the consuls, and confiscations were unknown. Now they had to pay double duties, and they were put to more trouble and delay than ever. It was no use writing to Mr. Bruce on the subject; he was too far away, and by the time an answer could be received from him they might as well have sent to England at once. It appeared to the speaker that in the working of this new Treaty, everything that was at all favourable to the Chinese was strictly carried out, but at the same time British interests, as well as those of other Foreign countries, were neglected. Indeed, whatever was favourable to the Foreigner in this new Treaty was overlooked, while Chinese interests were cherished, and every word of the Treaty which could be construed in their favour, was carried out to the very letter. This was a state of things with which they had much reason to be dissatisfied—it was a state of things that ought not to last. The speaker went into the details of the subject, and showed how he had personally taken measures to test the sworking of the treaty under the present system, and with what result; he hoped the action of the Chamber of Commerce might lead to the speedy amelioration of the evils which at present existed. He submitted the subject to their consideration, and requested the Secretary to read the paper on the subject of the Foreign Inspectorate, which the committee had resolved should be laid before the members for approval.

After considerable discussion on the various points raised by

Digitized by Google

this document, it was proposed by Mr. Johnson, and seconded by Mr. Still, that all the resolutions read at the meeting be printed, and copies of the same forwarded to the members to receive confirmation, and any further suggestions on the matter of which they treated which might appear advisable.

The *China Mail* describes as follows the healthiness of Hong Kong during the late summer in contrast with other ports :—

"We have had a remarkably mild summer as yet, milder than previous years, and still more improved by pleasant breezes. This is all the more striking when we consider the present condition of other parts of China in regard to temperature. At Tien-Tsin, which was so long ice-bound last winter, the thermometer is now at 112 degrees in the shade, and the mortality, as mentioned above, is from 10 to 12 per diem; at Shanghai the number of deaths has been large, and the heat excessive; at Foo-chow it is 97 in the shade; at Saigon the men, French, are dying at the rate of eight or nine per diem; while in Hong Kong the weather has been quite pleasant, and the mortality not in excess of ordinary times. It would thus appear that Hong Kong is at present the sanitarium of China."

The *Gazette* of the 27th of July publishes a document issued by the local committee appointed by Government for promoting the representation of the colony at the Great International Exhibition. It states that all articles must be forwarded through them as the central authority, and that Admiral Sir James Hope has expressed his readiness to let such things, as may be ready in time to go by long sea route, be carried free in any of H.M.'s ships proceeding to England at a suitable date. The rest the committee propose to send by overland passage.

As a rough suggestion of what may be contributed, the committee put forward the following list :—

I. Use.—1. Paper; 2. Matting; 3. Minerals, such as granite, coal, steatite, jade stone, gypsum, lapis lazuli, &c.; 4. Vegetable and insect wax. II. Food.—1. Dried fish; 2. Tobacco; 3. Native opium; 4. Tea; 5. Sugar; 6. Samshu, or Chinese wines; 7. Grain and pulse of all kinds; 8. Soy; 9. Ginger. III. Ornament.—1. Silk screens (embroidered); 2. Fans; 3. Gold work; 4. Silver work; 5. Ivory work; 16. Bamboo carved work; 7. Peach stone work; 8. Pottery and porcelain; 9. Bronzes; 10. Enamels; 11. Crystals; 12. Lacquered ware. V. Dress.—1. Silk, raw and manufactured; 2. Chinese hats of different grades or districts; 3. Mat cloaks; 4. Manufactured cotton; 5. Wools; 6. Grass cloth; 7. Crapes. V. Medicine.—1. Chinese medicines (herbal and others). VI. Musical instruments, such as gongs, &c.

The *China Mail* reports a fire which broke out in Mrs. Winniberg's millinery establishment, Queen's Road, which totally destroyed it and the godowns of Mr. Henry Duddell underneath. There was, as usual, a great scarcity of water, and much energy misapplied. Never has there been a fire in Hong Kong without a great and very unnecessary amount of confusion, where all would be directors, and yet there was no one real head; but on this occasion confusion was worse confounded. The soldiers, instead of being mustered and despatched in divisions under officers to the spot, seem to have been started off to do just as they liked; and as the two rooms facing the road were filled with wines and spirits many of the men, instead of assisting to put out the fire, betook themselves to looting, and retired up the hill-side to enjoy their drink unobserved. It was really the most disgraceful scene we ever witnessed.

Mr. William Speiden, Jun., the United States' Naval Storekeeper, has been fined £200 for unlawfully detaining a Chinese contractor, by locking him up in a cellar, and the Judge was much disposed to imprison him for the offence.

The *Hong Kong Register*, the oldest newspaper in China, is no longer in existence.

A meeting was held to consider the question of the Canton claims. It is stated that a resolution was passed, "That Mr. Bruce be requested to pay 25 per cent. of the claims out of the monies already received from the Chinese Government." No report has been given in the Hong Kong papers.

The *Daily Press* reports the following attempt to establish Confederate privateers on the coast of China.

"We certainly must say that the disruption of the United States has soon assumed those calamitous characteristics for which civil wars are so celebrated. The U.S. naval storekeeper at Shanghae was a politician named 'Judge' Cleary—we believe he earned the title from having been a magistrate in California. It seems by last advices from Shanghai, that this man, in connection with 'Colonel' Ward (the celebrated filibuster), Captain Allen (who brought the steamer *Surprise* from California), and Captain Lynch (for some years in command of the steamer *Antelope*, and lately of the *Contest*), purchased the schooner *Neva*, equipped her from the U.S. naval stores, and intend to cruise off this coast as a privateer. The steamer *Saginaw* hurried up yesterday on the intelligence being made known, and, we make small doubt, will capture her. Ward is a desperate character, and has a large sum of money which he has made in the Imperial service. He was connected with Walker, and is a sailor by profession. Lynch is a Northener. We fancy the affair will end in grief. The craft is too small, and a suitable crew can hardly be had in time. We heard that two of the *Saginaw's* officers resigned upon learning the object of her trip, but subsequently withdrew their resignations."

CANTON.

The following items are taken from the *Friend of China*:—During the late rains and floods in this province, in an adjacent district two women and two children were floated away house and all. The second rice crop of the season in this, the Shun-tukh and Sam-shui districts, is, it is feared, almost totally destroyed, and the distress consequent is likely to be very great. Already subscriptions are afoot among the wealthy for the relief of the suffering, many of whom are hawking their children for sale.

"It is a practice among the inhabitants of the villages around to bring their newly-finished dragon boats, and pull, with the usual clamour of drum and gong, up and down the face of the foreign quarter at Honam. During the past month there have been half-a-dozen such spectacles, the Honamites appearing to take the warmest interest in the motions of the rowers and drum-beaters. A new boat of this sort equipped in the usual style, had pulled down, and after a little delay off the Kum-fa-mew landing-place was there met by a violent squall to which she lay to peaceably enough. It was hardly over, however, before she ventured up, and was near the Spanish Consular chop when over she went, and the tide running down furiously. Of her crew of seventy or so, only some twenty were picked up alive. Fifty at least found a grave in the Chu-kiang. The poor fellows, nearly all in the full bloom of youth, were natives of the village of Pak-hok, the chunam and tile factories about abreast the Macao Passage fort.

"There have been some disturbances in the province of Kansuh lately between the different sections of Mahomedans there. Many of these are Mongol Tartars, and it may be that at a meeting where abstruse points of doctrine were discussed, the language of the latter was not understood. At all events, from words they came to blows, and the Mongols, once in arms, carried devastation all around. According to advices whole towns were destroyed by the ravagers."

The sale of the land intended for the use of foreigners, called the Shameen Site, is announced for the 3rd Sept., and will consist of the following :—

Lots.	Situated on.	Square Feet Each Lot.	Upset Price Each Lot.
No. 5	River front	11,400	$4,000
No. 6	"	16,200	4,200
No. 7	"	19,800	4,300
No. 8	"	10,350	4,000
No. 9	"	12,150	4,000
No. 10	"	12,645	4,000
Nos. 25 to 27	Broadway S.	12,645	3,000
Nos. 11 to 15	River front	12,645	4,000
Nos. 28 to 32	Broadway S.	12,645	3,000

CONDITIONS OF SALE.

1. Each lot will be put up separately at the price mentioned in the catalogue; no bidding under that amount will be accepted.

2. The highest bidder above the upset price will become the purchaser; but if any dispute arises as to the last or best bidder, the lot in dispute shall be put up again at the former bidding, or at such sum as shall be named by the auctioneer. The biddings shall be made in Mexican dollars, at the weight of 7.1.7 per tael. No person shall advance less than twenty-five dollars at each bidding.

3. The purchaser of a lot, immediately after the lot is knocked down to him, shall sign an agreement to pay the whole of the purchase money, one-fourth of which shall be payable at once as deposit, and the remaining three-fourths within six days of the sale inclusive.

4. The purchaser will have a lease on payment of the remainder of the purchase money, and possession will be given on completing the purchase, but the purchaser shall not require any other title than the lease which will be given by Her Britannic Majesty's Consul at Canton in the form which may be seen at the Consulate office on application. A refusal to accept such lease will cancel the sale.

5. If any mistake be made in the description of a lot, or there be any other error in the particulars of sale, the same shall not annul the sale, but a compensation or equivalent shall be given or taken as the case may require according to the rate per superficial foot at which the lot was

Digitized by Google

sold. Should any objection be made to the above by the purchaser, the sale shall be cancelled and the lot re-sold.

6. Upon failure of complying with the five first above-mentioned conditions, or any of them, the deposit shall be forfeited, and Her Majesty's Consul will be at liberty, without notice, to re-sell the lot by public auction.

JAVA.

A company has been formed at Samarang to carry a railway from that place through the plain of Damak to Souracarta and Djocjocarta.

A great deal of rain has fallen over the whole of Java, and inundations have taken place in different places. In Banyumas and Pachitan, but especially in South Kediri, much damage has been done. In the last-named district, which suffered so severely from the floods in February, much destruction of life and property has again occurred. Eleven persons and 200 cattle were drowned, nine desas with 227 houses have been laid waste, and a great quantity of paddy destroyed. The sugar-cane and other crops have also been much injured.

The accounts from Banjermassing are of the same nature as those received in previous months. Expeditions are sent out in different directions and destroy the enemy's bentings or stockades, but no sooner have the troops retired than the Rebels again re-assembled in as great numbers as ever, and the same fruitless expeditions must be repeated. The troops are harassed and many valuable lives lost, especially of officers, in these affairs, which appear to lead to no useful result.

Accounts from the Batu Islands, on the west coast of Sumatra, state that earthquakes still continue to take place at the Island of Simo. The scanty population remaining after the frightful occurrences of the 9th March, had almost wholly forsaken the Island.

MALACCA STRAITS.

SINGAPORE.

There is but little news from this port, Siam, or Borneo.

The *Singapore Standard* is indignant at the news that the semi-monthly mail would be stopped "at the very moment when free ports have been opened out in newly-acquired territories," and still more indignant that the Straits transfer question should still remain unsettled, and it affirms that our House of Commons is the *locum tenens* of members "whose souls are gloomy as the spirits haunting the Hartz mountains, or weir-wolves intent only on devouring dead bodies." Our ignorance of spirits in general, and Hartz spirits in particular, together with our total unacquaintance with weir-wolves, prevents us from directly contradicting this grave assertion.

The Chinese firm of Chong San Seng Chai, and Co., has become insolvent. Their liabilities are stated at $59,000. Three others, Heng Lee, Chong Eng, and Tye Poon, failed about a month since, to meet their engagements. The former, Henghee, owes about $20,000, and a composition of 50 per cent. has been refused by the creditors. The others, Chong Eng, and Tye Poon, have submitted no statement of their affairs, and are themselves missing. They offered a fortnight since to pay in full, and are supposed to be able to do so, and it is believed that, tempted by the facility with which compromises can be effected in Singapore, they are endeavouring to defraud their creditors.

The piratical fleets designated the "Lanun" appear to have again been successful in passing through the Java Sea, making their usual victims. It is considered to be very disgraceful to the Goverments of England and Holland.

The *Standard* animadverts on an article which appeared some time since in our paper, on "the position of France in the East," and after quoting it at length, has the audacity to affirm, in reply to some remarks contained in it, that "go where you will, more unpardonably sin will be found to exist in districts of missionary labour than the poor deluded settlers ever knew before the appearance of the missionaries."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ADAMSON—On the 14th inst., at Rushton-park, Sussex, the wife of W. R. Adamson, Esq., of a daughter.

ANNESLEY—On the 10th inst., at The Hermitage, Sandgate, Kent, the wife of Lieut. James O'Donel Annesley, 95th Regt., of a daughter.

CAMPBELL—On the 24th inst., at Hill House, Harrow Weald, Middlesex, the wife of Patrick Campbell, Esq., of a daughter.

CAUNTER—At Penang, on the 7th August, at the residence of Mr. Edwards, medical practitioner, the wife of Mr. John Caunter, of a son.

DENT—On the 15th inst., at The Grove, Balham, the wife of Stanley Dent, Esq., of a son.

DE FARIA—At Macao, on the 30th June, the wife of Ensign F. L. De Faria, of a son.

DICKINSON—On the 14th inst., at Surbiton, Surrey, Mrs. George F. Dickinson, of a daughter.

HOWELL—On the 15th inst., at Sunbury, Middlesex, the wife of William G. Howell, Esq., of a daughter.

LANGLEY—On the 15th inst., at 11, Queen's-gate-terrace, the wife of Henry Langley, Esq., of a daughter.

MUIRHEAD—At Pootung, Shanghai, on the 22nd July, Mrs. David Muirhead, of a son.

PATRIDGE—On the 16th ult., at Anglesea Place, Woolwich, the wife of Captain Patridge, of Ningpo, of a daughter.

SAWTELLE—At Swatow, on the 22nd July, the wife of Rev. H. A. Sawtelle, of a daughter.

WEEKS—On the 19th inst., at Glen Lea, West-end, near Southampton, the wife of John Weeks, Esq., Commander P. and O. Service, of a son.

MARRIAGES.

HALLIDAY—LOCH.—On the 10th inst., at Roehampton, Surrey, by the Rev. Sir. W. Dunbar, Bart., F. M. Halliday, Esq., H.M.'s Bengal Civil Service, eldest son of Sir Frederick Halliday, K.C.B., to Anne Margaret, eldest daughter of the late Thomas Coutts Loch, Esq.

LONGLEY—DAVENPORT.—On the 17th inst., at the parish church of Yazor, Herefordshire, by the Rev. G. H. Davenport, Henry Longley, to Diana Eliza, second daughter of John Davenport, Esq., of Foxley, Herefordshire.

MURROW—DA SILVA—.On the 30th July, at the Church of the Immaculate Virgin, Hong Kong, and afterwards at St. John's Cathedral, by the Rev. J. H. Gray, M.A., T. J. Murrow, Esq., editor and proprietor of the *Daily Press*, to Bellarmina, second daughter of Luiz J. Da Silva, Esq.

PEAKE—CLARK—On the 29th August, at Maindee, Newport, Monmouthshire, by the Rev. H. Newman, Arthur Peake, Esq., P. and O. Co.'s Service, to Jessie Margaret Ann, third daughter of Captain William Clark, H.E.I.C.S.

PEARSON—FURNISS.—At Shanghai, on the 21st July, at Trinity Church, by the Rev. J. Hobson, Richard Pearson, of Hastings, to Frances Susannah Maria Furniss, of London.

RICHARDSON—PORTER.—At St. John's Cathedral, Hong Kong, on the 6th August, by the Rev. J. J. Irwin, Thomas W. Richardson, son of the late Thomas Richardson, W.S., of Edinburgh, to Ellen M. Porter, daughter of the late Elijah Porter, of Brooklyn, U.S.A.

WILKIE—BOWMAN.—On the 22nd ult., at the Church of the Holy Trinity, Weymouth, by the Rev. James Cottle, LL.D., John Wiseman Wilkie, to Caroline Constance, only daughter of John Frederick Bowman, Esq., of Tunbridge, Kent.

WILSON—CARR.—At St. John's Cathedral, Hong Kong, on the 8th August, by the Rev. J. J. Irwin, George Wilson, to Mary Ann Carr.

DEATHS.

BOYD—At Hollywood-road, Hong Kong, on the 28th July, Jane Constance, a native of Dumfries, wife of James Boyd, Master of the British barque *Velocidade*.

BUCHAN—At Hong Kong, on the 9th August, Elizabeth Lucy, wife of George Buchan.

COULTERS—At the General Hospital, Hong Kong, on the 7th August, Reuben Coulters, private 44th Regiment.

CRAWFORD—At Hong Kong, on the 22nd July, Andrew Crawford, H.M.S. *Imperieuse*.

CUSHEN—At Hong Kong, on the 30th June, Thomas Cushen, Army Hospital Corps.

EDWARDS—At Hong Kong, on the 15th June, James Edwards, H.M.S. *Pearl*.

GILES—At the Seaman's Hospital, Hong Kong, on the 1st August, Newel Giles, second officer of the American ship *Huntress*.

HANCE—At Whampoa, on 23rd July, Ernest Arthur Harland, third son of Dr. H. F. Hance, H. B.M.'s Vice Consul, aged 4 years and 7 months.

HARE—On the 19th inst., William Hare, in his 61st year. For 31 years he was a faithful servant to the Travellers' Club.

LAKE—At Hong Kong, on the 11th June, John Lake, H.M.S. *Imperieuse*.

LAURENCE—At Hong Kong, on the 29th July, Joseph Laurence, gunner, Royal Artillery.

MAN—On the 22nd inst., at the house of her brother, Upper Tooting, Surrey, Georgiana, eldest daughter of the late Edward Man, Esq., of Mincing-lane, aged 52.

MARTINEAU—On the 11th inst., at the house of her brother, F. Edgar Martineau, Edgbaston, Ellen Martineau, aged 31.

MOORE—On the 19th inst., at his residence, 31, Grove-end-road, St. John's-wood, Colonel William White Moore, late of the H.E.I.C.'s Bengal Establishment.

O'BYRNE—On the 14th inst., at 13, St. George's-terrace, Herne Bay, Robert O'Byrne, Esq., in the 73nd year of his age. R.I.P.

PICCOPE—At Hong Kong, on the 31st July, T. A. Piccope.

TAIBOT—At Hong Kong, on the 23rd July, F. Taibot, Chief Officer, Siamese barque *Sea Forth*.

TAFFS—At Hong Kong, on the 1st August, Winifred, wife of C. C. Taffs, of the Royal Engineer Department.

WHITSHED—On board his ship, H.B.M.'s gunboat *Leven*, whilst at Simonoseki, Japan, on 21st June, Lieut. Commanding James H. Whitshed, son of Sir St. Vincent Keene Hawkins Whitshed, of Greystones, co. Wicklow, Ireland.

WILLIAMS—At Hong Kong, on the 6th August, William Williams, A.B., H.M.S. *Pearl*.

COMMERCIAL REPORT.

CHINA—EXPORTS.

SHANGHAI.—TEA.—Hankow have continued to take place during the past fortnight to the extent of about 9,000 chests, of which 3,700 chests have been re-sold here at 29 to 33 taels for fair Oonams to second-class Oopacks. There are now about 1,500 chests of these kinds on offer, and arrivals of one or two chops continue to take place from time to time. In old teas there are no transactions to notice, and the stock of Hoo-chows and low Congous is still about 3,000 chests. Some 5,000 packages of new flowery Pekoes have arrived and are placed on the market at high rates (50 to 55 taels) for the finest. Supplies of old Pekoes appear to accumulate, and 3,000 packages are reported to be in stock. Greens.—The new Pingsueys have opened at 38 to 38½ taels for two or three favourite chops, and 35½ to 37½ taels for others of inferior quality. Settlements for the fortnight, are—Pingsueys, 8,000 half-chests, Moyunes 6,000, Hoo-chows, 2,050, and Japan teas, 4,600 half-chests, against 555 half-chests China and 2,186 half-chests Japan at the same period last season. Stock—China, 4,500 half-chests, Japan, 1,500 half-chests, and 4,000 half-chests of the former at Ningpo.

FOO-CHOW-FOO.—A fair amount of business has been done during the fortnight. For Congou previous rates were maintained until the past few days, when a decline of one tael occurred. Fine Congous became scarce causing a run upon Souchongs, in which description a large business has been done at high rates. The new Oolongs are beginning to arrive in quantity, but little business appears to be doing in them, there being no vessel loading for the United States. In Flowery Pekoes and Scented Teas a moderate business has been done. The receipts since the date of last advices are estimated at 36,000 chests Congou, 3,000 chests Souchongs, 23,000 half chests Oolong, 1,000 chests Flowery Pekoe, and 4,000 boxes Scented Teas. The settlements of the fortnight are reported as under:—Congou, 21,600 chests at $11 2c. to $16 2c. for trashy to common, $19 2c. to $22 2c. for good common to flavoury, and $24 7c. to $28 7c. for good flavoury to Kaisows; Souchongs, 6,000 chests at $19 2c. to $32 7c.; Flowery Pekoe, 1,200 chests at $28 4c. to $51 7c.; Oolong, 1,800 half-chests at $19 2c. to $24 2c.; Scented Teas, 3,500 boxes at $20 7c. to $34 7c. The arrivals of Congou on the market this

Digitized by Google

season have been 190.000 chests against 160,000 chests same period last season, and 122.000 chests the season before. The sales have been 120,000 chests, 140,000 chests and 95,000 chests respectively, and present stocks 76,000 chests against 20,000 chests and 28.000 chests.

AMOY.—Since the date of last report there has been but a moderate business done. The Congou market was opened on the 10th July, by the settlement of about 800 half-chests of superior cargo quality at $20.75 to $22.50. Subsequently about 900 half-chests of similar quality were settled at $2.50 per picul advance, but this little spurt was of only short duration. Until latterly this kind commanded some attention, at rates proportionate to those first paid, but now there is not much doing, and prices are about $1.00 to $2.00 lower. The Oolong market was opened on the 24th July, and about 1,500 half-chests of common to good common quality were settled at $17 to $18 short. A moderate business has since continued at these figures, but just at present there is, if anything, a slight easier tone prevailing. Plain Orange Pekoe: this description during the early part of the month occupied the attention of buyers somewhat, and purchases were made at $12.50 to $18.25 short, for low ordinary to fine quality. Arrivals to date: market, 7,271 half-chests; settled, 5,470 half-chests; stock, 3,715 half-chests; contract, 1,914 half-chests: total, 9,185 half-chests, against 16,709 packages last season. Congou settlements have been made of all grades, at $14 to $20 for low ordinary to preferable, to good common, and $21.75 to $25.00 for superior cargo quality. Arrivals to date are—market, 14,682 half chests; settled, 5,764 half-chests; stock, 9,619 half-chests; contract, 700: total, 15,383 half-chests, against 13,773 half-chests last season. Oolong and Ankoi: in the former description there has been a fair amount of business done since the market opened, and 4,904 half-chests have been taken at $15.00 to $21.00 for inferior to good cargo quality.

RAW SILK.—Shanghai: We have again experienced a fortnight of excessively high prices, at which a fair business has been done, amounting to 4,000 bales; prices are reported lower in the interior, and as Carolus Dollars have lately been bought at 5 to 8 per cent. cheaper than at the opening of the new silk season, the laying down cost at this port will be considerably under the rates ruling here. The quantity come down has been excessive, and has materially increased the stock, but fully confirms the fears of a scarcity of fine Silk. With a continuation of unsatisfactory news from home, large stock, and every prospect of a full supply, it is extraordinary that prices should have continued so firm; and many of the large buyers are keeping out of the market expecting a material decline. From Ningpo some 1,200 bales of Sewhings, &c., had been shipped prior to the imposition of the attempted "squeeze." This has now been removed, and further supplies are expected. From Japan about 200 bales have reached us. Quotations are:—Tsatlees, No. 1 and 2, 460 taels per picul; No 2, 430 to 440; No. 3, 400 to 420; No. 4, 375 to 390; No. 5 and common, 330 to 360. Taysaams, No. 1, 360 to 375 taels per picul; No. 2, 320 to 340; No. 3, 295 to 327; 4, 5, and common, 245 to 275; Yuenfa, 290 to 410 taels per picul; Hainings, 290 to 350 ditto; Hongchow Tsatlee, 360 to 375 ditto; Sewhings, 290 to 330 ditto; Laeyongs, 250 to 265 ditto; Throwns, 300 to 365 ditto.

CANTON.—The quotations remain as last given. The sales of the fortnight are reported at 75 piculs. The third yield is generally inferior, and the assortment on the market very poor.

DRUGS, &c.—Cassia lignea, $15.40; stock, 3,000 piculs. Cassia oil, $212; stock, 100 piculs. Cassia buds, $37½ to $40; scarce and wanted. Star anniseed, $14 to $14.59; scarce. Anniseed oil, $141; stock, 100 piculs. Rhubarb, $30 to $50, nominal. About 500 piculs cassia lignea are reported at Canton.

PROVISIONS, &c.—Flour appears inclined to advance, fresh Gallego and Haxall being wanted. Beef: Stock excessive, and sales of American reported at $6 per barrel. Pork is saleable at $13 to $14 for American mess, but the stock is large. In other goods under this denomination the market is over-supplied. Coals are higher. Hong Kong English steam from the store are worth $14. For Sydney $10 is asked. The Shanghai quotations are—English steam, 13 to 13½ taels; American anthracite, 12 to 13 taels; Formosa, 6½ to 6¾ taels; Japan, 6½ to 7 taels.

MANILA.—The *Maria Rosario*, from Singapore, arrived 23rd July, and the *Rosarito* and *Glorias de Maria*, from Liverpool, on 1st August, bringing their cargoes to a very dull and overstocked market. The sales do not include any made "to arrive" by the last-named vessels; but it is unlikely that any considerable portion of their cargoes can have been placed, as dealers are doing little or nothing, and it is exceedingly difficult to induce them to take delivery of goods bought some time ago. Importers hold large stocks which it is useless to attempt to force on the market, even were they willing to accept rates, that would leave serious losses, increased by the present very unfavourable exchange; but as shipments should now materially fall off, it may be hoped that after the wet season, a more active demand at improved prices may be reported. There is little or no alteration to report in produce.

SINGAPORE.—There has been little change in our produce market. Supplies during August are never very large, and the low prices now current are a great check to production. Little produce is being shipped to England, but two vessels are loading for America on owner's account. Freights are well supported.

JAPAN.—KANAGAWA.

The market continues exceedingly dull. The demand for camlets has almost ceased, and all transactions have been confined to barter against tea and silk. Importations of camlets and grey shirtings have latterly been very large, and cause a great depression in these goods. Tea.—Settlements for the month are estimated at about 1,000 piculs, at a reduction of $3 to $4 for good and fair kinds. The stocks in Yokuhama are light, but large supplies are daily expected. Silk.—During the early part of the month our market was quiet, and little was done except in barter against imports; but on the 29th the *Fiery Cross* arrived, bringing accounts of the opening of the Shanghai market, when an active demand sprung up, and the small stock on the market was brought up at an advance of from $20 to $25 on former rates. The total export from 1st July, 1860, to 10th June, 1861, has been 1,997 bales to England; 8,754 to Shanghai; and 191 to Hong Kong.

NAGASAKI.

Business continues on a fair scale, but no cash transactions in imports have taken place, The *Cornelia L. Bevan* has arrived from Hong Kong with a cargo of sundries, chiefly on Chinese account.

HANKOW.

Trade goes on improving. Imports are more easily disposed of, but only against native produce, excluding tea, for which cash is demanded, The following are some of the bargains that have been made known:—6½ catty grey shirtings at Tls. 2.2.5, for 200 bags of fungus at Tls. 18; ditto at Tls. 2.3 against 80 bags ditto; 1,300 tubs of oil at Tls. 3.3 against half American drills, half cash; 1,000 tubs of oil at Tls. 3.3 for 6½ catty grey shirtings at Tls. 2.3; 150 pieces red chintz at Tls. 1.8 cash; 500 tubs of oil at Tls. 3.5 for 64 reed white shirtings at Tls. 2.3. One chop of tea has been bartered against manufactured goods—this is a good feature in the market. The goods are said to be 5 catty T-cloths at Tls. 1.6.0; 5¼ grey shirtings at Tls. 1.8.5 to Tls. 1.9., 6½ do. at Tls. 2.2, and American drills at Tls. 2.9.7—the tea being Tl. 1 above market rates.

TIEN-TSIN.

Trade is being resumed with much briskness, and large transactions have taken place during the fortnight. The resident shopkeepers commenced buying on the day the last mail left, and the regular traders who were there soon followed. The quotations given below are those of actual transactions. Light Grey Shirtings, 5¼ catty, are difficult to dispose of by themselves, Damasks and Brocades are not inquired for, and are only taken in small quantities. The buyers from the interior would be back in August, when a large business is anticipated in heavy cotton goods.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 1½d. to 6s. 2d.	6s. 2¼d.

Per West Australian, from Canton, July 27, to London.—Tea, 654,400 lbs.

Per Prince Alfred, from Canton, July 29, to London.—Tea, 915,500 lbs.

Per Seaman's Bride, from Hong Kong, August 7, for Sydney and Melbourne.—Tea, 50,000 lbs.; sugar, 7,934; prepared opium, 23,400 taels; grain, 6,622 bags; sundries, 3,276 packages.

Per Madras (mail steamer), from Hong Kong, July 28, to London and Continent.—Silk, 2,298 bales.

EXPORTS FROM MANILA.

Per Martaban, July 23, to Melbourne.—Sugar, 7,600 piculs; coffee, 400; cigars, 800 mil.

Per Tropic, July 24, to Sydney.—Sugar, 11,100 piculs; coffee, 450; cigars, 20 mil.

EXPORTS FROM SINGAPORE.

Per City of Glasgow, Aug. 18, to Liverpool.—Sago flour, 7,354 piculs; gambier, 2,061; buffalo hides, 254; pearl sago, 205; gutta percha, 95; black pepper, 1,517; tin, 58; coffee, 69; white pepper, 11; buffalo horns, 359; wine, 1 case.

Per Pioneer, August 13, to London.—Hides, 214 piculs; tin, 112; black pepper, 1,676; white pepper, 604; rattans, 108; sticlac, 98; cubebs, 90; india-rubber, 30; coffee, 148; horns, 30; hemp, 61; tapioca, 5; gum benjamin, 5; elephant's tusks, 1; nutmegs, 7 cases; mace, 3. From SARAWAK: Antimony ore, 150 tons; aromical ore, 50 piculs; sago flour, 2,520; gutta percha, 376; india-rubber, 282; vegetable tallow, 65; Malacca canes, 157 bundles; rattans, 202.

Per Mencius, August 21, to London.—Gambier, 3,031 piculs; black pepper, 1,937; tin, 253; white pepper, 815; pearl sago, 344; sago flour, 1,039; coffee, 557; hides, 275; horns, 122; rattans, 166; gutta percha, 519; indiarubber, 37; cubebs, 36; gum benjamin, 35; sticklac, 284; gambouge, 19; gum damar, 282; tapioca, 116; nutmegs, 8 cases; mace, 7; 489 boxes transhipped.

Per Rocket, Aug. 16, to Boston.—Gambier, 1,006 piculs; pearl sago, 101; sago flour, 96; gutta percha, 223; tea, 500 boxes.

EXPORTS FROM PENANG.

Per Robert and Alexander, August 8.—For London: tin, 2,176 piculs; sugar, 1,937; black pepper, 2,783; white, 144; tapioca, 507; India rubber, 662; gum benjamin, 79; buffalo hides, 226; rattans, 52; nutmegs, 181; mace, 22; cloves, 1; fish maws, 2; rum, 2,700 gallons; nutmeg oil, 18 dozen; sundries, 5 cases; green snail shells, 1,060.

Per Mary Ann, August 15.—For London: sugar, 2,544 piculs; tin, 396; black pepper, 1,532; tapioca, 877; rattans, 149; India rubber, 384; nutmegs, 30; mace, 14; essential oil, 168 bottles; mace paste, 130 lbs.; rum, 5,175 gallons.

Per East Lothian, Aug. 22, to London.—Sugar, 2,488; tin, 1,726; india-rubber, 368; rattans, 102; buffalo horns, 114; hides, 208; black pepper, 2,020; white, 174; tapioca, 466; mace, 22; nutmegs 38; tea, 3 boxes; rum, 6,309 gallons.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: July 19, Assyrian, Ocean Mail; 20, Wynaud; 22, Peterborough. From Liverpool: 26, Raleigh.

At HONG KONG, MACAO, AND CANTON.—For London: Aug. 3, Hero; 6, Prince Alfred, Lord of the Isles, Kelso. From Liverpool: 5, Sea Snake; 7, Furzel, From Glasgow: 10, Swatow (str.) From Swansea: 7, Judge Shaw. From New York: July 28, Maury; 28, Hotspur; Aug. 2, Daylight.

At MANILA.—From Liverpool: Aug. 1, Rozarito; 3, Glorias de Mana. From Cadiz: 1, Louisita; 3, Cervantes. From Sydney: July 25, Berengaria.

At SINGAPORE.—From Liverpool: Aug. 2, Antilla. From Sunderland: 16, Johan Lange; 18, Zes Geyzustus. From Glasgow: 14, British Queen. From Melbourne: 13, Overmann; 16, Bertha; 18, Herbert.

SAILED.

From SHANGHAI.—For London: July 18, Challenger; Aug. 2, Jubilee.

From FOO-CHOW-FOO.—For London: July 22. Invincible; 25, Sir W. F. Williams. For Sydney: 25, Algernon.

From SWATOW.—For Cork: Aug. 3, Mischief.

From HONG KONG, MACAO, and CANTON.—For London: July 28, Primula; 27, West Australian; 28, Prince Alfred; Aug. 5, Spirit of the North. For Boston: 6, U.S.S. Dacotah. For Sydney: 7, Seaman's Bride. For San Francisco: July 27, Sardinian; Aug. 11, Lotus.

From MANILA.—For Sydney: July 24, Tropic. For Melbourne: 23, Martaban.

From SINGAPORE.—For London: Aug. 13, Pioneer; 21, Mencius. For Liverpool: 18, City of Glasgow. For Boston: 16, Rocket.

From PENANG.—For London: Aug. 8, Robert and Alexander; 15, Mary Ann; 22. East Lothian.

LOADING.

At SHANGHAI.—For London: Assyrian, Charlotte Ann, Egean, Pegasus, Polmaise, Wynaud. For New York: Leichardt, Union.

At FOO-CHOW-FOO.—For London: John Norman, Napoleon III., Star of the North. For Australia: Johanne.

At HONG KONG, MACAO, AND CANTON.—For London; Hero, Sea Snake, Coleroon, Verbena, Jessie Beazley, Niphon. For Sydney: Esmeralda, Samuel Fales. For Australia: J. Stephenson, Macao. For San Francisco: Lucretia, Penguin.

At MANILA.—For Liverpool: Burdoesy Habana, Gertrudes, Luisita, Northern Crown. For Falmouth: Bahia. For Cadiz: Concepcion. For Sydney: Berengaria.

At SINGAPORE.—For London: Palmerston. For Liverpool: Antilla. For France: Charlemagne, Jules Cezard. For New York: Samuel Appleton, J. W. Sears.

FREIGHTS AND CHARTERS.

At SHANGHAI.—Business is in a very depressed state, and the large amount of disengaged tonnage is more or less swelling by the daily arrivals, as there is no demand for vessels of either large or small size, and, consequently, a great many of them will have to go elsewhere seeking. Exemption Certificates are now suspended by the Custom-house, which almost deprives the natives of any chance in embarking in the coast trade which continues without any animation. As this acts greatly against foreign trade a protest has been made on behalf of the British Chamber of Commerce, the result of which is not yet known. The business by the steamers on the Yang-tsze continues brisk, but is kept very quiet. The Adriatic has been chartered to Swatow and back, 50 lay days, $3,300; Elizabeth, Chefoo, Swatow, and back, 70 days, $5,300; Armistice, Coast Japan and China, $1,600 per month. The Neva has been sold for 3,750 taels; Lebanon, for 12,000 taels; and Iskenderia for 4,000 taels.

At FOO-CHOW-FOO.—For moderate-sized craft several charters are offered at satisfactory rates.

At AMOY.—Lower rates have been accepted owing to the large arrivals, and the demand for coast charters being so small in consequence of the duty imposed on them.

At HONG KONG, MACAO, AND CANTON.—There is very little business doing for Europe, and it is quite at a stand-still for the United States, as also for emigration purposes. Australia has been the principal port, as engagements have been made with no less than six vessels. In rice charters a fair business has been done, while for the coast it has been restricted, owing to the Custom-house having imposed both an export and import duty by suspending the Exemption Certificates. The charters reported are—Hero from Canton, and Nemesis from Foo-chow-Foo to London, both at current rates. Earl of Hardwicke, Jupiter, and John Stephenson from Foo-chow-Foo to Australia, the first at £1,500 in full, second at £4. 15s. per ton; latter on terms unknown. Seven vessels for Bankok, at 55c. to 60c. per picul.

At MANILA.—The Northern Crown is loading 1,200 tons current sugar for Liverpool at £2 per ton, and would load hemp, &c., at less than tcurrent rates. Burdeosy Habana is also loading for the same port a £3. 7s. 6d. for sugar, and £4. 5s. for hemp; and Luisita at £3. 5s. for current, £3. 10s. for unclayed, and £4. 5s. for hemp.

At SINGAPORE.—To Liverpool: £3. 10s. to £4. To New York: £5 to £5. 10s. Ready employment is found by all seeking vessels, as a good inquiry still continues for tonnage. The Antilla loads for Liverpool at above rate. Beatrice, from Padang to New York, at £5 light freight, £5. 10s. coffee. East Indian, from Samarang to Falmouth, at £3. 10s., and 10s. extra if to the Continent.

At PENANG.—There is no vessel now on the berth for London, but the Victor and Gwalior, which are shortly expected, have both been chartered back, the former at £3. 15s. to £4. 10s. The latter at £4. to £4. 10s.

CASUALTIES.

The steamer Manila left Hankow on the 13th July for Shanghai. On the 19th, when about eight miles north of Starling Island, observed some bushes sticking up above the water close to the starboard bow, when the engines were reversed which partly turned her round, and both anchors had to be let out. After having been knocking about for eight hours the quarter deck was four feet under water, lying over at an angle of thirty degrees, when all hands were ordered into the boats, who arrived at Shanghai on the 24th July, having behaved throughout the accident in a most exemplary manner. The vessel is quite a wreck.

The Dollart, arrived in Amoy on the 10th July, having on board a Russian cargo, which has been no less than twenty-three months on its way from Cronstadt to the Amoor. It has been shipped in three vessels which have all met with very heavy weather, and have either had to return to a port or lay about the sea. With the Dollart the captain died when twenty-two days from Batavia, also several of the crew, when the captain's son, who was mate, took charge of her, and managed to get her to Amoy, where all the crew had to go to the hospital and a fresh one was put on board, and she sailed again for Castries Bay on the 25th July.

The St. George, from Amoy, drifted ashore outside the Six Islands, when she signalised the steamer Cadiz, and offered her $1,000 or $1,200 to tow her off, which the steamer refused to do. The Welcome (Brit.) also bound out, seeing her position stood in, and by the loan of her hawsers succeeded in floating and anchoring her in deep water. For this the captain sent in a claim of $500, which was refused, they saying that the ship would have floated herself at high water; but tney ultimately paid $200 for saving a ship and cargo worth $60,000.

PASSED STRAITS OF SUNDA.

From England and Continent to China.—August 1, Bulgersterjn; 8, Richard. To Singapore: 29, Bantam; 30, Beatrice, Palmerston, Antilla; Aug. 4, British Queen; 7, Zes Gezusters; 8, Johana Lange. To Batavia: 6, Capella; 7, D. F. Weber; 10, Svan Heel. From China to England and Continent.—5, Soberana; 6, C. S. Lemon; 7, Mutlah. From Singapore.—July 27, Tigris; 29, Canadian; Aug. 12, Lettice Catherine. From Batavia: 2, Ternate; 8, Ferdinand Brumm. From Manila: 3, Marchioness of Londonderry; 8, Nueva and Engracia. To Boston: 6, Saracen.

Continental Intelligence.

FRANCE.

The Paris papers of the 25th inst. assert that in consequence of the late events in Japan, the English vessels on the China station have been ordered to Yedo.

A despatch has been received by the Maritime Prefect of Toulon, on the 22nd inst., to send forthwith 100 additional seamen to Alexandria to reinforce the French fleet in Cochin China. The steam-frigate *Ulloa* sailed from Toulon on the 21st for Alexandria, having on board several naval officers, seven missionary priests, 187 quartermasters and other non-commissioned officers, and 600 seamen, for Cochin China, with six civilians going to seek their fortune in the new colony.

The Shanghai correspondent of the Marseilles *Semaphore* writes:—

"A sad event has occurred here. Count de Sallabery, a Frenchman, who lately went on an expedition into the interior, took into his service two Europeans, an Italian and an Englishman. But one night whilst he was asleep, these two men murdered him, by stabs with a poignard, and threw the body into the sea, after which they stole his property. The murderers then went towards Ningpo, but were soon arrested by the Chinese police, at the request of the English Consul, who also acts as French Vice-Consul at Ningpo.

"About fifteen boats manned by Europeans, and containing cargoes of silk for Shanghai, were recently seized in the river by pirates, who demanded a sum of 50,000f. to release them. The Europeans refused to pay the money, but, fortunately, they abstained from any act of violence, as otherwise they would undoubtedly have been murdered. The pirates were about to go off with the vessels, but the English Commodore at Shanghai sent a gunboat, and the whole were retaken. The Rebel army of 15,000 or 16,000 men, which had for some time been blockading Chin Kiang, on the Yang-tsze, suddenly disappeared a few days back, and has gone we know not where. It appears that energetic measures are about to be taken to protect Ningpo against the Rebels. The French Admiral in command of the Shanghai station a short time back made a reconnaisance at that place, and has just gone on a new one, accompanied by the French Consul. They intend to visit the Island of Chusan, in which, during the expedition in China, stores for the troops were placed, and which the French intend to occupy permanently. This island will possess great advantages for French commerce, and the English will regret seeing it fall into the hands of the French."

The *Pays* says in its "latest news":—"The complete evacuation of China by the French troops is not so near at hand as some foreign journals allege. Letters received from Peking by the last mail state that it has been considered necessary to support the Ambassadors in that capital by forces sufficiently imposing to prevent the results of the campaign from being compromised by the ill-will of the inferior mandarins who are clandestinely opposed to the liberal tendencies of the Viceroy."

A letter had been received at Toulon from Cochin-China, dated the 31st of July last, giving very unsatisfactory accounts of the state of that country. At that date the Annamites were beginning to repeat their attacks under the influence of a proclamation from the Emperor, who had set a high price on the head of every Frenchman. Copies of this proclamation had been distributed through the country, and even attached to the trees. The French possession of My-Tho was nearly blockaded by from 4,000 to 5,000 Cochin-Chinese, who were ravaging the country, pillaging and massacring the inhabitants who would not emigrate at the approach of the French. These troops, composed of brigands of the worst description, were commanded by a mandarin of no common energy, who, being perfectly aware that his followers could not resist the French in combat, was determined to avoid a collision with them. Knowing all the passes through the marshes, he could commit his depredations with impunity. The French commander had consequently determined to attack Bien-Hoa, the base of the enemy's operations. The result is anxiously expected.

An addition is about to be made to the Exhibition now open at the Palais de l'Industrie of the productions of the French colonies—namely, a collection of articles of the kingdom of Siam which were sent to France by the Government of that country. The public and persons connected with manufactures will thus have an opportunity of examining different articles of raw material, such as silk, cotton, ivory, horn, gums, different kinds of wood, &c., which are similar to the productions of the new French colony in Cochin China.

The Siamese Ambassadors are to leave France about the 28th, and orders have been sent to Toulon to prepare the steam frigate *Asmodee*, to convey them to Alexandria.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Sept. 23.

Although it was only in my last letter that I had to record the close of the Session of the States General on the 3rd inst., that Parliamentary body was re-opened on the 16th inst. for the Session of 1861-62, by the King in person. In his speech from the throne His Majesty congratulated the country on its being in such a flourishing condition, informed the House that he was on the most amicable terms with all foreign Powers, but said nothing of America. With regard to the Colonies he said but few words, regretting the war that was going on in Borneo, but hoping it would soon be brought to a satisfactory conclusion.

Mr. J. A. Philipse, one of the members for South Holland, has been re-appointed President of the First Chamber of the States General for the present Session. The first act of the Second Chamber was to make up their list of three candidates for their Presidency, for presentation to the King, who, by the power vested in him by the Constitution, is entitled to make the selection. The three candidates elected by the Chamber are Mr. van Reenen (who had 36 votes), Mr. Dullert (27 votes), and Mr. van Goltstein (34 votes).

The King has selected Mr. van Reenen as President of the Second Chamber.

As it may be interesting to your readers in the East to see the present composition of the First Chamber, I subjoin herewith a correct list of the members, with the provinces where elected, and the year in which they will have to retire, according to stipulations contained in the Constitution.

1. NORTH BRABANT.
1862. N. F. C. J. Sassen.
„ E. J. P. van Meeuwen.
1865. L. J. B. van Sasse van Ysselt.
„ H. P. van den Fries.
1868. L. Rysterborgh.

2. GELDERLAND.
1862. H. W. Baron van Aylva van Palland van Waardenburg en Neerynen.
„ H. R. W. Baron van Goltstein van Oldenaller.
1865. W. A. Baron Schimmelpennick van der Oye.
1868. C. E. J. F. van Nispen van Pannerden.
„ C. H. Baron van Rhemen van Rhemenshuyzen.

3. SOUTH HOLLAND.
1862. J. A. Philipse (President).
„ A. van Ryckevorsel.
1865. D. Blankenheym.
„ O. B. Hooft van Benthuyzen
„ A. Hartefelt.
1868. A. van Weel.
„ P. Loopuyt.

4. NORTH HOLLAND.
1862. F. L. H. J. Bosch van Drakestein.
„ W. Borcel van Hogelanden.
1865. Dr. H. van Beeck-Vollenchoven.
„ J. C. van Wessum.
1868. F. van Audermeulen.
„ C. Hartsen.

5. ZEALAND.
1862. C. van der Lek de Clercq.
1868. J. Fransen van der Putte.

6. UTRECHT.
1865. J. Baron Taets van Amerougen tot Natewisch.
1868. J. Huydecoper van Maarsseveen.

7. FRIESLAND.
1862. G. R. G. van Swinderen.
1865. T. A. M. A. van Andringa de Kempenaer.
1868. F. J. J. van Eysinga.

8. OVERYSSEL.
1862. W. H. Cost Jordens.
1865. J. A. G. Baron de Vos van Steenwyk.
1868. J. D. C. Baron van Heekeren van Wassenaar-Twickel.

9. GRONINGEN.
1862. A. J. van Royen.
1868. J. J. Cremers.

10. DRENTHE.
1865. W. J. Touckens.

11. LIMBURG.
1862. L. L. G. M. de Villiers de Pite.
1865. L. F. H. Beerenbroek.
1868. F. B. H. Michiels van Kessenich.

Secretary, J. R. SINGENDONCK.
Assist. Secretary, J. K. J. de JONGE.

The *Journal de la Haye* relates, with evident marks of self-complacency, that the Emperor of the French after perusing Mr. Money's work, "Java; or, How to Manage a Colony," placed it in the hands of Marshal Pelissier and M. Chasseloup de Laubat, who reported so favourably on its contents that orders have been given to Rear-Admiral Bonnard, the new Commander-in-Chief and Governor of the French settlement in Cochin China, to repair in person to Batavia on his way out, in order to study for some time the Dutch system of colonial government in Netherlands India, with a view to introduce it into the new French colony.

Major-General C. A. de Brauw, of the East India army, Aide-de-Camp Extraordinary to the King, is nominated Grand Officer of the Order of the Crown of Oak, and Count D. C. van Hogendorp, Resident of Samarang, to be Commander of the same Order.

Mr. J. K. de Wit, Consul-General of the Netherlands in Japan, has received the Royal permission to accept and wear the decoration of Knight of the Second-class of the Order of

Digitized by Google

St. Anne in diamonds, conferred on him by the Emperor of All the Russias.

First-class Lieut. Kniphorst, R.N., Commander of H.M.'s steamer *Sindoro*, fitting out for service in the Indian Archipelago, is appointed Flag Lieutenant to Rear-Admiral May, the new Commander-in-Chief of the Dutch naval forces in the East, who goes out by the overland route in October. Lieut. Kniphorst will, however, go out in command of the *Sindoro*, and join the Admiral after his arrival in Java.

The King has conferred the honorary rank of Major General on the Soesoehoenan of Soerakarta, His Highness Pakoe Boewono Senopati Ingalogo Ngabdoer Rachman Saidin Panotogom VIII., and to the Sultan of Djokdjokarta, His Highness Hamangkoe Boewono Senopati Ingalogo Ngabdoer Rachman Saidin Panotogomo Kalifatolah VI.

Mr. J. H. Donker Curtius, late Dutch Commissioner to Japan and Siam, has obtained the Royal permission to accept and wear the decoration of Knight Commander of the Order of Christ, conferred on him by H. M. the King of Portugal.

The King has awarded a pension for life to L. N. Baron van der Goes van Dirxland, the late Minister for Foreign Affairs.

Last week Mr. H. D. Potter, formerly Resident of Tagal, received a very handsome and valuable memorial from the officials and inhabitants of his former Residency, in the shape of a massive silver tea equipage, engraved with a suitable inscription. The present was manufactured at the Royal Netherlands Manufactory of Silverware, at the head of which is Mr. J. M. van Kempen, of Voorschoten.

Despatches have been received by the Minister for the Colonies from the Governor of Curacoa, stating that on the 17th ult. the American piratical steamer *Sumter*, Capt. Semmers, appeared off that port, and fired a signal gun. The Commandant of the fort, perceiving the Secessionist flag, would not allow the privateer to enter the harbour till he had communicated with the Governor. In the mean time the *Sumter* sent a boat ashore with an officer and a party of armed men, to ask permission to enter the port for the purpose of coaling and repairing damages. The Governor gave the permission required, but not without a strong protest on the part of the United States Consul. The *Sumter* remained there a week, and then put to sea. She carried a crew of a hundred and fifty men, and was armed with four thirty-two pounders and two sixty-four pounders. She did not purchase any provisions at Curacoa, one of her officers remarking they had found such a quantity of food on board the prizes they had made as to last them for several weeks. Those of the Officers who had served in the United States Navy wore their old uniforms with the naval button. On the day the *Sumter* left, one of her crew deserted. The Governor gave them the assistance of the police to find him, but they did not succeed. It was said he found a safe asylum at the house of the United States Consul. This affair will probably lead to a diplomatic correspondence between the Netherlands Government and the Cabinet at Washington.

It will be remembered that in the last Session of the States General, the Bill for the introduction of a uniform penny postage, though carried in the Lower House, was thrown out by the First Chamber. In consequence of this, an agitation has commenced, for the purpose of pressing it more strongly than ever on the consideration of the Legislature. An address to the States General has already been got up and numerously signed by the inhabitants of Bergen-op-Zoom, and a similar one is being prepared by the Chambers of Commerce at Leyden, Utrecht, and other towns.

A letter from Harderwyk states that a detachment of colonial troops, consisting of one hundred and fifty men, under the command of Lieut.-Col. W. Lammerée, of the E. I. Infantry, who is returning to duty from furlough to this country, and accompanied by the Second Lieutenants, G. S. Ruempol, S. Barthelemy, and F. Schut, and the medical officer of the third-class, T. van Gelder, marched to Rotterdam on the 14th inst., where they embarked the next day on board the *Constance*, Capt. W. Kimmerer, for Batavia. The letter further reports that another detachnent, consisting of one hundred and twenty-five men, under the command of Capt. L. Pauwels, of the E. I. Infantry, returning from leave of absence, and accompanied by the Second Lieutenants, W. Helderman, A. E. van Dugteren, P. B. Staden ten Brink, and J. van Poll, are under orders to embark at Rotterdam, on the 26th inst., on board the *Noord Brabant*, Capt. H. R. Bok, for Batavia.

Accounts from Nieuwe Deep mention the arrival at that port of the steamer *King Willem III.*, Capt. Pieseers, from Port Mahon, with seventy-one of the crew of the frigate *Evertsen*, left there in hospital suffering from a disease in the eyes. They were under the command of First Lieutenant van Rhyn, and in medical charge of Dr. Juzi, one of the surgeons of the above-named frigate, landed at Port Mahon to take care of the men. Amongst those now arrived are four hopelessly and perfectly blind.

The following ships have been chartered by the Netherlands Trading Company since my last to bring cargoes of colonial produce from the East to the undermentioned ports :—

For Amsterdam :—	*Argonaut*,	Capt.	R. M. Donema.
„	*Magdalena*	„	J. Hoog.
„	*Bato*	„	C. van der Burg.
For Rotterdam :—	*Dageraad*	„	J. R. Ulrich.
„	*Brederode*	„	L. Kruymel.

The Company advertises for tenders for the conveyance of a small iron steamer with its engines on board to Sourabaya ; to be seen at the factory at Fyenvord. Offers received up to the end of September.

H.M.'s steamers *Bromo* and *Sindoro* are under orders to sail on the 1st of October for the East India Station, whilst orders have been given to commission the steamer *De Linge* for the same destination, and she will be despatched from this country before the end of the year.

Accounts have been received here from Gibraltar that the new Governor-General of Netherlands India, Baron Sloet van de Beele, arrived at that port, on the 9th inst., by the Peninsular and Oriental Steam Navigation Company's steamer *Ceylon*, and proceeded on to Alexandria.

The Hague journals state that the last accounts from the Dutch colonies in the East Indies, which, however, only come down to the 31st of July, are generally satisfactory. The populations of the districts in Borneo, which were inundated in the spring, were returning, and hopes were entertained that by their activity in cultivating the land a good harvest would be obtained. On the other hand, an expedition under the orders of Major Schnack, which was sent to capture Antassari, chief of the rebels of Banjermassing, had failed, half of the men composing it being killed or wounded. The letters suggest that, instead of petty expeditions, which only fatigue the Dutch soldiers and give courage to the enemy, energetic measures ought to be undertaken. Pirates had recommenced their depredations on the west coast of Borneo, and had even carried off some men from the island called Biliton, and the attempts made to check them had not succeeded.

COMMERCIAL.

The great event in our market since last mail is the Company's East India COFFEE sale, held at Rotterdam on the 18th inst., and which—as was anticipated from the comparatively small quantity—served to confirm the present high quotations, and in several instances even to overshoot them, as may be seen by a glance at the valuations and actual paid prices, in the subjoined table, giving the particulars of the sale. It was a pitched battle for high or low prices, but it was a very brief one, for the very first lot decided the fate of the day in favour of an advance, and purchasers seeing how the result would be, went in freely and bought to the extent of their requirements, and even above them, with an unusual display of liveliness and spirit. The whole quantity was sold.

SUGAR appears to inspire a little more confidence, and has slightly improved, though the prices are still below those of the July sale, which establishes the criterion. A good deal of business has been done in Java sugars, amongst which I may mention 1,666 krarjangs, ex *Balder*, No. 11, at 32¼ fl. ; 1,098 kr., ex *Windward*, No. 11½, at 32½ fl. ; 498 kr. ex *Proteus*, No. 15, at 36½ fl. ; and 797 kr., No. 17½, at 38 fl. At Rotterdam two several parcels changed hands at rather better rates. The brokers have established the estimated value of the sugar in the Company's approaching sale as follows :—Brown descriptions 1 fl., yellow ¾ fl., grey ½ fl., and white ¼ fl. under the prices realised at the July sale. In the Refined market there is a lively demand for ready goods at former prices ; the refiners are deeply engaged in contracts, and are with difficulty induced to make fresh ones for the moment. The only new contract I heard of was one for 400 tons, deliverable at the end of December.

RICE continues in good request for the reasons mentioned in my last, and a slight advance is perceptible in the prices paid. The 16,000 bags Necransie just arrived here, per *Solway*, were sold previous to the vessel's appearance. A lot of 1,000 bags Java table rice was sold at 11 fl., which price could not have been obtained last mail. 11,076 bags Rangoon fetched 7¼ fl. ; good clean descriptions are in greatest request. At Rotterdam 3,500 bags table rice, ex *Helvoetsluys*, were sold at 10¾ fl. ; 1,000 more per same ship, at 11 fl. ; and for the rest of the cargo higher prices are demanded.

TEA calm, with low stocks and steady prices.

SPICES.—With the exception of Amboyna Cloves, for which there is still a good demand, and for which 21¼ fl. has been paid for No. 2, there is not much to say about the finer descriptions, which are all held for higher rates than the prices of last sale, which purchasers are unwilling to give at present.

BANCA TIN shows an improvement in the quotations, and several purchases have been made. Thus successive sales exhibit successive higher prices. 1,000 blocks were sold at 70 fl., 1,500 at 70½ fl., 2,000 at 71 fl., and smaller lots fetched as much as 72 fl.

INDIGO is firm, if not higher, and stocks of Java rapidly melting away.

In HIDES there has been a steady business doing. 5,000 Batavia and Samarang ox and buffalo, imported by the Company, and 4,900 ditto belonging to the private trade, have taken at full rates.

TOBACCO rather quiet, but not lower. The crop of 1860, from Sourabaya, is as follows:—

2,500,900 lbs. Government contract produce.
7,324,500 lbs. free labour do.

A striking proof of the expansiveness of the latter over forced labour.

The company has announced a sale on the 28th of October at Amsterdam of 2,013 chests of Chinese and Japan mixed goods, such as lacquered ware, ivory goods, bamboo work, porcelain, silk manufactures, and other fancy articles. This will be followed by another sale of similar articles belonging to the private trade, and put up to auction by the brokers, Messrs. van der Vies and Co.

RESULT OF THE NETHERLANDS TRADING COMPANY'S SALE OF EAST INDIA COFFEE, HELD AT ROTTERDAM, SEPTEMBER 18, 1851.

PASSENGERS ARRIVED.

Per *Maria Adriana*, Capt. van der Held, at Brouwershaven from Batavia: Mr. J. van der Linden.

Per *Johannis Ludowyk*, Capt. van der Waal, at Brouwershaven from Batavia: Rev. J. J. Scheuer, lady, and family, with a Javanese servant.

Per *New Holland*, Capt. Tuk, at Nieuwe Deep from Batavia: Mr. M. Ullenbeck, officer in the E. I. Civil Service, lady, and five children, Mr. and Mrs. Portengen, Mr. van Genyk, Mr. van Meesten, Lieut.-Col. Brunsoeldt van Hulte, Mr. Engelke, Mr. Kamper, two children, with a Javanese servant, Mrs. van Ginnip and child, Miss Veucht.

Per *Henrietta Maria*, Capt. Tjebbes, at Nieuwe Deep from Batavia: Mr. and Mrs. R. Keyzer and daughter, Mr. D. H. Huet.

Per *Maarten van Rossem*, Capt. Ryken. at Brouwershaven from Batavia: First Lieut. J. L. Begens, Mr. Voute and family, Lieut.-Col. van Hassell, Mr. Staal and family, Mr. van Heeften, jun.

Per *Lamina Elisabeth*, Capt. Gersen, at Nieuwe Deep from Batavia: Mr. and Mrs. P. van Degelen and family, Mr. J. P. de Rooy.

Per *Jannetje*, Capt. Lupcke, at Helvoetsluys from Batavia: Mr. E. A. Halewyn, Mr. L. A. Blikman and family, Mr. P. Sandberg and family, Mr. Hafkemeyer, Capt. O. A. Kocken, E. J. Army, Mr. G. A. Tindal, Mr. J. J. Sterke, Mr. B. Hendriks, Mr. I. E. Scheltens, Miss Farsenaar.

PASSENGERS OUTWARDS.

Per *Medea*, Capt. Lourena, from Rotterdam to Batavia: Mr. and Mrs. Kruisboom and three children, Mr. and Mrs. Isaac Bousquet, Dr. Bierhaus and daughter, Miss van Vliet, Miss Harsfeldt, Miss Mascar, Miss Warnsinck, Messrs. J. van Schmidt auf Altenstadt, Hope Laudon, J. C. Berg, Jacob Sirks, G. Lamers, E. A. Engelbrecht, H. J. Tydeman, van der Schalk, D. F. Hurrelbrink, — Herderschee, J. de Blauw, W. Stortenbecker, — van Faber, S. G. Pries, B. Paillard, H. C. Eenhuyzen, A. van der Straate, L. A. Quack, C. B. Opscholdens, J. L. Sonnenberg, J. Q. de Calurvaar, Mr. and Mrs. J. de Graaf and child, three Javanese native servants, and two soldiers.

Per *Doelwyk*, Capt. Hoefman, from Rotterdam to Batavia: Mr. and Mrs. J. Zimmer and child, Messrs. C. D. Strootman, K. Ruiter, J. Spoelstra, P. Hegerwaard, F. G. Broman, H. Margadant, J. J. Saudberg, J. Mulder, P. C. Gaal, and one Javanese servant.

Per *Minister Pahud*, Capt. Kievit, from Rotterdam to Batavia: Messrs. B. H. van Rhyn, W. Hulswet, H. T. van Syll, E. R. van Ellinkhuyzen, J. Schorl, F. H. Schultjes, T. C. L. Pooy, and F. A. M. Baron van Voorst tot Voorst.

Per *Aegidia and Pauline*, Capt. Hoogland, from Rotterdam to Batavia: Messrs. J. E. ter Beek, L. van der Upnach, A. C. Leers, J. A. Arentz, A. J. Ludwig, C. F. Koch, A. G. Debart, J. W. Markers, N. Weyna, and van de Riviere—all officers of the Dutch East India army.

Per *Zeenymph*, Capt. van Roggen, from Amsterdam to Batavia: Mr. and Mrs. A. B. Obdam, Mr. and Mrs. Jesse and three children, with two Javanese native servants, Mr. and Mrs. N. Kerkhoff, Mr. and Mrs. van der Wyk, Miss M. Korteweg, Messrs. W. C. Mauve, J. H. van der Meulen, L. Obdam, J. T. Obdam, J. Lugler, Lieut. A. Bosch, Lieut. G. Klinkenberg, J. C. du Cloux, G. Legel, and F. Gezell—schap of the E. I. Civil Service.

Per *Bernard Agnes*, Capt. Oudeman, from Amsterdam to Batavia: Mr. A. Thoman, Mr. J. Bungener, Mr. C. Thoman, Miss E. Schlosser.

Per *Pauline Constantine Eleonore*, Capt. Pybes, from Amsterdam to Batavia: Mr. D. Keyzer.

Per *Magdalena*, Capt. Kooy, from Amsterdam to Sourabaya: Mr. and Mrs. J. Engelenburg and family.

Per *Anna Lena*, Capt. Zaal, from Amsterdam to Samarang: Mr. and Mrs. G. Leslie and two children, Mr. V. W. de Villeneuve, and Miss M. Scheib.

Per *Ouderkerk an der Amstel*, Capt. K. J. Swart, from Rotterdam to Batavia: Mrs. N. van Davelaar, governess, and five children, Miss Pohl, Mr. and Mrs. Hoorweg, Miss F. H. Fontein, Messrs. J. C. Bicker Top, M. C. Bylevelt, A. H. Spaan, F. de Perponcher, E. L. Elias, C. Dykerhof, F. H. d'Aulnil de Bourouill, Frey van Boolhuyzen, P. de Keth, C. Laurent, A. W. Krayenhoff, and G. W. Drayer.

BANQUET AT PERTH TO SIR J. HOPE GRANT.

The freedom of the city of Perth was lately presented to Sir J. Hope Grant, G.C.B., and on the following day the gallant General was entertained at dinner in the County Rooms by the gentlemen of the county and city.

The Earl of Mansfield, who presided, in proposing the toast of the evening, referred to the gallant general's services for thirty-five years in the army, and to the distinctions he had gained in the campaigns of the Sutlej, the Punjab, India, and China. He also highly eulogized his character in private life.

Sir Hope Grant, in the course of his reply, said—It has been my greatest ambition to be of service to my Queen and country, and your approbation amply repays me for all the difficulties I have had to contend with. In the last China campaign, amid all the horrors and dangers of war, there was much to interest and amuse, I assure you, and I cannot help remembering the day we landed at Pehtang. The country around was a large salt marsh, and before we were enabled to set foot on shore the tide had risen and covered the whole country round for miles with water. There was a raised causeway or road, which ran from the Taku Forts to Kohtung, and General de Montauban and myself determined to make for this position. There was a large Tartar cavalry picket on this road, but they seemed struck with surprise and terror at our amphibious appearance, and at two such fine armies marching up to their knees in water, with their trousers tucked up, carrying shoes and stockings in one hand, and in the other their weapons of destruction, and they never waited for an attack. Our first day's fight was upon the 12th of August—grouse-shooting day. But we had, unhappily, other game to destroy. The Tartars were well licked; and in the house where San-ko-lin-sin, the famous Tartar general, had resided, a despatch was found written by him to the Emperor, in which he said—"English newspapers have been put into my hands, which I have had translated, and in them it is stated that the English mean to land at Pehtang, and take our forts in reverse. We know very well this is not likely to be the case. No nation would ever be so foolish as to state publicly the tactics they intended to pursue. Besides which, the country is quite impracticable, and I have troops all along the road which will soon annihilate them." So, gentlemen, you will see the candour with which this was stated, and that the way in which we tried to forewarn the Tartar general had the effect of putting him off his guard, as he could not believe in the truthfulness of our public prints. Well, gentlemen, the Taku Forts fell, and we marched up to Peking, after two sharp actions along the road. Batteries were formed by the French and ourselves to blow down the

Digitized by Google

walls, which would have been no easy matter, as they were 50 feet high and 60 in breadth. We have read in ancient history of the walls of Babylon being so broad that a number of chariots could be driven abreast along the top of them, and on the walls of Peking I am convinced that six or eight coaches-and-four could have gone easily in the same manner. However, just five minutes before our guns were to open, one of the city gates was given up to us, which we took possession of. A day was fixed for signing the treaty, and as I had been informed by Roman Catholic missionaries—who had heard it from Chinese converts, of whom there are a great number in that city—that infernal machines and guns were to be turned against us when we got into the intricacies of the town, I sent a large force to be prepared for any little *contretemps* we might meet with. Lord Elgin accordingly started at the hour appointed, and I accompanied him. We proceeded to the hall of audience, where we were received by the Prince Kung and about 400 or 500 Mandarins, dressed in splendid robes. The terror displayed in the Prince's countenance was truly amusing. His eyes kept turning about without moving his head, first towards Lord Elgin and then towards me, and he was as pale as death. The ceremony was just commencing, when Mr. Berto, a photographer who had accompanied me to China, being anxious to obtain a good view of the signing of the treaty, placed his large apparatus within 20 yards of Prince Kung, the large lens presented at his breast and at the other Mandarins, who, like ourselves, poor fellows, are just as frightened at infernal machines as we were. They thought this was some terrible species of mortar with which we intended to blow them all into the next world, and their looks of consternation were truly amusing. The treaty was soon signed, and we were bowed out much more pleasantly than we were bowed in. You are aware, gentlemen, everything ended satisfactorily. In a few days we marched down the country, and got away just as the severe frosts commenced. The river closed up, and snow fell, and I was obliged to march the cavalry 32 miles in one day to the mouth of the river Peiho to enable them to embark. Shortly after the frost became so severe that the sea froze over 40 miles from land. Well, gentlemen, we got safely home to our native country, and I trust we shall have no more war with China. I trust, when I return from India, which I hope to do before long, that I shall not be forgotten by my old friends who have treated me so kindly and warmly this evening.

Literature.

La Chine et les Puissances Chrétiennes. Par D. Sinibaldo de Mas, Ancien Envoyé Extraordinaire et Ministre Plénipotentiare de la Reine D'Espagne en Chine, &c. Paris: Hachette and Co.

This book is written in a thoroughly lively and readable style, and discusses all those topics—social, political, religious—which are connected with the intercourse between Chinamen and Europeans. M. Sinibaldo de Mas writes with the authority of a man who is perfectly conversant with his subject, and with the ability of an author who knows how to turn his observation and acquirements to the best possible account. With Anglo-Chinese literature he is evidently quite familiar. He considers Williams's "Middle Kingdom" as the best and most complete work that has hitherto been published on China, quotes Davis, Lockhart, Bowring, and Scarth, the *Friend of China* and the *China Herald*, and commits, as far as we know, in his allusion to English authors, only one very trivial mistake—viz., that of confounding Dr. Medhurst, the missionary, with his son Mr. W. H. Medhurst. On the whole, the writer thinks favourably of China and the Chinese. He hazards the assertion that they are more polite than any European nation; declares that since visiting the country he has renounced his belief that the duel was a necessary institution, as the Chinese are refined and courteous without it, and palliates the barbarous custom of compressing the feet by stating that it is not more injurious than the European habit of tight lacing, or more absurd than the crinolines in which European ladies conceal the natural beauty of their figures. Truly does he say that "une femme au naturel et une femme Européenne habillée sont les deux choses du monde qui ont le moins de ressemblance."

In the chapter entitled "Antagonisme Politique," M. Sinibaldo de Mas may be regarded as a special pleader for the Chinese, and the arguments he advances are extremely powerful, if not convincing. We perfectly agree with him in his belief that we have no right to destroy the nationality of a people under the pretext of civilising them. If civilisation were happiness, the case, he says, would be altered; but that the two are totally distinct, is, he considers, proved by the 4,000 or 5,000 cases of suicide committed every year in London and Paris. Yet he does not for a moment doubt that "foreign commerce has been and continues to be a great benefit to China," and he observes what everybody knows who is familiar with the land, that the natives themselves are fully alive to the advantages of commerce and intercourse with Europeans, and that it is only "une race étrangere usurpatrice" that has endeavoured to prevent our free access to the country.

A curious chapter in the work discusses the advantage of China being divided into three or four different kingdoms, and concludes with remarking that France, England, and all the European Powers should do everything that is practicable to produce such a result.

Writing on the Opium Trade, our author notes with some pride that not a single chest of opium has ever been introduced into China by means of Spanish vessels, yet he does not regard opium-smoking as an unmitigated evil. He says, indeed, that he has smoked it himself, without feeling ill-effects, or any of that delicious intoxication which it is described as producing. He tells us, too, that by a *ruse* he has sometimes led his companions to smoke it to excess: "Et aussitôt apres, leur ayant parlé d'affaires serieuses, ils m'ont répondu avec autant de lucidité qu'ils auraient pu le faire avant de fumer." Happy would M. de Mas be, he says, if he could prove his assertion on some member of "du comité chinophile anti-opiste de Londres," and especially on Lord Shaftesbury himself, whom he accuses of not having sufficiently studied the question, and of using intemperate language. At the same time, he exonerates our countrymen from whatever blame may attach to the originators of the traffic, since the Portuguese were the first in the field.

If we were fully to review such a work as this of M. de Mas, we should be compelled to bring forward a number of subjects which have been again and again discussed in our columns. We do not see anything that calls for special comment in his notice of the three wars between Great Britain and China, unless it be the admirably lucid style in which they are described. His account, too, of the manners and customs of the Chinese, which occupies a considerable portion of the first volume, does not materially differ from the statements of other writers. Yet M. de Mas thinks and sees for himself, and while he cites largely from English writers, he draws his own conclusions, and has always at hand a fund of lively illustrations. On the whole, while differing from the author in many of his conclusions, we are indebted to him for a very useful and entertaining work—a work which we shall be glad to place upon our shelves for frequent reference and occasional reading.

CHINESE IMMIGRANTS IN AUSTRALIA.

We extract the following from the columns of a daily paper:—"We must congratulate the respectable portion of their community on their determination to aid the Executive in putting down the scandalous riot at the Burragong Gold Fields, in which a mob of ruffians, after brutally assaulting an inoffensive party of Chinese, proceeded to attack the police, with a view to rescue three of the ringleaders, who had been very properly locked up. From the commencement of the Chinese immigration to the Australian diggings, there has been an ill-feeling against them, founded partly upon the hatred with which vulgar-minded men regard foreigners of any kind, and partly upon the dislike to more competition in an occupation of a gambling character, that seldom rewards those engaged in it to the extent of their desires. As a rule, the Chinese have been forced to work in the least advantageous spots, but by unwearied industry and greater thrift than the European diggers, they have continued to get on, and so long as they violated no law, and did not interfere with the rights of others, they were entitled to encouragement and respect. Far from this was the treatment accorded to them on the 30th of June, when a large mob, armed with bludgeons provided for the purpose, assaulted them with the utmost ferocity, stealing and destroying their property, and maltreating them. So gross were the outrages, that Chinamen were actually scalped by their assailants in the effort to deprive them of their 'tails.' The captain of the police acted exceedingly well; but when, after the repulse of one attack, his position was threatened by 3,000 men, he judiciously retreated, to wait for reinforcements, which were on the road when the mail left. All business at the diggings was at a stand; the managers of the banks had left in fear, the rioters were in complete possession of the ground and preparing for resistance—an idea which, it is to be hoped, we shall hear they abandoned when the military arrived."

THE COLOURING OF TEA.

A Jersey paper has the following:—The recently-opened trade with Japan has afforded the opportunity of importing, for English consumption, fine green tea at a cheaper rate than from China. The Japanese, like sensible tea-drinking people, have not hitherto, even for the sake of extra profit, covered the surface of the leaf with powdered colour, as it is done by the Chinese in order to please foreign customers. Merchants in England, knowing that in Jersey we have no Board of Customs to interfere with their operations, are sending it here to be coloured; this makes the Japanese tea appear like that from China, and therefore it is more seemingly valuable in the London market. Many females are employed to change it from the natural dark olive to the artificial bluish hue, as seen when sold in the shops: the change is effected nearly in the same manner as confectioners colour the surface of sugar-plums for children. There can be no objection to the employment to the employment of our poor, as the consumer in England has ultimately to defray the cost; but notwithstanding this it is absurd to incur an expense to make tea unwholesome for the sake of having the leaf more inviting to the eye, as the powdered mineral is of course washed off, and drunk when the infusion is taken at the tea-table. The Japanese fashion of using it in its original purity is decidedly the best, as an infusion made from the unsophisticated leaves must be most inviting.

The London & China Telegraph.

LONDON, SATURDAY, SEPTEMBER 28, 1861.

THE OPIUM TRADE.

THE immorality of the opium trade with China is almost universally admitted; its impolicy in a commercial point of view, though not so obvious, can, we think, be proved. Looking at the subject from the loftiest of all stand-points, we should be justified in asserting that a vicious traffic must in the long run be as detrimental to the trader as to the purchaser. So much at least we know from our belief in the moral government of the universe, since this is GOD'S world and not the Devil's. But on such a matter as this a mere abstract belief will be immensely strengthened by facts; and those who, for the sake of humanity, would be glad to witness the annihilation of this trade will be gratified in knowing that it contains in it the elements of its own destruction. We do not quite agree with Colonel SYKES in his broad assertion that, "whatever the pre-"text for our wars with China, they really originated in the "opium complications and our smuggling transactions," for our extraordinary ignorance twenty years ago of Chinese customs and institutions, combined with our imperfect knowledge of the language, tended in great measure to produce a rupture at that time. The opium trade, indeed, grew with the rapidity of fungi after the abolition of the East India Company's monopoly in 1834, but, though it tended to hasten a rupture between our country and China, it was not the sole cause of it. Still we have the hideous fact that the strenuous exertions of the Chinese Government to prevent the illicit opium traffic were opposed by the equally strenuous labours of English merchants and others to introduce the poison into the country. How fatally the latter have succeeded we know from the 70,000 chests of opium which are annually imported into China, and from the revenue derived from it last year, which amounted to upwards of six millions sterling.

There can be no doubt whatever that in proportion to the success of the traffic in opium will be the detriment to legitimate branches of trade. It is not merely that immense sums are spent by the Chinese in this pernicious drug, but that the purchase and use of it tend to destroy the sale of our British manufactures. Opium smoking is the worst species of intoxication. It is an expensive luxury, and at the same time disables a man from work, and any one who has visited the opium shops in China knows well the utter degradation into which the opium smoker inevitably falls. Does your Compradore appear stupid and dull, you at once know the cause, and tax him with indulging in the fatal drug, notwithstanding you are daily selling it. Truly has it been said that the confirmed opium smoker "is the most forlorn creature that treads the earth." "What we "are doing," says an able writer on the subject, "is just this; "we are drugging to the death the man whom we are hoping "to see enter our shop daily, purse in hand!" and a Chinese officer at Shanghai on being asked how trade might best be promoted, instantly answered:—"Cease sending us millions' worth "of opium, and then our people will have more money to pur-"chase your manufactures." He might have added that not only would more money be then available for the purposes of trade, but that the power to conduct business would not be destroyed; for as KOO KINGSHAN said, five-and-twenty years ago, "Merchants who smoke fail to keep their appointments, and "all their concerns fall behind-hand. For the wasting of time "and the destruction of business, the pipe is unrivalled."

Now, if the export of this drug from India and its sale in China continues to increase in the proportion which it has done of late years, it is clear almost to a demonstration that British goods will lack purchasers, and that British trade in its honourable and legitimate branches will be considerably curtailed. Such a result, however, we will not anticipate. As India has now passed over to the British Crown, our Government will be responsible for the extent to which the poppy shall be grown, and it rests with the Government to say how far, by the growth and sale of the plant, the commercial interests of this country and the moral interests of China shall be injured. Happily the expense of cultivating the poppy has considerably increased, and promises to increase yet more, and there are many reasons for believing that ere long the cultivation of the plant, except for medicinal purposes, will be a losing speculation. That the opium traffic will be ultimately placed by public opinion among the obsolete branches of trade we have not the slightest doubt.

COMMERCE WITH CHINA ACROSS BURMAH.

WE copy the following article on the above important subject from the *Calcutta Englishman*:—

"Dr. C. Williams took his departure from Rangoon in the steamer of the 2nd of August, *en route* to Amerpoora, where he goes on a political mission to the Burmese Court. There he will be in communication with Colonel Phayre, the Commissioner of Pegu, and will negotiate with the King for permission to undertake the expedition through Northern Burmah and the Himalaya passes into the Chinese province of Yunnan.

"Dr. Williams is an assistant-surgeon in Her Majesty's 68th Regiment, stationed at Rangoon; and since his residence in Pegu, has devoted much of his time to the study of the Burmese language, in which he is proficient, being also possessed of attainments which qualify him to accomplish efficiently the enterprise upon which he is bent, should the permission of the Burmese authorities be fortunately obtained.

"One great geographical problem which will be solved in carrying out the proposed expedition will be the decision of a point now involved in total uncertainty and obscurity, namely, into what stream the great Sampoo River, which flows from east to west in Central Asia, debouches its waters. In most of our maps it is arbitrarily marked as taking a southerly turn, and pouring its flood into the great volume of the Burhampooter, and so reaching the ocean; whereas some assert that it takes no such bend, but still continuing its eastern course, unites with the Irrawaddy, and so gains the sea. There is not the slightest proof of either position; but we believe the more valid assumption is that our charts are erroneous, and that the latter course is the true one.

"A communication, not very lucid and intelligible it is true, has been received here from a French missionary vicar, now, and for many years past, residing in Thibet, who asserts that the Sampoo forms no connection whatever with the Burhampooter, but continues its easterly course to join the Irrawaddy, as above described, and so reaches the ocean; and this interesting question will be one of the first cleared up by Dr. Williams's expedition. The difficulties of the new route from Burmah into the Chinese province of Yunnan cannot be great, as there is a considerable and regular trade carried on through it between the two countries; and it is with the view to carry a line of British commerce over the same ground into Southern China that the present political mission to the Court of Ava has been undertaken, preliminary, it is to be hoped, to the British officer continuing his journey into the Celestial Empire, with the sanction of that Court.

"The present King of Burmah is not without some sentiments of enlightened policy, and it is believed would freely consent to the passage of British merchandise through his dominions, were it not for his natural dread of political and military difficulties hereafter arising, which might make him regret, as so many other Asiatic potentates have done, the establishment of too free communications with us, who are believed by our neighbours in the East to carry—first, bales, packages, and casks, to be almost invariably followed by swords and other aggressive weapons."

An "expedition *through Northern Burmah* and *the Himalaya passes* into the Chinese province of Yunnan" for trade with "*Southern*" China, is an absurdity, not only as regards a commercial route between India and Western China, but also as regards the known geography of that very mountainous part of Asia situated west, north, and east of the northern portion of Burmah. And this we will fully show by a brief description of it in a future number.

So, also, what the *Englishman* says on the subject of such an expedition's determining whether the great Thibetan river north of the Himalaya range, named variously the Aru, Yaru, Yárutsanpo, or Sanpu, becomes the Bramapootra south of that range, *or* the Irawaddy of Burmah, is, in our opinion, a very idle inquiry; the question having been long since most satisfactorily solved, notwithstanding the hostility of the wild mountain tribes on that part of our frontier to our exploring

Digitized by Google

the Brahmapootra upwards from its extreme north-*east* point north-*westward* to the Aru or Sanpu.

The body of water of the last-named river, at a point of it, full a degree west and north of Bhamo on the Upper Irrawaddy, is known to surpass by far the volume of the Irrawaddy at that town. So the body of the Brahmapootra in Upper Assam very far surpasses what its mountain tributaries from the east, including the Lohit, Dehong, and other streams, carry into it. Additional to which, we have the fact that the Upper Irrawaddy *has been* traced to its sources in the snowy mountain ranges which form the lofty water-shed between them, the Thibetan and Chinese river Lou-Kiang or Nan-tien Ho—called in Burmah the "Salveen,"—and the eastern tributaries beforenamed of the Bramapootra.

We will only here add our opinion that the King of BURMAH, whose great desire to be honoured with a visit from an Envoy direct from our QUEEN and this country is well known, will not feel very flattered at having deputed to him an Assistant Surgeon of a British regiment quartered in the principal port of His MAJESTY'S ancient kingdom. However learned and scientific Dr. WILLIAMS may be, how great soever his attainments, his Eastern experience, and knowledge of the Burman language and customs, he will be viewed at the new capital of Mandelay as a subordinate in a profession which is not held in the highest rank at the Burman or any Asiatic Court. And, beyond doubt, the KING, his Court, ministers, and people, will not fail to compare, with wounded feelings, the sending of such an Envoy to him by the Government of Calcutta, with the Envoys sent, in late years, direct from our QUEEN to the inferior Court of Siam, and to the Courts of China, Japan, and Persia, neither of which, though larger in extent and more populous than we have left Burmah, is more independent as a Sovereign Power, or more worthy of the direct friendly recognition of our QUEEN.

THE PRUSSIAN EXPEDITION TO CHINA.

The Berlin *National-Zeitung* publishes the following letter from an officer belonging to the Prussian Expedition to China and Japan. The allusion to the English Ambassador is, however, quite erroneous :—

"Tien-tsin, June 25, 1861.

"After remaining for five weeks in the harbour of Tche-foo, the squadron arrived the day before yesterday at the mouth of the Peiho, probably to take leave of the north of China in a fortnight and proceed south. There is but little chance of our concluding a treaty with the Imperial Government. They are willing enough to negotiate a commercial treaty, but refuse point-blank the important concession of allowing a Prussian ambassador to reside at Peking with jurisdiction; but as England, France, and Russia have obtained this right, of course Prussia cannot be satisfied with less. It is generally understood here that we are indebted for this refusal to the French, whose influence since the war has vastly increased, and thrown that of England into the shade. Mr. Bruce is not considered to be an able diplomatist, and calumny asserts that his wife is the chief politician, and that she is swayed by French influence in the person of M. Bourtoulon.

"Count Eulenburg is gone up to Peking to-day in order to have an interview with Prince Kung and see what can be done. He hopes to obtain a decisive answer in a fortnight, when we shall proceed to Hong Kong, the Count going in the *Arcona*. It is, however, a great question whether it would not be advisable to open negotiations with the rebels, who are *de facto* in possession of a great part of China, and on the point of marching to Peking, after the fall of which they will be the real masters of the whole empire. The Maud-shu dynasty has overlived itself, and it cannot last long before they lose even the appearance of power.

"We yesterday paid a visit to the celebrated Taku forts, which cost the English and French so much trouble to take. There were originally four, but now only two are in existence, the others having been blown up. That one, situated on the right bank of the Peiho, is occupied by the British, whilst that on the left bank is garrisoned by the French. They are both built entirely of earthwork, and their construction reminds one of the entrenched camp at Woosung. If the English had given themselves the trouble to land out of range of the guns and attack the forts in the rear, instead of wading through the knee-deep mud with an unnecessary display of bravery, and trying to take the forts by storm, they would have been saved their painful defeat two years ago, and need not have uselessly sacrificed the lives of 600 gallant men.

"A short time since an English gunboat was lost as a supplementary consequence of the war, and to the secret joy of the Chinese. Last year the latter had sunk ship-traps in the mouth of the river, to prevent the entrance of the enemy's gunboats. These traps are constructed on the same principle as those used in our own attacks and defence of fortified places, presenting the form of a spherical star covered with iron spikes, some of which must necessarily be turned upwards, in whatever direction the instrument may be thrown or sunk. Several of these dangerous machines —some of them weighing as much as eleven tons—were found by the allies in the bed of the river and taken out, and the channel was supposed to be quite clear of them, when the above-mentioned unfortunate gunboat ran right on to one, which pierced her bows to such an extent that she was hopelessly lost and had to be abandoned.

"The English and French troops live in earth huts; the former without any attempt at comfort, as if they considered it only as a temporary occupation, and therefore not worth the trouble, though they have been quartered there now for more than a year. On the other hand, the French have domesticated themselves in a very ingenious and comfortable manner, evidently with a view to a prolonged residence there, as they have now settled themselves at Tche-foo. At the latter place they have been making large purchases of mules, and the frigate *Andromaque* lately went to Cochin China with two hundred of these useful animals and a detachment of soldiers as a reinforcement."

Spirit of the Press.

ARMY MEDICAL DEPARTMENT IN CHINA.

The late Lord Herbert, on moving the thanks of Parliament to the army for its conduct during the last war with China, was enabled to make the proud and unprecedented statement that the health of the troops throughout that arduous campaign had been as good as if they had been employed at home. We need not say how this most satisfactory announcement was received by a cheering House. It was, indeed, felt by the nation that we had half redeemed the disgrace of the dreadful scenes of our first occupation of Chusan, during the Chinese war of 1840-1-2, where we rehearsed on a minor scale all that we afterwards performed in the great theatre of the Crimea. It seemed that it had at length been demonstrated to the military authorities what attention to the simple laws of nature could effect, and that an army could be maintained in a high state of health and efficiency even in a climate by no means favourable to European life. Such opposite results, among the same people and in the same country, are not to be explained away by any theory as to difference of season, or of intensity in the morbific influence of climate during the two campaigns. We have a simple and more obvious mode of accounting for the terrible mortality of the troops in the one case, and their comparative exemption from sickness in the other. In the first Chinese war, the principal medical officer was powerless, and just as likely as not to be snubbed and insulted if he ventured to tender advice to his military superiors, with reference to the selection of encampments, or to any matter connected with the health of the army. In the late war, however, there was a sanitary medical officer attached to the Quarter-master-General's office, and the principal medical officer had the right to communicate with the Secretary for War, through the Director-General of the Medical Department, on all subjects relating to the health of the force. The knowledge that this important appeal would be resorted to, if occasion required, averted anything like interference or interruption from the operations of the sanitary officer. His suggestions were promptly adopted and carried into execution by the military authorities; and, as the world knows, all went well. The new medical organisation of the army was, in fact, upon its trial during the recent Chinese campaign, and the manner in which it passed through that ordeal more than realised the most sanguine anticipations of those by whom it was devised. But it appears that this admirable system, which procured for our soldiers comfort, and secured an unparalleled average of health, even under unfavourable circumstances of exposure, contains an element distasteful in the highest degree to the military authorities. An outcry was raised in a high quarter that the "doctors" had, through the Warrant of 1858, become too powerful and independent; and it is said that an attempt was actually made to abolish this wholesome appeal against military prejudice to the War-office, upon the absurd and long exploded ground that it was subversive of discipline. However unlikely such an attempt was to succeed, we cannot forget that, within the last few months, the Royal Medical Warrant of 1858 has been infringed, so as to degrade the surgeon from the rank it assigned him. When this unfortunate measure was announced in April last, we took occasion to urge that it not merely inflicted an injury upon the officers whom it more immediately affected, but that it had a much more extended and more serious import. We contended that, amongst those who had joined the medical ranks on the faith of the Warrant of 1858, there would be discontent and disappointment, with a want of confidence in the stability of Royal Warrants; and that at the medical schools young men of high attainments, the class to whom it is desirable to entrust the care of our soldiers, whether in peace or war, would hesitate to enter a service in which inducements held out by an Order in Council can be so abruptly, and without apparent reason, withdrawn. Our anticipations in both respects have already been too truly verified. But it is not yet too late to repair the mischief already effected, and it is understood that the authorities at the War-Office are by no means indisposed to grant the army surgeons that rank of which they, without even the semblance of reason, have been deprived. It is, however, said that this proposition has been most strenuously resisted by the Horse Guards. Be that as it may, we feel assured that a heavy responsibility will rest with those who obstruct any reasonable means to maintain the medical department in the high state of efficiency which it displayed in the recent Chinese campaign. There is fortunately in this country a power—that of public opinion—against which, as historical precedents have shown, when great national interests are at stake, the influence of rank, however exalted, must in the long run cease to prevail. The public must take their choice. With Horse Guards' medical administration it will be Chusan and the Crimea over again. Under the improved system we shall have an efficient medical department and a healthy army in quarters and the field. There can be no doubt as to which side public opinion will incline, and it is not likely to fail in the end.—*Daily News.*

THE COMING TROUBLES IN JAPAN.

Those who are in the habit of thinking that their own countrymen, when brought into contact with half-civilised races, must always be in the wrong will, no doubt, have their own explanation of the event which has just taken place in Japan. The British Legation has been attacked by a band of natives, who attempted to murder all its inmates. Two gentlemen, Mr. Oliphant and Mr. Morison, were wounded, the rest happily escaping unhurt. We have as yet no details of the affair, but that it was most serious in its character may be judged from the fact that the European community were in a state of great uneasiness, in spite of the affected anxiety of the Japanese Government for their safety. It may be that in a few weeks we shall hear of further troubles,—perhaps some outrage on one of our countrymen, perhaps a breaking off of diplomatic and friendly relations with the Japanese State, perhaps of hostilities such as followed the last dispute with the Chinese at Canton. This country may possibly be again called upon to choose between a relinquishment of all that has been gained by years of enterprise and a resort to strong measures. A war in which no glory can be gained, and in which we seem to be scourging a crowd of feeble barbarians who can make no real resistance, is a contest from which a great country must instinctively shrink. That the Japanese Government will spare us the necessity of such an appeal to force as Yeh provoked is much to be hoped. According to the accounts given by travellers, it is strong enough to protect foreigners within its borders, and its anxiety for the Europeans at Kanagawa can soon be dispelled by its own exertions. A few days will suffice to give the British Legation all the security that can be desired, and we make no doubt that the assassins can be seized and brought to justice by the regular action of the Japanese police. No rebels check the authority of the Sovereign, and no fanatical soldiery, so far as we know, render the protection of foreigners difficult or dangerous to the Throne. Although the attempt of the 5th of July may have been the work of a band of assassins, yet we have a right to hold the Government responsible for the safety of our countrymen, since it is plainly in its power to keep from harm the little band of foreigners within its dominions. It is quite possible, however, that a good deal of trouble may be in store for us in those regions. The Japanese have been described as peaceable and friendly, polite and clever, and yet almost Arcadian in their simplicity and their want of knowledge of good and evil. It is, of course, not safe to trust the descriptions of travellers who merely tell us what they see in streets and palace courts, who judge of human nature by the guise it puts on at official receptions, and who feel the charm which the engaging curiosity of half-civilised men and women always has for the European. No accurate knowledge of the Japanese character as yet prevails in England; all that we have learnt is that the people are a sort of more refined Chinese, gifted with qualities which have worked out a singular and noteworthy civilisation, and that they have not been strongly opposed to admitting us to political and commercial intercourse. The long exclusion which was maintained seems to have been the effect of timidity rather than bigotry and savageness; the excesses of the Portuguese in early times made it a traditional policy of the State, and it was, perhaps, necessary to save the people from falling under the yoke of some ambitious European Sovereign or some unscrupulous adventurers. On the whole, there is much to prepossess us in favour of the Japanese, and it would cause pain and indignation in England if any of our countrymen were by their own faults to bring us into collision with a race which, at any rate, has always lived within its own four seas, and harmed neither ourselves nor any of our neighbours. But still it is quite possible that this secluded and simple people may be subject to an excess of fanaticism dangerous to the European residents, and not to be disregarded by their respective Governments. The very timidity which has so long excluded all but a single nation may incite the people, and even the authorities, to nefarious acts in the hope of driving the diplomatic and commercial residents out of the country. The first entrance of the British into Japan took place immediately after satisfaction had been obtained for the insults offered by Yeh and his myrmidons. The Japanese Government—partly, we may suppose, from admiration and a desire to be the friends of so powerful a people, but partly, doubtless, from lack of resolution to resist the approaches of an ambassador who had a large fleet and army within a few hundred miles—has made concessions of which it possibly now repents. The traditional policy of many generations is departed from, and the whole of Europe is admitted to privileges far more extensive than any accorded to the Dutch in times past. For a time the novelty of the thing appears to have pleased the people, and the presence of the British and French representatives was seen with no ill will by any class. But of late there is some reason to suppose that Japan has repented of its liberality. Not only England and France, but the United States and the minor kingdoms of Europe have been showing their flags in Japanese waters, and their citizens have been asserting their new rights on Japanese soil. Japan finds that it is being drawn rapidly into the vortex of the world's intercourse. Ships come and go from all parts of the world, the language of all European nations is heard in the streets, and the claims of all must soon be respected by the authorities. Japanese subjects will soon be]wandering over the world like Chinese, and coming back with new beliefs and hitherto unheard-of knowledge to unsettle the minds of the pilgrims to Fusi-Jama. The consequence is that in some quarters there is an evident desire to get rid of us. As in most other countries, there is a reactionary party, which makes itself felt, although the Government may disown, and even condemn it. In Japan there is a class of feudal chiefs who have seen with displeasure the advance of foreign enterprise. "Japan for the Japanese" is the maxim of these Conservatives, and, if there be any truth in the rumours which float about the foreign residencies, the dangers which threaten Europeans arise chiefly from them. The American who was murdered some time since is suspected to have fallen a victim to the retainers of some powerful man, and the attack on the British Legation may also have been prompted by an equally high-placed personage. The Government pretends to be unable to check these too powerful subjects; but such a plea must not be admitted for a moment, and should it really prove that the crimes which have thrown the European community into confusion are the work, not of common robbers, but of ruffians who act with the connivance of persons having influence in the country then the action of our own Government must be summary and firm. We do not, however, anticipate that it will be necessary to have recourse to violence in maintaining our position in Japan. The Emperor may possibly, with the weak duplicity of a barbarian, affect ignorance of what has taken place, or want of power to prevent it; or he may make a display of vigilance without meaning that it shall produce any effect, either in the way of prevention or detection. All this is on the supposition—which of course wants proof—that the Government is indifferent to the safety of the European residents and desires to rescind the treaties with England and France. But, putting it at the worst—namely, that the Japanese Government is really playing us false, and conniving at the crimes of a band of bravoes,—we think that it requires only a display of vigour on the part of our officers in those parts to bring the Emperor to reason and his assassinating subjects to punishment. It is certainly an untoward event that the difficulties in China should be thickening just at this conjecture, and that the rebels should be approaching the most prosperous port in the empire with an army of 100,000 men. Such a state of things is not only dangerous to our interests in the Celestial Empire itself, but it makes the Japanese disturbances more alarming, inasmuch as it may tend to detain the naval forces of the European powers in Chinese waters when their presence might be necessary in Japan. But a sufficient force will, no doubt, be spared to make the Government of that country aware that the lives of Englishmen are not to be taken with impunity. Prompt and decided action is, after all, the safest for us, and the most merciful to the Japanese themselves. Such a demonstration as will force the Government to carry out faithfully the terms of its treaties will be far better than complaints and remonstrances, which will be looked upon only as signs of weakness.—*The Times.*

MR. ATKINSON AND HIS REVIEWERS.

The *Critic*, of Sept. 21st, transfers to its columns the greater portion of our recent criticism on Mr. Atkinson's volume on "The Amoor," and introduces it with the following remarks:—"This is the age of disenchantment. Scarcely a week passes without some one or other being proved to be something other than they would have folks believe. One day we have a paragraph to prove Lord Cardigan no hero, and the next day a letter to show that the Chorley aërolite is a myth. No African traveller escapes the imputation of being an impostor. A stay-at-home naturalist treats M. Du Chaillu as an impostor, and in the same breath denounces Dr. Livingstone as a humbug. If we are to believe some people, Captain Bruton never went to Mecca; and more than one German reviewer has laboured to prove that Dr. Bartle never went to Timbuctoo, who, in his turn, turns round upon the explorer of the gorilla country, and criticises the geography of a part which he certainly never visited. From an article written in the *London and China Telegraph* it now appears that there is some reason to suppose that the late Mr. Atkinson's work on 'The Amoor' is open to more adverse criticism than it has hitherto been exposed to. We give the charge as it stands, and in awaiting the results of public investigation can only observe that there is a strong *primâ facie* case of plagiarism and of *suppressio veri.*"

GORILLAS IN BORNEO.

The *Straits Times* draws attention to the great similarity of the animals as well as in climate and scenery between the gorilla country described by M. Du Chaillu and the Eastern Archipelago which lies in the same latitude. The ants, wasps, and sandfly correspond. All the statements of the natives of Sumatra and Borneo agree in the fact that there is an animal, not the ourang-outang, thus described by a recent traveller:—"Had another palaver with the *hulu* men about the Mawas, and they gave me almost word for word the same story as the Pakan Baru people. All insist that it is not an ourang-outang—that is, not a monkey, but a man covered with black hair, standing as high as a man, with the toes turned inwards, and the bone of the forearm bare and sharp—with this it can cut down trees, and a single blow is sufficient to kill a man. They were first seen by the sea Malays, some ten years ago, when the high price of gutta percha induced whole villages to turn out into the jungle for the purpose of gathering it, and in the deepest and densest covers of the interior they found the Mawas."

INSOLVENT DEBTORS' COURT.—IN RE H. C. SIRR, LATE OF HONG KONG.

The insolvent, a barrister, applied to be discharged. Mr. Sargood opposed for Mrs. Penelope Mary Goddard Mason (late Sirr), who had obtained a decree of dissolution of her marriage with the insolvent, upon the ground of his adultery.—Mr. Griffiths supported.—Mr. Sargood objected to the jurisdiction of this Court, and submitted that the copy of causes showing the nature of the warrant upon which the insolvent was detained did not prove that the Court had power to grant a discharge. The copy of causes set out an order of Sir C. Cresswell, and attaching the insolvent for contempt, and ordering him to be brought before him to answer such matters as might then be alleged against him.—For the insolvent it was contended that he was really in custody for non-payment of £195 costs, and from that detainer this Court had power to discharge.—The learned Commissioner said he had no power to discharge for any contempt but that which related solely to non-payment of costs. He must have more precise information as to the nature of the detainer before he could deal with the case.—The case was then adjourned for further evidence.

TESTIMONIAL TO LORD ELGIN.

A meeting for considering the propriety of presenting a testimonial to Lord Elgin was held in the Dunfermline Town House recently. After some conversation it was agreed that his lordship should be requested to sit for his portrait, to be placed in the Town Hall, and an influential committee was appointed to collect subscriptions. The meeting consisted principally of county gentlemen and tenant farmers. About £150 was subscribed in the hall.

THE Bishop of Victoria will leave for Hong Kong by the steamer which sails from Southampton on the 4th October.

THE NEW HEAD MASTER OF THE CENTRAL SCHOOL, HONG KONG.

Mr. Frederick Stewart, M.A., of the University of Aberdeen, has been selected from the list of candidates for appointment to the Headmastership of the Central School at Hong Kong, lately advertised in *The Times*. Mr. Stewart was a distinguished student at the University, and has had considerable experience in scholastic duties. It is understood that he embarks for Hong Kong in the P. and O. Company's steamer of December 20th by the overland route.

TRIAL TRIP OF THE STEAMER "UNDINE."

We noticed in our last the launch of the screw steamer *Undine*, and we have now to record her trial trip, which took place on the Clyde on the 18th inst. The visitors invited to proceed on the trip embarked at Greenock, and a band of music was provided for their amusement. The vessel first proceeded to Gareloch Head, and, with 58 to 60 revolutions, attained a speed of 13 knots. As the engines are constructed for working at 70 revolutions, an increase of speed to the extent of two knots may be fairly expected. The visitors as usual were entertained with an excellent *dejeuner*, at which the usual complimentary toasts for her success, &c., were given. The *Undine*, under the command of Captain Bell, late of the steamer *Scotia*, with Capt. Milton as chief officer, will proceed to Hong Kong about the 1st proximo, calling at Singapore, and will convey the following passengers:—Mr. and Mrs. Palmer and nephew, Mr. and Mrs. Harsant, Mrs. Lewes, child and servant; Rev. Mr. and Mrs. Smith, four children, governess and servant; Capt. Wood, Mr. John Morphew, Miss Cruikshank, Mr Simpson, Master Garrett.

TRIAL TRIPS OF THE "ISLAND QUEEN."

We are now able to furnish the following particulars of the performances of the paddle-wheel steamer, *Island Queen*, built by Messrs. Laird and Sons, Birkenhead, for Captain Macfarlane and others. As already stated, the vessel is 400 tons and 110 nominal horse power, her engines being fitted with surface condensers. She made her first trial trip to Douglas, Isle of Man, thence to Holyhead, and from there to Liverpool, her average speed being 10 knots, and the consumption of coal equal to 10 tons in 24 hours. During this trial the weather was bad, with strong winds and heavy sea. The next trial was to ascertain her efficiency as a tug-boat, and subsequently she towed out to sea, from the Mersey, a new vessel belonging to Mr. Edward Bates, called the *Edward Percy*. The *Edward Percy* is about 900 tons measurement, and was drawing fully 18 feet. She towed this vessel easily at the rate of eight knots per hour, which is considered a first-rate result, looking at the nominal power of the steamer and the size of the vessel towed. The consumption of coal during the time she was towing was at the rate of 12 tons in 24 hours. The surface condensers worked beautifully, the vacuum being steady at 28. Two other trials were made, each of four hours' duration. In one case she made a speed of eight to nine knots, with a consumption equal to six tons in 24 hours; going 10 to 11 knots, the consumption was equal to 10¼ tons. The improved class of engines with surface condensers has proved satisfactory, and its advantages will be more apparent when contrasted with engines on the common plan, especially for long voyages, the boilers being kept perfectly clean and free from the incrustation usual when ordinary condensers are used. The *Island Queen* left Liverpool on the 22nd inst. for Hong Kong.

Naval and Military.

The screw steamship *Niger*, 13, Captain Peter Cracroft, was paid off in Woolwich Dockyard. Before quitting the ship all hands assembled below, by pre-arrangement, and, having invited the boatswain to join them, presented him with an elegant gold chain and boatswain's call, purchased by a subscription among themselves, amounting to about £15. On the bridge of the "call," or whistle, was engraved—"Presented to Mr. Coles, boatswain of H.M.S. *Niger*, by the ship's company." On Monday last a large amount of prize-money and pilotage, due from China, was paid to the crew, several of the seamen receiving upwards of £200 each. By reason of the high character of the ship Commodore Sir F. Nicolson granted the continuous service men an extension of the usual leave until the 14th of November, when they will report themselves to the flagship as returned for duty.

The *Orestes* steamvessel, now at Sheerness, having received her crew, will proceed to the Pacific station. The *Swallow*, in the same dockyard, is ordered to be fitted out immediately for service on the coast of Japan and Corea.

Directions have been received at Chatham for fifteen of the large 100-pounder Armstrong guns to be immediately mounted on the centre and No. 1 bastions, at the entrance to the Medway, in lieu of the smooth-bored guns of lighter calibre with which those defences are at present armed. The Armstrong guns to be mounted on the centre bastion will command the Channel approaches to the Thames and Medway as far as the light placed at the Great Nore, a distance of rather more than three miles. The 100-pounders ordered to be mounted on No. 1 bastion will flank the fire of those in the centre bastion, and sweep the face of the fortifications to a considerable distance. As soon as the Armstrong guns have all been placed in position, they will add materially to the already very imposing and heavily-armed line of defences existing at the entrance to the Medway, which, taking into account its difficult navigation, will be rendered almost impassable to hostile vessels. In addition, however, to the present defences, the projection known as Cheyney Rock has been selected by the Government as the site of a powerful casemated battery. This rock is situate at a distance of little over 2,000 yards from the right of the present works, and by position it is admirably adapted for the purposes to which it will be applied. As soon as the works in progress have been completed, the sea defences on the eastern shore will consist of an almost impregnable stronghold, mounting rather more than 150 guns. All of these will eventually be Armstrongs, crossing each other's fire at varying angles of elevation and depression, the whole having a complete command of the narrow channel, and bearing on every point at which a fleet could anchor or take up a threatening position. In addition to the fortifications which defend the eastern shore of the Channel, the passage of the Medway will be rendered still more secure by the casemated batteries which are now in course of erection at Garrison-point, the armament of which will consist of guns of the heaviest calibre. Extensive fortifications are also in course of construction on the opposite shore of the Medway at the Isle of Grain, which will add still further to the security of the dockyard and other naval establishments at Chatham.

Her Majesty's ship *Undaunted*, 51 guns, recently launched at Chatham, left her moorings in Sheerness harbour, and proceeded to the Maplin Sands to test her machinery at the measured mile. Captain Schomberg, of the steam reserve, had command of the ship, and Messrs. Price (inspector of machinery afloat), Blaxland (chief engineer, Sheerness-yard), Robinson (assistant shipwright, Sheerness), and G. Penny (foreman of shipwrights afloat, Chatham), were in attendance on the part of the Government. The trial was most successful, the working of the engines exceeding the most sanguine expectations. The trial was conducted under the disadvantages of being against both tide and wind, the wind being from north-west by north, with a force of six to seven. The results were—average speed with full boiler power, 13 knots; revolutions, 61; pressure of steam, 20lb.; vacuum, 25; draught of water—aft, 20ft. 2 in.; forward, 15ft. 6 in.; Griffiths's screw diameter, 18ft., pitch 20ft.; speed at half-boiler power, 11¼ knots, 51 revolutions.

The autumn half-yearly change of quarters of the division of Foot Guards will take place as follows at the commencement of October:—Grenadier Guards.—1st battalion from Dublin to the Tower of London, to embark at Dublin on the evening of the 3rd proximo; 2nd battalion to remain at St. George's, Kensington, and Magazine Barracks; 3rd battalion, from Windsor to Portman-street and St. John's-wood, on the 1st of October. Coldstream Guards.—1st battalion, from the Tower of London to Dublin, to embark at Liverpool on the evening of the 4th proximo; 2nd battalion, to remain at Wellington Barracks (old wing), and Buckingham Palace Barracks. Scots Fusilier Guards.—1st battalion, from Portman-street and St. John's-wood Barracks to Windsor, on the 1st proximo; 2nd battalion, to remain at Wellington Barracks (new wing).

The *Royal Alfred*, converting at Portsmouth from a 90-gun line-of-battle ship to a plated frigate, has her frame again in position in the 18-foot space where she was cut in two and launched. It would be difficult to convince a stranger to shipbuilding that the vast hull of this ship had so recently been separated, and the one part detached 18 feet from the other.

The paddlewheel steam sloop *Firebrand*, 6, Commander James M. Bruce, the crew of which have suffered so fatally in the West Indies from yellow fever, has arrived in Plymouth Sound. She left Halifax August the 22nd, and on the 29th encountered a gale, in which her mainyard and one lower deck port were carried away. The *Firebrand* lost altogether by yellow fever one assistant-paymaster, two assistant-engineers, a boatswain, and forty-seven petty officers and seamen. The crew are now in good health.

The sailing ship *Boscawen*, 70, formerly flagship to Admiral Sir Frederick Grey, on the Cape station, is now fitting alongside the dockyard, Devonport, as a training ship for boys, to be stationed at Southampton.

We hear that it is proposed to commission the *Rifleman*, at Deptford, and to despatch her, under the command of Mr. John W. Reed, Master (1857), to China, for the purpose of being employed on surveying duty. The *Actæon*'s orders for returning to England have been sent out some time since.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, SEPT. 17.

1st Regiment of Life Guards—Major and Lieut.-Col. the Hon. Dudley Charles Fitz-Gerald de Ros to be lieut.-col., without purchase, vice Col. Richard Parker, promoted to be major-gen.; Capt. George Henry Earl of Mount Charles to be major and lieut.-col., without purchase, vice the Hon. Dudley Charles Fitz-Gerald de Ros; Lieut. the Hon. Cecil Duncombe to be capt., without purchase, vice George Henry Earl of Mount Charles.

2nd Dragoon Guards—Edmund Warren Craigie, gent., to be cornet, by purchase, vice Charles Edward Frederick, appointed to the 10th Hussars.

Royal Regiment of Artillery—Surg. Henry Briscoe, M.D., having completed 20 years' full-pay service, to be surg.-major.

The under-mentioned officers have been permitted to resign their commissions, viz:—

Lieut. Thomas Auriol Robinson. | Lieut. Clinton Heywood S. Pasley.
Lieut. J. de Burgh Rochfort. | Lieut. Joseph Thomas Maher Loughnan.

Digitized by Google

Scots Fusilier Guards—Lieut. and Capt. the Hon. Walter Rodolph Trefusis to be adjt., vice Lieut. and Capt. George Grant Gordon, who resigns that appointment.

11th Regiment of Foot—Major John Walpole D'Oyly, to be lieut.-col., without purchase, vice Edward Moore, who retires upon full pay; Capt. Robert Neville to be major, without purchase, vice D'Oyly; Lieut. Edward Birch to be capt., without purchase, vice Neville; Ensign Geo. Augustus Eliot to be lieut., without purchase, vice Birch; John Patten Tighe, gent., to be ensign, by purchase, vice Eliot; George Vincent Meredith, gent., to be ensign, without purchase, vice Denis Bingham, appointed to the 60th Foot.

15th Foot—Ensign Edward Cuthbert Ward to be lieut., by purchase, vice Russell Harris Vieth, who retires; John Lewis Gibson, gent., to be ensign, by purchase, vice Ward.

21st Foot—Lieut. James Gregorie M'Donald Tulloch to be capt., without purchase, vice William Cairnes, cashiered by the sentence of a General Court-Martial; Ensign Edward Frederick Pole to be lieut., without purchase, vice Tulloch; Thomas Maitland Campbell, gent., to be ensign, without purchase, vice Pole.

32nd Foot—Capt. the Hon. Raymond Harvey de Montmorency, from the 33rd Foot, to be capt., vice Alexander James Badgley, who exchanges.

33rd Foot—Capt. Alexander James Badgley, from the 32nd Foot, to be capt., vice the Hon. Raymond Harvey de Montmorency, who exchanges.

35th Foot—Major and Brevet Col. Archibald Campbell, from half-pay, late 99th Foot, to be major, vice Thomas Teulon, who retires upon half-pay; Capt. and Brevet-Major Robert Henry Price to be major, by purchase, vice Major and Brevet-Col. Archibald Campbell, who retires.

45th Foot—Ensign Henry Hodson Hooke to be lieut., by purchase, vice Charles Harrison Hignett, who retires; Cornet John Webb, from the 3rd Hussars, to be ensign, vice Hooke.

60th Foot—Ensign Pierce O'Brien Butler to be lieut., without purchase, vice Joseph John Bradshaw, supposed to have been drowned; Ensign Denis Bingham, from the 11th Foot, to be ensign, vice Butler.

61st Foot—Capt. Francis De Luttrell Saunderson, from the 68th Foot, to be capt., vice Thomas Casement, who exchanges.

68th Foot—Capt. Thomas Casement, from the 61st Foot, to be capt., vice Francis De Luttrell Saunderson, who exchanges.

73rd Foot—Capt. Horatio Petus Batcheler, from the 3rd West India Regiment, to be capt., vice Matthew Smith Blyth, who exchanges.

2nd West India Regiment—Egbert William Cooper, gent., to be ensign, by purchase, vice Roger, promoted.

3rd West India Regiment—Capt. Matthew Smith Blyth, from the 73rd Foot, to be capt., vice Horatio Petus Batcheler, who exchanges; Ensign Charles Ramsay Gibb to be lieut., by purchase, vice Rainsford, who has retired.

Gold Coast Artillery Corps—Lieut. Christopher Frederick Holt, from the 1st West India Regiment, to be capt., without purchase, vice Jones, whose appointment, as stated in the *Gazette* of the 6th of August, 1861, has been cancelled.

Royal Malta Fencible Artillery—Lieut. Loretto Bonavita to be capt., with local and temporary rank, vice Brevet-Major Felice Rizzo, deceased; Edmund Rizzo, gent., to be lieut., with local and temporary rank, vice Loretto Bonavita; Lieut. Thomas Emmanuel Bonavita to be adjt., with local and temporary rank, vice Loretto Bonavita, promoted.

STAFF.—Lieut.-Col. and Brevet-Col. Richard Wilbraham, C.B., half pay Unattached, to be governor of the General Hospital at Woolwich.

MEDICAL DEPARTMENT.—TO BE STAFF ASSISTANT-SURGEONS.—Assist.-Surg. William Ramsay, M.D., from the 37th Foot, vice Joseph Johnston, M.D., placed upon half-pay.

Assist.-Surg. John Livingston Power, Supernumerary in the 64th Foot vice John M'Lean Marshall, placed upon half-pay.

John Waring Belcher, M.D.	Robert Hogarth Clay, M.D.
Henry Welch, gent.	Usher Beere Eaton, M.D.
Robert Batho, gent.	John Greig, M.D.
William Ironside, M.D.	Walter Nethercoat Pell, gent.
Francis Patrick Staples, gent.	Alfred Fred. Stafford Clarke, M.D.
Joseph John Pope, gent.	Augustus Robinson Hall, gent.
Joseph Augustin Fitzpatrick, gent.	James Watt, M.D.
William Hill Climo, M.D.	Edward Footner, gent.
William James Wilson, M.D.	Henry Stewart Lodge, M.B.

BREVET.—The undermentioned promotions to take place consequent on the death of General Francis Moore on the 23rd of August, 1861:—Lieut.-Gen. Sir Philip Bainbrigge, K.C.B., col. of the 26th Foot, to be gen. Major-Gen. Charles Murray Hay, col. of the 91st Foot, to be lieut.-gen. Lieut.-Col. and Col. Richard Parker, from the 1st Life Guards, to be major-gen. Brevet Lieut.-Col. Frederick Douglas Lumley, major on half-pay, unattached, to be col. Brevet-Major John Davenport Shakespear, Royal Artillery, to be lieut.-col. Capt. William Hanmer, 87th Foot, to be major. Brevet Lieut.-Col. Henry Charles Cunliffe Owen, C.B., Royal Engineers, having completed a qualifying period of service, under the 8th and 10th clauses of the Royal Warrant of the 14th Oct., 1858, to be col. Major and Brevet Lieut.-Col. Hugh Smith, unattached, Assist.-Adjt.-Gen. at Cork, having completed five years' service in the rank of lieut.-col., to be col. in the army, under the 8th clause of the Royal Warrant of the 14th of October, 1858. Lieut.-Col. Edward Moore, retired full-pay 11th Foot, to have the honorary rank of col. Capt. and Brevet-Major Seymour John Blane, of the 52nd Foot, to be lieut.-col. in the army. Capt. Arthur Cassidy, of the 2nd Dragoon Guards, to be major in the army. Capt. George Digby Barker, of the 19th Foot, to be major in the army. Capt. George Dare Dowell, of the Royal Marines, to be major in the army. Paymaster, with the honorary rank of capt., John Edward Large, of the Rifle Brigade, to have the honorary rank of major. Paymaster David Cant, of the 79th Foot, to have the honorary rank of capt.

Lieut.-Col. Greenwood, C.B., who died at Cheltenham on the 22nd inst., in his 67th year, served in the China expedition, for which he received a medal. He entered the Royal Artillery in 1812.

THE NAVY.

PROMOTIONS.

ENGINEERS.—J. H. Keane, A. Gillies, and W. Holloway, supernumeraries of the Asia, and W. H. Edwards to the Pantaloon.

ASSISTANT-ENGINEERS.—First-class: A. Andrews in the Griffon; C. H. Thompson in the Dauntless; T. H. Kitto in the Cockchafer; S. Judd in the Geyser; L. Backler in the Arrogant, for the Handy; J. W. Elliott in the Asia, for the Grinder; E. Keen in the Rinaldo, and F. Skelton in the Slaney (acting); William A. Houghton in the Dee.

APPOINTMENTS.

COMMANDER.—D Arcy S. Preston to the Medea.

CAPTAIN.—G. J. Napier to the Malacca.

LIEUTENANTS.—J. F. Prowse to the Malacca; P. Blakiston to the Marlborough (additional), for disposal; N. Bowden Smith to the Pelican; C. N. Streatfield to the Asia; G. J. Armytage to the Malacca; C. Wodehouse to the Medea; J. Houghton to the Orestes; P. J. Murray to the Pelican.

MASTERS.—C. C. Scott (for the Satellite), C. B. Ryall (for the Styx), and E. G. L. Street (for the Petrel), to the Indus; T. Pounds to the Medea; W. L. Southey to the Cumberland, for the Rosario; S. W. Brown (additional) to the Asia, for the Chanticleer; H. Goldsmith to the Cumberland, for the Barossa; J. Palmer to the Zebra.

SURGEONS.—W. Telfer to the Malacca; F. G. Thoms to the Scylla; J. C. Messer to the Pelican; G. B. Newton (additional) to the Nile; H. Edmonds, M.D., to the Victory.

PAYMASTERS.—T. C. Thomas to the Hawke; T. Hockings to the Formidable; H. S. Collins to the Donegal; L. Masterson to the Cornwallis; F. Penfold (additional) to the Wellesley; J. Wotton to the Medea; H. W. Arlidge to the Cadmus.

SUB-LIEUTENANTS.—H. R. Berners to the Narcissus, G. G. Brodie to the Donegal, A. A. S. Watts to the Revenge, F. J. Pitt, H.M. Molyneux, D. E. K. Grant, and W. Brawn to the Warrior.

ASSISTANT-SURGEONS.—E. Waller to the Trafalgar, J. T. B. Torrance to the Malacca, A. C. J. Johnston to the Pelican, E. Olive (acting) to the Orestes, E. T. Ryan (additional) to the Nile, W. J. Aplin to the Warrior, T. Milne to the Nile, J. Noble to the Mersey, T. Milne, M.D. (acting), to the Steady, W. Connolly to the Impregnable, J. Brown to the Medea, F. Piercy to the Donegal, H. G. Ruby to the Victory, for Haslar Hospital.

SECOND MASTERS.—J. C. Thomas to the Jackall, C. P. Hodges to the Dee, N. H. Hannay to the Dasher, A. Mould to the Plover, G. Tomlin to the Asia for the Pandora, J. C. Thomas to the Dee.

MASTERS' ASSISTANTS.—H. Mortimer to the Medea, E. H. Smith to the Malacca, W. H. Birch to the Victory, E. H. S. Bray and V. H. Lye to the Warrior.

SECRETARY'S CLERK.—Alexander W. Brett to the Nile.

ASSISTANT-PAYMASTERS.—W. H. P. M. Gilham (in charge) to the Terror, D. F. Guy (as supernumerary) and A. Boys to the Victory, F. F. Fitzmaurice to the Donegal, W. H. E. Mitchell to the Medea.

CHIEF ENGINEERS.—J. Hood to the Medea; R. Nicoll (additional) to the Indus, for charge of the machinery; E. West to the Malacca; G. Rock (additional) to the Seringapatam, at the Cape, for service in Dock and Victualling Yard.

Melrose to the Pike; D. Crighton (additional) to the Fisgard, for the Princess Alice; W. J. Wise to the Asia, for service in the Fire Queen; G. Edwards to the Asia, for the Echo; J. Sumner to the Medea; J. Stocks to the Malacca; W. Hair to the Hawke (additional), for the Magpie, vice Hawkins; T. Smith to the Asia, as supernumerary; G. J. Maybury to the Cumberland, for the Wildfire; W. R. Partridge to the Cumberland, as supernumerary.

Monetary and Commercial.

The Bank of England have further reduced their rate of discount to 3½ per cent. This rate will not, however, continue more than a month, when the rate will again tend upward. Public Securities have been well maintained, and Consols have touched 93¾, causing the failure of eight brokers on the Stock Exchange.

The increased disposition to enter into business in South American Stocks which has been manifested during the present year continues observable. The South seems to revive as the North falls into discredit, and it is a remarkable fact that the number of defaulting States is now greater in the latter than in the former. Among the South American republics there are now only three in disgrace, and none of these have ever re-

Digitized by Google

sorted to open repudiation—a practice which belongs to the North alone. The three non-paying republics are Venezuela, New Granada, and Mexico. All the other Southern States of the American continent have either maintained their credit intact from the first or have made arrangements for the resumption of liabilities which are being faithfully carried out. Brazil occupies the peculiar position of never having had her financial reputation brought into question during her whole existence. Chili, Peru, and Buenos Ayres stand next in rank, a temporary default in each of these cases having been long since repaired, and dividends and sinking funds being now remitted each half-year with undeviating regularity. Equador a few years back joined in the march of honesty, and, after a short interruption, consequent upon the rule of an illegal government, which was improperly tolerated by our Foreign-office, is now again meeting her engagements in a commendable spirit.

A general Court of proprietors of the Bank of England has been held for the purpose of declaring a dividend; Mr. Alfred Latham, the Governor, presiding. It was announced that the profit for the six months ending the 31st of August was £750,589, making the Rest on that day £3,751,654. The Directors proposed a distribution of 5 per cent. for the half-year, free of income-tax, leaving the Rest at £3,024,004, which was unanimously agreed to without discussion. In moving the usual vote of thanks, Alderman Salomons, M.P., alluded in complimentary terms to the satisfactory course adopted by the Court in meeting the wishes of the public by the earlier publication of the Bank returns.

There is a probability that in the next Session of Parliament it will be found necessary to take a comprehensive review of the Indian railroad question. The money wasted and the interests injured by the system under which these works have hitherto been promoted would prove upon examination to be of most serious extent. Indeed, among experienced observers there is a strong conviction that the waste may be set down at least at 25 per cent., which, on the £55,000,000 actually and prospectively guaranteed, would amount to £13,750,000.

The total amount of gold to be sent to this country by the State Bank of Russia was £250,000. Of this a great portion has arrived.

The Chairman of the Leeds Chamber of Commerce, having written to Earl Russell, urging him to depute Mr. Cobden, M.P., to visit Belgium and Berlin, to negotiate the settlement of commercial treaties, his lordship has replied to the request, by stating that Lord Palmerston was of opinion that there was great inconvenience in appointing persons not in the public service, and on that account Mr. Ward, the English Chargé d'Affaires at Hamburg, had been appointed to negotiate on behalf of Her Majesty's Government.

The advices from New York show the anticipation of a further advance in the rate of exchange to have been correct, the quotation being now firm at 108. With the large issues of Government notes and securities, a continuance of this movement seems inevitable, notwithstanding the temporary check it may receive from the purchases of wheat for France.

The commercial advices from Buenos Ayres *via* Bordeaux, by the French mail steamer, bring the intelligence that an amicable arrangement has been entered into between the contending parties for a peaceful separation of Buenos Ayres from the Argentine Confederation. A treaty is to be drawn out by two Plenipotentiaries, and Senor Restra has already been named to act in that capacity for the former Government.

A telegram received by Messrs. Glass, Elliot, and Co. from Port Vendres announces that the submarine telegraph cable lately laid between that port and Minorca has been joined to the cable laid between Algiers and Minorca in September last, and that a direct communication is now established between France and Algiers.

The purchase of cotton at Liverpool for New York has been already noticed. The steamer *Edinburgh*, which sailed from Liverpool for New York, took on freight 1,300 bales.

At Demerara a meeting of the Council of Government was held on the 20th ult., at which, among other business, a letter was read from Mr. Thornton Warner, emigration agent at Calcutta, stating that orders had been given to despatch five hundred Chinese this year for Trinidad.

The accounts from Manchester show that the adoption of the short-time movement has been further stimulated by the continued absence of a rise in manufactured goods commensurate to that in cotton. Spinners and manufacturers in all parts of the district, it is stated, are giving notice to their hands that they are to work only four days a-week. Several firms have adopted three days as the limit, and a few have given notice to stop entirely. According to some estimates, the consumption of the staple is now 25 per cent. below the full regular quantity.

THE MALTA AND ALEXANDRIA CABLE.

Accounts from Malta of the 17th state that:—

"The British screw steamer *Malacca*, having on board another section of the Malta and Alexandria electric telegraph cable, came in on the afternoon of the 12th inst.—from London, 26 days; Plymouth, 17; and Port Mahon, 3. Mr. Samuel Canning, managing engineer for Messrs. Glasse, Elliott, and Co., and a staff of electricians arrived by her. The *Rangoon*, which has been here two or three weeks with another portion of the cable, awaiting the arrival of the *Malacca*, left on the 15th inst. She proceeds to the Alexandria buoy, and, after joining the ends, will pay out the cable she has on board to Bengazi. To this place the *Malacca* will repair in a day or two to await for her. The *Malacca* will then commence laying her cable from the buoy in the Gulf of Syrtis to Bengazi, which will complete the whole line between Malta and Alexandria. The remainder of the cable on board the *Malacca*, which it is expected will amount to about fifty miles, is to be coiled in a tank now being constructed on the shore of Malta harbour, to be used in case it should be wanted for repairing any part of the line. Her Majesty's ship *Medina*, Captain T. A. B. Spratt, C.B.; the *Mohawk*, Commander E. Howard; and the *Assurance*, Lieut. Luard, have left for the scene of operations, to render such assistance as may be necessary. On board the *Rangoon* are Messrs. Canning, Clifford, and De Santi, a staff of electricians and labourers on the part of the owners of the cable, Messrs. Forde and Laws on the part of Government, and Mr. J. Quintana, appointed to the Bengazi station."

The amount of bullion by the steamer *Indus*, from Southampton on the 20th inst., was—in gold: to Alexandria, £12,500; Madras, £1,338; Calcutta, £350. In silver: to Mauritius, £4,000; Calcutta, £550; Hong Kong, £11,220; Foo-chow-Foo, £1,000; Shanghai, £42,746. Total, £14,188 in gold, and £59,516 in silver.

ARTICLES OF IMPORT.

TEA.—The improved feeling which was manifest at the date of our last has continued through the past fortnight, and the amount of business has been considerable. Prices have been firmly maintained at the improvement then quoted, whilst in some cases there has been a further slight advance. Green teas, especially ex *Glencoe*, have met with a ready sale at very high prices, partly for export and partly for home consumption. The *Fiery Cross* arrived in dock on the 23rd inst. with the first of the new seasons' Kaisows, which, as yet, are barely on the market, but a few fine have sold from 2s. 4d. to 2s. 8d. per lb. Low to fair common Congous, both dusty and fair leaf kinds, have been in improved demand at ¼d. to ½d. per lb. advance. Good common may now be quoted at 11d. to 11½d. per lb. Fair to good flavoury kinds have maintained their recent rise in prices. Common to good Ho-hows and Ning-chows have met with a good inquiry, and prices are about ½d. per lb. dearer. Good and fine Ning-chows and Monings and Wopaks have been taken to a moderate extent at former prices. Good and fine Kaisows have shown no change, the supplies being very limited. Tayshans, except the lower qualities for price, have not been in much demand, and prices are rather easier. Souchongs and Oolongs show no material alteration. Further considerable parcels of Flowery Pekoe have been realised at public auction "without reserve" at rather improved prices. Common to fair scented teas remain without alteration, but good and fine, both Capers and Orange Pekoes, are in demand, and would command full prices. Uncoloured Japan kinds have been taken to a fair extent at former rates. Green teas continue to command extreme rates for all descriptions, especially for common to good qualities, fine being comparatively cheap. Some very low chaffy Twankay sold as high as 1s. 4d. per lb., and common at 1s. 8d. to 1s. 8½d. per lb. There has been one public sale, on the 17th inst., comprising 29,000 packages, of which 14,200 packages were sold, including 10,000 packages offered without reserve.

SILK.—There is no change to report in this market, business still being very dull, and no signs of any improvement yet.

SUGAR.—The tone of this market has considerably improved, and transactions have been effected in some instances at an advance of 6d. per cwt. 500 bags common Penang sold at 32s. to 34s. Privately the sales have been 10,000 bags unclayed Manila at 30s. 3d., and 250 baskets of Java 34s. to 40s.

Digitized by Google

COFFEE.—Colonial sorts having been rather plentiful, have met a brisk competition, and a rise of 1s. to 2s. per cwt. has been effected. 370 bags good brownish Java sold at 74s. to 74s. 6d., and 410 bags good ordinary at 71s. 6d. to 72s.

RICE.—The market is but moderately supplied, although the demand continues unabated. The transactions that have taken place have been made at improved rates. Good middling white Java is quoted 14s. 6d.

PEPPER.—Black: very firm, and a small advance occasionally realised. Only 482 bags Penang brought to auction, and only the damaged sold at full relative prices. White: only a limited business has been done, but at rather improved rates.

SAGO.—Market firm, with a moderate trade. No sales by auction have been made. FLOUR.—No auctions have been held, but fair business has been done privately at full rates—16s. to 16s. 6d. per cwt. for middling to fair.

SPICES.—Cinnamon, quiet at our last quotations. Cassia lignea, rather more inquiry, and fair business done at 85s. to 88s. per cwt. for third to first quality; 100 cases at auction, retired. Cassia buds, steady; 13 cases sold at auction at 207s. 6d. to 210s. per cwt. for good. Cloves, steady; 27 cases Penang, at auction, sold at 1s. 1¼d. to 1s 2½d. for fair to good. Mace, without change; and of 23 cases Penang and 10 cases Singapore at auction, three fourths sold at 8d. to 11d. per lb. for ordinary to middling red and reddish. Nutmegs, in steady demand at previous very low prices; and of 146 cases Penang and 16 cases Singapore, at auction, three-fourths sold at 3s. 5d. per lb. for good bold, 11d. to 1s 8d. for ordinary small to very good medium.

HEMP.—A considerable business has been done in Manila roping, privately, but 155 bales of hemp, at auction, all retired.

COTTON.—A firm and animated appearance still continues in this market, rates having advanced 1s. 8d. per lb. Good fair new Dhollera, 6½d. to 6⅝d.; middling fair to good Compta, 5⅝d. to 5¾d.

JAPAN WAX.—A few small sales have been made at 58s. for block. Saucer is quoted 65s. to 72s. 6d.; 29 boxes at auction all retired.

TOBACCO.—There is no change to notice, and Java sorts would be soon taken now, being much required.

TIN.—This market has been very firm, at the late advance; fair operations accomplished, including sales for arrival. The price of English has again been raised £3 per ton.

GAMBIER.—Private transactions have been made to a fair extent; at auction 18s. per cwt. has been realised for good pale. CUTCH: A reduction of 6d. per cwt. was experienced till the 24th inst., when it was fully recovered, and 5,826 bags nearly all sold at 21s. to 23s. for middling to very good.

MISCELLANEOUS.—India rubber: A few baskets have sold at 1s. 2d. per lb. at auction. Camphor: Nothing of importance doing; a few cases sold at 230s. to 235s. Sapanwood: Steady; 79 tons Siam sold at auction at £7. 10s. to £9. Soy: Firm at 2s. to 2s. 3d. Mother-o'-pearl shells: No transactions. Star anniseed: Very quiet, and no sales. Sticlac: Good quality much wanted. Gum benjamin: Firm; of 18 cases at auction, half sold at £27. 15s. for first quality, and £8 to £11. 10s. for third. Damar: Dearer; of 192 cases at auction, half sold at 54s. for fair picked. Gamboge: Flat. Rattans: 7,986 bundles Penang, and 7,000 of Singapore sold at 2s. 2d. to 6s. 2d. per 100. Saltpetre: Moderate business at 30s. 6d. to 35s. Gutta percha: Fine genuine is much required; other sorts not inquired for. Rape seed: Firm, with limited supply. Elephants' teeth: No sales. Vermillion: Firm; 14 boxes at auction sold at 2s. 2d. per lb. Turmeric: No China in the market. Galangal root: Steady; 26 bags at auction sold at 22s. for fair. Cubebs: Steady; 48 cases at auction sold at £7. 10s. for fair but stalky. Dragons' blood: Of 13 cases, half sold at £9. 2s. 6d. to £9. 17s. 6d. for fair lump. Galls: 27 cases Japan sold, at auction, at 39s. to 39s. 6d. per cwt. Rum: Limited demand; 150 casks Mauritius sold at 1s. 6½d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. 0d. nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £8. 15s. to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, 11d.; yellow metal, 9½d.

TIN.—120s. for block; 121s. for bar. Tin plates, best charcoal, I.C., 28s. per box.

LEAD.—English pig, £19. 5s. to £21. 10s.; shot, patent, £22. 5s.; sheet, £20. 5s. to £20. 10s.; spelter, £18. 7s. 6d.; zinc, English sheet £24; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£469,686
Foo-Chow-Foo	—	36,480
Hong Kong	—	270,309
Manila	—	—
Singapore	17,219	66,992
Penang	—	19,024

FROM MARSEILLES.

	Gold.	Silver.
Shanghai	—	166,034
Hong Kong	—	45,518
Singapore	10,160	6,776
Penang	—	44
Foo-Chow-Foo	—	4,400

MANCHESTER MARKETS.

The excitement in the Liverpool cotton-market continues to influence the yarn trade here. A very large business took place on the 24th inst. in yarns for all markets, probably without any exception, even at an advance of ⅛d. to ¼d. per lb. on the rates of the 20th. The home trade houses have bought considerable quantities, but there seems to be fully as much doing for India, China, and Germany. A speculative feeling is gaining ground among buyers, some of whom seem ready to purchase all they can get hold of, in anticipation of coming scarcity. The market for piece goods has been affected in a less degree. Prices are forced up by the advance in cotton, but the improvement is not much more than nominal in any respect. The following is from the circular of Mr. Samuel Mendel, of the 24th inst.:—"The excitement in the cotton market, with the advance established in this staple, and the large daily sales, induce both spinners and manufacturers to ask such extreme prices, that in most cases business is quite impracticable."

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

MESSRS. GLASS, ELLIOT, AND CO., have this morning received a telegram from Malta, informing them that the Benghazi and Alexandria section of the Malta and Alexandria submarine telegraph cable has been successfully laid.

ARRIVALS NOT INCLUDED IN THE TABLE.—Sept. 25, at London, from Akyab, Charlotte Jane; from Maulmain, George Metcalfe; 23, off Salcombe, from Java, T. D. Marshall; 25, at Falmouth, from Maulmain, Liverpool; 24, at Antwerp, from Akyab, Atlantic. Sept. 24, at Texel, from Batavia, Johanna. 12, at New York, from Ningpo, Lord Clarendon. 28, at Liverpool, from Manila, G. B. Carr.

DEPARTURES.—Sept. 25, from London for Sunderland and Singapore, Sagamore. From London, Sept. 26, for Sunderland and Shanghae, Glencoe; 24, from Deal, for Shanghae, Emily C. Starr; 25, from Liverpool, for Singapore, Clio; 27, from London, for Cronstadt and Amoor River, Sappho; 26, from Deal, for Shanghae, Samuel; 25, from Portland Roads, for Batavia, Allegonda Jacoba; 25, from Liverpool, for Batavia, Julia; 26, for Singapore, Pantolaon.

SPOKEN.—Potosi, Shanghai to London. 18 Aug., 19 S., 2 W. Nyverheid, Batavia to Rotterdam, 21 Aug., 14 S., 9 W. Gazehound, London to Singapore, 14 N., 25 W. Willem Daniel, Amsterdam to Batavia, 30 July, 26 S., 25 W. Avondhu, London to Singapore, 3 Aug., lon. 24 W.

LAID ON AT LONDON.—For Hong Kong and Canton: Beautiful Star, Helen's Bank, Fiery Cross. At Liverpool.—For Manila: San Luis. For Shanghai: Melbourne. For Hong Kong: Mexicana.

ANTWERP, 26th Sept.—A letter from St. Petersburg states the Russian frigate Swellana has been lost on the coast of Japan with all her crew.

From PENANG.—At London: Parsee, Sirocco, William and Jane, Norwood, Pilgrim.

From BATAVIA.—At Liverpool: Kerr. At England: Therese.

From BANKOK.—At Falmouth: Hannah Salkeld.

FREIGHTS AND CHARTERS.

The abundance and cheapness of money will no doubt lead to an extension of trade, and as the American vessels are not pressing so heavily on the market as they have done the last few months (many of them, owing to the improvement in grain freights, returning to New York), outward business is likely to improve.

There are 41,000 tons of shipping loading for India, China, and the Cape of Good Hope. In coal freights the Peninsular and Oriental Company's contract, taken last week, for Welsh coal to Alexandria, is divided between two houses who tendered at the same price.

Current Rates Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s. to 60s.

CASUALTIES.

The Dominion, Leamon, from Rangoon, aground on the Dwars in Den Weg, has discharged her cargo. She was towed off Sept. 9, and arrived at Brouwershaven very leaky.

The Seringapatam arrived at Falmouth, Sept. 12, with part of cargo thrown overboard.

The Lodore, Gardner, from Akyab, which put into St. Thomas' July 10, leaky, is now reloading, and will probably sail for Liverpool in a week.

The Jan Van Schaffelaar, Verbeck, from Batavia for Holland, which arrived at Mauritius 12th July, had experienced hard gales off the Cape, in which she sprung a leak, damaged her rudder, and sprung her foremast.

The Reinhardt, which arrived at Falmouth, Sept. 9, from Akyab, had thrown part of her cargo (rice) overboard. She has been surveyed and has commenced discharging.

The Wilhelmina Lucia, Nolles, which arrived at Mauritius, July 31, from Batavia for Holland, had experienced very bad weather, sprung a leak, lost sails, &c., and sprung fore and mizen masts.

Bristol, Sept. 22.—The Maury, from Cardiff to Hong Kong, which put into Kingroad on 15th Sept., through stress of weather and with crew refractory, has been towed to Penarth to lighten.

The Russell, Griggs, which arrived at Falmouth Sept. 22, from Rangoon for Antwerp, was leaky, and had sustained considerable damage.

At Mauritius, July 6, H. M. S. Chesapeake, from Hong Kong for England. July 28, Hankow (s.), from New York, and left 3rd Aug. for Hong Kong.

The following sailing vessels belonging to the reserve at Chatham have been ordered by the Admiralty to be sold:—The Cleopatra, 26 guns, 918 tons; the Vestal, 26, 913 tons; the Tyne, 26, 600 tons; the Volage, 26, 516 tons; the Daphne, 18, 726 tons; the Fantome, 16, 483 tons; Childers, 16, 385 tons; the Comus, 14, 462 tons; the Electra, 14, 462 tons; the Despatch, 12, 483 tons; the Kangaroo, 12, 483 tons; the Frolic, 12, 509 tons; the Arab, 12, 481 tons; the Daring, 12, 426 tons; the Elk, 12, 484 tons; and the Mariner, 12, 481 tons. By direction of the Admiralty, a careful survey and estimate of the value of each of the above vessels has been made.

LAUNCH OF THE "EXPRESS."—On the 21st inst. a large and beautifully-modelled paddle steamer, of 964 tons, was launched from the shipyard of Messrs. J. and G. Thomson, at Govan. She has been built expressly for the coast and river trade of China, and is constructed somewhat similar to the steamers in the Hudson River. On the promenade deck there will be a house 160 feet in length, containing a magnificent saloon 60 feet by 25 feet, also pantries, bath-rooms, captain's-rooms, &c. The ventilation so much required will be provided by means of "jalousies," and other appliances. She is the property of Messrs. Lyall, Still, and Co., of Hong Kong, and will be commanded by Captain Castilla. She is expected to sail for Hong Kong in about a month.

LAUNCH OF THE "CELESTIAL."—Messrs. T. A. Gibb and Co.'s new paddle-wheel steamer, the *Celestial*, was successfully launched on the 25th inst., and from her handsome appearance and fine lines, will, no doubt prove herself a favourite in China. The machinery is ready to be put on board, so that she will be ready to leave for Hong Kong by the first of December. She has only been three months under construction, and is a proof how much can be done in iron ship-building in a short time, as she is a vessel of 800 tons and 200 horse-power, and has been built to satisfy Lloyds' rules for nine years A 1.

COOPER AND AVES,

PURVEYORS TO THE ROYAL NAVY,

ORIGINAL PRESERVERS OF FRESH PROVISIONS TO H.M.'S GOVERNMENT,

EXPORT OIL AND ITALIAN WAREHOUSEMEN,

PICKLE AND SAUCE MANUFACTURERS, AND WINE MERCHANTS,

AND SHIPPERS OF GROCERIES IN BOND,

134, LEADENHALL-STREET, LONDON,

Opposite the East India House.

THE OFFICERS of the ROYAL NAVY and MILITARY MESSES ABROAD, are respectfully reminded that COOPER and AVES continue to purvey for both services, and that any commands they may be favoured with will meet with the attention which has now for half a century distinguished them in the above business.

C. & A. guarantee every one of their Preserves, Condiments, &c., to retain their good qualities in any climate.

QUINTESSENCE OF JAMAICA GINGER AND CAMOMILE.

GINGER has long been deservedly known as an Excellent Domestic Medicine, and combined with Camomile, it is the most efficient stomachic tonic known; for while the Ginger relieves the stomach from distension and flatulency, arising from impaired digestion, the Camomile strengthens the coats of the stomach, and by that means gives it a healthy and invigorating tone. So highly concentrated is this preparation, it is unimpaired by age or climate, and well adapted for exportation. In Gout, Spasms, Dysentery, Cholera, or those complaints incidental to tropical climates, it is invaluable, as in numerous cases a dose or two has checked, and frequently cured, most alarming attacks. No family should be without it. Sold in Half-pints, Quarter-pints, and One-Eighth-pints.

Agreeable Seidlitz Powder, in one bottle, protected by a case, with measure and spoon included. The advantage of this preparation is the perfect combination of the solid ingredients of the Seidlitz Spring in one compound powder. It is very cooling and refreshing, well adapted for Exportation, or Travellers by Land or Sea.

Aromatic Tincture of Quiniodine. For the prevention of fever, intermittent or remittent ague, and other effects of Malaria. No person exposed to the influence or predisposing cause of Fevers should be without it, for if taken in small doses daily, the system will become so thoroughly impregnated with its principles, as to be rendered proof against all attacks of contagion or Malaria. Sold in Pints, Half-Pints, Quarter-Pints.

Agents:—Bathgate and Co., Old Court-house-street, F. W. W. F. THOMAS AND CO.'S,

PATENT SEWING MACHINE.

TO TAILORS, SHIRT COLLAR, GLOVE, BOOT AND SHOE MAKERS SADDLERS, AND OTHERS.

FOREIGN, Colonial, and Country users of SEWING MACHINES, who cannot get them adjusted or repaired when imperfect or out of order, must necessarily rely on the respectability of the maker for obtaining a really serviceable Machine, suitable to their requirements. The high reputation which during the last 14 years the Machines made by W. F. Thomas & Co., have acquired for the perfection of their workmanship, insuring uninterrupted action and non-liability to derangement, entitle the makers to the confidence of persons residing in the country and abroad, and of intending emigrants, to whom any disappointment in the quality of the Machines must be attended with serious inconvenience.

The MACHINES are made of various sizes, and adapted for every kind of work. The stitching produced is alike on both sides of the material; there is no cord or ridge, and the thread cannot be pulled out.

Lists of Prices and Specimens of the Work can be had from W. F. THOMAS & Co. (Original Patentees).

66, NEWGATE-STREET, LONDON.

NOTICE.

HOLLOWAY'S PILLS AND OINTMENT.

HEALTH TO THE SICK.—Purifying and renovating properties of a remarkable kind are the characteristics of these inestimable remedies. The poor sufferer, well nigh worn out by lengthened disease, may still be strengthened and restored by the tonic influence of these medicaments. In dyspepsia, loss of appetite, flatulence, and liver complaints, while the Pills are taken, the Ointment should be rubbed over the digestive organs. In heart and chest complaints it should be rubbed on the back and chest as assiduously as salt is rubbed into meat. By steady perseverance with this treatment, the blood is purged of all impurities, and the whole animal system thoroughly regulated. These excellent remedies, in most cases, restore the sick to health.

IMPORTANT ANNOUNCEMENT.

METALLIC PEN MAKER TO THE QUEEN,
BY ROYAL COMMAND.

JOSEPH GILLOTT begs most respectfully to inform the Commercial World, Scholastic Institutions, and the public generally, that, by a novel application of his unrivalled Machinery for making Steel Pens, and, in accordance with the scientific spirit of the times, he has introduced a New Series of his useful productions, which for excellence of temper, quality of material, and, above all, cheapness in price, he believes will ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; and they are put up in the usual style of boxes, containing one gross each, with label outside, and the fac-simile of his signature.

At the request of persons extensively engaged in tuition, J. G. has introduced his Warranted School and Public Pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold Retail by all Stationers, Booksellers, and other respectable Dealers in Steel Pens. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street; 96, New-street, Birmingham; 91, John-street, New York; and at 37, Gracechurch-street, London.

IMPORTANT PUBLIC SALE at AMSTERDAM.—On MONDAY, October 28, 1861, and folowing days, there will be publicly SOLD a vast and important collection of JAPAN GOODS—23,000 trays, an assortment of 6,000 various boxes, 300 small tables, a great number of lacquered goods, rich bronze ornaments, 40 pairs of bronze vases, 40 to 60 centimetres high, 400 coloured porcelain vases, cups and saucers, plates, dishes, and table services, 2,600 pieces of silk and crape, 250 saloon screens, and 300 casks bamboo baskets, &c., recently imported by the casherlands Trading Society. Also a rich collection of Netelain, Chinese lacquered, ivory, and sandalwood goods, mother-of-pearl counters, enamelled goods, Foulardsoods, crape shawls, &c.

For further particulars apply to the brokers, A. B. Van der Vies, J. W. Mynssen and Otto Van der Vies, at Amsterdam.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street Piccadilly, London.
Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1865.
The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.
Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

METROPOLITAN LIGHT COMPANY,

447, STRAND, LONDON.

CLARK'S PATENT IMPROVED LAMPS FOR THE CAPE, INDIA, CHINA, AND JAPAN.

THE advantages of CLARK'S PATENT GEM LAMP, are so apparent, and its superiority so unquestionable, that it would be extremely surprising were any one acquainted with its merits to purchase the Lamps hitherto sent abroad.

THE LAMP GIVES DOUBLE THE LIGHT OF THE OLD LAMPS.

It is much more elegant in appearance. It is so simple in construction that it cannot be mismanaged.

The GEM LAMP for Table use is fitted on Bronzed, Lacquered, Cut Glass, Silvered, or Jasper Slate Pillars.

Merchants are respectfully informed that, for many reasons, French or English Moderator Lamps are not suitable for exportation. The size of the glasses for the Gem Lamps being only one-half of those of the old lamps, 50 per cent. is saved in freight and package; their cost and risk of breakage are also considerably less. The Gem Lamp is admirably adapted to burn any of the native oils, such as cocoa-nut, olive, mustard, or rape seed oils.

To show the superiority of CLARK'S PATENT LAMPS, one is always kept burning.

CLARK'S CANDLES for Tropical Climates are the best adapted for the East, as they are entirely free from grease in substance, &c., and do not gutter. They give a most brilliant light, and are unsurpassed by any yet manufactured.

JOHN CLARK, Manager.

MESSRS. LENNY & CO.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, Mauritius, Reunion, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 123, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

WITH IMMEDIATE DISPATCH.

FOR SINGAPORE, the fine fast-sailing barque, WEST A 1 13 years, 409 tons per register, coppered and copper-fastened throughout, W. H. HAWKINS, Commander, lying in the St. Katharine Docks. Has superior accommodation for passengers.

For freight or passage apply to the owners, Messrs. Thornton and Wests, Old Swan Wharf; to Rangel, Woollett, and Co., 1, Lime-street-square; or to Douglas and Mills, 23, Billiter-street.

STEAM to SINGAPORE & HONG KONG, the beautiful new screw steam clipper UNDINE, 600 tons register, 200-horse, Captain JOHN BELL (late of s.s. *Scotia*), Commander. This vessel having been built under Lloyd's special survey expressly for the China trade, offers a desirable opportunity to passengers. Her accommodations are unsurpassed, being fitted with the latest ventilating improvements for tropical climates, to which are added the luxury of bath rooms, &c She will positively sail on 14th September, and, having only two or three cabins disengaged, early application for passage must be made to Messrs. James Morrison and Co., 2, Crown-court, Philpot-lane.

LOADING in GEORGE'S DOCK.—For SHANGHAI, having more than half her cargo engaged, and in course of shipment will receive quick despatch, the splendid new clipper barque J. H. RANSOM, Captain CHAPMAN, 399 tons register. A 1 at Lloyd's for 13 years, very fast, and in all respects a first-rate conveyance.

For freight, &c., apply to Andrew Leighton, 17, Water-street, Liverpool.

FOR HONG KONG, to follow "the Beautiful Star," the HELEN'S BANK, 317 tons register, A 1, 10 years, A. BUNNING, Commander; to load in the London Docks.

For freight or passage apply to W. O. Young, Newman's-court, Cornhill.

WITH QUICK DESPATCH.

FOR HONG KONG & WHAMPOA, the splendid new A1 Aberdeen Clipper ship, BEAUTIFUL STAR, Commander ——, 539 tons register; loading in the East India Docks. This fine vessel, built expressly for the China trade, by William Duthie, Esq., builder of the celebrated ships "Huguenot" and "Rifleman," so well known for their rapid passages, offers a first-rate opportunity to shippers. Excellent accommodation for passengers.

W. O. Young, Newman's-court, 74, Cornhill, E.C.

REGULAR LINE OF PACKET SHIP.

FOR HONG KONG and WHAMPOA, the splendid clipper ship, STAR QUEEN, A 1, 13 years, 769 tons register, A. BARBER, Commander; lying in the East India Docks. This ship has proved herself to be one of the fastest ships afloat, and has very superior accomodation for passengers.

For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange Buildings, E.C.

REGULAR LINE OF PACKET SHIP.
TO SAIL ON THE 9TH NOVEMBER.

FOR HONG KONG and WHAMPOA, the new Clipper ship, FIERY CROSS, A1, 13 years, 699 tons register, JOHN DALLAS, Commander; lying in the West India Docks. This extraordinary vessel has proved herself to be the fastest ship afloat, and has just landed the first cargo of new teas in perfect order. Her passenger accommodations are excellent.

For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

FOR SHANGHAI, with immediate despatch, the splendid clipper barque HUMPHREY NELSON, A 1 10 years, 454 tons register, JAMES CHELLEN, Commander; West India Docks. This favourite vessel, built at Dundee, is especially recommended to shippers requiring despatch.

For freight or passage apply to Robertson and Co., 5, Newman's-court, Cornhill, London, E.C.; or York-chambers, 55, King-street, Manchester.

FOR SINGAPORE, the well-known ship SALVADOR PACKET, loading in the London Docks. Will shortly sail.

For freight and passage apply to Robertson and Co., 5, Newman's-court, Cornhill; or York Chambers, 55, King-street, Manchester.

FOR SHANGHAI direct, a regular trader, the well-known British-built clipper ship WEYMOUTH, A 1 12 years, 829 tons register, EDWIN E. THOMAS, Commander; loading in the London Docks. This splendid vessel is well known in the China trade, and possesses extraordinary sailing qualities.

Temperleys, Carter, and Darke, 3, White Lion-court, Cornhill.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Mason, Mr. Paterson. From Marseilles, 28th Dec., to Shanghai: Madame Cordier, infant, and two servants. Mr. E. Fiers. From Suez to Shanghai: Mr. C. Lehmann.

PASSENGERS ARRIVED OUTWARD.

Per Foam, from London: Mr. Arthur Hill. Per Falcon, from London: Mr. Scott, military storekeeper, Miss Smyth, and one Spaniard. Per Pekin, from Southampton: Ensign Thomson, 99th Foot, Messrs. D. D. Inglis, Baker and son, Pearce, Alfred Lock, Rogers, Ridsdale, and Downs; from Gibraltar: Sigr. C. Ruiz; from Bombay: Messrs. Rickerby, Davidson, Balfour, Hogarth, Carpenter, Tripp; from Singapore: Chon Chun-soon Lee, Sek Guam, Mr. Macdonald, and four deck passengers.

Summary of News from the Far East.

THE LATE OUTRAGE AT JAPAN.

The intelligence received by this mail from Japan throws but a faint and uncertain light upon the recent outrage. The papers contain plenty of rumours and a few facts; but the former are unsatisfactory, and the latter for the most part insignificant. The most prominent items of news are the following:—The number of assailants killed and wounded on the night of the attack is said to be twenty-four, and in the pocket of one of them a document was found, to which the names of fourteen of the conspirators are subscribed. A translation of the paper has been published, and thus it runs—

"I, although a person of low degree, have taken the earnest resolution to perform a great deed to the honour of the Sovereign, and to expel the foreigner, as it is intolerable to stand by and see the sacred Empire violated by the barbarian. But, properly, the performance of such a deed as shall cause the might of the Empire to sparkle in foreign regions, is difficult for the power of a person of low standing. Yet, I am simple of opinion, with a desire to combine a very little sincerity and a very limited force, whereby partly to shower a thousand benefits upon the Empire. Should this also tend by-and-by to expel the foreigner, and if I could tranquillise respectfully the Imperial minds, it would indeed redound to my greatest honour, though but a person of low degree. I have thus taken the resolution, regardless of my own life."

The unpronounceable names which follow this confession need not be appended; but the paper itself is remarkable from the close similarity it bears—not, indeed, in expression, but in character—to the statements made by political assassins in other parts of the world. These men thought they were acting for the public good, and imagined that the spirit which animated them was the love of country. A correspondent of the *North China Herald* thus refers to the reasons for the outrage. They serve at least to show that the rumour to which we have referred in our leading article, and which reached us by the last mail, is believed to have some foundation in fact:—

"It is difficult to give any reason for this cowardly attack. Many rumours are afloat; here it is generally believed that it was made by the followers of one of the Damios who felt insulted by some incidents that occurred on the road when Mr. Alcock and party were journeying overland from Nagasaki to Yokuhama. It is said that when passing through the territory of one of the Princes they deviated from the road to examine a coal mine at some distance from it, notwithstanding the endeavours of the Yaconins to prevent them, one of the officers laying his hand on his sword and pointing to a rope drawn across the road indicating that the barrier must not be passed—a symbol always respected by the Japanese. Another report is, that on meeting the procession of one of the Damios, whose cortege took two days to pass them, Mr. Alcock insisted on occupying the centre of the road—the Japanese themselves on such occasions fall on their knees and remain in that position until the great men have passed—this, in a country where human life is valued so lightly, and personal

Digitized by Google

dignity so highly, would be taken as an insult only to be washed out in blood."

In a leader on the subject, the *North China Herald* says :—

"The present posture of affairs cannot be tolerated. Any attempt to maintain either a diplomatic position or trading relations any longer than may be necessary to give the several Treaty Powers time to decide what they will do, and to send out their instructions, would be mere madness. Two years of forbearance carried to its utmost limits, and the exhaustion of all diplomatic means, bring us just to this point. We are at a standstill nearly as regards all trade, and with such insecurity to life, as makes it a serious consideration whether political agent or merchants can longer remain in a country where national flags can afford no protection. Certainly it is very lamentable, that the same dire necessity should follow the trade of our commerce wherever in the East we seek to lay new foundations."

"Admiral Hope, long daily expected at Yedo from Hong Kong, had not arrived on the 26th July. Our Minister was maintaining his ground in the Legation with the aid of a guard of twenty-five blue-jackets from the little despatch boat, the *Ringdove*, the only British man-of-war on those waters for the protection of British interests. Whether any second and more desperate attack was pending no one could say. It is to be hoped the Admiral's tardy arrival may yet be in time to prevent such a calamity, and extricate the British representative from his perilous position. We hear that M. de Bellecourt, the French Chargé d'Affaires, immediately on hearing of the attack, very generously put himself on board the *Ringdove* at Yokuhama, and took with him fifteen of the crew of H.I.M.'s ship *Dordogne*, with an officer, determined to share a common danger. M. de Bellecourt, a few days later, went to his own Legation, where he remained with his guard at the latest date. Mr. Harris is also in his Legation, and hitherto, at least, undisturbed."

In another report it is affirmed that the provocation did not come from us at all, but from the Russians. It is said that a collision took place at the island of Tsassima three or four months ago, during which the palace of a great feudatory prince was bombarded, one of his forts taken, and many of his followers killed. To avenge this outrage and defeat, hearing a great foreign chief was at Nagasaki, on his way to Yedo overland, he instantly despatched one of his emissaries to follow him; and if he could not be slain on the way, to find the fitting instruments among the Loonins—never far to seek in Yedo—attack the Legation, and bring his head, after massacring everybody in it. This version of the affair is stated to be implicitly believed by many well-informed Japanese.

Meanwhile, whatever the cause of the recent outrage may be, it is clear that the lives of our countrymen are in peril, and that commercial progress must be considerably impeded. The alarm is not confined to Yedo; the accounts from Yokuhama state that the Consulate at Kanagawa is turned into a regular stockade, with a double palisade and numerous guard-houses all round it, the entrance being guarded by armed Yacunins.

CHINA.

PEKING.

The news conveyed to us by way of Petersburg of the death of the Emperor, is of course unrecorded among the intelligence which reaches us by this mail. The report that he was dangerously ill was, however, current at Tien-tsin.

The money market at Peking was in a troubled state, and the native banks almost at a standstill. The heat had been excessive, the thermometer 106 in the shade.

In the *Peking Gazette* Shing-pao reports a great victory having been obtained over the Rebels in Shantung, and the utter expulsion of them, after a severe conflict, from Chiuksien in the Shangtung province, where they had taken a stand. The memorialist announces the capture of 300 prisoners and some 700 munitions of war, and the number of slain on the side of the Rebels he states to be difficult to estimate. Hsi-ling-ah, another of the Shantung heroes, whose name we often hear, narrates in a memorial the slaughter of a number of rebels, and the attack and destruction of Tiên-chia-chuang, a place to the south-west of the province of Tung-chang, where the Rebels had fortified themselves. Tsêng-kuo-fan, it is said, has likewise succeeded in the recapture of another place in the An-hui province, called Chih-kang-ling. Three hundred of the Rebels gave themselves up, and 2,800 were captured, but the whole without distinction were decapitated.

A correspondent writes us :—"Prince Kung says he has no knowledge of any American treaty; he only knows, or has heard, of an American who was received at Peking to render tribute, but there is no official record of a treaty. The Prussians have been positively and definitely refused a separate treaty."

The festival of Corpus Christi has been celebrated with great pomp in the Roman Catholic cathedral, after which a procession paraded the streets. In this procession four mandarins of the yellow button, who have been converted to Roman Catholicism, held the cords of the canopy, and the diplomatic body was represented by several secretaries and attachés.

TIEN-TSIN.

The latest date from this port is the 10th Aug. Much sickness, chiefly fever and dysentery, prevailed among the troops, and there were sad complaints of commissariat mismanagement. The heat was excessive; the thermometer standing at 110 in the shade. Several of the mercantile firms were commencing to build permanent residences.

It is stated that the following military movements will shortly be made:—The 60th Rifles and Military Train go to England; one battery of Artillery and Fane's Horse go to Calcutta. The garrison will then consist of the 67th, 31st, and one battery of Artillery, and that is likely to be further reduced by the removal of a wing of one of the regiments to Shanghai; it is not certain which regiment will contribute a wing.

An interesting report has been published of the hospital established at this port at the beginning of the year for the treatment of sick children. The wish is expressed that it may ultimately be employed as a Medical Missionary Hospital.

THE YANG-TSE-KIANG.

The news from the Great River is confined to the fact that trade at Hankow is improving, imports being more easily disposed of, but only in barter for China produce, excepting tea, which could only be bought with money, with few exceptions. There has been no fresh movement on the part of the Rebels. Mr. Consul Medhurst has issued a notification warning British subjects against the slightest breach of neutrality, and referring to the *Manila* having, some time ago, drawn upon herself the fire of the Imperialists while engaged in landing a passenger at 'Ngan-ching. The Consul cannot afford protection to vessels so attacked, and he warns all against the danger they incur by any such breach of neutrality.

The advices from Newchang contain no news of any importance. Trade had scarcely recovered from the effects produced by some forced sales of manufatcured goods. The local consumption could be but small, but if the export of native produce in foreign bottoms can be accomplished, there is little doubt that large quantities of goods will be taken in exchange for the produce of the country.

CHEFOO.

The prospects of this port are stated to be extremely promising. It possesses an excellent harbour, and the country all around it is of the most beautiful description, only to be surpassed by some of the best Japanese scenery. The climate is pleasant and healthy, and the place altogether has exceeded the highest expectations that were formed regarding it.

SHANGHAI.

Considerable complaints are made of the unhealthy state of that portion of the settlement which is inhabited by the Chinese, and the fault is laid at the door of the Municipal Council.

On the 8th August, the case was tried between the master and owners of the *Rose* and His Excellency Woo, the Superintendent of Customs. The charge preferred by the latter was that they had carried on an unlawful and clandestine trade on the river Yang-tse in defiance of the Treaty of Tien-tsin and the provincial regulations for British trade on that river. The facts as stated by Mr. Cowie, who appeared for the plaintiff, were as follows :—On or about the 10th of July the *Rose* went up the river and anchored off Sai-gon-yin, a town situated on the Yang-tse, at the entrance of a creek leading to Sin-yu-miou, and at a distance of about twenty miles this side of Chin-kiang The steamer *Plato* and the schooner *Halcyon*, two of H.I.M.'s revenue cruisers, were also at anchor off Sai-gon-yin. On the 23rd July the compradore of the *Rose* came down the creek from Sin-yu-mion in a native boat, and went outside into the main river without stopping at the native Custom-house, and proceeded down the river at a distance of quite five miles below Sai-gon-yin. The *Rose*, which had been at anchor at this last-mentioned place since her arrival on the 10th, then commenced getting up her anchor, and the Customs' officer in charge of the before-mentioned cruisers, having had his suspicions aroused immediately sent off a tide-waiter to board the *Rose*, and accompany her wherever she went. She set sail and dropped down the river alongside the native boat, from which she received several cases of treasure

Digitized by Google

and bags of rice, and also sundry smaller packages. She then proceeded about two miles further down the river, and there received on board eight chests of tea, and would, it was believed, have received more, had it not been for certain misgivings supposed to have been entertained by the master, as to his being watched by the tidewaiter on board. Having left his compradore at this place the master then brought the *Rose* on direct to Shanghai.

Mr. Whittall, for the defendants, after entering minutely into the details of the case, maintained in the first place that the trading of the boat was with the sanction of the authorities; in the second place that there was no breach of regulations, as the evidence showed that she went to no port; but what she received she received outside, and, finally, that as the regulations of the Yang-tsze had not been confirmed by the British Minister, the Chinese authorities had no right to fine a British subject, or ship, under them.

The following was the sentence of the Court:—"That, first, the fact of trading between Chin-kiang and Shanghai is proven, but that the act having been encouraged by the action of the Chinese authorities on previous visits of the *Rose* to the same locality, and by the undecided action of the same authorities when the breach of treaty complained of was committed, any penalty imposed should be a mitigated one. That, second, any penalty imposable for breach of the Yang-tsze regulations cannot be awarded, save under reference to H.M.'s Minister, as the 4th Article of the Order in Council, of 13th day of June, 1853, provides that no penalty may be imposed on regulations made by H.M.'s Consuls, save under certain conditions which have not been fulfilled in regard to the Yang-tse-kiang regulations. And, third, that the defendants are not punishable under the 47th Art. of the Tien-tsin Treaty, as the visit of the *Rose* to Sin-yu-miou for trading purposes was warranted by the encouragement given by the Chinese authorities and by precedents established by themselves on other parts of the coast."

Mr. Medhurst has issued a circular at the request of the chairman of the Hong Kong Committee for the London National Exhibition of 1862, to notify to the foreign community, that, in the event of no local committee having been established for representing the port of Shanghai, the Hong Kong Committee will be glad to render every assistance to intending contributors, as the contributions from Hong Kong will consist mainly of Chinese material.

With reference to the heat of the weather, a correspondent of the *North China Herald* writes:—"The present summer is undoubtedly one of the hottest experienced in Shanghai during the past seven years; yet the highest I have registered after most careful observation is 90¼ on July 15, and 91 on July 24. This is so far satisfactory that I coincide with you in making these two days the hottest of the season, you giving max. 95¾ and 95½ respectively; but the difference is still considerable, and I would, with all deference, submit to yourself and others who observe the temperature here that to give correct data it is equally necessary to protect a thermometer thoroughly against the radiation from the rays of the sun and from anything that has become heated by the sun shining upon it, as it is from the direct rays." In reply to this statement, the editor maintains the correctness of his observations, and adds that the quicksilver in his thermometer cannot be affected by any extraneous influence.

A scheme for lighting Shanghai with gas is under consideration. A daily newspaper is about to be published, entitled *The Shanghai Daily Times*.

We do not hear a word by this mail of the advance of the Rebels on Shanghai, so we may hope that the apprehension which existed has passed away.

AMOY AND FOO-CHOW-FOO.

From neither of these ports is there any news of special interest to record. There, as elsewhere, the excessive heat of the weather is the main subject of remark.

HONG KONG.

The working of the Chinese Customs is still occupying the attention of the Chamber of Commerce, and at a meeting held on the 15th August it was resolved that a memorial should be drawn up on the subject and sent to Her Majesty's Government, that a copy of the memorial should, at the same time, be sent to Peking for the information of Mr. Bruce; and that the committee should be empowered to correspond with the various commercial associations in England and America, memorialising them, and requesting their hearty co-operation. It was also resolved to invite members of the Chamber, and others, to furnish any statements they could make as to the injurious working of the new Treaty.

On this subject the *China Mail* writes as follows:—

"Our merchants complain of various grievances, which they allege cannot be justified either by the spirit or the letter of the Tien-tsin Treaty. These grievances they suffer—under protest—at the hands of the collectors of Chinese Customs, foreign and native. They consist of dues never levied before, and, as they affirm, quite unlevyable now. For example, they are now charged transit dues at the place of exportation, altogether irrespective of whence the goods have been brought; or, in other words, without regard to the fact whether the goods proposed to be exported have travelled a mile or five hundred miles. More than this, they are charged the two-and-a-half per cent. *ad valorem* duty on goods purchased interior by a native, and brought to the seaport after payment of all the inland-transit charges. Now this two-and-a-half *ad valorem* duty is only recognised in the Treaty as a commutation that will free all goods from every inland-transit charge, but it is now being levied even in the face of receipts produced showing that every inland-transit charge has been paid. It is therefore round what may be called the commutation-half-duties that a part of the present battle must rage. Can anything be shewn in the Treaty to prove that such duties are applicable to goods purchased by a foreigner from a native at a Treaty port? We think not, though Messrs. Lindsay and Co. have had to pay this duty in such circumstances. But this is not the chief grievance, bad as it appears. It is in the matter of re-exports that a new, unwarranted annoyance has suddenly sprung up. A British merchant exports a cargo of Chinese produce from Ningpo and pays the export charges on it. He takes it to Shanghai, with a view to thence shipping it to England: he pays on it, most absurdly, an import duty at Shanghai, and another export duty when it leaves for England. This, which has been Messrs. Fletcher and Co.'s case, is the effect of a late order to discontinue all drawbacks, and to grant no more exemption certificates. If Article 45 of the Treaty is thus to be read, then that Article's existence is much to be regretted. Perhaps Mr. Bruce has his instructions from home to strain every clause of the Treaty in favour of the Chinese, so that the indemnity-money will come out of the merchants' pockets, in whose behalf, more or less, every Chinese war has been made. We cannot suppose these things are being done by Mr. Bruce on his own responsibility—he would not act so without a full warrant. If they are done on the other hand, without his knowledge or sanction, it is full time that the representative of England should interfere. But the disagreeable suspicion remains, that the words of the Treaty can be twisted into sanctioning all these things; for, in reference to the double payment of duty just alluded to, Consul Medhurst says, in reply to a strong remonstrance, that though the Treaty is in *principle* opposed to a double payment of duty on Chinese goods carried from one port to another, yet there is nothing specified in the Treaty on which he can base his application to the Superintendent of Customs for redress of the grievance."

The monument which has been placed in the cemetery in memory of the Royal Marines, contains the following inscription:—"In memory of the officers, non-commissioned officers, buglers, and privates of the Brigade of Royal Marines (Light Infantry); and the non-commissioned officers, buglers, and gunners of the battery of Royal Marine Artillery, who fell in the execution of their duty in China during the years 1857, 1858, 1859, and 1860. Erected by their comrades." On the rear slab the services of the brigade are recorded, from the taking of Canton in December, 1857, with the various expeditions in the neighbourhood, the Taku Forts in 1859, the defence of Shanghai, and the campaign in the North, which ended in the Treaty of Peking.

The *Friend of China* writes in strong language on the state of Victoria Gaol, and lays the blame of its condition on Sir Hercules Robinson. From a long article we extract the following paragraphs, without, however, giving any judgment upon them:—

"The internal economy of the Hong Kong Gaol! There is no internal economy! It is a den in which men are dealt with as beasts, as members of the brute creation! There is no attempt at reform—no endeavour at reason—and, for some reason or other, the prisoners shun the established pastor of the gaol as they would an enemy.

"As regards the rations to the Chinese, more deliberate intention to keep the poor wretches low can hardly be conceived. The rice is taken from the galley in tubs, and shovelled into tin dishes, a dish for each man, which is then piled so that the food shall get cold. Nor even of that do they get the weight for which the public pay, though what becomes of the residue we cannot tell."

A Government notification states that, at the request of the Acting Consul General for Spain in China, Ramon Moran, Esq., is recognised as Acting Consul during the temporary absence of José de Aguilar, Esq., from this colony.

It appears that our expectation of a compromise of the action brought by Mr. Moss against Mr. Alcock, our Minister in Japan has not yet been realised. Mr. Moss is at Hong Kong, and we understand the case is entered for trial at the Supreme Court in November.

CANTON.

The heat of the weather forms one of the main topics in the news from Canton, which by this mail is of the most trifling description. A complaint is made of the troops being marched to divine service in the heat of the midday sun, and the writer adds, Canton is in the same position as Calcutta; there is not during summer a shade of difference between the actual amount of heat in the two places, and it is deemed by old Indians more oppressive if anything in China than in India, while it is a matter of fact that the direct rays of the sun are far more dangerous.

Besides the great injury to the rice crops in the districts around Canton, the silk yield for the year, owing to the rains, is also likely to be very small. Not that the worms have died in quantity; but they cannot get enough leaves to feed on, and, as a consequence, give but a poor supply of floss to their owners.

The *fete* of Napoleon was celebrated by an immense expenditure of gunpowder. There were two salutes in the morning, three at high noon, and two again at night. The day was devoted to feasting and Chinese Crackers, and night was remarkably gay with divers illuminations.

The Customs' service in Canton has lost a promising young officer of the name of Woodworth. He had been directed to proceed in the *Cumfa* on an expedition, and was stepping on to the gangway of one of the chops, when his foot slipped and he fell into the river, from which he never rose alive. The son of an English clergyman, and of excellent deportment, he had obtained such speedy promotion that he wrote home for his wife and child to join him here. The body was found the day after off Dutch Folly; the Chinese who picked it up taking away rings, watch chain, &c., before the corpse reached the Customs' chop.

COCHIN CHINA.

News of an unsatisfactory nature has been received from Cochin China. M. Lavassier de Lavergne, the chief of the staff of Admiral Bonard, commanding the forces in that country, has been recalled from Toulon, where he was to have re-embarked for his post. His recall is attributed to an intention of organising an expeditionary force of 5,000 to penetrate to Hué, the capital of Cochin China, a measure without which it is not thought possible to place relations with that country on a satisfactory footing.

JAVA.

Advices from Batavia are to the 1st Sept. Very heavy rains continued to fall in all parts of Java, causing the rivers to overflow their banks and producing much injury to the roads and bridges, while the crops were seriously damaged. This will no doubt be productive of great distress, especially in those parts of the island which suffered so severely from the inundations a few months previously.

The same unfavourable weather seems to prevail in many of the dependencies. In the island of Banka, throughout the months of June and July, heavy rains fell with very few intervals, accompanied by strong variable winds. The health of the inhabitants generally was not much affected by this unseasonable weather, but amongst the convicts, especially those who had recently arrived from Java, much sickness occurred, and not less than 17 died during the month of July. The effect of this weather upon the crops was very bad. Everywhere in the nutmeg parks the ground was covered with half-ripe fruit which had been detached from the trees by the rain and night-cold. Hundreds of trees which bore heavy crops have thus been completely stripped, and much of the fruit gathered in July is surrounded by thin mace, while the nuts are so watery and possess so litle kernel that when dried they will only belong to the lowest class. The expectations of a more than usually productive crop for 1861, which was predicted from the appearance of the trees in the beginning of the year, are thus disappointed, and unless a very speedy change of weather occurred the crop on the contrary would be very deficient. Many trees, in bearing and otherwise, had been rooted up by the rains and landslips.

The Portuguese part of the island of Timor was in insurrection against the Government.

An embassy from the Sultan of Jambie had arrived in Batavia, and been received by the Governor-General with due honours.

MALACCA STRAITS.

The *Singapore Free Press* states, "Several statements have lately appeared in our columns on the subject of an alleged misunderstanding between the Government of Siam and its feudatory, the Sultan of Tranganu. These statements were made upon what we considered good authority, but we have now reason to believe that they were erroneous."

The great quantity of sea-damaged goods sent to auction of late, has again directed attention to the causes which produce a state of things so injurious to the market for sound goods and entail such heavy losses upon the underwriters.

The American steamer *Hankow*, Captain Sands, arrived at Singapore on the 22nd of August, having left New York on the 13th of May last, calling at the Cape of Good Hope and Mauritius, and sailed for China on the 24th.

Her Majesty's steamer *Charybdis*, Hon. Capt. Keane, sailed for China on the 4th August.

His Imperial Majesty's steamer *Le Rhin*, Mons. Aignier, from Saigon the 17th ultimo, arrived here on the evening of the 23rd, *en route* for Aden.

His Imperial Majesty's steamer *Rhin*, M. Aiguier, sailed for France *via* Suez on the 31st August.

On the 10th July, the English vessel *Commodore*, Captain Ross, with a cargo of tea bound to Australia, struck on a reef at the entrance to the bay of Kayeli (island of Buro), but on the following morning floated off at high water.

Much of the prosperity of Penang was owing, in days gone by, to the cultivation of the nutmeg. This plant is now affected by a disease for which no remedy has been discovered, and the cultivation of it is no longer remunerative. Accordingly many owners of nutmeg plantations are therefore turning their attention to the culture of cocoa-nuts and betel-nuts, planting them wherever the nutmeg trees have perished. An effort is also being made to cultivate cinchona. The *Penang Argus* asks why tea should not flourish upon the hills, and evidently thinks it worth while that some experiment should be made for turning them to some profitable account. The same paper also points out that cotton might be cultivated with advantage in Penang.

A grand cricket match came off last month between the military and civilians; the latter had proved most successful by the latest accounts, but the game was not completed.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CLARK—On the 3rd inst., at 62, Lansdowne-place, Brighton, the wife of Major-General Clark, K.H., of a daughter.

LEGGE—At the London Mission House, Hong Kong, on the 17th August, the wife of the Rev. James Legge, D.D., of a son.

LOVELL—On the 5th inst., at Gillingham, Kent, the wife of Major Lovell, C.B., Royal Engineers, of a son

MARKHAM—On the 4th inst., at South Norwood, the wife of John Markham, Esq., H.B.M.'s Vice-Consul at Shanghai, of a daughter.

MORESBY—On the 15th Sept., at Bronwylfa, Exmouth, the residence of Vice-Admiral Sir Fairfax Moresby, the wife of M. Fortescue Moresby, Esq., R.N., of a son.

ROZA—At Hong Kong, on the 20th June, the wife of A. B. da Roza, of a son.

WOOD—On the 30th Sept., at Ellershie, Chichester, the wife of Capt. Wood, R.N., of a daughter, stillborn.

MARRIAGES.

ALLEN—DE CASTRO.—On the 15th inst., at Christ Church, Tunbridge-wells, by the Rev. Hugh Allen, D.D., rector of St. George's, Southwark, uncle of the bridegroom, Hugh Edward Blakeney Allen, Esq., of Tunbridge-wells, only son of Edmund Thomas Allen, Esq., M.D., late of York, deceased, with Maria Ritta, only surviving daughter of Dom Francisco Xavier de Castro, Colonel in the Portuguese service, late of Macao, China, deceased, and of Donna Maria de Castro, of Cambridge.

PEARCE—WANKLYN.—On the 10th inst., at the parish church of Eccles, by the Rev. Edward Wanklyn, B.A., second son of Matthew Pearce, Esq., Seedley-terrace, to Mary Emma, eldest daughter of the late William Wanklyn, Esq., Walness Bank, Pendleton, Manchester.

WOOLLETT—ROSS.—On the 11th inst., at Dulverton, Somerset, by the Rev. H. J. Taylor, Herbert A. Woollett, Esq., of Manley House, Kennington-park, to Harriet Sophia Stuart, daughter of the late Robert Ross, Esq., and niece of the late Rev. John Sydenham, of Combe House, Dulverton.

DEATHS.

ATCHISON—On the 21st July, at Tien-tsin, North of China, Captain G. T. Horton Atchison, H.M.'s 67th Regiment, in his 29th year.

BOND—On the 22nd July, at Taku, North China, of fever, Lieut. Henry Bond, of the R.A., aged 21.

COOKE—On board the Screw Troop-ship *Simoom*, in the Woosung river, on the 4th Aug., Commander J. M. Cooke.

CULBERTSON—At Shanghai, on the 8th August, Elizabeth Fitch, daughter of the Rev. M. S. Culbertson, aged 3 years.

DONALD—On the 7th Aug., at Hong Kong, William Hodgson Donald, in the 25th year of his age, son of J. Donald, Esq., of Birch Brook, Arley.

GELLATLY—On the 12th inst., at 1, Albion-terrace, Limehouse, of apoplexy, Peter Gellatly, Esq., in the 64th year of his age.

HUTTON—On the 28th Aug., at Vizianagram, Madras, Major-General Hutton, of Her Majesty's Indian Army, having nearly completed 50 years service in that country.

LOPEZ—At Macao, on the 16th August, Lieut. Pedro P. Lopez.

PEGADO—At Hong Kong, on the 24th August, Manuel Maria Dias Pegado, aged 53.

RODGERS—DONLEY—On board H.M. hospital ship *Melville*, Hong Kong, on the 20th August, John Rodgers, Engineer, H.M. Naval Yard; and Charles Donley, Musician, H.M.S. *Vulcan*.

Digitized by Google

Rose—At Singapore, on the 30th August, Emily Cary, infant daughter of Captain Geo. Rose, Superintendent of the Sailors' Home, aged 12 months and 5 days.

Roza—At Macao, on the 21st August, Joze Roberto Araujo Roza, of apoplexy.

Stone—At Shanghai, on the 14th August, H. M. Stone, late Master of the American barque *Fruiter*, a native of Boston, Mass. U.S.A., aged 39 years.

Surrage—At the Government Civil Hospital, Hong Kong, on the 19th August, John Surrage, seaman, aged 28 years.

Tavares—At Shanghai, on the 17th August, Amelia, wife of L. A. Tavares, aged 27 years.

Williams—At Shanghai, on the 11th August, —Williams, Master of the American ship *Elizabeth F. Willetts*.

Withers—At Shanghai, on the 2nd August, F. Withers, Assistant Surgeon, H.M.S. *Encounter*.

COMMERCIAL REPORT.

CHINA—EXPORTS.

Shanghai.—Tea.—Black: The arrivals from Hankow during the fortnight are variously estimated, but about 11,300 chests seems to be correct; of these 2,470 chests have been shipped by their owners, while 6,900 chests have been placed on the market and have realised full prices, say 28½ to 31 taels for fair Oonahms and second class Oopacks, and 34½ taels for one parcel of rather superior quality. New Fl. Pekoes have been taken to the extent of 2,200 chests at from 37 to 41 taels; the quality of some is good, and prices not unreasonable. The total settlements to date of all kinds of Black teas, and including Hankow purchases shipped from this port up to the present time, are about 35,800 chests, against 5,950 chests at corresponding period last season. Stocks: 3,000 chests Oonahms and Oopacks; 1,200 chests Hoochows; 1,500 chests Old Common sorts; 600 chests New, and 300 chests Old Flowery Pekoes. Greens: There has been but a moderate business in these kinds, and the vexed question of duties still remaining unsettled, shipments from Ningpo to this port are at present suspended, the stocks at the former place now reaching 12,000 half-chests. The settlement is quoted of 7,900 half-chests China and 971 half-chests Japan Teas since last report, making to date 24,000 half-chests China and 5,530 half-chests Japan, against 7,090 half-chests and 2,230 half-chests respectively at same period last season. Stocks; Pingsueys, 700 half-chests; Moyunes, 1,000 half-chests; Hoochows, 2,000 half-chests; 2,000 half-chests Japan kinds, and at Ningpo about 12,000 half-chests Pingsueys and Fychows. Prices are without any noticeable change.

Foo-chow-Foo.—After the departure of last mail, and up to the 14th August, settlements continued to be steadily made, but on a smaller scale, at about previous rates, excepting for ordinary to common, on which a fall was established, and teamen were evincing more disposition to give way, when a few buyers came in, making considerable settlements, which, if they do not actually show an advance on some—the better—descriptions, have at least stopped the downward tendency, and made teamen firm again. The settlements have been principally for Australia and the Continent, and some for India by Parsees. The total arrivals of Congou to date are rather under those of last season; and, as teamen are said to be losing heavily at present rates, it will probably have its effect in reducing supplies. The settlements for the fortnight have been as under:—Congou: Sales, 18,953 chests, at 5 to 26 taels. Ordinary to good common about one tael lower. Good common to flavoury as before. Flavoury rather higher. Stock, 86,694 chests. Souchong: 2,364 chests, at 18 to 26 taels for common to good. Stock, 9,892 chests. Oolong: 2,059 half-chests, at 15 to 26 taels for common to good; cargo stock, 79,511 half-chests. Fly, Pekoe: 845 chests, at 26 to 46 short, for common to fine. Stock, 1,970 chests. Scented Teas: 3,119 10-catty boxes; 1 parcel old at 17½ taels. New: 20 to 32 taels for common to fine. Stock, 2,844 10-catty boxes. The arrivals, settlements, and stocks of Congou to date, as compared with last season, stand as under:—, Congou, market arrival, 229,205 chests; settled, 142,511 chests; stock, 86,694 chests; contract arrival, 20,992 chests—total, 250,197 chests against last season, 243,406 chests.

Amoy.—Arrivals continue upon a fair scale, and stocks are accumulating. The *Mary Ross* and *John Bull* have sailed for New York during the fortnight, the settlements for which period have been—Oolong, 6,600 half-chests, at $15½ to $21; Orange Pekoe, 210 half-chests, at $16¾ to $17; Ankoi, 520 half-chests, at $9¾ to $13.

Canton.—For Congous the market has advanced nearly two taels. The stock, as will be seen below, is much reduced—between 25 to 35 chops more only are expected this season. A good business has been done in scented teas, and rates incline upwards. The few country greens which were upon this market have been bought up. In other sorts little has been done. The sales of the fortnight are thus reported:—Congous, 15 chops Oonahm at 24½ to 28 taels, 6 chops Oopack at 29½ to 34 taels, 500 half-chests Canton packed, at 25 taels; scented teas, 8,500 boxes Orange Pekoe at 22 to 31 taels, 6,500 boxes Caper at 16½ to 28 taels; Oolong, 250 half-chests, Canton packed, at 16 taels; country greens, 400 half-chests at 35 to 41 taels for Gunpowder and Imperial, 38 to 40 taels for Hyson, and 26 to 36 taels for Young Hyson; Canton Greens, 500 boxes Gunpowder at 15 taels, and 250 chests Hyson Skin at same price. The stock upon the market is stated thus:—Congou, 14 chops; Souchong, 1 chop; Oolong, 1,000 half-chests; Flowery Pekoe, 200 chests new, and 400 chests old; Plain Caper, 3,000 boxes.

Macao.—A large business has been done in Tayshan Congou, mostly under contract. The settlements on the market exceed 10,000 chests at about $16. There are about 12,000 chests still unsold.

Raw Silk.—Shanghai.—The business of the fortnight has been comparatively small, caused no doubt by the firmness of the dealers, the unprecedentedly heavy stock, and the continued unfavourable news from Europe. It is to be hoped that when the dealers find that even the low rate of exchange has failed to induce active operations, they will be more moderate in their demands, and that a safer scale of prices than have been ruling here for some months may be established. The supply from the interior continues liberal of medium and lower grades, but of really fine silk there is an evident scarcity, as proved by the small receipts of these descriptions to date. Prices in the interior are reported somewhat lower; but the dealers here remain very firm, and are only disposed to make the smallest concession on inferior descriptions. Best qualities remain as last quoted. The purchases of the fortnight, including the arrival of about 400 bales Japan, are estimated at 3,000 bales, and the unsold stock at 16,000 to 17,000 bales. Tsatlees.—No. 1 and 2, 430 taels per picul; do. 2, 430 to 440 taels; do. 3, 395 to 420 taels; do. 4, 370 to 385 taels; do. 5 and common, 352 to 355 taels; Taysaams, No. 1, 360 to 370 taels; do. 2, 320 to 340 taels; do. 3, 295 to 310 taels; do. 4, 5, and common, 235 to 275 taels; Yuenfa, 290 to 410 taels; Haining, 290 to 360 taels; Hongchow Tsatlees, 350 to 370 taels; Hong Tsatlee, 370 to 380 taels; Sewhings, 290 to 325 taels; Laeyongs, 250 to 260 taels; Throwns, 300 to 420 taels. This steamer has about 2,900 bales; and the *Assyrian*, 131 bales; *Charlotte Ann*, 427 bales; *Polmaise*, 730 bales; and *Wynaud*, 430 bales, all loading for London.

Drugs, &c.—Canton: There is a small stock of Cassia Lignea which is quoted $17.50. In other drugs no quotations are given, there being no stocks. The Macao market is thus reported upon. Cassia Lignea, $15.25 to $15.50; stock, 2,000 piculs; Cassia Buds, $39 to $40, scarce and wanted; Cassia Oil, $215 to $220; stock, 50 piculs; Aniseed, $14.50; stock, 100 piculs; Aniseed oil, $150; stock, 100 piculs: Galangal, $4¼ to $4½; stock, 600 piculs.

CHINA—IMPORTS.

Shanghai.—The depression in trade still continues, and it is with the greatest difficulty that sales to any extent can be effected. There have been no additions to the supplies of American goods for the past two months, and with the gradual decrease in stocks an improvement is looked for. There has been a slight move in sugar during the past two weeks, as it is said that the Taou-tae has made a concession of two or three mace per picul on the taxes lately imposed. In most descriptions of Straits and Native produce there is the greatest inactivity prevailing. In American cotton goods—Drills—the deliveries for the past two weeks have been 11,000 pieces; stock, 250,830. Sheetings—Deliveries, 3,720; stock, 1,415. Jeans—Deliveries, 1,000; stock, 7,800; and the delivery of English shirtings—Grey, 53,300; white, 53,50. Spotted shirtings—White, 3,750; coloured, 700. Brocades—Coloured, 400; blue shirtings, 1,100; T-cloths, 7,130; chintzes, 1,850; velvets, 1,960; handkerchiefs, 200 dozen; damasks, 700 pieces; English drills, 140; dimities, 900; woollens—Spanish stripes, 150; long ells, 120; camlets, 90; lastings, 240.

Canton.—Cotton: Since our last the arrivals have been the Fettey Shaw Allum, Fort William, and Despatch from Bombay, with about 6,751 bales, and the Margaret Jane from Calcutta. The improved advices from India and England have produced no alteration either in demand or prices. The market has been without any animation, the demand being still confined to small parcels. Sales during the fortnight consist of 6,925 bales Bombay, 35 bales Madras, and 900 bales Shanghai. Importers are not disposed to sell new at a reduced price. The quotation for new Bombay, 8t. 6m. to 10t. 2m.; for old, 7t. to 8t. 8m.; Madras, 7t. to 9t. 8m.; Bengal, 7t. to 8t. 8m.; and Shanghai, 10t. 2m. to 10t. 5m. per picul. Stock in Canton on the 26th Aug., 46,200 bales Bombay; 11,150 bales Madras; 1,200 bales Bengal; and 3,425 bales Shanghai.

Foo-chow-Foo.—The market has displayed more animation than we have had to advise for some time past, the sales effected being as follows:—3,500 pieces 6¼ catty grey shirtings, at $2. 40c. to $2. 42½c. per piece; 500 do. white do., $2. 60c.; 1,250 6¼ catty do., $2. 30c.; 2,400, 7¾ lbs. (fine) T-cloth, $2. 60c.; 10,890, 6 to 7 lbs., $1. 70c. to $1. 85c.; 8,730 pieces 40 yards American drills, $3. 50c. to $3. 60.; 1,051 piculs lead, $9. to $9. 50c. per picul Drugs.—The demand for this has been very light, sales for the fortnight being 90 chests of Malwa, at $750, and 22 chests of Bengal.

Hong Kong.—The import market has been again fully supplied by large auction sales, which have been sufficient to meet the local demand in Manchester piece goods, in which the direct *bona fide* sales have been most limited. Shirtings continue absolutely unsaleable. T-cloths have somewhat improved in inquiry, though prices obtained are without alteration. The same remarks apply to yarns. The further downward tendency in exchanges is another feature against quitting at present quotations, except when settlements can be effected in barter for produce. In woollens some small sales have been made for re-export by foreign firms. Fancy goods continue entirely neglected. Metals continue in heavy stock, with but small sales.

JAPAN—KANAGAWA.

Transactions in imports have been very few. The market is more depressed than foreigners have ever known it. Large supplies have increased stocks so much that, even with a good demand, improvement in price cannot be expected for a long time. In silk the market has shown considerable excitement, the dealers asking advanced rates for each small parcel brought forward, which the smallness of supply has enabled them to obtain. For fair Mybash 1 and 2, $500 to $510 has been paid. Reports as to the crop are so various and contradictory that no reliable estimate can be made, but it is believed that the small quantity coming to market is no indication of a short crop. Quotations—Ida 1 and 2, none; 3 and 4, $300 to $350; 2 and 3, new, $480 to $510; 2 and 3, old, $400 to $450. Re-reeled, 3 and 4, ordinary, $280 to $380. Cotia, $300 to $330. Tea, a fair business has been done, and rates have advanced $1 to $2 per picul lately. Settlements for the month are estimated at 3,000 piculs. Stock, 600 piculs.

NAGASAKI.

Imports.—There is no change to report in the import market, which continues in a very inactive state. The Heilige Willibrordus and the Crimea have arrived from Singapore, the latter with a full cargo of piece goods and Straits produce, chiefly on account of the Chinese Guild. The principal sales have been made in barter against produce. For other imports there is no inquiry.

Exports.—Tea: New crop still coming to market, but settlements have been small—estimated at 1,450 packages of new and 300 to 400 old. The native merchants are holding back for higher prices. Silk: Settlements 20 to 25 bales. Estimated stocks, No. 1, 10 bales; No. 2, 20 bales; No. 3, common and mixed, 60 bales. Quotations, No. 1, $420 to $460; No. 2, $380 to $400; No. 3, $280 to $360.

Digitized by Google

HANKOW.

In imports there is more business doing, but principally against produce, excepting tea. We have the following quotations:—Grey shirtings, 5¼ catty. 1.5.5 to 1.6 taels; 6 do., 1.7 taels; 6½ do., 1.9.5 to 2.0.0 taels; 7 do., 2.0.0 to 2.0.5 taels. T-cloths, 24 yards, 1.4.5 taels; 26 do., 1.9 taels. White spots, no market. Dyed spots, 2.6.0 taels. Dyed brocades, 2.8.0 taels. American drills, 2.7.0 to 2.8.0. Camlets and long ells, no market. Seaweed and mushroom, no demand. Exports: Tea comes to market pretty freely, and prices are a shade lower. We have not any late quotations.

TIEN-TSIN.

In the early part of the past fortnight there was a small demand for the heavier kinds of grey shirtings, but as importers were anxious to realise prices gave way daily, and buyers waited to find the lowest point they could purchase at. About thirty of the inland raders have arrived from the interior; a fair business was consequently expected. There is difficulty in making remittances, as the French men-of-war steamers refuse to carry treasure.

MANILA.—In imports the business continues dull, and very small sales only are reported, including those made to arrive by the last two vessels from Liverpool. In exports the market continues without animation, and quotations are generally again lower. Unclayed sugar is now quoted $2. 81¼ for Taal, and $3. 06¼ for Zebu; coffee, $15. 85.; hemp, $8. 37½.—all per picul.

BANKOK.—Since our last a gradual improvement has been felt in the demand for the chief articles of export, and sellers more ready to transact business. The quotations are—Buffalo horns, Tls. 12 per picul; hides, Tls. 7½ to Tls. 8; black pepper, Tls. 10; white sugar, Tls. 8½ to Tls. 9½; brown, Tls. 3½ to Tls. 4; silk, Tls. 165.

BATAVIA.—Very unfavourable weather still continues, and large quantities of sea-damaged goods continue to be brought to auction, the regular demand and prices declining. Cambrics are very little sought after. Shirtings are also very difficult to move.

SINGAPORE.—Extreme dullness still continues in the demand for manufactured goods, and the wholesale clearances have been, if possible, on a more limited scale than before. The want of demand for export continues, and the immense clearances of sea-damaged goods at auction have entirely supplied the local wants.—In exports the principal articles have undergone little change in prices, and the amount of business done has been rather limited. Tin has receded slightly in value, and the market is nearly cleared. Black pepper is still rather scarce, and maintains its value. White is without change in value Sago flour has been purchased to moderate extent at rather under former prices, and pearl sago is being taken pretty freely at last rates. Coffee continues in good inquiry.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 0d. to 6s. 0¼d.	6s. 0¼d. to 6 1

EXPORTS FROM JAPAN.

Per Antagonist from Nagasaki, July 25, to London.—Silk, 43 piculs; tobacco, 1,485; cotton rags, 2,190; vegetable wax, 500; camphor, 19; mother-o'-pearl shells, 255.60; rapeseed, 228.50; gallnuts, 36.73; ginger, 9 bales; bamboo baskets, 231 packages; earthenware, 8 boxes; lacquer ware, 9; bronze ware, 8.

EXPORTS FROM CHINA.

Per Jubilee, from Shanghai, August 2, to London.—Tea, 797,978 lbs.; silk, 555 bales; rhubarb, 62 piculs; silk waste, 36; wool, 361.

Per Egean, from Shanghai, August 8, to London.—Tea, 290,425 lbs.; silk, 885 bales.

Per Union, from Shanghai, August 9, to New York.—Tea, 755,994lbs.; tobacco, 158 piculs; rice, 8,000.

Per John Norman, from Foo-chow-Foo, August 15, to London.—Tea, 587,500 lbs.

Per Star of the North, from Foo-chow-Foo, August 16, to London.—Tea, 1,109,500 lbs.

Per Johanne, from Foo-chow-Foo, August 12, to Melbourne.—Tea, 194,000 lbs.

Per Mary Ross, from Amoy, Aug. 6, to New York.—Tea, 431,382lbs.

Per John Bull, from Amoy, Aug. 15, to New York.—Tea, 235,872 lbs.

Per Ganges (mail steamer), from Hong Kong, Aug. 13, to London.—Silk, 1,893 bales; to the Continent, 319.

Per Spirit of the North, from Canton, Aug. 8, to London.—Tea, 780,600 lbs.

Per Caduceus, from Canton, Aug. 12, to London.—Tea, 1,239,190 lbs.

Per Primula, from Canton, Aug. 17, to London.—Tea, 592 500 lbs,

Per Coleroon, from Canton, Aug. 20, to London.—Tea, 903,000 lbs.

Per Jessey Beazley, from Canton, Aug. 23, to Liverpool.—Tea, 607,283 lbs.

Per Penguin, from Macao, Aug. 14, to New York.—Tea, 244,614 lbs.; raw silk, 74 piculs; straw braid, 44 boxes.

EXPORTS FROM MANILA.

Per Bahia, August 8, to Falmouth.—Sugar, 11,150 piculs; Sapanwood, 350.

Per Gertrudes, August 16, to Liverpool.—Hemp, 4,000 piculs; sugar, 7,050; mother o' pearl shells, 70; cigars, 84 mil.

Per Burdoes, Y. Habana, August 24, to Liverpool.—Hemp, 2,408 piculs; sugar, 3,225.

EXPORTS FROM SINGAPORE.

Per Charlemagne, August 22, to Bordeaux.—Rattans, 165 piculs; tin, 203; buffalo horns, 111; Rhio gambier, 297; white pepper, 117; gambier, 2,999; black pepper, 1,053; pearl sago, 153.

Per Samuel Appleton, September 2, to New York.—Gambier, 6,153 piculs; black pepper, 584; sapanwood, 324; Borneo sago flour, 1,508; Borneo pearl sago, 294; cubebs, 72; Borneo cassia, 11; rattans, 858.

Per T. W. Sears, September 2, to New York.—Gambier, 8,937 piculs; sago flour, 503; sapanwood, 265; rattans, 994; 108 boxes camphor.

Per Antilla, Sept. 4, to Liverpool.—Gambier, 1,126 piculs; sago flour, 4,505; black pepper, 375; sugar, 9; rattans, 121.

Per ship Jules Cezard, Aug. 22, to Havre *via* Samarang.—Tin, 980 piculs; black pepper, 1,945.

Per Palmerston to London.—Gambier, 2,494 piculs; coffee, 1,963; black pepper, 1,246; sago, 1,846; tin, 669; gutta percha, 112; horns, 33; tapioca, 46; rattans, 136; mother-o'-pearl shells, 22; gum Benjamin, 50 cases; spices, 28; private effects, 2; Malacca canes, 40 packages.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: August 10, Wagoola; 15, Solent. From Liverpool: 15, Spirit of the Deep. From Sydney: 15, Queen Bee.

At HONG KONG, MACAO, and CANTON.—From London: August 18, Foam; 17, Westminster; 20, Falcon. From Hamburg: 24, Pudel. From Boston: 18, Elizabeth Cushing. From Sydney: 18, Kestrel. From San Francisco: 18, Bald Eagle.

At BATAVIA.—From Liverpool: Aug. —, D. F. Weber.

At SINGAPORE.—From London: Sept. 5, Xulla, Richard Thornton. From Liverpool: Aug. 28, Susan Douglas; Sept. 4, Electric. From Glasgow: Aug. 25, Abdul Medjid. From Hamburg: 25, Candace; 28, Maria Wilhelmina; 29, Octavia. From Melbourne: 25, Heather Bell.

SAILED.

From SHANGHAI.—For London: Aug. 8, Egean. For New York; 9, Union.

From FOO-CHOW-FOO.—For London: Aug. 15, John Norman, Star of the North. For Melbourne: 4, Johanne.

Digitized by Google

From Amoy.—For New York: Aug. 7, Mary Ross; 14, John Bull.
From Hong Kong, Macao, and Canton.—For London: Aug. 11, Caduceus; 17, Primula; 21, Verbena. For Liverpool: 24, Jessie Beazley.
From Manila.—For Liverpool: Aug. 16, Gertrudis; 24, Burdeos, Y, Habana. For Falmouth: 8, Bahia. For Sydney: 13, Berengaria.
From Singapore.—For London: Aug. 21, Victor. For Liverpool: Sept. 4, Antilla. For Bordeaux: Aug. 22, Charlemagne. For France: Aug. 31, H.I.M.'s Rhin. For Havre: 22, Jules Cezard. For New York: 26, Beatrice; Sept. 2, Thomas W. Sears; 3, Samuel Appleton.

LOADING.

At Shanghai.—For London: Assyrian, Ballarat, Charlotte Ann, Imperial, Pegasus, Polmaise, Queen of the Ocean, Raleigh, Wynaud. For New York: Leichard, Magna Bona.

At Foo-chow-Foo.—For London: City of Carlisle, Clara Novello, Napoleon III., Runnymede, Southern Cross. For Australia: Ceres, Earl of Hardwicke, Florence Nightingale, Nemesis.

At Hong Kong, Macao, and Canton.—For London: Finzel, Keepsake. Lord of the Isles, Sea Snake, Westminster, E et Reine, Hero, Kelso, Niphon, Shand. For Sydney and Melbourne: Pamella, Samuel Fales. For San Francisco: Lucretia, N. B. Palmer.

At Manila.—For London: T. E. Lemon. For Liverpool: Luisita, Northern Crown. For Cork: John Mathie. For Cadiz: Concepcion.

At Singapore.—For London: Electric, Palmerston. For Liverpool: Greyhound. For Channel: Neptune. For Melbourne: Heather Bell.

At Penang.—For London: Gwalior, Victor. For Boston: Rocket.

FREIGHTS AND CHARTERS.

At Shanghai.—To London: Tea, £4; silk, £5. To New York: Tea, $14 to $15; silk, $25. There is no improvement to note in tonnage since the date of the last, and the number of disengaged vessels still continues large. The Taou-tae having made some slight concessions on the taxes imposed upon native produce, there are hopes now of a change for the better. The following charters have been made:—Horatio to Newchwang, at $8 per ton; Geelong to Nagasaki, 30 lay days, $1,800; Adriatic to Swatow and back, 40 lay days, $5,400. The C. E. Tilton (Am.) has been sold, and, it is reported, for $23,000. The wreck of the steamer Manila for 81 taels.

At Foo-chow-Foo.—To London: £4. At this rate several vessels are loading, and others will soon follow. For Australia also several charters have been made.

At Hong Kong, Macao, and Canton.—To London: £3. 10s. A fair amount of business has been transacted during the past fortnight. To Great Britain rates are low, although the present is the height of the export season. To the United States, the political state of affairs has stopped trade, and the berth on the Canton waters is still unoccupied. For Australia small vessels to load tea are in request, otherwise there is little doing. There has been a good business done in rice charters, but the rates paid are not very remunerative. The coast trade continues prostrate, owing to the novel action of the China Customs under foreign inspectors, in causing native produce to pay full tariff rates upon both its export and import too. As this baneful institution exercises no authority over native craft the Chinese have naturally returned to the employment of their own vessels again. Small handy craft are still much wanted. The amount of disengaged shipping is small. The charters reported are—Lord of the Isles and Kelso, from Canton to London, at £3. 10s.; Sea Snake, from Macao to London, at current rates; N. B. Palmer, to San Francisco, $13,000 in full; seven vessels, to Bankok and back, at 52½c. to 60c. per picul, and on owners' account; three to Saigon and back, at 60c. to 65c.; Wilhalmine, to Tien-tsin, $2,300 in full; Henrietta Louisa, to Kanagawa, $1,000 per month.

At Manila.—Last rates are fully maintained. The *T. E. Lemon* loads for London at £3. 5s. for current, and £3. 10s. for unclayed sugar, and £4. 5s. for hemp per 20 cwt. with measurement goods at £4. 10s. per 50 feet. The *Rosarito* goes to Liverpool with current sugar, at £3. 5s., and hemp, at £4. 5s. per 20 cwt.; and the *Cervantes*, on the berth for same port, gets sugar at £3. 10s., for unclayed, and £3. 5s. for current; their flag (Spanish) causing a saving in export duty. The *Northern Crown* (American) has got hemp for Liverpool at £3 per 20 cwt.

At Batavia.—Freights have risen rapidly and as the arrivals of disengaged tonnage are far below the requirements they will likely go still higher. The following ships are loading for Holland:—Puttershoek, Reinestein, Majestic, and Jeddo. Sugar at about £5. 15s., and coffee at £5. 5s. per ton nett. The Cecrops has been chartered for Australia at £3. 10s. per ton.

At Bankok.—Rates have advanced, and vessels of suitable capacity are wanted to a fair extent for the transport of rice to China. The Catharine is to load 15,000 piculs at 57½c., and Robin Hood 20,000 piculs at 55c., both to Canton.

At Singapore.—To London, £3 to £4. A good demand still continues for shipping, nearly all the disengaged vessels having been taken up, and several charters are still offering. Amongst the latest are:—Electric, for London, at £3 tin, £3. 10s. gambier, and £4 light freight; Greyhound, for Liverpool, at £3 dead, and £3. 10s. light freight, with 900 tons rice from Penang at £3. 15s.; Rory O'More, with present cargo to Macao and back to Singapore, at $4,500 in full; Herbert, Susan Douglas, and Thames, from Bankok to China, at 55c. to 62½c. per picul.

PASSED STRAITS OF SUNDA.

From Amsterdam to Japan.—Aug. 20, Jacob and Anna. From England and Continent to China: 15, Valdivia, Nankin, Jeanne et Joseph; 16, Lauderdale; 17, Mary Lee; 18, Nordstern; 21, Capiolani. To Amoor River: 12, Mary. To Manila: 18, Clementine; 26, President Plate. To Bankok: 18, Nil Desperandum. From Manila to England and Continent: Aug. 12, I. Victoria, Ethereal; 17, Ashmore; 19, Chatham. From Singapore: 12, Reunion; 19. Caroline Elizabeth. From Siam: 20, Hannah Salkeld. From Batavia to Sydney: 15, Leonidas. From Manila to New York: 17, Shirley; 21, Merrimac. To Boston: 26, Ocean Pearl. To Sydney: 18, Antagonist. To Melbourne: 25, Canton. From China to New York: 20, Heroine; 24, Canvass Back. From New York for Shanghai: 21, Kathay.

The Chinese in Australia.—The anti-Chinese riots at Burrangong are all over. Great threats were held out that any attempt to apprehend rioters would lead to a most formidable collision, and telegraphic messages were forwarded to town speaking of preparations made to organise resistance; but the Government very properly disregarded all these threats, and the opposition vanished altogether on the appearance of the military force. Many of the worst characters on the goldfield had taken time by the forelock and beat a retreat. Several persons have been apprehended and committed for trial, but they are mostly but secondary actors, and in some cases the evidence only goes to show that they were pleased spectators of the outrages on the Chinese. A reward of £100 each has been offered for the three known ringleaders, but their escape has been facilitated by their friends. And, as certain classes have almost unchecked control over the course of legislation, it is inevitable that an Act will be passed prohibiting immigration into the colony. It has been urged that such an Act will be at variance with the spirit of the Treaty our countrymen have recently extorted from the Emperor of China, by which treaty not only is free ingress to that country claimed, but also free egress for the Chinese population. But to this it is replied—first, that our legislation is not contrary to the Treaty, inasmuch as the compulsory removal of the restrictions on Chinese emigration was only intended for the behoof of such of our colonies as might need the cheap labour, and does not imply that those colonies that are averse to receiving Celestial visitors should keep their doors open to them; and, secondly, if it is contrary to the Treaty, it does not matter, inasmuch as we are to legislate for ourselves, irrespective of any Imperial negotiations, as to which we are not consulted. Some of the more ardent of our democrats, especially those who sigh for separation and a republic, rather like the idea of a collision between Imperial and Colonial policy, as tending to justify and precipitate independence. The motive is not openly avowed, but it is not difficult to trace its secret action. But whether or not there may be anything in the language of the Treaty that would compel Her Majesty to disallow our anti-Chinese legislation, it cannot be denied that our treatment of them contrasts with the policy we have forced on them—and contrasts in a way that is not altogether to our credit.

Disastrous Rising of the Nile.—Stoppage of the Railway.—On the night of the 1st instant the waters broke through from a canal on the western side of the river, which is near the railway. The latter has been destroyed, telegraph posts and wires torn up and washed away, and some ten miles, at least, of country laid under water. A goods train that was sent up with an engineer and platelayers pulled up for a moment at a place where the regular passenger train had just passed before them. The embankment immediately began to give way from under them, and the carriages sank down into the water. The men took refuge upon the roofs, but after a while found that both before and behind them the earthern embankment had entirely melted away from under the rails. They had to adopt the only means for saving themselves that offered—to drag themselves through the water along the rails, their only guide in the darkness that had set in, until they reached dry land, in a state of utter exhaustion and some among them having been on the point of letting go their hold and of resigning themselves to what seemed an inevitable fate. Intelligence came from the Delta of similar damage to the railway from Kafr Zayat towards Benha, which has likewise become impassable, and in several parts is altogether destroyed. Steamers have been collected for the transit of the outward Calcutta mails and passengers. The passengers will be conveyed by rail from the landing-place to Kafr Damar, the first station beyond Alexandria, and thence by way of the canal and Nile to Boulac. It is calculated that at least two or three months will be required to repair the damages to the railway, and to admit of a resumption of the traffic. The expense which this alone will inflict upon the Government amid its other losses, all which it can so ill afford may easily be conjectured.

Departure of the Siamese Ambassadors.—Advices from Civita Vecchia, of the 9th inst., announce that the Siamese Ambassadors embarked from that port on the preceding day on board the *Asmodée*.

The P. and O. Steamer "Mooltan."—In consequence of doubts as to the capabilities of this vessel fulfilling the contract speed, she was tried on the 14th inst. loaded to a depth of 20 feet; and notwithstanding her engines are only 400 horse-power, she attained a speed of 12 knots with comparative ease.

Captain William Baldry, of the *Shantung*, has been committed to take his trial for the wilful murder of a seaman named Riley, caused by constant ill-usage, on her last passage from China to London.

The Russian Imperial corvette *Novik*, bearing the flag of Rear-Admiral Popoff, arrived at the Motherbank at noon, yesterday, from Cronstadt, on her way to the Amoor and Pacific.

ADDITIONAL PASSENGERS INWARD BY THIS MAIL.

From Singapore to Marseilles, Mr. Rittersban; to Aden, Syed Md. Alcuff, Hassein, and Hardin; to Suez, Governor-General Pahud, Mrs. Vincent and daughter, Miss Luise de Crenze, and two E.M. servants; to Alexandria, Mr. and Mrs. Ottemboff and child, Mr. C. Bletterman, Mrs. H. Kinder, child, and E.F. servants, Mr. E. Forn and servant; to Southampton, Capt. Burn, Mr. Willans.

THE OUTWARD MAIL OF 26TH JULY.

The correspondence which left this by the mail of 26th July for the Straits, China, Japan, &c., was conveyed only as far as Galle, and would wait there the arrival of the following mail of 10th August.

Continental Intelligence.

FRANCE.

The Siamese Ambassad[illegible]rs sailed from Marseilles on the 28th ult., in the steam-fri[illegible] *Asmodée*, on their return home, via Suez. The Ambass[illegible] having expressed their wish to pay homage to His Ho[illegible] the Pope, the commander of the *Asmodée* received orde[illegible] to touch at Civita Vecchia. The following details have been published relative to the departure of the Siamese Ambassadors from Paris :—

"As the time for their departure approached the Siamese Ambassadors became very sad, and manifested their sorrow at quitting France, and when the moment for their taking leave arrived their tears fell in torrents. Previous to quitting the hotel the three ambassadors assembled their servants. They reminded them of the excellent reception they had met with, and they remarked that they ought to feel grateful for having been selected for the journey to France, where they had witnessed so many wonderful sights, and that they owed a heavy debt of gratitude to the Emperor and Empress of the French for their Majesties' magnificent reception. The ambassadors having expressed their regret at not being able to present their last homage to their Imperial Majesties, resolved to compensate for it as much as lay in their power. They then ordered their attendants to light ten wax candles they brought from Siam, and which are used in that country for religious ceremonies. Turning to the south, in which direction they were told their Majesties were at that moment, they touched the ground three times with their foreheads, saying at each time that they humbly took leave of the Imperial family, and they placed themselves under their lucky auspices to perform a good journey and to be for ever happy. After that ceremony, when they quitted the hotel, the ambassadors and their attendants several times repeated, '*Vive l'Empereur! Vive l'Imperatrice! Vive la France!*'"

At the reception of the Ambassadors by the Pope, the former, in a speech addressed to His Holiness through an interpreter, said that they had been sent by their Sovereign to express his veneration for the head of the religion which was preached in Siam by zealous missionaries, and to assure His Holiness that the Catholic religion would always be protected in that country. The Pope in his reply desired the Ambassadors to thank their Sovereign for the protection he had granted to the Catholics in Siam, where he was happy to learn the missions were making progress. The Ambassadors then offered the presents which had been sent to His Holiness by the King of Siam.

A letter from Saigon, in the *Moniteur de l'Armée*, says :—

"An affecting ceremony took place here on the 3rd of August. A commission named for the purpose, and accompanied by the clergy of the new cathedral of Saigon, proceeded to the tomb of the Bishop of Adran, a short distance from the town, and took possession of it in the name of France. This tomb was erected in 1799, in memory of the illustrious French missionary, by his friend, the Emperor Gia Laongs, whom he assisted to recover the throne of his ancestors. The monument is in the form of a pagoda, and stands in an enclosure walled round and planted with trees. In conformity with the Emperor's orders, this tomb henceforth becomes national property, and will be kept in repair by the State. The Bishop of Adran was one of the men who have conferred most honour on France, religion, and humanity."

The *Patrie* affirms that the latest accounts from Yedo prove that the Japanese Government had nothing whatever to do with the barbarous attack on the English Legation, and that it was caused entirely by private animosity. The Japanese Government, adds the *Patrie*, was engaged in looking after the criminals, and had captured three.

The same journal announces that the Chinese Government having refused to allow a Prussian representative to reside in Peking, the French Minister will be intrusted with the charge of Prussian interests in China.

Galignani reports that in the steam-frigate *Labrador* which lately arrived at Toulon with troops from China, was a native of that country with four or five thousand young fish, of the sorts most highly prized in China, which were taken in the ponds of the Celestial Emperor, and have been brought over for the Government, to see if they can be acclimatised in France. The fish are contained in three large jars, and, singular to relate, not one deathoccurred among them in the long voyage of 6,000 leagues.

The Russian navy (says the *Pays*) has sustained a severe loss on the coast of Japan, that of the *Svellana*, line-of-battle ship, 100 guns and 800 men. All the crew are said to have perished.

A letter from Toulon states that the steamer *Canada* is under orders to convey ten officers and 1,200 men to Algiers. Thence she will proceed to Alexandria with a battalion of Turcos, who have volunteered to serve in Cochin China. They are to be despatched from Alexandria to Suez by railway.

It is stated that M. de Montigney is about to be sent on a mission to Siam.

RUSSIA.

It is reported in diplomatic circles that the Russian Government has addressed an energetic note to the Sublime Porte on the subject of its projected attack on the Prince of Montenegro, and that the Emperor of Russia had resolved to send a squadron to cruise off the mouth of the harbour of Cattaro. A letter published in the Russian journal, the *Amoor*, states, that on the 13th of June a caravan of Russian merchants had arrived at Tiagne-Tzine. It had left a town called Toune-Tjoou, about twenty versts from Pekin, embarking in three boats under the Russian flag. The Muscovite traders appear to have found that some English speculators had anticipated them. The Russian report describes the town of Tiagne-Tzine as populous, and the inhabitants actively engaged in traffic with English merchants. The latter had opened about a dozen establishments, well supplied with European goods, but at very high prices. The Chinese shops are principally stocked with English cotton stuffs, manufactured to suit the Chinese market. The Russians were waiting for the arrival of Chinese goods, of which the town contained but a small quantity, and had consequently done a very limited amount of business.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Oct. 11.

The Colonial Minister has submitted the draft of the "Bill for regulating the Custom-house duties in Netherlands India" to the different Chambers of Commerce, to elicit their opinion previous to its presentation to the States General. Of the contents of this document—which is naturally very lengthy—I am enabled to give you the following condensed particulars :—

The tariff for the import duties shows on the whole a considerable successive reduction on the present rates, and they are to further undergo an annual mitigation till they reach the lowest point at present contemplated. The new arrangement is to come into operation on the 1st of January, 1863. I give you herewith some of the principal articles of the tariff, with the proposed duties, premising that the figures in parenthesis exhibit the present existing duties, and the others the new duties for 1863, 1864, 1865, and 1866 and following years respectively. D. o. means with certificate of Dutch origin :—

Earthenware	...	D. o. (12),	10,	8,	7,	6	per cent. ad valorem.
„	...	for. (24),	20,	16,	14,	12	„

Salt	(prohibited),	16, 16, 16, 16	„
All unenumerated goods	D. o. (6),	6, 6, 6, 6	„
„ ...	for. (12),		

The only article that shows a retrograde or increasing duty is that of musical instruments, which are now duty free if of Dutch manufacture, and pay 6 per cent. if of foreign make, whilst for some reason or other a duty of 3 per cent. is to be immediately laid on the former, increasing gradually to 6 per cent. In the same manner, the present duty of 6 per cent. on those of foreign make is not only to be retained, but annually increased till it reaches nine, or one-half more than what it now is.

For the rest, your readers will perceive that on some articles the duty is to be abolished altogether (books, machinery, physical and surgical instruments, and copper, lead, and iron); in other cases articles hitherto prohibited are permitted to be imported, as gunpowder, firearms, and salt, whilst in most others the duty is to be successively reduced year by year till it reaches one half of the present rates. And, lastly, in some instances the protective or differential duty between goods of Dutch origin and those of other countries is dropped, and the duty equalised for all nations (machinery, copper manufactured goods, cordage, and spelter). The greatest reduction appears to be on brandy, rum, and liqueurs.

With regard to the export duties, the proposed tariff is very short, for the general principle is that all exports are duty-free, only the following articles forming an exception to the rule:—

	Exported to Holland.	Exported to Other Countries.
Cochineal	... 2	... 2 per cent. ad valorem.
Hides	... 3	... 3 „
Indigo	... 10	... 20 c. per Netherlands lbs.
Coffee	... 6	... 9 per cent. ad valorem.
Pepper	... 6	... 9 „
Sugar	... 3	... 6 „
Tobacco	... 6	... 6 „
Tea	... 3	... 3 „
Tin	... 36.50c.	... 7fl. per 100 Netherlands lbs.
Birds' nests	... 6	... 6 per cent. ad valorem.
All other unenumerated goods	... free	... free.

The King's visit to the Emperor of the French at Compiegne, naturally causes a vast deal of conversation, mixed with surmises of political combinations, it is on the whole generally believed to be nothing more than a visit of courtesy. His Majesty takes no statesmen or diplomatists with him, but will only be accompanied by two of his aides-de-camp, viz., Baron Snouckaert van Schauburg and Baron van der Capelle.

In the Second Chamber of the States General, the Minister of Finance has presented the Budget of the State for the year 1862. The expenditure is estimated at 86 millions of florins, the receipts at 61 millions, without reckoning the surplus revenue from the East Indian colonies and possessions, which will be five millions less than the sum anticipated, owing to the falling off in the production of coffee, sugar, tin, and other articles, but notwithstanding this deficiency, the total surplus of the budget will be more than 3,700,000 florins, supposing that the ten millions voted for the extension of railroads are provided for elsewhere. Should this, however, not be the case, there will then be a deficiency of 6,300,000 florins, but which will be abundantly covered by the available surplus of former years, amounting to seventeen millions, so that in the worst case there will still be a general surplus of ten millions and a half at the disposal of the nation. Notwithstanding the difference exhibited between the figures of the estimated revenue and expenditure, the minister described the position and resources of the country as encouraging, and on the whole, favourable, laying stress on the fact of the increasing amount of the taxes received.

After the Government had wavered a long time as to the recognition of Victor Emmanuel as King of Italy, the question was supposed to be finally settled in the affirmative, as mentioned in a former letter. It now appears, however, that the ministers have not the courage to defend their conduct with regard to that act. It made a great sensation, and was commented on by the Opposition, that in the King's speech, on the late opening of the States General, not a word was said about Italy. A Member of the First Chamber on the debate on the Address to the Throne had the boldness to express his astonishment at this omission, and that the recognition of Italy had not been formally announced by the *Official Gazette*, proposing as an amendment to the third paragraph of the address to add the following words: "We sincerely hope that the recognition of the kingdom of Italy will tend to improve our relations with foreign States generally." The Minister for Foreign Affairs explained that on the receipt of the communication from Turin in April last, that Victor Emmanuel had with the consent of his parliament taken the name and title of King of Italy, the Netherlands Government, after due deliberation, had resolved to recognise him by that title. The amendment, he continued, specially mentioned the "Kingdom of Italy," whilst the measure of the government only applied to the alteration of the title, and therefore it was considered superfluous to promulgate it officially. The non-introduction of the subject into the Royal Speech the Minister confessed to be purposely done, in order to avoid giving rise to the discussion of a subject which would be received with enthusiasm by some but with feelings of discontent by others. It was thought the Ministers might be charged with throwing a lighted torch into the legislature engendering religious dissensions, and this fear alone prevented them from introducing the topic in the Speech, as they most earnestly desired not to disturb the unanimity and mutual good feeling happily existing between the Government and the Legislature. He therefore opposed the amendment, and requested the hon. Member to withdraw it as highly objectionable, which was acceded to, and the original reading of the paragraph passed without further discussion. From this we gather that Holland has not recognised the existence of the *Kingdom of Italy*, but only the title of Victor Emmanuel as "*King of Italy*," just as he claims the unmeaning title of "King of Jerusalem."

At a combined meeting of the Directors and Royal Commissioners of the Netherlands Trading Company, held in this city last week, it was unanimously agreed to present the names of the three undermentioned gentlemen for the King's selection, in virtue of Art. XXXIII. of the company's bye-laws, as managing dircetor of the said company, in the room of Mr. D. Goudswaard, who has received the Royal permission to retire from that honourable post at the end of this year. The three gentlemen are Mr. G. Obreen, Mr. D. de Clercq, and Mr. H. J. Knottenbelt. In connection with the above, I may here add that the King's selection for the appointment has fallen on the first named gentleman, Mr. G. Obreen, who is a merchant at Rotterdam, and member of the Municipal Council, as well as president of the Chamber of Commerce and Manufactures in that city. Mr. Obreen will enter on the duties of his new office on the 1st of January next.

An address numerously signed by the principal shipowners of this city has been sent in to the Colonial Minister, complaining of the undue preference given to vessels belonging to Rotterdam in being chartered for the conveyance of troops and officers to Netherlands India. It sets forth that since the beginning of this year the Government chartered for the above purpose three vessels belonging to Amsterdam, six to Rotterdam, and one to Dordrecht; whilst during the same period passage for forty-two officers was engaged in five Rotterdam vessels, and only one owned here, which last vessel, moreover, took out only two officers. It has been stated that the selection made is not arbitrary, but that in general the Rotterdam vessels are found to be better adapted for the conveyance of troops; but as no particulars are known of the requirements for accommodation, space, light, and ventilation, the signers of the address respectfully urge the Colonial Minister to give orders to the company to publish for general information the conditions demanded and extent of accommodation required; and, further, to take the needful steps that in the selection of vessels tendered for the conveyance of troops and officers to Netherlands India vessels belonging to Amsterdam and Rotterdam may be chartered alternately.

Another new first-class war steamer, called the *Zoutmann*,

Digitized by Google

was successfully launched last week, at the Royal dockyard in this city, and is to be immediately fitted out for active service.

Despatches were received by the Naval Department from the Cape of Good Hope announcing the safe arrival in Simon's Bay of H.N.M. steamer *Amsterdam*, Captain-Lieutenant J. P. G. Muller, from this country to Batavia. She proceeded on her voyage on the 11th of August. All well on board.

The steamers *Sindoro* and *Bromo* sailed for India on the 1st inst., as previously arranged; the former from Vliessingen and the latter from Helvoetsluys. Mails were made up at the Post-office for both vessels.

Mr. J. C. van Lannoy, resident of Bantam, has, at his own request, received permission to retire from the service, with the right of claiming a pension for his long and meritorious services to the State.

Captain-Lieutenant F. R. Toewater, R.N., has been attached to the Staff of Rear-Admiral May, the new Commander-in-chief of the naval forces in Netherlands India, in the quality of head of the newly created "Department of the Naval Personnel."

Mr W. K. L. van Hogendorp is confirmed as Assistant-Resident of Krawang.

Accounts have been received here from Alexandria announcing the safe arrival in that port on the 13th ult. of the new Governor-General of Netherlands India, Baron Sloet van de Beele. His Excellency was received on landing by Mr. Ruyssenaers, the Netherlands Consul-General, and after a brief stay in that city proceeded to Suez, where he embarked by the mail steamer to Ceylon and Singapore, at which latter port he will find a Dutch ship-of-war waiting to convey him to Batavia. At Alexandria the Pasha of Egypt had placed a vice-regal equipage at the disposal of His Excellency, an act of delicate courtesy towards the distinguished traveller.

Last week a large number of gentlemen connected with Netherlands India presented Mynheer van Hoevell, on the occasion of the twenty-fifth anniversary of that gentleman's wedding day, with a substantial mark of their sympathy and esteem. A deputation from the East Indian notabilities left this city also on the same day for the Hague to congratulate on the auspicious day, and to assure him of the warm feelings of gratitude and confidence entertained towards him by all those who formerly resided in Netherlands India.

The following gentlemen connected with the East have been knighted by the King with the Order of the Netherlands Lion:—J. C. de Lannoy, late Resident of Bantam; C. de Groot, Engineer of the First Class, and Head of the Mining Department in Netherlands India; W. Rappard, Procurator-General of the Supreme Court of Justice in Netherlands India; and J. J. [illegible]derman, President of the Orphan Asylum at Batavia.

Captain [illegible] O. A. Uhlenbeck is promoted to the rank of Captain, R.N. [illegible] the First Class Lieutenant H. A. Modderman to be Capta[illegible]tenant.

The King has been pleased to grant to Messrs. J. H. W. Lamberts and C. A. Lamberts, of Almelo, in their quality of appointed Directors, the Royal permission to establish in Java a company with limited liability, to be called "the Java Steam Weaving Company."

Baron K. F. van Lynden has received the royal license to accept and wear the decoration of Commander of the Order of St. Michael, conferred on him by His Majesty the King of Bavaria.

The Netherlands Trading Company advertise for tenders under the usual conditions to ship cargoes of produce from Java to this country. They also require a vessel of 500 tons to convey a cargo of piece goods from a port in Holland to Sumatra, and bring back a return cargo of East India produce. The ship to be reported ready to commence loading on the 29th inst.

COMMERCIAL.

Coffee is in great request, and decidedly higher. Large orders have been executed since the Company's sale, not only for the home markets but for exportation. Nos. 17, 18, 19, 21, 22, and 23 may be quoted 1 cent higher than sale prices, and the other numbers even more. At Rotterdam the market is equally lively and prices quite as high, whilst the holders expected shortly a further rise. No less than 148,517 bags of the last sale, and 13,080 bags (also Company's) out of previous sales, were sold and taken out of bond last week.

Sugar.—The Company's sale of 22,546 kranjangs of Java at Rotterdam has established a rise of from 1 to 2 florins on previous rates, and the brokers have in consequence altered the prices of the different numbers of the standard samples as follows:—

No. 5.....25½fl.	No. 11.....33½fl.	No. 17.....38½fl.
„ 6.....27 fl.	„ 12..... 34½fl.	„ 18.....39½fl.
„ 7.....28½fl.	„ 13.....35½fl.	„ 19.....39½fl.
„ 8.....30 fl.	„ 14.....36½fl.	„ 20.....40½fl.
„ 9.....31½fl.	„ 15.....37½fl.	
„ 10.....32½fl.	„ 16.....38½fl.	

The article remains in very good demand, and a further rise is anticipated. Since the sale some large contracts have been made for refined on delivery in December and January, amongst which I may notice one of 700 tons at Rotterdam, and one of 700,000 kilogr. in this city; and further, 500,000 kilogr. ASR, No. 1 at 38fl., No. 2 at 37fl., and No. 3 at 36fl.

Rice continues to command large transactions at very firm if not higher rates. At Rotterdam 27,000 bags Necransie, ex *Sourabaya*, *Meleyar*, and *Henriette Gerardina Susanna*, were sold at 7fl.; since which some more cargoes were placed both there and in this city at 7¼ and 7⅜fl. There is also in both markets a good demand for the better descriptions, principally for export, as the supply of Carolina rice is stopped by the blockade of the American ports. 1,400 bags Java table were sold here at 11¼fl., 1,100 bags at 11½fl., and 1,000 more of the same quality subsequently at 12¼fl.

Banca Tin is again coming into favour. Some thousand blocks have been taken at 70½fl., and no more is to be obtained under 71fl.

Tea calm, as little business has been done in anticipation of the Company's sale of Java at Rotterdam on the 9th inst.

Tobacco.—Owing to the short supplies of this article from America, and the general expectation of a prolonged struggle in the United States, the markets both here and at Rotterdam continue to rise, not only for those descriptions, but also for Java. The Company had advertised a sale at Rotterdam on the 24th inst. of—

2,411 bales of Java tobacco in warehouse at Rotterdam;
1,403 „ „ „ „ at Amsterdam.

In the sale of preserved Ginger at Rotterdam the greater part was sold at 60 cents, and a few lots of Mandarin at 106c. Camphor neglected. India-rubber lower. Ratans very firm, and 2,100 bundles taken at higher prices.

The Netherlands Trading Company have advertised the following articles for sale at Rotterdam on the 24th inst.:—

42,970	bundles ratans in warehouse at	Rotterdam
44,333	„ do. „	Amsterdam
7,689	„ do. „	Schiedam
2,809	„ do. „	Dordrecht
421	chests gum damar „	Rotterdam
1,327	„ cassia „	Amsterdam
11	bales Japan camphor „	do.

The result of the sales of Java indigo and cochineal at Rotterdam and here, which consisted of 1,114 chests of indigo and 396 serons of cochineal, was to establish a rise in the value of both articles, as follows:—

Java indigo.	Amsterdam.	Rotterdam.
Ordinary	100 to 110 cents higher	95 to 110 cents higher
Good ord.	80 to 100 „ „	70 to 120 „ „
Middling	80 to 110 „ „	80 to 115 „ „
Fine	90 to 120 „ „	90 to 120 „ „

Java cochineal, No. 1,	10 to 20 cents lower	than the May sales.
„ „ 2, par to 5	„	
„ „ 4, par to 10	„ higher	
„ „ 8, par to 20	„ „	
„ „ 9, par to 10	„ „	

The whole quantity was sold, and at both sales the bidding was very animated.

Ships Arrived.—September 26, at Hamburg from Singapore, *Titania*, Captain Jaeger.

Ships Sailed.—September 27, from Hamburg to Singapore, *Emilie*, Captain Duck.

HAMBURG.

(from an occasional correspondent.)

October 11.

With reference to my letter of August 27, in No. 66 of the *London and China Telegraph*, I am now enabled to give you the following particulars of the Imports from China and the East in 1860, as extracted from the Official Tables recently published by the Board of Trade (Department for commercial Statistics) of this city:—

Imports direct from Netherlands India.

Article.	Quantity.	Weight..	Value in Banco Marks.
Raw sugar ..	7,129 baskets	33,934 cwt.	640,780
Rice	48,579 bags	72,925 „	611,630
Hides	11,388 number	1,406 „	59,890
Arrac	358 casks	21,558 gals.	42,370
Ratans	56,021 bundles	2,360 cwt.	31,160
Gum damar ..	592 chests	739 „	23,880
Coffee	239 bags	300 „	13,500
Tea	134 chests	86 „	7,870
Cubebs	110 bags	59 „	7,690
India-rubber ..	62 bags	55 „	7,140
Canes	52,750 number	—	5,120
Arrowroot ..	107 chests	75 „	1,800
Sago	168 bags	148 „	1,690
Pepper	72 bags	55 „	1,650
Spices	51 packages	28 „	1,450
Soy	68 chests	40 „	1,430

Spirit of the Press.

THE ATTEMPTED MASSACRE IN JAPAN.

DAILY NEWS.

The attack on Her Majesty's Legation at Yedo, as presented in the detailed accounts we publisheed on the 28th ult., was so extensive in its plan, so adequate in its means, and so murderous in its method, that we may well wonder that it did not end, according to the intention of its promoters, in the utter extermination of the Mission. This attack is the latest of a series of outrages which have marked the course of our experience of Japan under the Treaty. Our plenipotentiary has never once deluded himself as to his own security, or that of his consuls, attachés, and secretary. He may be said to have lived under the threat of this assault ever since he went up to Yedo. At intervals the Government have notified him of plots against his life, projects which they never appear to have made it their duty to prevent, but have rather chosen to press upon him a guard, which would encumber his movements, without ensuring his safety, or they have advised him to keep at home, remaining virtually a prisoner. Murder after murder has been committed upon foreigners, but in no case has redress been obtained. So that, in February, 1860, Mr. Alcock could write:—"My own conviction is, that if every member of the Mission, with myself at the head, were murdered in the streets to-morrow, or in our own houses, no redress would be afforded, or measures taken to bring the offenders to punishment." These reflections were called forth by the murder of the linguist attached to our Mission. At first, as merchants, officers, sailors, and servants belonging to the nations admitted under Treaty were murdered, the known dislike and reluctance with which the Government of Japan regarded the residence of Foreign Ministers at Yedo, and the obstructions they threw in the way of trade, suggested the suspicion that their assassination might form part of a plan for driving the strangers away in sheer despair. And Mr. Alcock appears to have so far recognised the possibility of a delusion of this kind as to warn the Japanese Government that if the first pioneers of trade and diplomacy were all cut off, others would unfailingly appear to take their places. But it was also remarked that the murders of foreigners took place always at the time when a larger or smaller naval force of the nation to which the persons murdered belonged was present. Thus a Russian officer and two sailors were assassinated, with a whole squadron under the Russian flag on the spot; and the linguist of the Mission when two British ships were in the bay. Mr. Alcock notes this fact in one of his despatches, as giving colour to a rumour that these murders were the result of political design on the part of the Prince of Mito, an intriguing member of the Royal family, with pretensions of his own to the succession, and anxious to provoke collision with foreign Powers, in the hope that he may profit by the confusion to upset the Government. This suspicion was heightened, when in April of last year the very Regent of the Empire was surrounded with his retinue by armed men close to his own residence on the great highway of the official quarter. The assailants on this occasion were proved to be the Prince of Mito's men. That event was followed by great ostentation of concern on the part of the Japanese Government for the safety of Mr. Alcock, but still taking the form of advice. Our Minister, however, has always thrown the responsibility of providing for the safety upon the Government, and only recently he formally withdrew from the capital—an act by which he reduced the Ministers to the necessity of entreating his return, and promising him the fullest protection. This last atrocious outrage once more brings up the name of the Prince of Mito. Nobody doubts that he projected it and supplied the funds, probably in connection with some of the members of the oligarchy which really governs Japan. The band which attacked the Legation is known to have spent the day at a house kept by one of this person's own retainers, and to have proceeded thence to their murderous work. We, however, have nothing to do with the internal feuds of the nobles of Japan. The apparent Government is weak and timid, and the Tycoon and Regent but puppets, power being actually exercised by that section or connection of the aristocracy which may happen to be in the ascendant for the time. These frequent crimes might happen without the privity of the Government, but they could not go unpunished if the criminals had not all-powerful protectors. The attack on the Legation has brought matters to a crisis, and we must now let no empty words or shadows of authority stand between us and a signal reparation.

ECONOMIST.

The case of Japan is peculiarly regrettable. It does not appear that in this instance we have been at all culpable—unless it was in being there at all. There is no reason to believe that our representatives have been either insolent, encroaching, or negligent of the prejudices and feelings of the natives; and there is reason to know that the usual disorderly and reckless behaviour of sailors while on shore has been carefully watched and rigorously checked by the British authorities. The error on our part, if there be any, was earlier in date, more venial in character, and cannot, we fear, now be amended. The Japanese were a peculiar people, with a singular but most elaborate civilisation, industrious, comfortable, and contented, supplying themselves with all they needed by the exercise of an almost unmatched ingenuity; assailing no nation, injuring none, asking only to have no intercourse with any. For generations, for centuries, the strongest characteristic of the people and the most marked desire of the Government was to prevent all communication with foreigners, and especially all residence of foreigners upon their shores. The feeling was a fanatical one—the result mainly of historical antecedents; but it pervaded and determined the whole policy of the country. First, the Russians, then the American, and finally the British, annoyed at this rigid exclusion; deeming perhaps that such isolation from the influences of our higher culture could not be good for the Japanese themselves; deeming certainly that it shut us out from markets which might reward our enterprise with wealth, and our luxury with new productions; fancying, perhaps, that no nation had a right thus to shut itself up in self-satisfied exclusiveness,—resolved to break through the cordon of inhospitality by which these islanders hoped to guard themselves against foreign gold, foreign manners, foreign influences, foreign demoralisation perhaps. Accordingly Lord Elgin, being in those seas, having time on his hands and a force at his disposal, sailed for Japan, entered their harbours, anchored near their capital, was received with a false and assumed cordiality—the offspring of the mingled timidity and cunning which belongs to the Asiatic character; and succeeded in obtaining a treaty of commerce, in which there was nothing unwarrantable, oppressive, or unjust,—against which, in fact, nothing could be alleged—except that we know the Japanese authorities, if left to themselves, would rather have sunk us in the ocean than have signed it. As usual with Orientals, they consented because they did not venture to refuse, resolved to make the treaty a dead letter if they could, and to discourage subsequently by every means they dared the intercourse and residence of Europeans. As usual with Englishmen, we have no tolerance for those underhand and double-faced proceedings, and insist upon the treaty being fulfilled, and upon our countrymen being well treated and respected. Of course we have a full legal right to do so. Of course, practically, when attacked or wronged, we can do nothing else. But it is a painful feature in the matter, and must always remain so, that we are conscious in our hearts that we are unwelcome visitors, and that we are there in defiance of the strongest prejudices of those who have—or had originally—the same right to say what shall be the policy of Japan, as we have to say what shall be the policy of Britain.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for the publication, but as a guarantee of good faith.

A Register is kept of the addresses of all persons connected with the Far East, and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in China, Japan, Singapore, *and other parts of the* Far East, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, THURSDAY, OCTOBER 17, 1861.

RESUSCITATION OF THE RED SEA CABLE.

The telegraphic cable, which has been for nearly three years lying at the bottom of the Red Sea, at the cost of more than half a million sterling, is now, it appears, to be rescued from its watery grave, and be converted into a thing of life. It is proposed by Sir Macdonald Stephenson, in a letter to *The Times*, which will be found in another column, to form a new company, which shall at their own risk restore the cable to a working condition, provided they be allowed the privileges bestowed on the present company in the event of their efforts succeeding. The reports lately made by Sir Charles Bright and Mr. Latimer Clark, the electric engineers, who were, as stated in our issue of the 17th July last, engaged by Government to furnish a report of the probable cost of repairing this cable, are quite favourable to the proposed plan. Their opinion has also been endorsed by Mr. Brunton, who for some time acted in the capacity of engineer to the company, and was present at the first laying of the cable, and also at the subsequent repairs. Previous, however, to the expression of these opinions Messrs. Gisborne and Forde, the Government engineers, had reported that the cable was only injured in a few sections, and, we believe, estimated the outlay for effecting the repairs at under £50,000.

We trust that the friends of Sir Macdonald Stephenson will prove staunch supporters of the speculation; and as we cannot for a moment expect that Government will offer any objection to being relieved of their present unsatisfactory outlay of the guaranteed interest on £800,000, we may assume that if the usual sureties are furnished by the proposed company, its formation may be looked for very speedily. It is imperative that the coming cool season in the Red Sea should not be lost; since, if the effort be postponed, it is probable that the cable will have become so buried in the ground that it will not bear the force requisite to lift it, and it must also be remembered that if the expedition is delayed too long it will be necessary to wait till after the monsoon. There can be no doubt thatthis plan is the only one by which we can expect to see this most important telegraphic communication re-established. It is utterly worthless and idle to propose any scheme for the present company, which has lost the confidence of the public, not by any fault of its own, but by its untoward mischances and the vacillating conduct of Government.

Notwithstanding the great interest we have ever felt in this undertaking, which has been proved by the early intelligence we have always obtained of the various stages of its progress, we shall heartily welcome the establishment of a duplicate line by the Euphrates valley, as advocated in our issue of the 17th of July. It can scarcely be expected that a length of line so great as that from Suez to Kurrachee can be at all times in working order; and since such stoppages may, as they generally do, occur at the very time when unobstructed communication is the most required, it will be surely worth while to have another route opened for telegraphic intercourse with the East. When we think of the stake we have in India, and of our increasing interests in China and Japan, it is evident that no possible effort on our part can be too great to secure a speedy communication with those countries.

OUR TROUBLES IN JAPAN.

Nothing can be more serious than the news which has lately reached us from Japan. It would be difficult to imagine any position more critical than that in which our English merchants and officials are placed by the attempted massacre at Yedo. For that act, which might have resulted in consequences the most disastrous, the Government must be held responsible, and we must show temperately, yet firmly, that the lives of British subjects cannot be lightly endangered, and that the good faith of treaties must be preserved inviolate. This is not a case in which a Consul can afford to await instructions from home. He must act with promptitude and vigour, and the ships we now have in the Japanese waters will enable Mr. Alcock to maintain the honour of his country. The show of strength does not necessarily involve the exercise of it; indeed, it very often happens that a warlike attitude is sufficient to prevent the evils of actual conflict.

A war with Japan would be a war of the most melancholy description. Much misery would be inflicted by it, and no honour would be gained. It would be easy to make the Japanese dread us, but while proving our prowess we should be adding tenfold to the strength of the Conservative party. The people generally are at present well disposed to hold intercourse with foreigners. They have sense enough to appreciate the advantages of commerce, and have no wish to be shut out, as heretofore, from communication with the Western World. But how would this feeling be changed if they suffered from the attacks of the English soldiery and saw their homes devastated and their companions slain? The justice of such severity they would not comprehend, the misery it entailed they would perfectly understand. If our Consul-General can prove in the most decisive manner that we are not to be trifled with, and can do this without having recourse to arms, he will revive much of the confidence which his recent conduct has shaken. Although the opinion we once entertained of Mr. Alcock has been materially changed by his un-English and unjust conduct in the case of Mr. Moss, and by his flight from Yedo on the murder of Mr. Heusken, we have never for a moment questioned his ability. If he fails in the present momentous crisis, his failure will not arise from feebleness of intellect or vacillation of purpose, but from a dogged obstinacy of disposition which sometimes hinders him from acting with wisdom and impartiality. Indeed, if we may credit rumours which have reached us from the Far East, it is this very obstinacy which has given rise to the recent attack, since we are told that Mr. Alcock, during his late journey, persisted in forcing his way into places from which he had been warned to keep aloof, and thereby irritated the feelings of the people.

We wish we could believe with the *Patrie* and with some English journalists, that the Government of Japan is entirely guiltless in this matter. We cannot, indeed, prove its complicity, but we know enough of the Japanese to give us the strongest grounds for suspicion. The Guards, indeed, acted like good men and true, and did all in their power to defend the foreigners, but the question still arises whether such defence would have been needful had the outrage not been encouraged or winked at by the Government of the country? It would, indeed, be a plausible excuse, if it were possible to prove that the Emperor is powerless to check or to chastise the actions of the Princes. There have been many indications that the Government of Japan, like that of some European countries, possesses the show of strength, rather than its substance, but there have been none to prove that a criminal act of such magnitude could be attempted in that country without the knowledge of its rulers. Indeed, all we know of Japan, and of the intricate system of *espionage* in vogue there, tends to the opposite conclusion.

In private life a man sometimes is unfortunate enough to have acquaintances who are continually thrusting themselves into his society, and behaving as though they were his dear friends. He knows not what to do. To quarrel with them would be unpleasant and perhaps impolitic, yet he would be heartily glad to send them to Coventry, if it were possible to do so without offence. It is possible the Government of Japan may be in the same predicament. Again and again we have had polite intimations that our presence is not desirable, and the very assurances our officials have received of friendship and protection have implied that they would be acting a wiser part if they did not rely too strongly upon them. As a great nation, however, we can afford to be magnanimous, and it would be a thousand pities if we were to fight the Japanese, by way of proving the value of commercial intercourse with them.

THE REDUCTION OF OUR FORCE AT TIEN-TSIN.

If we could rely on the good faith of the Chinese—if we could believe that with them the signing of a treaty was equivalent to keeping it—we should rejoice in the intelligence that the greater portion of our troops are about to be withdrawn from Tien-tsin. It is not in accordance with our practice as Englishmen, or with our political creed, to take advantage of the weakness of a people with whom we have been at war after friendly relations have been opened up between us. The troops have done their work, and done it well—our diplomatists, too, have done theirs. We have gained a free channel for our commerce into the heart of the Celestial Empire, and we have no just pretext for quartering troops on a soil which belongs to a friendly people. On the other hand, it is impossible to forget that the Government of China is friendly "on compulsion," that it has no faith in principles which we deem of world-wide application, and that, if it can recover some of its prestige—so much injured by the Taipings—it would not shrink from doing so at our expense. We should like to know whether Mr. Bruce is willing to be thus left without protection ; and, though we are far from agreeing with the *Army and Navy Gazette* that the Treaty of Peking is "as "much a nullity as was that of Tien-tsin," we see grave cause for apprehension in the diminution of our force at Tien-tsin during the present uncertainty of affairs.

THE MALTA-ALEXANDRIA TELEGRAPH.

England is at this moment in telegraphic communication with Suez. In another portion of our columns will be found an account of the successful issue of this magnificent undertaking. So many long submarine lines have been successfully laid, and have afterwards failed, that our announcement will probably excite less interest than it would otherwise cause. The present cable, however, is laid under the same conditions as exist with respect to the cables that connect England with the Continent, and which have for more than ten years maintained their efficiency unimpaired. The Malta-Alexandria cable is laid in a depth for the most part not exceeding 100 fathoms. The course has, moreover, been selected with especial care ; the nature of the sea bottom has been everywhere ascertained before depositing the cable upon it, and the position of the cable has been fixed by taking cross bearings with the African coast, so that when required to be lifted up for repairs, it will be found without difficulty. The electrical portion of the cable, moreover, we mean the copper wire and gutta-percha covering, are proved by the electrical tests to be in the best proportions yet adopted. These results have not been attained without a great pecuniary sacrifice. The direct distance between Malta and Alexandria is only 860 miles ; the course actually taken is about 1,250 miles, but along the route selected we shall be enabled with certainty to effect future repairs. The core of the cable was designed to work through 1,200 miles ; it will now only be required to work through 620 miles, the distance between Alexandria and Ben Ghazi, but its excellence in this respect enables very low battery power to be used, and thus any faults that may exist in it are less likely to be developed, and the core will last all the longer. This line has cost about £400,000. Between Malta and Tripoli the cable lies for about seventy miles in from 100 to 400 fathoms, and this section at present tests much the best, the pressure and cool temperature of the deeper water being highly favourable for electrical purposes. We believe, therefore, that this line will prove as successful as any of those between England and the Continent, and, indeed, that it will be much less exposed to breakages by anchors. If it succeeds, a revolution will be effected in the art of laying long submarine cables, and coast lines will come into favour. They cannot, indeed, be everywhere adopted, but India, China, and Australia can be connected by coast and shallow sea lines with this country. About £1,500,000 has been lost in the Atlantic, Mediterranean, and Red Sea lines, but a million and a half of money will not have been thrown away, if at length we have proved the practicability of submarine telegraphy, and established a means of communication more wonderful than any ever dreamt of by poet or romance writer. No great discovery has ever yet been brought to perfection, except with some loss of private fortune or public expenditure, but we firmly believe that the dark days of submarine telegraphy are over, and the efforts of its promoters will, henceforth, be crowned with complete success. We will only add that in the present instance the line will only be fully available when telegraphic communication through Italy is more efficiently administered. At present this is exceedingly defective.

THE CHINESE IN A BRITISH COLONY.

We are giving the Chinese in Australia a strange specimen of English fair play. Plodding, patient, and industrious, they have come to that colony to gain an honest livelihood, and by all accounts are as inoffensive in their habits as they are successful in their undertakings. At Melbourne the evidence of their prosperity is shown in the many public buildings which they have erected at their own cost. Altogether these peaceable people seem to have acted as uprightly in the colony as any of their Christian neighbours, yet the attempt has actually been made to exclude them by mob law. The democratic party—in every country the most opposed to true liberty of action and thought—has demanded their legal exclusion from Australia, but the rioters have not waited to test in a lawful manner the success of this insolent demand, but have attacked the Chinamen with brute violence, and set the Government of the country at defiance. For the credit of England and of Englishmen all the world over, we trust that the Chinese diggers will have justice awarded to them. Free trade is the motto which we carry with us to the Antipodes and to the Far East, and our course of conduct in China was been guided by this enlightened policy; but if we sanction or allow an attempt on our own territory, which we should without question resist if John Chinaman were the aggressor on his own soil, we shall be acting in shameless opposition to our own principles. If the Governor has not sufficient power to act with vigour in this matter it is time that the Home Government should interpose. At any cost we must show the Chinese that our practice is not at variance with our principles.

We subjoin the opinions expressed by two of our contemporaries on this subject. The *Saturday Review* writes :—

Among the various nationalities that were drawn together from all parts of the world to the Australian gold-fields, there arrived a considerable number of Chinese from Hong Kong. These people were very successful in their mining, and the reports they carried home stimulated numbers of their countrymen to follow their example. They have not shown themselves other than peaceable visitors. No crimes of theft or violence are charged against them; and they appear to follow the laborious pursuit upon which they are engaged with more than ordinary energy and skill. It is alleged against them indeed that they are dirty, and that they are immoral; and every one will feel how such failings must shock the fastidious cleanliness and virgin purity of an Australian digger. But they are also guilty of another very serious offence ; and that is, that they share with the European diggers the profits of the gold-field. Its area is limited, and therefore its average yield to each person is clearly curtailed by every addition to the number of labourers; and the European feels that his scantier profits are due to the presence of the Chinese. Which of the two offences has made the Chinese to be unsavoury in the nostrils of the European diggers is of course a moot point in the colony. The democratic papers loudly maintain that the diggers are actuated solely by a jealousy for the seventh commandment, and a high appreciation of soap and water. The papers on the other side maliciously insinuate that the exquisite sensitiveness of their modesty has been marvellously quickened by the sight of the promising "claims" which the Chinese are industriously digging. Whichever feeling preponderates, it has of late found a very practical expression. So unanimous are the miners, either in their horror of immorality or their hatred of successful rivals, that in the middle of July last, the whole of the diggers working at one of the chief gold-fields assembled together and marched upon the Chinese. The wretched strangers, even according to the reluctant testimony of the advocates of the diggers, "were treated in the most brutal manner," stripped of every shred of property, and driven in a mass, in a state of abject destitution, to a distant cattle station. Against this oppression there is no appeal for them. The utter impotence of the law in the face of any mob, which is the mark of all democratic constitutions, has been brought painfully to light. No attempt even to reinstate the Chinese in the possession of their property, or to protect them from further outrage, has been made by the Government. Probably any such vindication of the law is an impossibility. A modest attempt on the part of the authorities to arrest three of the most prominent rioters turned the whole mob furiously upon the Government. The three rioters were released, the authorities decamped, and the mob remain masters of the field. This is bad enough, but it is far from being the worst. The class from whom the Burrangong rioters are drawn are the rulers of New South Wales, and their lawless excesses are viewed with very mild disapprobation by the section of public opinion which gives law to the colony. Already it is proposed to give legal effect to the object of these outrages, and to complete by a statute what the niggers have begun with their revolvers. The democratic party have raised a cry for the legal exclusion of Chinamen from New South Wales. To that cry it is probable that the Prime Minister will not be wholly deaf. It is not, therefore, impossible that an English colony may, in the nineteenth century, retort upon the Chinese that policy of exclusion which has made them a byword among nations, and has usually been supposed to be the peculiar product of ignorance and barbarism. If this policy concerned them alone, it need excite among us no stronger feeling than curiosity. If it were being carried out at San Francisco or New York, it would merely suggest reflections upon the economical results of entrusting political mastery to an uneducated class. Assuredly, protection to native industry was never carried to such a length in the darkest feudal days. But it concerns us much more nearly than as a matter of simple speculation. England has a credit to support, which, unhappily, it is in the power of Australia to impeach. It is, even in a material point of view, a serious

Digitized by Google

loss to the nation if she is regarded as an inveterate hypocrite. Yet what other construction can be put upon our conduct, if we denounce exclusiveness at Hong Kong and practise it at Sydney—if our armies claim free immigration as the common right of all men in China, while our own Governor in Australia is repudiating it in the case of the Chinese? China happens to be the one country with which we are under engagements, implied if not express, with respect to the mutual immigration of the subjects of the two Crowns. It is earnestly to be hoped that the Queen will never be advised to consent to any measure of the Colonial Parliament which may incur the suspicion of sharp practice in this respect. The Emperor of China is not in a condition, even if he were inclined, to resent or criticise any measures we may take with respect to his emigrant subjects. But unfaithfulness to the principles which we have professed in dealing with him will not be the less disgraceful because he certainly is not able, and probably does not care, to punish it. No regard for the independence of the colonies can justify us in tolerating the dishonour of two contradictory foreign policies pursued simultaneously on behalf of the same Empire and in the name of the same Queen. Whatever the value of Australian allegiance may be to England, it certainly will not repay a slur on her good name.

The *Australian and New Zealand Gazette* says:—

The labours of the Chinese diggers on the gold fields in Victoria appear, from the quantity exported by them during the current year, to have been attended with less success than previously. To the present date 15,011oz. is the amount of their exports, against 37,000 oz. during the same period of 1860. The exports of gold by the Chinese were 86,000 oz. in 1860, against 85,500 in the previous year. It appears from the following that the Celestials by no means deserve the treatment which they have received in New South Wales, which, if matters had been reversed at Canton, would have probably occasioned a war. Sir John Bowring had less provocation. No doubt they are regarded with jealousy, but so are newly-arrived Englishmen, thanks to the despotism of trades unions; yet the most reliable accounts speak of them as hard working, patient, emigrants, despite their not very cleanly habits; but of their aptitude for trade and business there can be no doubt, for they live and flourish where the more boisterous and wasteful Anglo-Saxon would starve. We are told that the Chinese have lately made a handsome contribution to the number of the public buildings of Melbourne. In Little Bourke-street and the alleys leading from it, that peculiar people have made a city for themselves and their British-born spouses, whose numbers (according to the *Argus*) are gradually increasing; and few tradesmen seem to flourish but those who hang over their doors the mysterious characters which only Chinamen understand. In a central position in that street, Kong Meng and Co. have lately erected a court house, where disputes among Chinamen will be disposed of after their own manner and according to their own laws; it is of brick, with a front of white stone, the columns of the one story Ionic and of the other Composite. The floors are of black and white marble. There are no fire places, the Chinese having some superstition on that point; and to obviate another prejudice, the windows are not placed one above another. The building was designed at a cost of £1,733."

THE NEW STEAMERS FOR CHINA.

Messrs. Jardine, Matheson and Co.'s steamer *Reiver*, now preparing for despatch to China at Messrs. Lairds' yard, will, we understand, be followed by another one, to be built by the Messrs. Denny, of Dumbarton, on the Clyde.

Messrs. Lyall, Still and Co.'s steamer *Express*, the launch of which was noticed in a late issue, will, we understand, be shortly ready for her trial-trip, and will proceed on her voyage to Hong Kong early in December.

Messrs. Gibb, Livingston and Co.'s steamer *Celestial* will also make her trial-trip on the Thames and be despatched to China in all next month.

Messrs. Dowlzee, Norozee and Co.'s steamer, building at the yard of Messrs. Mare, of Blackwall, is quite ready, and will be launched on the first favourable state of the tide. The two steamers building at the same yard for the Bombay and China line are also in a forward state.

Messrs. Tod and MacGregor, of Greenwich, are also building a steamer, by order of Mr. Harkort, of Shanghai.

The *Airetoon Apcar* will be despatched for Calcutta in the present month, and be employed in the Calcutta and China trade.

DEATH OF THE EMPEROR OF CHINA.

The *St. Petersburg Journal* of the 8th has the following from China:—

"Advices from Peking of the 24th of August announce the death of the Bogdokan (Emperor). On the morning of that day two decrees inserted in the *Peking Journal* made known his last wishes. By the first he appointed his eldest son heir to the Celestial Empire; and by the second he adjoined to him a council of eight, composed of Zsaiyouan (I-tain-wan), Douan-Houa (Tchen-tain-wan), Louohoun, Taintou, Mou-in, Kouan-youan, Douhan, and Tsia-you-in. Prince Kung does not figure in this list. At two in the afternoon it was announced that the Bogdokan had just drawn his last breath. All business was suspended for three weeks on account of the event. The tranquillity of the capital had not been disturbed.

THE RED SEA CABLE.

The following is the letter of Sir Macdonald Stephenson alluded to in our leading article:—

(To the Editor of *The Times*.)

Sir,—I request permission to occupy a small portion of your valuable space upon a subject of great national interest—the telegraphic communication between Great Britain and India, China, and the Australasian colonies.

I shall not waste the time of your readers by discussing the past proceedings connected with the telegraph by the Red Sea, further than to state that, Her Majesty's Government having given the guarantee, and, after doubts of its validity having been raised by the law officers of the Crown, having obtained an Act of Parliament to confirm and carry out the original intention of the contracting parties, the public confidence has been so much shaken as to have materially prejudiced the original undertaking, irrespective of the injury inflicted upon it by the failure of so many sections of the cable, which might otherwise have been repaired and restored without exceeding the capital originally provided.

One result is the indisposition of Her Majesty's Government to proceed further with the undertaking as a Government question.

Now, it is impossible that this country can stand still while France, Russia, and other countries are extending their telegraphs with all the speed they can command. It is not the characteristic of Englishmen to abandon what they have once deliberately, and upon conviction, undertaken. Difficulties afford no excuse for apathy and indifference. The communication is indispensable, and practicable with due and rightly-directed exertions; and I now write with a view to apprise those of your readers who are interested in the subject that a proposal has been submitted to Her Majesty's Government by responsible persons, who are prepared to undertake the restoration of the cable without either guarantee or pecuniary assistance from the Government, and that, assuming that the matter is promptly decided, the restoration of telegraphic communication upon the eastern division of the line will probably be completed before March next.

It is assumed that so soon as Parliament meets authority will be applied for to consolidate the capital of the existing company. The most experienced electrical engineers have been consulted, and reports from Sir Charles Bright, Mr. Latimer Clark, and from Mr. Brunton, the late superintendent of the Red Sea Telegraph Company, have been received in confirmation of the grounds upon which a successful issue to the operations is expected.

The results, if successful, are of so great importance that the policy of using every exertion to accomplish the object will scarcely be questioned, and the plans proposed of repairing the eastern division first will allow of the experiment being tried with the least cost, while the completion of the through communication will afterwards be effected by the use of land lines on a great portion of the Egyptian and Abyssinian coast. The possession of alternative lines by Asiatic Turkey and the Red Sea will alone render the country independent of all contingencies.

I have to apologise for trespassing upon your valuable space; but, believing that the subject is one of sufficient public interest to excuse it, I have only to add my conviction that if prompt measures are taken the public will within a very few months receive daily telegrams from all parts of India.

I am, sir, your obedient servant,

Macdonald Stephenson.

SUTTEE IN CHINA.

We extract the following article from a recent number of *All the Year Round*:—

"The Indian suttee, or voluntary sacrifice of a living wife by burning on one pyre with the corpse of her husband, is abolished throughout the British dominions, and is supposed to be rare in the outlying provinces. The act of self-immolation was often most determined. Of one widow it is said that she not only set at nought all admonitions to relent from her purpose, but that she put a finger into the fire and held it there for some time as a proof of fortitude; also, that she took up some of the fire with one hand, to place it in the other, where she held it while she sprinkled incense on it to fumigate the attendant Brahmins. We have all heard of the custom of suttee, while the existence of a similar practice in China is almost unknown in England, unknown even to many Englishmen in China who have resided there for years. Of such a scene of public self-immolation by a Chinese widow, I, writing now at Foo-chow-Foo in the month of January, eighteen hundred and sixty-one, was a few days ago an eye-witness.

"The Chinese suttee, when it occurs, is the self-sacrifice of widows, who are also orphans and childless; who consider themselves useless, and, as it were, lost in the world; and who seek death, not only as a means to show their affection for the deceased husband, but of escape from the evils of a very wretched and isolated position. It is commonly a suicide of the desperate, put forth as a public and glorious act of devotion. Highly praised by Chinese moralists, both ancient and modern, many instances of this kind of solemn self-destruction are recorded in history and romance, though of late years there has been scant resort to it in practice.

"The first notification I had of what was about to take place was the parading of a handsome wedding chair about that suburb of the provincial capital in which our foreign settlement is situated. The chair was accompanied by all the pomps and gaieties of a wedding—music, gay streamers, and so forth. There was, however, one thing most unusual in this procession. The occupant of the chair was exposed to public gaze, instead of being, as in weddings is invariably the case, closely screened. On making inquiry among our Chinese servants as to what this extraordinary departure from established customs might portend, I was informed that the lady was no bride, but a disconsolate widow, recently bereaved, who was determined upon following her husband to the unknown world, where she might serve and wait upon him as became his dutiful and loving wife. Having accordingly made known her intention to her friends, and having fixed the day for her departure, she was now taking leave of all she knew, and parading the streets as a pattern to her sex. The object of her death

Digitized by Google

being to rejoin her husband, the ceremony was a sort of wedding; she was arrayed and adorned as a bride, and seated in a wedding chair.

"I ascertained the time and place appointed for the closing ceremony, and on the morning of Wednesday, the 16th of January, proceeded, accompanied by two friends, to a spot some four miles distant from Nantae, the seat of the foreign settlement and southern suburb of Foo-chow-Foo.

"Everybody we passed appeared as well acquainted with the object of our journey as we ourselves were. As we approached the scene of action we found ourselves in a stream of people, chiefly women and girls, the greater part of whom were small footed, and were hobbling along leaning one against another for support, or assisting their tottering footsteps by means of the shoulders of dutiful sons or brothers.

"We arrived only just in time to see the chair of the victim carried on the ground, and herself ascend the scaffold which had been prepared for her. The chair was the bridal chair in which she had been carried about the streets; and the scaffold consisted of two stages, one raised a few feet from the ground, and the other about a foot higher. The whole was covered with a dark cloth canopy, supported by a framework of bamboos, within which was set a gallows of one very thick cross piece of bamboo, fastened at either end to a strong upright pole. From this bamboo, under the canopy, and exactly in the middle of the scaffold, hung the fatal rope, covered with a red silk napkin; beneath it was set a chair, to enable the devotee to reach the noose. On the lower platform, was a table of choice meats and vegetables, at which she was to take her last meal in the land of the living. The table was surrounded by the woman's friends, dressed in holiday costumes, and wearing the red cap of Chinese officials. In former times it was the custom for two district magistrates to be in attendance on all these occasions; but since the higher authorities were hoaxed, some years ago, by a lady whose courage failed her at the last moment, they have refused to be present at such exhibitions, and now despatch an inferior officer to superintend the arrangements.

"The scaffold was raised in the midst of a large expanse of fields, at the time lying fallow, and was surrounded by a crowd numbering some thousands. Benches from which a better view could be had were so much in demand, that we were obliged to pay a dollar (four and ninepence) before we could obtain one for myself and another for my companion; I use the singular number, because we had lost the third member of our party in the crowd.

"The chief actress in this extraordinary scene appeared at first to be far less excited than any one in the vast concourse assembled. She was dressed in red bridal robes, richly embroidered with coloured silk, and her head was adorned with a handsome gilt coronet. Her decidedly plain ace betrayed not the slightest emotion, and she sat down at the table with as much apparent good will as if it had been her bridal, rather than her funeral, feast. While she was eating we made some inquiries among the crowd, and ascertained, in addition to the fact of her being childless, that she was twenty-five years of age, and that her only surviving relations were a brother in poor circumstances, and his infant child, her nephew. We were further informed that she had resided in a village which was pointed out to us at a little distance from the spot.

"After the lapse of about half an hour, the poor woman having apparently satisfied her appetite, rose from her seat, and, still standing on the lower platform, addressed the surrounding crowd in a set speech, thanking them for their attendance, and explaining why she acted as she did. When she had finished speaking, she took from a bowl on the table, several handfuls of uncooked rice, which she scattered among the crowd, and eager was the scramble to get a few grains as her virtuous blessing. This done, she fondled her baby nephew, and bade an affectionate farewell to her brother, who stood by her on the scaffold; then, stepping upon the upper stage of the platform, she bowed gracefully to the surrounding multitude, and addressed to them a few last words. It struck me at this moment that she might be under the influence of opium, for her laughing countenance and rapid gestures were too highly excited to be natural, except under the influence of some such stimulants. It is right to add that the gaiety was clearly not assumed.

"She was helped to mount the high chair placed under the rope, but the rope proving to be still beyond her reach, her brother stepped forward and held her up in his arms, while she with her own hands passed the fatal noose over her head and adjusted the cruel slip-knot to the back of her neck. The red silk napkin was then placed over her face, and a handkerchief fastened to her right hand. At a signal given by herself, her brother stepped back and left her suspended in mid-air. She then, shaking her joined hands before her breast, "chin-chinned" the crowd: her own weight causing her to turn round and round, so that persons on all sides received her parting salutations. The spectators had, up to the fatal moment, been laughing anc chattering, as if assembled at a village fair, but now here was perfect stillness, as every ear was strained and every eye intent. In two or three minutes the action of the hands, at first decided and regular, grew weaker and weaker, and finally ceased altogether; then followed a convulsive shudder of the tiny feet and all was over.

"It is worthy of note that, although the greater part of those present were, as I have said, females, yet the only sense of pity or dread that I saw shown in any way, was on the part of one of three Canton women who stood near us, and whose dress and manner showed but too plainly the position they held in Foo-Chow. At the moment the victim was left to herself on the rope, this girl, unable to endure the sight, crouched on the ground, and buried her face in her handkerchief; while others, holding respected stations in society, were tearless and unmoved.

"As to the real nature of this dreadful transaction, I cannot help looking upon it rather as an act of determined suicide than as an instance of extraordinary and superstitious devotion. The woman was evidently in a low station of life, and on the death of her husband was left absolutely destitute and unprotected. Her small feet would prevent her from gaining a living by field labour, or any work of a like nature, while her unprepossessing face left her no chance of being purchased into the harem of any man of wealth. In England, a country abounding with the rich and generous, and furnished with a poor law, such a desolate condition would be bad enough; but in China, where the wounded deer is invariably either driven from the herd, or gored to death, it is far more miserable. The choice lay between abject life as a drudge, and triumphant death as a saint—and the woman preferred the latter."

A NARRATIVE OF THE OUTRAGE IN JAPAN.

The following letter relative to the recent outrage in Japan is written by Mr. Wirgman, the special artist of the *Illustrated London News*, and addressed to the editor of that journal:—

"Yokuhama, July 11.

"I thought to have been enabled to send you by this mail some interesting sketches from the interior of Japan, having come to this place overland from Nagasaki, but serious events have occurred at Jeddo, and I therefore hasten to send you a slight account of what took place.

"We had only been in Jeddo two days, fatigued with our month's trip, when, having retired to rest about half-past ten P.M., we were awoke by loud and repeated knockings at the front door. Thinking there was a fire, or some slight disturbance, we at first took no notice of the noise, but in a short time the knocking became so loud as to resemble discharges of musketry, and the shuffling of feet and rushing about aroused us thoroughly. Presently two pistol shots were heard, and Messrs. Oliphant and Morrison appeared deluged with blood. The assassins were in the house, and, with the exception of Mr. Morrison, no one of us had firearms ready. After a brief pause there was a renewal of the uproar, accompanied by smashing of glass and breaking of wood. The assassins were in the next apartment, we being in Mr. Alcock's room. By this time our guns were loaded. The yacunins now fell upon the marauders, and a great fight took place in the extensive gardens and avenue leading to the river, the watchmen striking their two bits of wood in rapid time. The yacunins rushed into our apartment with lanterns and drawn swords, saying 'Nipon yacunin!' to let us know them. Japanese soldiers with muskets and fixed bayonets also entered and went into the garden, where they piled arms. Lanterns appeared in all directions, and bonfires were made. The garden and park looked like a scene in a play. The fine, soldierlike Japanese guard being seen in dim outline grouped in different directions, before us a sheet of water reflecting fires, lanterns, and men, was a scene never to be forgotten, and even at the moment filled me with admiration. There was another alarm, and at the sound of the watchman's rattle the squatting groups jumped up, and we stood to our arms. A yacunin and several soldiers rushed in out of breath and spotted with blood; another assassin had been caught; five of them were dead, and seven severely wounded. We listened anxiously to every sound. We could not walk two steps without four or five yacunins following us to protect us. Search was made round the house for hidden assassins. Mr. Alcock was just going to sit in his easy-chair when a pool of blood in the seat was pointed out to him; Mr. Oliphant lay on the floor, with a mosquito-net over him, faint, and weak from loss of blood; Mr. Morrison's wound was only slight - a cut in the forehead; he stood with his sword in one hand and a revolver in the other. So passed the night. Two of the gentlemen lived in a little house further up the hill; we were very anxious about them, but gratified by seeing them join us safe and sound; they had not been disturbed. In the morning we went round to see the grounds; they were filled with troops, and the wildest-looking watchmen or policemen I ever saw, in all kinds of groups, on the grass; whilst here and there lay a ghastly mangled human form, one or two with their heads cut almost in two. The yacunins fought like tigers for us, and deserve all praise. Mr. Alcock and M. de Bellecour went round to see the wounded yacunins. One had died; the others were cut about, but seemed quite cheerful, and gracefully bowed to Mr. Alcock and M. de Bellecour in return for his thanks to them. They showed us their wounds and their notched swords, a sign that it was no child's play. One of them had a chain-mail fillet cut in two on his head. The shaven-headed doctors were scientifically attending them, binding and bathing their wounds. How proudly the unwounded walked—in regular swash buckler style, hand on the hilt of the sword, head erect, and eyes sparkling! All the officers wear knickerbockers on these occasions. Early in the morning a courier was despatched for the *Ringdove*, which vessel came up, bringing us a guard of marines and Frenchmen. The ministers (Japanese) came at five in the morning, but did not get an audience till twelve o'clock at noon. Seven or eight of our yacunins were wounded. Three of the loonins committed suicide at Sinagawa next day, and another has been caught since, but nothing certain is known as to who sent them. Prince Mito is reported to be the man, and the reason for their attacking only the British Legation is said to be, not from any dislike to foreigners, but to involve the present Japanese Government in a war with England; for Mito was always trying to upset the present rulers, even before foreigners came."

General Peel on the late War in China.—At the annual meeting of the Huntingdonshire Agricultural Society, held on the 15th inst., General Peel, in referring to the late war in China, and to the Commander of the British Forces, observed that there never was any war which reflected greater credit on every one connected with its management. The organisation, the equipment, the arrangements made for the comfort of the troops were really excellent. The appointment of Sir Hope Grant to the command of that army showed that his Royal Highness the Commander-in Chief had attentively watched the operations of that gallant officer in India and that success—and in such cases success is perhaps the least test of merit—which attended those movements. In China Sir Hope Grant gave the most complete proof that he possessed that talent which he had previously shown in India.

We regret that we have to announce the death of Lieutenant James H. Whitshed, in command of Her Majesty's gunvessel *Leven*, which vessel had been employed in the Surveying Service, who died on the 21st of June last at Simonoseki, Japan, after an illness of two days only.

Captain W. Burwood Baldry, master of the ship *Shantung*, has been charged with the wilful murder of a seaman on the homeward voyage. The inquiry is not yet concluded.

In strange contradiction to the news which reached us by the last China Mail, the *Preussische Zeitung* of Sept. 29 states that—"The latest reports received from the Prussian Minister at Tien-tsin relative to the negotiations for the conclusion of a treaty of commerce between Prussia and China permit the hope of a speedy and favourable result."

Sir John Bowring, it is said, is engaged on an autobiography.

THE ARMSTRONG GUN.

A long article on the defects of the Armstrong gun has appeared in the *Mechanics' Magazine*. We subjoin the following paragraphs, premising that some of the deficiencies alluded to as having been manifest in China were pointed out at the time by our correspondent at Tien tsin (see *London and China Telegraph*, November 13th, 1860). :—"On information received, we suppose from the departments, the Under-Secretary of War, Mr. Baring, stated in the House of Commons that our information relative to the failure of the Armstrong gun in China and elsewhere was not founded on facts, and that the despatches to which we alluded had not been received by the War Department. What will Mr. Baring's successor say now in palliation of his statements? Not only have recent events fully demonstrated the rectitude of our statements, but they have placed the defects of the Armstrong gun in still more prominent colours. After much urging, and at the request of the Admiralty, the War Department at last consented that the larger size Armstrong gun should be put to something like a severe trial. For this purpose a certain number of 40-pounders and 100-pounders were placed on board the *Trusty* and *Excellent*, and other guns were forwarded to Shoeburyness and Woolwich marshes for trials of rapid firing. Our readers must understand the significance of the phrase—rapid firing. Heavy artillery, if fired with deliberation, so that the gun never becomes heated, and every care of skilled artificers be taken, is the one condition under which the Armstrong gun has been tried. But the effect of rapid firing—that is, as rapid as the necessities of actual warfare demand—is very different. In the latter case heat is rapidly transmitted to the mass of the gun, the delicate screw arrangements and breech-pieces (or the 'gimcrackery,' as Sir William Armstrong termed them at one of the meetings of the Institution of Civil Engineers) no longer fit the one into the other, and the consequence is that an enormous escape of gas takes place invariably before the twentieth round, and the gun is rendered *hors de combat* before the thirtieth shot. During the experiments on board the *Trusty* with Captain Cole's circular shield, no less than nine vent-pieces were destroyed from one gun, and the gun, as a matter of course, was rendered unserviceable until repaired by skilful artificers. Under the direction of the Select Committee the heavy Armstrong gun has recently been tested by rapid firing, and similar disastrous results were obtained. As many as four vent-pieces were destroyed from one gun during 50 rounds; and the time consumed in firing these 50 rounds, with the assistance of skilled artificers, was something like eight hours. Facts like these require little or no comment. We beg to draw attention once more to another point of the Armstrong system. We have on several occasions alluded to the principle in the construction of the shot and shell. We have shown that by a delightfully ingenious arrangement every projectile was nothing more or less than a voltaic pile. Mark the result! On the arsenal wharf at Woolwich are stored some 40,000 shells. These are the products of the Elswick and Woolwich establishments, and they have never yet left the Woolwich stores. Let any gentleman possessing the slightest chymical or mechanical knowledge examine these shells, and he will find the lead exfoliating from the iron, demonstrating that this description of projectile can neither be kept in store, nor transported without essential injury, nor used over troops without serious danger of casualties arising as they did in China." In a leader on this subject, the *Times* says:—"For the last year or two we have been accustomed to think that we have the most formidable artillery in the world. If this gun, in short, is substantially a failure, not only have we sacrificed a vast amount of money, but an important element of our national strength will suddenly disappear. These considerations, however, only make it the more incumbent upon us to investigate the facts without hesitation or delay. We cannot mend the matter by evading the question or postponing the inquiry. On the contrary, if we shut our eyes to doubt we shall be worse off than ever. By resolutely grappling with the case we shall gain one of two advantages. If the gun should be found really effective and valuable in spite of all said against it, we shall recover our confidence; if it should be found untrustworthy, we can at once look about for a substitute."

SMUGGLING ON BOARD THE P. AND O. CO.'S STEAMER "DELTA."

A very large seizure of tobacco was made on the 13th inst., on board the Peninsular and Oriental Company's steamship *Delta*, lying in the graving-dock, Southampton. The *Delta* arrived on Thursday from Alexandria, and the whole of her cargo, &c., having been disembarked, the vessel was freed from Custom-house surveillance, and taken into the graving-dock on Saturday, to have her bottom cleaned. It appears, however, that information was subsequently given in some quarter which induced one of the Custom-house officers, named West, to go on board the *Delta* on the 13th instant, and his visit resulted in the discovery of no less than 206 lb. weight (1¾ cwt. 10lb.) of manufactured tobacco and a box of cigars. The contraband goods were stowed away in a hollow iron beam in the engine-room, access to which is obtained by a manhole door, and the officer, West, who borrowed the necessary implement from the *Atalanta* steamer, went direct to the spot, and on unscrewing the iron plates the booty was found. The tobacco was all done up in pound parcels. The ship is, of course, at present under seizure, and all the engineers have been suspended by the company. Five of the engineers and three others of the crew who had access to the engine-room (including the engineers' storekeeper and the leading stoker), were taken into custody, placed on the 14th at the bar of the borough police-court, and remanded to await further instructions from the Board of Customs. The whole of the men engaged in that portion of the ship where the tobacco was secreted are liable, unless the offender or offenders are discovered, to a penalty of £100 each. Three of the firemen lately employed in the *Delta*, but who have been *non est* for the last day or two, sent in a written letter on the 14th stating that the tobacco belonged to them, and that a desire to free their employers from any blame and their comrades from unjust punishment induced them to volunteer the confession; but, as they failed to substantiate the truth of their assertion by their personal presence, to incur the penalties of the law, the "confession" is looked upon as a *ruse*, concocted with a view to evade the law.

FISH AND FISHERIES IN CHINA.

A gentleman sent to China on an agricultural mission by the French Government, M. Eugene Simon, has made a valuable report on the fish and fisheries of that country, and has also despatched specimens of several kinds which he thinks capable of being bred in Europe. He speaks of these in the highest terms, and says that it would not be difficult to select forty or fifty species worthy of observation. Amongst others is the Lo-in, or king of fish, classed as Crenilabrus by Dr. Bridgman, measuring sometimes six or seven feet in length, weighing from 50lbs. to 200lbs., or even more. and said to be equal to the famous salmon of the Rhine. Then come the Lien-in-wang and the Kan-in, almost as good, and even larger in size than the other; the Li-in, finer than any carp in Europe, and weighing sometimes 30lbs.; and the Ki-in, or Tsi-in, which does not weigh more than 10 or 12lbs. or so, and is the finest and most delicate of all in flavour, partaking at once of the characteristics of the trout and sole. M. Simon also speaks of the immense care which the Chinese in former times paid to the embankment of their rivers, the directing of their course through mountains and along plains, and in the formation of immense lakes, in which millions of fish find refuge from all but omnivorous man.

THE FAR EAST AT THE GREAT EXHIBITION.

We copy the following from a contemporary:—"Hong Kong, as a British colony, has been invited to send products to the Colonial Department, and a commission consisting of the leading merchants has been appointed. The Hong Kong collection will, however, be thrown into the shade by the contents of the Chinese court, which will astonish the outer barbarians. At the Exhibition of 1851 China was poorly represented, at that of 1862 the resources and industry of the great empire will be illustrated by a magnificent collection of natural and manufactured articles. General Stavely has promised to contribute some of the choicest 'loot' from the Imperial palace at Peking; and other collectors of Chinese curiosities have offered to send in valuable specimens of porcelain, silken carpets, and ivory carvings. The Japanese Court will be another centre of attraction in Captain Fowke's building. It will contain the presents received by Her Majesty from the Tycoon, and a grand assortment of Japanese products and manufactures, got together by Mr. Alcock, the British Consul. From the Sandwich Islands the Commissioners expect to receive a good collection, which will illustrate the newly-developed civilisation of the natives."

MR. LAWRENCE OLIPHANT.

The *Critic* states that Mr. Lawrence Oliphant, our secretary of legation in Japan, is on his return home from that country, invalided, through the injuries received in the murderous attack made on him by the band of assassins at Yedo, on the night of the 5th of July last. Mr. Oliphant had been only one short week in Japan when, on the occasion referred to, he received two serious wounds, one on the right shoulder and the other on the left wrist. The latter, it is feared, will deprive him of the use of his left hand.

ART AT PEKING.

Among the booty taken by French soldiers at Peking was a valuable and curious work of art—viz., a figure of a camel in solid silver, nearly 20 inches high, bearing on its back a clock, and its hump being decorated with rubies, emeralds, and other precious stones. The statuette, on which the word "London" is engraved, is in the possession of a non-commissioned officer of the 101st Regiment, who, the *Toulonnais* states, has refused 70,000f. for it.

DEATH OF CAPTAIN G. T. H. ATCHISON.

Captain George T. Horton Atchison, whose death is announced as having taken place at Tien-tsin, China, of small-pox, had seen eleven years service, and had served in the Chinese campaign of 1860, including the action of Sinho, the taking of Tong-hoo, and the storm and capture of the inner Taku fort. His commissions bore date—ensign, October 25, 1850; lieutenant, June 6, 1854; captain, September 17, 1858. The deceased was in his 28th year, and was deputy-assistant-quartermaster-general of the 67th foot.

The Queen has been pleased to approve of Mr. Johann Knus as Consul at Penang for His Majesty the King of Prussia.

Mr. Barnett Meyers, of Tooley-street, is preparing a collection, which promises to be unique in its way, of canes from China, Japan, and the Eastern Archipelago, for the Great Exhibition.

Naval and Military.

The *Chesapeake*, Rear-Admiral Jones, arrived at Portsmouth from Hong Kong on the 3rd inst., and will be paid off in the usual course.

The new General Hospital at Woolwich is, by Her Majesty's command, to be called the "Herbert Hospital," in honour of the late Secretary of State for War.

The sailing frigate *Cambrian*, 40, Commodore James J. M'Cleverty, from the East Indies and China station, arrived at Plymouth on the 11th inst., and was inspected in the Sound on the following day by Rear-Admiral Robert S. Smart, of the Channel Fleet, and a gunnery lieutenant of the *Cambridge*. The crew of the *Cambrian* were exercised at quarters and at target practice. On the 14th the frigate went into Hamoaze, where she will be dismantled and her crew paid off. The *Cambrian* was commissioned at Plymouth in 1857. Off the Azores, on the 1st inst., her maintopmast-yard was carried away in a heavy gale.

The following changes of stations, &c., have recently taken place in the Royal Engineer corps.—Colonels: Renwick, to the Cape of Good Hope, and Hadden, to Ceylon. Lieutenant-Colonels: Whittingham, ordered from Canada to Jamaica; Robertson, to Canada; Browne, C.B., from leave, returned to head-quarters, as field officer for military discipline; and Graham, from Chatham to Shorncliff. Captains: Pasley, removed to Gravesend, to relieve Captain Mare, now on sick leave; Pelley, from Gibraltar to Sandhurst; Fyers, from Chatham to Malta; Drake, from Malta to Devonport; Hawthorn, from Chatham to Gibraltar; Kerr, to Bermuda, to command the 26th Company; and

Digitized by Google

Malcolm, ordered home from China. Lieutenants: Jones, ordered to Malta; Engledue, from Gravesend to the Cape of Good Hope; Salmond, from Chatham to Gibraltar; Campbell, from Chatham to Malta; Tarbet, from Chatham to Shorncliff; Mackenzie, from London district to Dover; Vetch, from Shorncliff, and Peters, from Portsmouth, to headquarters; Sanford, from leave, to Guernsey; Courtney, ordered home from China; and Smith, from the Cape of Good Hope.

Lieutenant C. R. King, 50th Regiment, has been appointed aide-de-camp to Sir C. Macarthy, Governor of Ceylon, in succession to Lieutenant Prinsep, of the Bengal army. Lieutenant D. Seymour, 1st battalion 12th Regiment, has been appointed aide-de-camp to Sir George F. Bowen, Governor of Queensland. Lieutenant M. C. Saunders, 1st battalion 12th Regiment, has succeeded Assistant-Commissary-General Maule as aide-de-camp to Sir Henry Young, Governor of Tasmania.

The construction of the *Royal Oak*, the first of the iron-plated wooden 51-gun screw frigates, several of which are building at the various Royal dockyards, is making rapid progress at Chatham. In the course of a few days the vessel will be entirely framed and ready for planking. Although nominally only a 51-gun frigate she is considerably longer than many of our modern line-of-battle 91-gun screw steamers.

The following sailing vessels belonging to the reserve at Chatham have been ordered by the Admiralty to be sold:—The Cleopatra, 26 guns, 918 tons; the Vestal, 26, 913 tons; the Tyne, 26, 600 tons; the Volage, 26, 516 tons; the Daphne, 18, 725 tons; the Fantome, 16, 483 tons; the Childers, 16, 385 tons; the Comus, 14, 462 tons; the Electra, 14, 462 tons; the Despatch, 12, 483 tons; the Kangaroo, 12, 483 tons; the Frolic, 12, 509 tons; the Arab, 12, 481 tons; the Daring, 12, 426 tons; the Elk, 12, 484 tons; and the Mariner, 12, 481 tons. By direction of the Admiralty a careful survey and estimate of the value of each of the above vessels has been made.

Stores and ammunition are in course of shipment by Government, by the following vessels:—The Pride of the Ocean, 1,169 tons, and the Fairlie, 755 tons, for Bombay; the Star Queen, 769 tons, for Hong Kong; the Damietta, 265 tons, for St. Helena; the Witch of the Seas, 343 tons, for the Cape of Good Hope; and the Mutlah, 313 tons, for Algoa Bay.

The line-of-battle screw steamer *Bombay*, 81, 400-horse power, returned to her moorings at Folly Point, Chatham, after making a two days' trial trip for the purpose of testing her engines and machinery. The *Bombay* was built a few years ago for the Government at Bombay, and before her alteration to a screw steamer was one of the finest line-of-battle sailing ships of her rating afloat. On being converted into a screw steamer at Chatham she was lengthened about 50 feet, and fitted with a pair of 400-horse power engines. During the run the number of revolutions made per minute by the screw, with all the boilers at work, was 64, and at half-power 42; the draught of water forward was 20 feet 2 inches, and aft 16 feet 6 inches; the average rate of speed during the trial being 10·19 knots.

The *Wellesley*, 72, flagship at Chatham, having been ordered by the Admiralty to be used as a training ship for boys and lads entered for the navy, is to have her present sea-going rigging removed, and to be jury-rigged. About 150 lads have been already transferred to her from the various ships lying at Chatham and Sheerness, and as fast as boys enter at either of those ports they will be sent on board for training. The system of entering what are termed novices for the navy is to be discontinued, experience having demonstrated that boys below a certain age invariably make the best seamen.

The screw steam-corvette *Orestes*, 21, at Plymouth, is ready to leave for the Cape of Good Hope on the arrival of the gunboat *Handy*, which she escorts to Sierra Leone.

Lieut.-Col. Sir H. M. Havelock, son of the General, has arrived at Aldershot and entered on his duties as Deputy-Assistant-Adjutant-General of the division, in the room of Major Nugent, who has been appointed Assistant-Quartermaster-General in Nova Scotia. Sir Henry Havelock, who entered the army in 1846, is in his 33rd year.

Notice is given that the distribution of the amount awarded for the destruction of pirates in the China seas on the 25th of February, 1858, by the *Algerine* and two boats of the *Calcutta*, and of the proceeds received and of the tonnage bounty awarded for the barque *Constancia*, captured on the 15th of August, 1830, by the *Alecto*, will commence on Monday, the 7th of October, 1861, in the Prize Branch of the Department of the "Accountant-General of the Navy, Admiralty, Somerset-house."

Orders have been at length received at Portsmouth to break up and remove the ruins of the *Meteor*, floating battery, from No. 2 dock at that port.

The *Warrior*, 40, screw, Captain the Hon. A. A. Cochrane, C.B., will not make her trial at the measured mile in Stokes Bay at so early a date as was originally determined on—Thursday. The exact time has not yet been fixed.

The *Chanticleer*, 17, screw, completed her official trials under the supervision of the officers of the Reserve and Engineering departments at Portsmouth on Thursday. On her trial she drew 11 feet water aft, and 13 feet 6 inches forward. The engines attained 90 revolutions, the load on the valve being 20 lb., the pressure on the gauge, 22 lb., and the vacuum, 25·5. The mean speed of the vessel in knots was 11·28.

A further order has been issued by Major-General Eyre, commanding the troops at Chatham, on the subject of the officers of the garrison appearing in public in private clothes. Major-General Eyre has given the most stringent orders to the various officers commanding that, under no circumstances—excepting in the cases of going on a journey—are officers to appear in public dressed in private clothes without the especial leave of their commanding officer.

THE TROOPS AT TIEN-TSIN.—We (*Army and Navy Gazette*) stated some little time back that the force at Tien-tsiu would be reduced to two European regiment The Indian forces move immediately. They obtain Indian pay and allowances, and of course the Europeans must be placed on an equality. It is said, however that when the Indian detachments leave, the Europeans will be deprived of a large portion of their present emoluments, a proceeding not very fair or dignified on the part of the authorities. We cannot regard the withdrawal of the troops with feelings other than those of uneasiness. Our private accounts from China are of a very unsatisfactory character. Mr. Bruce is in fear of his life at the capital, and, despite all assertion to the contrary, the treaty of Peking is as much a nullity as was that of Tien-tsin. We now hear of the death of the Emperor, and whispers that the Chinese are disposed to disavow the whole of the arrangements so hurriedly made with Lord Elgin in 1860. It seems a very difficult condition of affairs to deal with; and sending away our troops, the only kind of ambassadors apparently respected by this inscrutable people, does not wear the aspect of wisdom.

Monetary and Commercial.

COMPLETION OF THE MALTA AND ALEXANDRIA CABLE.

Intelligence has been received of the completion of this important undertaking, full particulars of which will be found in another column. The whole length of this line is 1,300 miles, having intermediate stations at Tripoli and Benghazi. Arrangements are now nearly completed for working this line, and it is expected it will be open to the public by the end of October, when communication with India and China will be expedited thirteen days.

A new City and Provincial Bank has been proposed on the "limited liability" principle, and it is rumoured that Mr. Robinson, a director, and Mr. Costerton, late manager at Hong Kong of the Chartered Bank of India, London, and China, have joined the direction.

The large supply of Mexican dollars by the last packet have been sold at 4s. 11¼d. per ounce, showing a rise of ¼d. compared with the price obtained for the previous supply. In the interval, however, higher rates have been current. The bar silver has been sold at 60¾.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of August, and the eight months ending with August, show less decline in our exports than the wretched state of the American trade would lead us to expect. The exports for the month of August, and for the eight months ending 31st August, are valued as follows:—

August.			Eight months ending 31st August.		
1859	1860	1861	1859	1860	1861
£	£	£	£	£	£
12,117,275	13,535,205	12,337,441	86,405,885	88,077,892	82,575,126

whence it appears that we are exporting just now rather more than at the same period of 1859, though less than last year,—and that even for the whole eight months our exports have only fallen off by four millions sterling as compared with 1859,—or not five per cent. This is really but very trifling, considering the enormous loss on our American trade, which is reduced by the tariff and political calamities to less than half its usual proportions.

What the loss on our American trade is will be seen by the following table, which gives the comparison of the articles exported to the United States during the eight corresponding months:—

VALUE of EXPORTS to the UNITED STATES in the Eight Months ending August 31.

	1859.	1860.	1861.
Beer and ale	£66,470	£68,506	£24,778
Coals	127,399	134,016	179,162
Cottons	2,454,211	2,472,441	1,051,235
Earthenware and porcelain	401 000	443,899	183,245
Haberdashery and millinery	1,132,633	1,004,360	520,993
Hardwares and cutlery	771,367	664,637	402,789
Linens	1,317,760	1,147,942	451,761
Metals—Iron—Pig	186,099	137,035	78 706
Bar, bolt, and rod	594,149	466,217	142,176
Railway of all kinds	659,489	579,090	164,919
Cast	14,863	15,801	9,040
Wrought, of all kinds	326,828	314.680	118,074
Steel, unwrought	335,068	384,489	201,734
Copper—Sheets and nails	96.448	38,901	8,188
Lead	49,867	58,955	1,451
Tin plates	847,251	734,295	255,865
Oil seed	118,530	68,597	1,620
Salt	51,029	64,806	54,166
Silk stuffs	190,001	94.574	78,516
Other silk articles	119,955	85,793	22,545
Soda	405,752	349,549	131,269
Spirits (British)	42,569	47,132	12,070
Woollens:—Cloths of all kinds	540,558	487,809	244,715
Mixed stuffs	1,630,594	1,405,375	584,362
Worsted stuffs	992,484	764,206	351,663
Totals	£13,472,374	£12,033,105	£5,275,042

It is remarkable that, while the exports have fallen off steadily throughout the year, the imports still continue to exceed in value those of previous years. Even for the month of July (the last for which the imports are valued), the imports

Digitized by Google

exceed those of the same month in preceding years. While America is taking so much less than usual of our goods, we have been taking much more than usual of her grain, and this was even the case as late as the month of July. The enumerated imports, forming about 80 per cent. of the whole imports, are valued thus :—

Month of July.			Seven Months ending 31st July.		
1859	1860	1861	1859	1860	1861
£	£	£	£	£	£
15,551,616	15,200,442	17,748,952	76,367,158	90,569,648	100,015,301

The Bank of France has raised its rate of discount from 5½ per cent., at which it was fixed on the 26th ult., to 6. The movement admits of a very simple explanation. France is being pressed upon by the same kind of influence from which we ourselves suffered so much during the past season—namely, a very deficient harvest, and a consequent drain of gold. It is a peculiarity of the present occasion, however, that not a little of the gold which has left the French Bank has come over to this country. Very probably it may become necessary for us hereafter to import a good deal of grain to make up for what we are now parting with to satisfy the more pressing requirements of France, but, for the time the influx of gold from this source has contributed to the plethora of money witnessed here. From the same cause the exchanges with France and other continental parts remain firm, notwithstanding the natural tendency of capital to flow to the market where it commands, relatively, a price so much higher. It is somewhat remarkable under these circumstances to observe the unchecked flow of gold into the Bank of England.

On the extreme pressure of money in Paris the *Economist* says :—

"In the opinion of many persons of authority, it indicates that the commercial crisis which has been long foreseen in this country, owing to the scarcity of the harvest, the terrible falling off in trade caused by the civil war in America, the exaggerated building speculations in Paris, and other causes of minor importance—it is considered to indicate, I say, that the crisis has commenced, and that the belief of those best able to form a judgment on the matter is that it will be extremely serious. Already, indeed, are a considerable portion of the silkweavers of Lyons out of work, and the municipality has to grant funds for establishing *ateliers* to prlieve them—a disguised way of giving them charity; whilst the high reice of cotton must needs produce a certain degree of stagnation at Rouen, Lyons, Mulhouse, and other manufacturing towns."

It has been announced that the dividend and bonus of the Oriental Bank Corporation for the half-year ended the 30th of June last will be 7 per cent., payable, free of Income-tax, on the 1st proximo. The meeting of shareholders takes place on the 29th inst.

The directors of the Oriental Bank have appointed Mr. Patrick Campbell, late their manager in China, to succeed Mr. Riach, deceased, as sub-manager in London.

It appears that the shipments of cotton from Liverpool to the United States amounted during the p st month to 3,703 bales, of which the whole were American, except 321 bales East Indian. The principal portion was conveyed in steamers.

The mercantile advices from New York are exceedingly gloomy, because, although money is easy and the rate of exchange continues supported, the general business depression remains unrelieved. A number of commercial houses are gradually winding up, and every now and then a failure of importance is announced, though it is really surprising to find that they are not much more frequent. Among recent casualties of this description was that of Messrs. Moore and Co., dry goods merchants, a respectable house, with extensive engagements, but it was hoped that at least a favourable dividend would be secured.

On the 1st inst. the commercial treaty with England became a reality, and, as an introduction to it, during the fortnight preceding it the bullion stock of the Bank of France has been drained by one seventh, and the rate of discount had to be raised in consequence, most of the funds have resented the measure by a proportionate fall; lastly, come the returns of imports and exports in the *Moniteur* for the first eight months of the current year, showing a considerable increase in importation and a falling off in many of the exports. There is, as will be seen, matter for raising a cry of distress, and, no doubt, advantage will be taken of so many concurring circumstances to make out a case against the new commercial policy of the empire. It will be made the scapegoat, although it has had only so far to do with the matter that it mitigated the effect of some of the unfavourable circumstances.

The Oriental and General Marine Insurance Company has announced their removal to new offices in Finch-lane, where they will commence business shortly.

The report of the directors of the Oriental Inland Steam Company, already issued, describes the steady progress of the company's operations towards that extended and efficient action which they believe now to be near at hand. The board reiterate their confidence that a profitable and satisfactory result will speedily be obtained. The entire cost of the steamers despatched to India has been paid, and the company has no outstanding debts whatever.

The amount of bullion by the steamer *Pera* from Southampton, on the 4th inst., was, in gold to Alexandria, £9,500; to Madras, £600; in silver to Calcutta, £10,260; to Hong Kong, £6,941; to Foo-chow-Foo, £496; to Shanghai, £36,455. Total, gold, £10,100; silver, £54,152.

ARTICLES OF IMPORT.

TEA.—The improvement which we noticed in this market at the date of our last has been firmly maintained during the past fortnight. There has been a steady demand both for home consumption and export, but without excitement, and prices for most kinds of Congou show a slight advance. The quantity offered at public sale has been considerable, but the sales have passed off with more spirit than usual, at full market rates, and the market closes with a healthy appearance, owing to the large deliveries and moderate supplies. The principal feature of the month has been the arrival of the *Fiery Cross*, which made an unprecedentedly quick passage for the time of year. Her teas were placed on the market on the 24th ult., and the great bulk of them have now been realised at very full prices, owing to the other vessels still keeping out. Some few parcels sold as high as from 2s. 5d. to 2s. 8d. per lb., the bulk ranging from 1s. 9d to 2s 3d. per lb. The quality, on the whole, we consider barely up to the average of former seasons. Low to fair common Congous have met with a steady demand for export for those with leaf, whilst the broken leaf kinds, with quality, have sold for home consumption, and prices are ½d. per lb. dearer. Good common are scarce, and, owing to demand for Halifax, have risen to 11½d. to 1s. per lb. Fair to good flavory kinds show an improvement of ½d. per lb., but without great inquiry. Common to fair Ho-Hows are slightly better. For good Ho-Hows and Ning-Chows and second class Honams and Wopaks there has been a steady demand, and owing to their scarcity they may be quoted fully ½d. per lb. dearer. Fine Monings and Wopaks have been saleable to a moderate extent at former prices. Good Kaisows, of old season, are less saleable, owing to the arrival of those per *Fiery Cross*, and prices have rather given way for the few offering. Tayshans are in moderate demand at former prices; fine have sold from 1s. to 1s. 1d. per lb. Souchongs and Oolongs, in the absence of new season's arrivals, leave little room for remark, prices remaining much as before. Flowery Pekoes continue to be realised from time to time, chiefly at public auction, at rather improved prices. Notwithstanding the low prices, the deliveries show no increase. Common to fair scented teas remain heavy of sale at former prices; good and fine continue in request at higher rates; the new season's from Foo-chow have realized extreme prices. Uncoloured Japan teas have been taken to a fair extent at rather higher rates. Green teas show a very considerable advance upon all the common and medium descriptions. Those per *Glencoe* sold very readily, owing to the market being quite bare on her arrival. The *Ziba's* teas, which have been offered this week, have not been so eagerly taken, except for the grades under 2s. 7d. per lb.; fine teas continuing relatively cheap, but more difficult of sale. The rise in prices on all common and medium kinds during the month is 3d. to 4d. per lb., whilst fine have only advanced about 1d. per lb. There have been four public sales during the past month, comprising 60,000 packages, of which 27,000 pkgs. were sold, including 17,800 pkgs. offered without reserve. The stock on the 1st of October of all descriptions of Black was—in London, 47,755,211 lbs., and of Green 2,873,370 lbs. The total delivery was—of Black 55,761,189 lbs., and of Green 7,898,055 lbs. The stock at Liverpool was 3,178,503 lbs. of Black and 9,202 lbs. Green. The total delivery of Black was 5,982,035 lbs., and of Green 481,621 lbs. The imports in London to the 1st of October have been, of Black 57,476,099 lbs., and of Green 4,660,718 lbs.; at Liverpool, of Black 7,049,484 lbs., and of Green 459,836 lbs. The amount of tea afloat at the present time, by the Circular of Messrs. Mitchell, Aspinall, and Skipper, is 23,984,674 lbs., against 21,053,929 lbs. at the same period in 1860.

SILK.—During almost the whole of the remainder of the month of September there was a dragging business, drooping prices, and deliveries smaller even than the preceding month, but for the last ten days buyers, both home

Digitized by Google

and foreign, have apparently been compelled to come into the market, and fair business has resulted; deliveries to date show a marked improvement. In China silk the demand has fallen principally upon the lower qualities both of Tsatlee and Taysaam, the higher relative prices asked for classical silks, pu ting them beyond the reach of the bulk of consumers The few bales of Japan silk that have arrived have been immediately sold. Chinese thrown continue neglected. Bengal silk has participated in the generally improved demand, but prices are as unsatisfactory as ever. The next periodical public sales are fixed to commence on the 23rd instant. According to a circular of Messrs. Arles Dufour and Co., of Lyons, the silk market, after a protracted dulness, exhibits a slight improvement. Manufacturers, since the beginning of the month, have succeeded in diminishing their stock of goods, and have also received some orders for general European consumption. Prices, consequently, are now very firm for all descriptions of silk, and in those qualities which had undergone the heaviest fall there has been even a slight advance. Still, it is said, as long as there is no improvement in the American trade, a more decidedly favourable change can hardly be expected.

Chinese thrown	1,120	1,683	2,470	2,677	1,175	3,329

Sugar.—The previous value has been fully sustained, owing to the quiet tone that has prevailed in the market, and holders exercising great firmness. The sales have been 556 bags Penang, at 32s. 6d. to 36s. 6d. for foxy brown to low middling yellow; 540 baskets Java, Nos. 14 to 14½, to arrive from Holland, at 44s.

Coffee.—An active demand has been experienced for Colonial sorts, and the abundant supply has been taken off freely at still higher prices; 28 casks, 194 bags and barrels Plantation Ceylon sold steadily; 176 bags native, of superior quality, sold at 69s. to 70s. About 200 bales Alexandrian sold, by private treaty, at 84s. to 90s.

Rice.—A quiet market prevails at present, and there is no change to notice in prices. About 20,000 bags have been sold privately. Fair new Necranzie Arracan at 10s. 9d. Good middling white Bengal at 13s. 3d.

Pepper.—Black rather dearer; and 1,573 bags Sumatra at auction chiefly sold at and after the sales at 4d. to 4½d. per lb. White is also dearer ¼d. to ½d. per lb., and 1,347 bags Singapore, and 95 bags Penang at auction, chiefly sold at 6d. to 7¼d. per lb. for ordinary to very good.

Sago has been in active demand, and large business done, at rather higher prices. Of 275 cases at auction, two-thirds sold at 18s. 6d. to 19s. per cwt. for middling medium. Flour.—Steady, with moderate business.

Spices.—Cinnamon: Prices remain as before quoted. Cassia lignea: 130 cases at auction sold at 90s. to 91s. for first pile. Cassia buds: No business of importance doing. Cloves: Moderate trade privately at 4¼d. to 1s. 3d. Mace: 6 cases Penang and 1 of Singapore were all retired at auction. Nutmegs: 3 cases Penang and 2 of Singapore sold at previous quotations.

Hemp.—Manila has advanced 10s. per ton, and 502 bales sold at auction for £22 to £23 for fair to good roping.

Cotton.—A firmness and activity still continues, and a further advance of ¼d. per lb. has taken place. Good fair to good new. Broach, at 6⅞d. to 7⅞d., fully fair to good. Dhollera, at 6¾d. to 7d.

Japan Wax.—Small sales of block have taken place at previous terms. Saucer is now quoted 65s. to 72s. 6d.; block, 52s. to 60s.

Tobacco.—Java is in good request at 9½d. to 10½d. for really fine. Common and musty sorts can seldom be sold even at low prices.

Tin.—This market has been very quiet, and our quotations (£118 to £120 for Banca, £117 to £118 for Straits per ton) only obtainable in purely retail operations.

Gambier.—Steady. Only 240 bales at auction, sold at 17s. 6d. to 17s. 9d. per bale for good. Moderate business privately upon former terms. Cutch has again relapsed into a sluggish state, and 1,907 bags at auction were all retired, only very low biddings being elicited.

Miscellaneous.—India-rubber: 183 packages at auction all retired. Camphor: Small sales are reported at 225s. 110 cases at auction all retired at 230s. Sapanwood: Steady, and no sales. Soy: Firm. 115 hogsheads all retired. Mother-o'pearl Shells: Nothing doing. Star Anniseed: Very flat. 138 cases retired at 65s. per cwt. Sticlac: Considerably dearer. 159 cases sold at 110s. to 120s. for fine to good Siam, and 70s. to 95s. siftings. Gum Benjamin: Firm. Auctions have combined 131 chests Sumatra with 5 chests Siam. About half of the former sold at £10. 2s. 6d. to £12. 10s. per cwt. for 2nd, being quite 10s. per cwt. dearer; £4. 10s. to £5. 2s. 6d. ordinary 3rd, and £1. 15s. to £3. 12s. 6d. 4th. The Siam retired. Damar: Firm and no business doing. Gamboge: Dull. Rattans: Steady, and no auctions. Saltpetre: Rates rather lower, and less demand. Gutta Percha: Fine genuine continues in enquiry; private sales of about 18 tons are reported at ¼ per lb. for good. Rape Seed: Supply small and in request. Elephant's Teeth: Sales are in progress. Vermilion: Firm and considerable enquiry at the present low prices. Galangal root: Nothing doing. Cubebs: No sales reported. Dragon's Blood: Good quality scarce; a few cases sold at auction at £6 per cwt. Galls: Steady; 249 cases Japan sold at 34s. 6d. to 40s. 6d. for ordinary, to good. Rum: No sales of East India are reported.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars, £6. 5s. 0d. nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £8. 15s. to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5 to £5. 15s.

Steel.—Swedish keg, £16.

Copper.—Sheet and sheathing, 11d.; yellow metal, 9¼d.

Tin.—120s. for block; 121s. for bar. Tin plates, best charcoal, I.C., 28s. per box.

Lead.—English pig, £19. 10s. to £21. 10s.; shot, patent, £22. 5s.; sheet, £20. 5s. to £20. 10s.; spelter, £18. 15s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

The tendency of metals generally is slightly upwards. Iron, English, is rather better in Staffordshire, but no activity; Swedes in demand at better prices; Swedes steel the same. Copper is firm. Tin is rather easier in foreign. Lead has improved slightly in price. Spelter is still inactive, with large transactions daily; the stock also continuously reducing. Tin plates very dull.

The export of metals from London and Liverpool to China in the month of September was as follows:—Pig iron, 25 tons; bars and nail rods, 398; hoops and sheets, 10; foreign steel, 10; yellow metal, 5; pig lead, 518; spelter, 49; zinc, 10; tin plates, 600 boxes; quicksilver, 50 bottles; making a total for the first nine months of 1861, of iron rails, 77 tons; pig iron, 556; bars and nail rods, 4,844; hoops and sheets, 440; steel, English, 34; foreign, 86; copper: cakes, ingots, and tiles, 1; sheets, rods, and nails, 93; yellow metal, 226; pig lead, 4,229; sheets and pipe, 44; spelter, 404; zinc, 21; tin plates, 8,554 boxes; quicksilver, 470 bottles.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£506,141
Foo-Chow-Foo	—	36,976
Hong Kong	—	277,250
Manila	—	—
Singapore	17,219	66,992
Penang	—	19,024

MANCHESTER MARKETS.

There has been a somewhat increased demand for goods suitable for India during the last week, at an advance of nearly 3d. per piece on last week's prices. This arises chiefly from the state of the cotton-market, the sales at Liverpool yesterday having reached 15,000 bales, at hardening prices, and the sales to-day being 12,000 bales. During both days a good deal was done on speculation, and the same appears to have been the case at Manchester, especially in shirtings and in yarns for the Eastern markets. There is nothing in the accounts received from those quarters to encourage a large sale here, unless it be of a speculative character. The improvement in the cloth-market extends to shirtings, Madapollams, longcloths, and T-cloths. In printing-cloths we do not hear of any change. The yarn-market has been quite as active as it was last Friday. A large sale has been made for India, China, Germany, and the Mediterranean. Blackburn yarns are rather dearer. The home trade houses have also been buying pretty freely. Prices are ¼d. to ⅛d. higher than they were this day week, and the market closes strong, with a decided tendency upwards.

COMMERCIAL POSTSCRIPT.

City, Thursday Afternoon.

Arrivals not included in Table.—Oct. 8, off Falmouth, from Batavia, Therese; 9, in the Downs, from Foo-chow-Foo, Ellen Rodger; from China and Demerara, Montmorency; 9, off the Wight, from Batavia, Shanghai; at Liverpool, from Bassein, Duke of Wellington; 11, at London, from Shanghae, Bankok, and Singapore, Ricardo Schmidt; at Liverpool, from Singapore, Kamehameha IV.; 15, at London, from Kanagawa, James Lemon; 14, at Liverpool, from Foo-chow Foo, Robin Hood; at Falmouth from Rangoon, Springbok; 12, at Cuxhaven from Moulmain, Liverpool; 13, from Batavia, Princessan Lovise; 16, off Falmouth from Foo-chow-Foo, Flying Spur; 15, at Liverpool from Akyab, Lodore; 16, at Falmouth from Akyab, Speedy, with part of cargo thrown overboard.

From Batavia.—At Liverpool: Kerr. At England: Therese, William Simpson.

From Bankok.—At Falmouth: Hannah Salkeld. At Liverpool: G. W. Browne.

FREIGHTS AND CHARTERS.

During the past fortnight there has been a somewhat limited business in charters, and the inquiries for shipping are confined to the supply of immediate wants. Though coal shipments are being made for China and Manila, there is little or no inquiry to the other ports in the East at very low rates. There is, however, rather more demand for vessels on the berth, and room cannot now be engaged for manufactured goods at unprecedentedly low rates.

Current Rates of Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s. to 60s.

CASUALTIES.

The Constance Kimmerer, from Rotterdam to Batavia, was in collision with another vessel off Folkstone, about midnight, Sept. 28, and sustained considerable damage. She proceeded to the river to repair.

Cape Town, Aug. 21.—The Drie Gebroeders (Dutch barque), Kramer, from Batavia to Amsterdam, put into Simon's Bay, Aug. 10, leaky, making twenty-two inches water per hour. Her cargo, coffee and sugar, is much damaged, will probably be sold, and the vessel go on the patent slip for repairs.

Cape Town, Aug. 20.—The Commerce, Frazer, from Singapore for Queenstown, which put into Table Bay yesterday in want of sails, is also very leaky.

Mauritius, Sept. 6.—The Mutlah, Lemon, from Canton to London, put in here Aug. 30 to stop a leak, and is now discharging. She reports having passed a vessel on her beam ends, about five miles south of Scarborough shoal (China sea), and drifting on to it. Her fore and mainmasts were gone, and the wreck lying alongside; her mizen-mast was standing, also the jibboom. She was about 1,600 tons, painted black, the upper part of her top rail white, fore and aft. She appeared to be abandoned. The weather was too heavy to board her.

The Van Galen (Dutch ship), Brandligh, from Batavia to Holland, put into Mauritius August 6, leaky, making at sea eight to ten inches water per hour, having experienced very bad weather. She had discharged her cargo prior to the 6th September.

The Norwood (ship), Bristow, from Penang to London, arrived at Mauritius August 17, with head of mainmast carried away August 3, in lat. 6 S., long. 91 E. She repaired the damage while lying in the roadstead, and sailed again Sept. 2.

The Glendower, Jarvis, from Hamburg for Hong Kong, was towed into Salcombe harbour Oct. 4, to have her bottom cleaned.

The Blue Jacket, Clark, which arrived at Falmouth Oct. 7 from Akyab, had mainmast sprung, and one man killed. She had also lost bulwarks and sails, having encountered a cyclone Sept. 9.

At St. Helena.—Aug. 16, Kamehameha IV., Crawford, from Singapore, and sailed for Liverpool. Alida Maria, Devries, from Java, and sailed 17 for Amsterdam. Beatrix v.d. Wyck, from Java, and sailed 17 for Rotterdam. 18, Adriana Petronella, Annoxk, from Batavia, and sailed 19 for Rotterdam. Alcyone, Haacke, from Batavia, and sailed 19 for Amsterdam. 19, Princessan Louise, Hillstrom, from Batavia, and sailed 21 for Hamburg. 21, Potosi, Johnson, from Ningpo, and sailed for New York. 22, Panic, Robinson, from Foo-chow-Foo, and sailed 23 for London. M.M.S. Chesapeake, from China, and sailed 24 for England. Christina Helena, Tjebbes, from Batavia, and sailed for Amsterdam. Kalimaas, Jonker, from Sourabaya, and sailed for Amsterdam. 24, Petchelle, Smith, from Whampoa, and sailed 26 for London. 25, Cheribon, Coers, from Batavia, and sailed 26 for Amsterdam. 26, James Lemon, Macaulay, from Jeddo, and sailed 27 for London. 27, brig Hoffmann, De Witt, from Batavia, and sailed 28 for Rotterdam. Vision, Crowell, from Jeddo, and sailed for London. Tryntje Ferma, Ingerman, from Padang, and sailed 28 for Amsterdam. Clio, Wynmalen, from Batavia, and sailed for Amsterdam. 28, Elizabeth, Knoll, from Singapore, and sailed 29 for Cowes. Vrede, Bruggen, from Batavia, and sailed for Rotterdam. 29, Christopher Newton, Menzies, from Singapore, and sailed for Liverpool. Jason, Van Bueren, from Padang, and sailed 30 for Rotterdam. 30, Prins Mauritz, Bach, from Batavia. Almelo Tjebbes, from Batavia.

Table Bay.—August 19, Commerce, Frazier, from Singapore for Queenstown, in want of sails. 20, Granger, Hensen, from Queenstown, for Hong Kong.

Algoa Bay.—July 24, Prov. Dreuthe, Hoekstva, from Table Bay, and sailed August 5, for Batavia.

Simon's Bay.—July 31, H.M.S. Cambrian, from China, and left 1 August for England. August 9, Drie Gebroeders, Kramer, from Batavia

Music in the Garden, Conservatory, Summer-House, on the Window Ledge, or on the Water, without a Performer.

T. CROGER'S new PATENT ÆOLIAN HARPS will produce the most melodious sounds ever heard, far superior to anything else. At a short distance the tones are truly delightful; and what renders it so amusing is, that anyone not being aware of its position cannot trace whence it proceeds; the effect is so peculiar, it seems to be in all directions at once. All persons are sure to be surprised and delighted with the romantic effect. Prices 14s., 16s., 18s., 20s., 22s., 24s., 28s., 32s., and 36s., according to the number of strings and finish.

THE NEW PATENT TRANSPOSING EDUCATIONAL INSTRUMENT, 15s., 18s., 20s., 25s., 30s., 35s., 40s., 63s., 73s. 6d., and 84s., instructions included. Illustrations and further information of all the above forwarded post free.

Harmoniums, Pianofortes, Organ-Accordians, Concertinas, Violins, Cornopeons, Flutes, Clarionets, Fifes, Drums, Cymbals, Triangles, and every instrument and article in the music business of the highest possible quality and on the most advantageous terms.

Keys, Vibrators, Bellows, and all parts necessary for Harmonium-making, Pipes, Stops, &c., for Organ-building.

Price Lists, with Testimonials from very many Professors and Amateurs, and answers to any questions forwarded with pleasure by the inventor and manufacturer, THOMAS CROGER, 483, Oxford-street, four doors east of Museum-street, London, W.C.

MERCHANTS, SHIPPERS, AND OTHERS WILL FIND T. C.'s TERMS AND INSTRUMENTS WELL WORTHY THEIR CONSIDERATION.

For full List of Prices, see "Australian and New Zealand Gazette" of Nov. 3, 1860; "China Express" of July 26, 1860; "Saunders, Otley, and Co.'s Oriental Budget" of April 1, 1861; also "Thacker's Overland News" of Feb. 18, 1861.

*** To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

KEATING'S COUGH LOZENGES.

JUDGED by the IMMENSE DEMAND, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

KEATING'S COD LIVER OIL just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the Fish being unusually fine, and the Oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St. Thomas's Hospitals, have analysed and pronounced the Pale Newfoundland Oil the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. No higher price need be paid than the following:—Light Brown, 1s. 8d. per pint, or 3s. per quart; Pale, 1s. 6d. half-pints, 2s. 6d pints, 4s. 6d. quarts, or in 5 pint bottles 10s. 6d. imperial measure.

HOLLOWAY'S OINTMENT AND PILLS.
FEMALE COMPLAINTS.—Many complaints arise in women from neglect or inattention during youth. Then is the fitting time to reduce all functional disturbances to order; once set right, no further irregularities will occur. Holloway's Ointment, well rubbed down the whole length of the spine twice a-day, corrects all derangements, both of nerves and circulation. It may be used with the most perfect confidence. In all the ailments dependent on excessive nervous sensibility it is a specific such as no discovery has heretofore presented. Holloway's Ointment, aided by the internal use of his Pills, is a healing balm in cases of ill-health, arising from over-susceptible nerves, so frequently afflicting our wives and daughters.

PAYNE'S CELEBRATED CURRY POWDER, unequalled for its delicious flavour and stimulating qualities.

1 lb. Bottles, 3s. 6d.; ½ lbs., 2s. 3d.; ¼ lbs., 1s. 6d. 7 lbs. for 21s.

Curry and Mulligatawny Paste, 1 lb. jars, 3s. 6d.; ½ lbs., 2s. 3d.

Payne's New Curry Sauce and Oriental Relish, Bottles 1s. 6d.

Tap Sauce, Bengal Club Chutnee, Green Mango, Pindaree, and Lucknow, Bottles 1s. 6d. and 3s. each. Bombay Pickled Mangoes.

Nepaul Pepper, Tamarind Fish, Preserved Ginger, Guava Jelly.

Genuine Arrow-Root, and all Indian Delicacies imported direct.

Depot for the celebrated Calcutta Condiments, prepared by PAYNE and Co., at the Belatee, Bungalow.

PAYNE and CO.
FOREIGN WAREHOUSEMEN AND WINE MERCHANTS, 328, REGENT-STREET,
OPPOSITE THE POLYTECHNIC INSTITUTION.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD HONG KONG.

IMPORTANT TO INDIAN RESIDENTS.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,

MANUFACTURER OF IMPROVED INDIAN LAMPS.

"Messrs. TUCKER & SON. "Edinburgh, Sept. 11, 1856.

"Sirs,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed) "A. Ross, Bengal Civil Service."

MANUFACTORY, 190, STRAND, LONDON.

SEWING MACHINES.

NEWTON WILSON AND CO.'S

NEW PATENT KNOTTED STITCH MACHINES,

FOR FAMILY USE, DRESSMAKING, QUILTING, &c.

This stitch is the strongest, most elastic, and most beautiful stitch known These are the only machines that will do the beautiful embroidery work now in fashion for trimming mantles, shawls, and dresses.

PRICE £9. 9s. to £18. 18s.

Samples of the work in running, hemming, tucking, gathering, binding, and embroidering sent, with Illustrated Price List, from the great Central Depot,

144, High Holborn, London.

W. F. THOMAS AND CO.'S,

PATENT SEWING MACHINE.

TO TAILORS, SHIRT COLLAR, GLOVE, BOOT AND SHOE MAKERS SADDLERS, AND OTHERS.

FOREIGN, Colonial, and Country users of SEWING MACHINES, who cannot get them adjusted or repaired when imperfect or out of order, must necessarily rely on the respectability of the maker for obtaining a really serviceable Machine, suitable to their requirements. The high reputation which during the last 14 years the Machines made by W. F. Thomas & Co., have acquired for the perfection of their workmanship, insuring uninterrupted action and non-liability to derangement, entitle the makers to the confidence of persons residing in the country and abroad, and of intending emigrants, to whom any disappointment in the quality of the Machines must be attended with serious inconvenience.

The MACHINES are made of various sizes, and adapted for every kind of work. The stitching produced is alike on both sides of the material; there is no cord or ridge, and the thread cannot be pulled out.

Lists of Prices and Specimens of the Work can be had from W. F. THOMAS & Co. (Original Patentees).

66, NEWGATE-STREET, LONDON.

List of Passengers.

PASSENGERS INWARD.

By this mail from Hong Kong.—For Southampton: Mrs. Graham, two children, and servant, Lieut Menzies, R.N., Dr. Matheson, 67th Regt., Messrs. G. Thompson, T W. Dearborn, Loney, Muller, Rodgers. For Marseilles: Mr. and Mrs. Sands, Mr. L. Oliphant, Secretary of Legation at Yedo, and servant. For Gibraltar: Sir Don Antonio Rodrigues Pardo, and wife. For Singapore: Mr. L. N. Bell. From Singapore to Southampton: Capt. Babot. From Penang: Mr. Scott. To Malta: Mr. Denison, Mrs. Vaulpel, and 2 children, Mrs. Pryce and servant. From Singapore to Marseilles: Mr. and Mrs. Wilsone.

PASSENGERS OUTWARD.

Per P. and O. str., 20th Oct., from Southampton to Shanghai: Mr. H. Cope, Mr. R. Elias. To Hong Kong: Mr. J. Mackay. From Gibraltar to Hong Kong: Rev. Messrs. Costa and Vasconcellos. From Marseilles, 28th October, to Singapore: Mr. Pahcot, Mr. Laborde, Mr. Pott.

Per P. and O. str., 27th Oct., from Southampton to Hong Kong, via Bombay: Mr. Lenny, Mr. Beadel. From Marseilles, 4th Nov., to Singapore, via Bombay: Mr. and Mrs. J. A. Stok and infant, 2 children, and 2 servants, Mr. and Mrs. J. M. Tiedemann and native female servant, Mr. Schaaf, lady, son, and 2 daughters, Miss Lacocture. To Shanghai: Mr. Vischer, Messrs. Hartman and Bezier. To Hong Kong, via Bombay: Mr. J. Kymealer. From Alexandria to Singapore: Mr. S. Mohr.

Per P. and O. str., 4th Nov., from Southampton to Singapore: Dr. Treacher, Captain J. T. A. McNair, Mr. J. Dawson. To Hong Kong: Mr. and Mrs. F. Smith, Mr. A. Cohen, Mr. L. Moore, Messrs. A. Hogg, Limbey, P. F. Bird. To Shanghai: Mr. Ernest Saton. From Alexandria to Singapore: Mr. and Mrs. J. J. Blankenhagen, T. Blankenhagen and native female servant. From Suez to Hong Kong: Mr. W. Pustau, Mr. Reesema. From Marseilles, 12th Nov., to Singapore: Mr. J. F. Arnold, Mr. C. T. Deines, Mr. Mederbergen. To Hong Kong: Mr. Armand.

Per P. and O. str., 12th Nov., from Southampton to Shanghai, via Bombay: Mr. E. Spence. To Hong Kong, via Bombay: Mrs. Williams. From Marseilles, 20th Nov., to Shanghai, V.B.: Mr. Hearn. To Hong Kong, V.B.: Mr. Fritz Alegg. To Singapore: Mr. T. R. van den Broeck.

Per P. and O. str., 20th Nov., from Southampton to Shanghai: Mr. Gore Booth. To Hong Kong: Mrs. W. H. Fittock. To Singapore: Mr. Marshall. From Marseilles, 28th Nov., for Singapore: Mr. and Mrs. Kernel.

Per P. & O. str., 4th Dec., from Southampon to Singapore: Mr. A. C. Babington, and Miss Babington. To Penang: Capt. and Mrs. Hilhard, infant, and servant. To Hong Kong: Mrs. Caine, two infants, and E. I. servant, Mrs. Kane, Mr. Mackintosh, Mr. Fred. Adams, Miss Cruickshank. From Marseilles, 12th Dec.—To Hong Kong: Mr. Diego Snares, Mr. and Mrs. J. M. Hazeland.

Per str. 20th Dec., from Southampton to Shanghai: Mr. Gibbon; to Hong Kong: Mr. Stewart, Mr. R. H. Payne; to Singapore: Mr. D. K. Mason, Mr. Paterson. From Marseilles, 28th Dec., to Shanghai: Madame Cordier, infant, and two servants; Mr. E. Fiers. To Singapore: Mr. D. Rodger. From Suez to Shanghai: Mr. C. Lehmann.

Summary of News from the Far East.

DEATH OF THE EMPEROR OF CHINA.

Although telegraphic news of this event reached us some time since, and has already been announced in our paper, full particulars of the occurrence, or rather the fullest we can expect to receive, have only reached us by this mail.

Hien Fung died on the 22nd August, a victim to dissipation, in the 30th year of his age. On his accession to the throne in 1850, it was hoped that he would have ruled the Celestial Empire with wisdom and discretion, as he was naturally a man of considerable ability. But the charms of the harem utterly enslaved him, and he was content to leave to his brother, Prince Kung, the toils and responsibilities of government. It is difficult at present to anticipate the effects of this occurrence upon the Government of China, or upon our own relations with the Celestial Empire. Some reports state that Prince Kung will succeed to the throne, while others affirm that an elder brother will be nominated as Hien Fung's successor; but it is still more probable, as the telegraphs have already announced, that his son will be the future Emperor of China. In this case, a regency must be appointed, and if Prince Kung obtains the office, it is not at all likely that our friendly relations with the Government will be disturbed.

JAPAN.

The state of affairs in Japan still continues in the most unsatisfactory state. It rests with our Government to state the course which is to be adopted. Mr. Alcock, it is said, has desired permission to retire from the difficult position in which he is placed, and we do not think he could have made a request more reasonable or more necessary. A man may be very clever, without being wise, and though in another less troubled sphere, Mr. Alcock's conduct might have won the approval of his countrymen, he has proved himself incapable of grappling with the difficulties in which his own conduct has involved him. Dates from Kanagawa are to the 25th Aug., and from Nagasaki to the 29th. Her Majesty's Legation will remove to Yokhuama until orders have been received from home as to the course to be adopted with regard to the recent outrage. The Consulate will also remove from Kanagawa. We are glad to learn that Mr. Oliphant has reached England by this mail, and that the restoration of his health, although a main object of his return, is not the sole one, as he has been sent on a diplomatic mission. Important results may be expected from this visit and it is probable that ere long the policy of our Government in relation to Japan will be disclosed to the public. There is a report of an attempted attack on the American Legation, but it appears to be without foundation. Mr. Harris remains at Yedo. Vice-Admiral Sir James Hope had gone to Hakodadi, in her Majesty's ship *Encounter*, and his flag-ship *Imperieuse* was reported to have been aground, but got off ultimately without danger. The *Nagasaki Shipping List* states—"On the 1st instant she got aground on Cape Sagimi. On the 5th the *Ringdove* took the Governor and the Admiral on board. The *Imperieuse* having been lighted by throwing overboard her guns, shot and coals, was, with the assistance of the French steam transport *Dordorgne* and some gun-boats got off again, and all her guns recovered. It was reported that she had suffered some damage and would have to go to Hong Kong to be docked, but this, we

Digitized by Google

believe, is an error; we have been informed by a very good authority that she has not suffered the slightest damage." Mr. G. S. Morrison, Consul at Nagasaki, is about to return to England on account of his health.

CHINA.

THE YANG-TSE-KIANG.

The reports from Hankow, which are up to the 26th August, continue extremely favourable. The Chinese are regaining their confidence since the Rebels have retreated from the neighbourhood. At the date mentioned, six steamers and one American sailing vessel were in the harbour.

"Every vessel," says a correspondent of the *China Mail*, "takes an average of 1,500 chests of tea, besides large quantities of flax, oil, vegetable wax, &c." Rafts of timber are being sent down the river to Shanghai on the plan adopted in America. "There is one subject," says the same correspondent, "which ought to be brought before our naval authorities, and that is the necessity that exists for a survey of the river Han, which to steamers like the *Fire Dart*, *Willamette*, &c., is navigable for 300 to 400 miles from its mouth on the Yang-tse. There are several large towns on its banks, and one of the largest and most important in the province is only 150 miles from Hankow. Of course the first trips would be in most senses experimental, but they would repay the trial I think. While on the subject of surveys, I may say, I hear frequent complaints on the imperfect and incorrect surveys of the river Yang-tse between Nanking and the Lang-shan crossing, and in many places, the complainers say that the positions of banks are roughly placed, or that they have altered considerably since. A gun-boat might be advantageously employed on this service."

Information from Nganking reports the capture of that city by the Imperialists, after a stubborn resistance of many months on the part of the Rebels and inhabitants. As far as can be gathered from the intelligence forwarded, it would appear that the city was impregnable to the attack of the besieging force, so they resolved to starve the Rebel horde within the walls into submission. This had its usual effect where the besieged are determined to resist, and the horrors of famine raged within the devoted city, until it merged into cannibalism of the most frightful description. After every catty of ordinary food was consumed, and the most loathsome animals devoured, they resorted to eating human flesh, which was vended at eighty cash per catty, or about fourpence per pound. It is reported, also, that three regiments or separate bands of the Rebels gave themselves up to the Imperialists as prisoners of war, under the impression that their lives would be spared, but they were slaughtered to a man, and their bodies thrown into the river. These were seen in hundreds floating down the stream by those on board the steamers *Governor General* and *Carthage*, and several sailing vessels from the upper ports on the Yang-tse-kiang.

SHANGHAI.

At Shanghai business is quiet, although a large number of vessels has arrived. The steam communication with the Yang-tse ports has been kept up vigorously, and as the floods on the river are subsiding, there is every likelihood of a large trade being done as the season advances.

At Tien-tsin orders had been issued for a public mourning of the Emperor's death. Official documents were being issued under the blue seal, blue being the colour used for imperial mourning.

An official notification states that Mr. John Markham, having returned from furlough, would resume his functions as H.B.M.'s Vice-Consul on the 1st September.

An action was tried between Mr. Hallpike and Mr. C. S. Compton, the proprietor of the *North China Herald*, for alleged breach of agreement as assistant editor. The sum claimed was 3,000 taels, and the verdict given was—"That defendant pay to the plaintiff six months' salary at the rate named in the memorandum for second year's remuneration, and six months' rent at the rate named in defendant's proposal of the 24th July, 1861, viz., total taels, 1,500; and that defendant pay the costs of the suit." Several actions have been also tried in the Consular Court, for and against Mr. P. T. Richards, late of Shanghai, and now established at Tien-tsin.

At the monthly meeting of the North China Branch of the Royal Asiatic Society, a Catalogue of Matrices, for types of the Chinese written characters, was presented to the Society through the favour of the Netherlands Vice-Consul, and the thanks of the society were voted in return. This work has been completed quite recently, under the supervision of Dr. J. Hoffmann, Professor and Instructor of the Japanese and Chinese languages for the Netherlands Indian Government, by command of His Excellency J. J. Rochussen, Minister for the Colonies, with the sanction of His Majesty the King. To this catalogue there is appended a communication by Dr. Hoffmann, in which the matrices and types are described, and their superior advantages detailed.

Lieutenant-Colonel Sarel's interesting narrative of the proposed overland expedition through the interior of China and Thibet to India, appears in the *North China Herald* of the 31st of August. Colonel Sarel describes what he saw with considerable felicity, and his account of this enterprising though unfortunate expedition possesses more than a passing interest. The first number of the new paper, the *Shanghai Times* was to be published on the 15th of September. It is to be a weekly as well as a daily journal, and proposes to devote itself mainly to the commercial interests of China.

A new case of piracy is recorded in the silk districts, by which it appears that a valuable cargo of silk, crape, cloth, specie, and other merchandise has been plundered from a native vessel, and the crew, consisting of twenty Chinese, in all probability murdered.

Miao-pei-lin, who was one of the Rebel chiefs, has now changed his course and been won over by the An-hui Governor under promises of great reward and distinction. Some refugees who have managed to effect their exit from Chia-ting, report that the Rebels in possession of the place are by no means numerous, the population consisting principally of kidnapped people, and that hence there is a good opportunity open for recapturing it. In consequence, probably, of this intelligence, it is stated that 1,200 troops are to be despatched to Chia-ting for the purpose of retaking the place.

Mr. Compton's house has been entered by a burglar, who found his way into that gentleman's bedroom, who was fortunately aroused by the noise. The thief turned quickly and endeavoured to escape under the half-screen doors by which he had entered; to do so he had to go on his hands and knees; this enabled Mr. Compton to get firm hold of him by the "tail," by which he dragged him back near to the fire-place, when he armed himself with a shovel, the first weapon that came within his reach. With this he struck him on the head several times, keeping him down all the time with great exertion, the thief making great efforts to rise or pull his antagonist upon him. In four or five minutes the house-boy, for whom he had called loudly during the conflict, came up, and police were sent for. Already some articles had been conveyed away, and it was evident the thief had an accomplice; other things were found secreted upon his person.

NEWCHWANG.

We mentioned in our number of the 28th ult., that an English gentleman attached to the British Consulate had been wounded by some ruffians. It now appears that this was Mr. Davenport, who, we are happy to say, is recovering, though slowly, from his wounds. The steps taken to punish his assailants appear to have had a good effect, the demeanour of the people being markedly more deferential than it was. It is stated in the *North China Herald*, that no foreign merchant will be able to stand his ground at the port of Yang-tse, who does not stay during the winter. During the whole of the frozen-up period. carts with produce from the east, north, and north-west, came into the place in hundreds, sometimes thousands, *daily*. They come from much greater distances than the river navigation reaches to in summer. Several circumstances combined to make that mode of conveyance remunerative for producers. At that season there is not farm employment for the farm carts and the draught cattle. The country being bare of crops, carts can drive everywhere across it, while the rivers, bays, &c., are frozen hard. It will take at least two, and more likely three winters to test fairly the commercial capabilities of the place. This year the people will learn what the traders are looking for; next year small quantities of produce will be brought on trial, and in the third, the foreign merchant will be enabled to form some notion of the quantities in which they can be produced, and their cost at Yang-tse.

There is a probability of a direct trade between that new port and England. Vessels drawing fifteen to seventeen feet of water can come into port without difficultyduring seven months in the year. A certain quantity of goods has always been required there, and more will be wanted for the future, while several products are likely to prove remunerative exports to England.

In climate Newchwang and the port of Yang-tse are superior to Tient-sin or Peking. From the 15th to the 16th of July the

Digitized by Google

thermometer stood at 80 deg. at daylight, and up to 92 deg. at the hottest time of the afternoon. But that has been the hottest weather during the summer. Before that it was comparatively cool, and from the 21st to the 24th it was 78 deg. at the coolest, and 89 deg. at the hottest times of the twenty-four hoors. On the evening of the 24th a succession of squalls blew with violence, and on the 25th, 26th and 27th, it was 65 deg. to 69 deg. at daylight. Since that up to the close of the month it had been gradually getting warmer. There is none of the close steamy heat there which prevails at Canton and Shanghai, while mosquitos are comparatively unknown. The winter is expected to be severer than at Tient-sin; but the native houses are so well built to meet the cold, and as there is very good coal to be had, and cheap firewood, the foreign residents have no fear of passing the winter comfortably at this new port.

FOO-CHOW-FOO.

For several weeks there has been considerable excitement, in consequence of rumours which have reached Foo-chow, in regard to the progress of the rebels in the northern province of Chek-kiang. It is said the viceroy contemplates leaving with all the troops he can raise; some say he wishes to raise 15,000, or at least 10,000 men. The Tartar general and the governor are reported to be desirous that the viceroy should proceed to the field of strife in the north in person, which he seems to try to avoid doing.

HONG KONG.

Two very good houses are being built on Victoria Peak for the Honourable John Dent and Mr. Hudson, on the hills a little beyond Mr. Remedio's bungalow, and as the road from Victoria to Aberdeen is now patrolled at each half mile by an armed policeman, the locality may be considered safe for pedestrians.

The condemned hulk *Minden*, belonging to the service, and lately sold, is to be broken up at Whampoa.

All the policemen charged with extortion and conspiracy at the late Criminal Sessions, Hong Kong, have managed to get clear. Two were found guilty, and sentenced to six months' imprisonment each; but the sentence was to be re-considered.

A typhoon has been experienced in the China seas, and several vessels are reported in our shipping columns to have been damaged. It is feared also that we may yet hear of further disasters. This typhoon will, no doubt, be followed by another, as usual.

At Kow-loong, on the 6th instant, the Commissariat sheds took fire, and their contents, consisting chiefly of large quantities of compressed hay and patent fodder, were utterly destroyed; the loss is estimated at about £40,000. The weather continues to be mild for this season of the year.

At Swatow a gun-boat has her crew busily engaged in surveying the different passages and creeks, by order of the Admiral. The typhoon of the 31st August was felt at Swatow in a strong gale with violent gusts from 4 P.M. till past midnight. The wind blew from W.N.W., W.S.W., and South; no damage was done.

The arrival of the new American steamer *Hankow* is thus noticed in the *Daily Press*:—

"The new steamer *Hankow*, under the command of Mr. George U. Sands, arrived in Hong Kong on 30th August. This vessel was singularly unfortunate before leaving the American Coast, for she fell in with a most violent gale of wind, which compelled her to put into the Delaware River for repairs. She has however reached this port without further accident, and now lays in the harbour, one of the most perfect efforts in river shipbuilding we ever saw. The ship as well as machinery has been constructed under the personal superintendence of Capt. Sands. Her dimensions are as follow:—Length 220 feet over all (thirty-four feet longer than the *White Cloud*; beam, 31 feet 6 inches; depth of hold, 11 feet. Messrs. Collyer & Co. were the builders. The machinery was constructed in Morgan's Iron Works, and the cylinder is 48 inches diameter, whilst the length of stroke is 8 feet 10 inches. Her accommodations are remarkably good, and we have not the slightest doubt that the *Hankow* will become as great a favourite on the Canton River, where we hear she is destined to run, as the *White Cloud* has hitherto been. The *Hankow* experienced strong head winds, with a heavy sea from New York to Cape St. Vincent (the first place touched at) and carried them to the Cape of Good Hope, where she arrived just as a long prevalence of heavy gales had ceased their violence and the *Hankow* had fine weather to Mauritius, but from there to the Sea Shells very violent gales. During the remainder of the passage had light winds and calm weather."

CANTON.

The *Friend of China* of the 7th of August has the following account of a native custom:—"The native festival called *Sui-ee*, or burning clothes time, which commenced on the first day of the current Chinese moon, ended on Tuesday last with full moon. The origin and incidents of this festival, as given in the calendar published in this paper on the 3rd inst., do not give the full popular notions and practice in this quarter, which are said to be as follows. On the fifteenth day of the moon the god of earth is supposed to mount his throne in hell, and pass judgment on those evil spirits that have come under his control during the preceding year; and it is for this that from the first day of the moon the Buddhist and Taouist priests are employed to recite prayers—perform masses—for the souls of the departed. At this all souls' festival, too, the temples receive ancestral tablets, and especial devotion is made for the spirits of all those whose friends are prepared to pay for the same. Money is subscribed among the different villages, to pay for services for the souls of those who have died without friends, for abandoned children, and for orphans. For these there are great preparations of paper clothes, paper money, spirits, and food—the two former being burnt, the rest distributed among the poor—(devoured by the priests?) The illuminated boat voyages up and down the river, by the creeks into the western suburbs of Canton, and on into the city, are specially for those who have been drowned. The music of flute and gong, though discordant to some western ears, is not so to all; and to our thinking the plaintive pipe in the dead of the night carries the best of remembrances that in the midst of life we are in death."

There have been no decided steps taken towards the evacuation by our troops, and rumours have been current in Canton that consequent on sickness at Tien-tsin the troops in garrison here will remain undisturbed till mid-winter; but, according to the *Friend of China*, there is no truth in the report.

A neat chapel has been built by the Wesleyan Mission at Sun-sha in the southern suburbs, which will be ready for inauguration in a few days.

Consequent on the appointment of the Rev. W. R. Beech to the Consular Chaplaincy at Tien-tsin, the Rev. Mr. Wylde has left Canton to succeed him as Military Chaplain at Hong Kong. Mr. Gray, is again pressed into the military service in Mr. Wylde's place.

Upwards of a dozen hongs have been built in the southern suburbs during the last two or three months, a perfect feat when the price of bricks and tiles is taken into consideration. The ground will get covered in time no doubt.

One of the wives of the celebrated Howqua, who attempted suicide by means of opium, has, by the aid of an English physician, recovered.

The following report of the land sale at Shameen is from the *Friend of China*:—"As we anticipated, there was a smart competition for the bulk of the lots, the fifty-four disposed of realising a total sum of $248,225, or but $11,775 short of the aggregate of the upsets—the twenty-one lots unsold forming a residue of $68,500 over the sum believed to have been paid for making the ground. $248,225 at the exchange of 4s. 5d. gives, say, £46,500 sterling—a nice little remittance for the Chancellor of the Exchequer by the outgoing mail as part of the Tien-tsin indemnity. For a fuller comprehension of the sale we give the names of the parties to whom the lots were knocked down, the abstract being as follows:—

Purchasers.	Upset Prices.	Advances.

Great complaints are made of the increasing practice of granting farms of the revenue. The native customs and inland revenue of Kwangtung is now farmed to 40 different people, each particular trade having a special farmer of whatever duty may accrue from it, the average *ad valorem* impost being three per cent. on the selling price.

The following comments are from the *Daily Press*:—"Messrs. Sassoon opened the ball, and imparted much confidence to the sale from the opinion which gained ground that they were operating for investment. They bought the first lot cheap, and biddings were rather languid until Mr. Cleberley began to buy for the two leading firms. He wanted all block No. 4, but only succeeded in buying six tenths of it. The five front lots of that block fetched $37,375, the upset price being $20,000. The Parsees and Indian firms then took up the biddings and purchased the remaining six front lots of the block for $47,300, the upset price being $24,000. This end is the pick of the site, and is almost entirely in the hands of the Parsee and Indian firms. The Southern aspects are all secured, in some instances only the upset prices being given.

"The Western portion of the site is rather in a ticklish position, and liable to be carried away by the force of the tide. In fact it did give way once. There is a tremendous strain on the retaining wall during the freshes.

"The result certainly bears a formidable appearance, and is encouraging to those who hinge their hopes upon the re suscitation of Canton. Our opinions are well known upon the subject, but as they have partaken somewhat of partisanship, we acknowledge that we have only studied one side of the question. The train of reasoning in our mind runs thus:—If the Canton Custom-house continues, it will drive the trade away from the place; if the establishment be broken up, smuggling to and from Hong Kong will proceed *ad libitum*. Hankow will take a great portion of the trade from Canton, both import and export. Howqua hates the British as he does a pestilence. The Americans always nestle under his wing. He has a deal of land on and near the old factory site, which is far more contiguous to the centre of trade than Shameen, which will thus have a formidable rival. In fact, unless something unexpected should occur, the owners of the Shameen site can never expect a monopoly, for ground in large quantities, far more centrally situated, can be had on the sites of the old hongs and factories.

"The successful result of land speculations at Hong Kong and Shanghai have doubtless encouraged parties to embark in this Shameen site. When we say that we judge by experience in arriving at the conclusion that little faith can be placed in the good out-turn of this Shameen site, simply because the community generally embarked in it, we refer to the following circumstances. When the first Hong Kong land sale was held in 1842, the whole British community embarked in it, and came to grief. Many of them, after spending immense sums on their lots, sought to abandon them, and the Government would not allow them to do so.

"Again, a couple of years thereafter, the British Government could not move for a long time a single lot of the ground they had leased from the Chinese on the Canton factory site. We mean the ground afterwards known as the British factories. We, ourself, was the first purchaser, and the Americans were the second. This was not until the land had been upon the market for several years. The result was brilliant.

"Again at Shanghai the mercantile community were averse to *speculating* in ground in the foreign settlement. And, indeed, but for the occurrence of fortuitous circumstances which none could have foreseen, nothing could have saved the speculators. And it is ever thus, in our opinion; land bubbles always fail unless by a fluke. We will almost defy any one to name a lucky land speculation where anything beyond a trifle was given for the ground. Look at the 'real estate' bubbles at San Francisco! It was only those who got the ground for a trifle who made money. All after speculations in the market came to grief. It therefore comes to this,—nothing but political events can make the Shameen land speculations lucrative. Nothing need be feared from the Cantonese—they have been thoroughly humbled. The Rebels then present the only chance—so that should Canton be menaced seriously by Rebels, the Shameen site will become a place of refuge for persons and for valuable property. Beyond this we really see no hope of the speculation turning out favourably."

Mr. Thomas Dick, formerly Interpreter at the Supreme Court, Hong Kong, comes to Canton as a Deputy Commissioner of Customs.

On the 4th of September an armed body of robbers, about ten o'clock, went to the goldsmith's shop of Sie-shing and Yekshing, in the Suee-Shee-Kie, or street leading from the Eng-sin-moon to the Kwei-tukh-moon, one of the principal thoroughfares of the city, and having effected an entrance, plundered the shops of their contents—to the value of 3,000 taels of gold it is said. It is only the old city that is patrolled by foreign police at night. The robbers, it is found, had secreted themselves in the city till the appointed hour, and afterwards escaped over the wall, and so by the water away.

The *Friend of China*, in referring to the different Charitable Institutions of Canton, says with reference to the Blind Asylum:—"The Blind Asylum was built from a special fund under the control of the two district magistrates, and the inmates, who numbered in April last 220 receive from the same quarfer a miserable dole of some three mace and a few candereens a piece once in three months. Having built the place, the magistrates appear to think they have done all that it is necessary for them to do;—the poor blind being left to find food by begging, telling fortunes, &c., their average earnings being some thirty cash a day only. Occasionally, sick and unable to go a begging, some of them die of sheer starvation!"

MACAO.

The *Boletim do Governo* contains the report of an examination of students at the seminary of Saint José. At this examination His Excellency the Governor of the Settlement was present, and on the last day distributed the prizes, the principal of which were as follows:—

English Language.—First prize: To José de Jesus. Second prize: Edelmundo de Couto. Third prize: Filomeno Vidal. Second-class: Daniel Gutierres. Third-class: Constancio Lopes.

Latin.—First prize, Daniel Gutierres; second, Hymocrates H. da Silva; third, José Felix de Jesus.

There were prizes also for attainments in Portuguese grammar, and in first rudiments. According to a list of the scholars in the seminary, there are 27 students of the English Language, 7 of Latin, 41 of Portuguese Grammar, 46 of First Rudiments, and 9 of Chinese. The examiners in the English Language were Messrs. Manoel, A de Souza, and Felix Hilario de Azavedo; in Latin, Portuguese First Rudiments, Arithmetic, Orthography, and the Christian Doctrine, the Rev. Jorge Antonio Lopes da Silva (Vicar of Sam Lourenço); and in Chinese, the Rev. Sr. Antonio Vieira.

COCHIN CHINA.

A recent visitor to Saigon states that there is a want of vitality about the settlement. No land, it is said, is attainable, and the European merchants remained cooped up in wretched houses, tenants at will of the authorities; moreover, there is no warehouse room, except at the China Town. On the other hand, roads have been made and some are being opened up, which will greatly benefit town and country. Barracks and hospitals are springing up and the Public Works Department is fully occupied (and is likely so to be for a long time to come) on coal sheds, commissariat stores, quarters for officials, drainage, canals, churches, &c., &c. The plan of the town has been drawn up, and if carried out will render Saigon one of the prettiest towns in the East, especially if cleanliness can be enforced. The number of inhabitants both in Saigon and the China Town has materially increased, and the increase is stated to be greater in the latter than in the former place, whilst the country shows a marked improvement as to population.

The reports from Mytho vary; some represent the country as but little cultivated; others represent the crop as likely to be greatly in excess of former seasons. The truth probably lies between the two, and, on the whole, abundance is likely to prevail. No notable progress has been made towards the conquest of the country since the capture of Mytho. It is reported that on the arrival of reinforcements, the admiral will send e xpeditions against Bein Hoa and Vinh-long, and add them to the French possessions.

SIAM.

BANGKOK.

His Excellency the Phraklang, or Minister of Foreign Affairs at Bangkok, has communicated to Her Britannic Majesty's Consul at that place, that the Siamese Government has received information of disturbances having broken out in Cambodia, over which territory the kings of Siam hold suzerainty, and that the Senabodi, or Royal Council, had resolved to despatch, for the protection of Siamese interests, a steamer and some gunboats to Kampoot. The Phraklang, accordingly, requested the Consul to issue a notification informing British subjects resident in Cambodia of the object of the expedition, and referring them for redress to the commander-in-chief of the expedition, in case of any difficulty arising between them and the Siamese force. The Consul has, accordingly, issued a notification to the above effect.

BORNEO.

SARAWAK.

The news from Sarawak, which is to the 4th of September, reports that Sir James Brooke had returned from Brunai, where he had met with a most cordial reception. The Sultan and his ministers have made over to Sarawak the government of the various districts between Banjong Kadurong (including Bintulu) and those formerly placed under the authority of Sir James Brooke. This will secure the peace of the coast, and materially advance the trade of Sarawak, as well as of these outlying districts. The interests of the Sultan and his ministers will also be promoted by this measure, as they will be secured a certain and liberal revenue, instead of being obliged, as heretofore, to enfore a fluctuating tribute, by violent measures, from a disorderly and often hostile population.

The trade of Sarawak is brisk, and the affairs of that province look more prosperous and promising than they have ever been before.

Sir James Brooke is, we presume, on his way to England, as he was to leave by the first mail in October.

MALACCA STRAITS.

SINGAPORE.

We learn that Capt. Sack, a gentleman well-known in Singapore has been murdered in a boat in which he was proceeding accompanied with a French nobleman, from Soo-Chow to Shanghai. The murderers, two Italians, wished to obtain possession of a box of dollars the unfortunate gentlemen had with them, and to ensure their evil desire proving successful they committed their purpose. Both the men have been arrested, and now await their trial in Shanghai.

His Prussian Majesty's frigate *Thetis*, Captain Tackmann, arrived at Singapore on the 15th current, from Batavia *via* Mintok. Next morning the frigate fired the usual salutes, which were returned on shore from Fort Fullerton.

The accounts from Banjermassing are not very favourable News had been received by telegraph, via Sourabaya, to the 4th current.

Nothing of importance had occurred at the head-place Banjermassing, or in the divisions Martapura and Tana Laut, and in the districts Allei and Amandil.

Between Tabalung and Muara Ayu a strong enemy, from whence coming was not known, had interrupted the communication by land and water, and hindered the passage of reinforcements.

Private advices received at Sourabaya state that Major Schaak had suffered a check before Paggy, and had many wounded, including two officers.

PENANG.

We regret to hear that small-pox is very prevalent at Marbau Kudong, Ayer Itam, and Permatang Maklom, and that there is considerable mortality among the children attacked by it. Until about three years ago the assistant apothecary of the province was in the habit of periodically visiting the villages in order to vaccinate, for which service about Rs. 20 monthly was allowed by Government. The allowance is still made, although it is said that the assistant apothecary does not now go to the villages, but requires the children to be brought to the hospital.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Barnet—On the 23rd inst., at 155, Westbourne-terrace, the wife of Wm. Barnet, Esq., of a daughter.

Borradaille—At "The Castle," Hong Kong, on Saturday evening, 31st August, the wife of T. S. Borradaille, Esq., of a son.

Chinnery—On the 6th inst., at Folkestone, Kent, Mrs. Samuel Chinnery, of a son.

Colebrooke—On the 12th inst., at Ottershaw-park, Chertsey, Lady Colebrooke, of a son

Decies—On the 11th inst., at Newcaste-upon-Tyne, the Lady Decies, of a daughter.

Fairman—On the 16th inst., at Boulogne-sur-Mur, the wife of E. St. John Fairman, Esq., of Alexandria, Egypt, of a son.

Grey—On the 17th inst., at Portsmouth Dockyard, the Hon. Mrs. George Grey, of a daughter.

Greenshields—At Cairn Hill, Singapore, on the 6th Sept., the wife of J. J. Green shields, Esq., of a son.

Hamilton—On the 1st inst., at Frankfort-on-the-Maine, the wife of Frederic Hamilton, Esq., Her Britannic Majesty's Charge d'Affaires to the Germanic Confederation, of a son.

Kennedy—On the 20th inst., the Lady Nigel Kennedy, of a daughter.

Murray—At Hong Kong, on the 4th September, the wife of C. W. Murray, Esq., of a daughter.

Rozario—At Hong Kong, on the 3rd September, the wife of M. B. do Rozario, Esq., of a son.

Silva—On the 21st inst., at her residence, 30, Portsdown-road, Maida-vale, the wife of, Mr. J. G. Silva, of a daughter.

Woller—At Hong Kong, on the 3rd September, on board the Hamburg barque *Miranda*, the wife of Capt. T. C. Woller, of a son.

MARRIAGES.

Brownlow—Hardy.—On the 15th inst., at the British Embassy, Paris, by the Rev. Lord Saye and Sele, the Hon. Edward Brownlow, to Helene Clementina, second daughter of the late John Hardy, jun., Esq., formerly H.M.'s Consul at St. Jago de Cuba.

Brant—Ruddock.—At St. John's Cathedral, Hong Kong, by the Rev. W. R. Beach, on the 3rd September, Mr. George Brant, of Windsor, to Miss Saran Jane Ruddock, of Bath.

Burke—Keith.—On the 24th inst., at the parish church of St. Marylebone, by the Rev. Chas. James Goody, curate, W. H. Burke, jun., Esq., of 17, Newman-street, Oxford-street, to Mary Ann, eldest daughter of D. Keith, Esq., of Wood-street, and Marlborough-hill-gardens, St. John's-wood.

Daly—McNab.—On the 19th Sept, at St. Mary's Cathedral, Hamilton, C. W., John George Daly, Esq., to Mary Stuart, daughter of Sir Allan McNab, Bart., of Dundurn.

Englehart—Wilcoxon.—On the 22nd inst., at St. Nicholas Church, Brighton, by the Rev. R. S. Smith, Edward Curteis Engleheart, to Emilie, youngest daughter of Robert Wilcoxon, of The Paragon, Blackheath.

Fellows—Hill.—On the 15th inst., at Hampstead, by the Rev. Thomas Ainger, Arthur Fellows, Esq., of Victoria, Vancouver's Island, to Eleanor Caroline, second daughter of Sir Rowland Hill, K.C.B.

Gurney—Prinsep.—On the 8th inst., at Kensington, by the Rev. Edward Auriol, Charles Henry Gurney, Esq., to Alice, daughter of H. T. Prinsep, Esq., Member of the Indian Council.

Hamilton—Scholefield.—On the 12th inst., at Leckhampton hurch, hetenham,, by the Rev. George Roberts, Vice-Admiral Arthur P. Hamilton, to Ellen Gertrude youngest daughter of the late Rev. J. Scholefield, rector of Barton-on-the-Heath, Warwickshire.

Hanbury—Strangford.—On the 17th inst., at St. Mary's, Bryanston-square, by the Hon. and Rev. Arthur A. B. Hanbury, the Hon. Charles Spencer Bateman Hanbury, M.P., to the Viscountess Strangford.

Hessey—Oakes.—On the 22nd inst., at St. Matthias' Church, Richmond, Surrey, by the Rev. Dr. Hessey, the Rev. Francis Hessey, D.C.L., to Julia Leonora, only surviving daughter of the late Thomas Alexander Oakes, Esq., of the Madras Civil Service.

Haskins—Hulme.—On the 24th inst., at St. Nicholas, Brighton, John Haskins, Esq of Hadlow House, Mayfield, Sussex, and Elm-grove, Ventnor, Isle of Wight, to Josephine, daughter of the late John Walter Hulme, Esq., Chief Justice of Hong Kong.

Willcoxson—Cagney.—At St. John's Cathedral, Hong Kong, by the Rev. W. R. Beach on the 3rd September, Mr. A. Willcoxson, to Miss Margaret Theresa Cagney.

Wilson—Hutchinson,—On the 22nd inst., at Holy Trinity Church, Walton Breck, by the Rev. Thomas Carter, John Simpson Wilson, of the Royals. Cheshire, to Mary Louisa, eldest daughter of the late T. P. Hutchinson. Esq., of Radcliff, near Bury, Lancashire.

Yardley—Stuart.—On the 8th inst., at St. Peter's Church, Dublin, by the Rev. J. J. McSorley, Thomas Yardley, Esq., 86th Royal Regt., to Minna Louisa, eldest daughter of Lieut.-Co. W. K. Stuart, C.B., Commanding 86th Regt.

DEATHS.

Barton—At Swatow, on the 9th August, John George, infant son of Capt. Z. Barton.

Fish—On the 16th inst., at the residence of Wilkinson Dent, Esq., 8, Fitzroy-square, Henrietta Barnes, wife of the Rev. John Dent Fish, of Whitchurch, Salop, aged 22.

Leggat—At Hong Kong, on the 3rd September, on board the steamship *Yang-tsze*, Mr Robert Leggat, engineer.

Lopez—At Macao, on the 16th August, Lieut. Pedro P. Lopez.

Pegado—At Hong Kong, on the 24th August, Manoel Marie Dias Pegado, Esq., aged 53.

Revel—On the 16th inst., at Turin, Emily, widow of Count Adrien Thaon de Revel, and daughter of the late Basil Montagu, Esq., Q.C. R.I.P.

Roza—At Macao, on the 21st August, Joze Roberto Araujo Roza, of apoplexy.

Sibthorp—On the 13th inst., of apoplexy, at St. Leonard's-on-Sea, Gervaise J. Waldo Sibthorp, Esq., M.P., of Canwick Hall, near Lincoln, and of Potterills, Herts,

Skene—On the 23rd Sept., on board the P. and O. steamship *Simla*, on his homeward voyage from Ceylon, James Francis Skene, advocate, only son of George Skene, Esq. in his 20th year.

Stewart—On the 16th inst., at 17, Inverness-terrace, Kensington-gardens, Charotte Anne, the wife of Algernon Stewart, Esq., late of H.M.'s Ceylon Civil Service.

Taber—At Macao, on the 5th September, of consumption, Mr. George A. Taber, a native of Fairhaven, Mass., U.S.A., aged 31 years.

Woodward—On the 10th August, accidentally drowned in the Canton River, while in the discharge of his duties, Frederick Woodward, of the Marine Customs, the dearly loved second son of the late Rev. Charles Woodward, in the 19th year of his age, much respected by his friends, by whom his loss is sincerely regretted.

Wade—On the 21st inst., at Bath, Colonel Sir Claude Martine Wade, Kt., C.B., aged 67 much beloved and deeply amented.

COMMERCIAL REPORT.

CHINA—EXPORTS.

Shanghai.—Tea: *Black.*—Transactions in the leaf have again taken place freely at Hankow, and re-sales on this market and re-shipment for England of about 14,000 chests Oonams and Oopacks are reported during the fortnight at about previous rates. The settlement of 575 chests Fl. Pekoe at Tls. 39 to Tls. 38½, and 800 ½-chests Oolongs under contract is reported. Settlements to date are estimated at 55,600 chests against 9,390 chests at same period last season. Stocks about 12,500 chests of Oonams and Oopacks, 1,000 chests Hoo-chows, 1,500 old and common kinds, 900 chests new, and 200 chests Old Fl. Pekoe. Greens: There has been very little done, only 3,200 ½-chests China, and 1,120 ½-chests Japan kinds have changed hands, making to date 27,200 ½-chests and 6,650 ½-chests respectively, against 18,000 ½-chest China and 3,200 ½-chests

Digitized by Google

Japan last year to the same date. Prices are much as before. Stocks: Moyunes 1,300 ½-chests, Pingsuey 700 ½-chests, Hoochow 3,000 ½-chests, Japans 1,000 ½-chests, and at Ningpo about 25,000 ½-chests.

Foo-chow.—A large business has been done in Tea, as the teamen have shown much more desire to realise their stocks. Prices of the good flavoury and Souchong kinds have been fully maintained, but a fall of ½ to 1 tael took place in the lower grades about ten days ago; and, although settlements have since been made at somewhat irregular rates, this fall has, on the whole, been fully established. Sales since the 17th August are:—Congou, 21,000 chests and 13,000 half-chests at 7 to 25.5 taels, say for ordinary and broken leaf, at 7 to 12.5 taels ordinary—stock 30,000 chests. Good common to flavoury at 13 to 23 taels common, to 2d, better—stock, 47,000 chests. Souchong kinds at 23.5 to 25.5 taels flavoury—stock, 11,000 chests. Good and fine none. Total, 88,000 chests. Souchong, sales 2,800 chests at 18 to 38 taels for common to fine—stock, 7,100 chests. Oolong, sales 1,400 half-chests at 17 to 24 taels for fair cargo to fine—stock, 92,500 half-chests. Pekoe, sales 690 chests at 22½ to 45 taels for common to fine—stock, 1,800 chests. Scented Tea sales 5,760 boxes at 21.5 to 36 for fair to fine—stock, 2,000 boxes. Total arrivals and settlements of new season's Congou to date are:—Market teas 260,000 chests, sales 172,000 chests. Contract Teas 21,100 chests. Total 281,100 chests, against 310,800 chests last season.

Amoy.—There has been a very limited business transacted since last report. The *Mary Ross* sailed shortly after its despatch, closely followed by the British barque *John Bull*, both for New York. Since which the market has remained without animation. During the last week, however, settlements to some extent have taken place, with a view to loading the British ship *Miletus* for the States, and rather advanced rates have been paid on those ruling at the early part of the month.

Canton.—The market for Congous has continued firm, prices having advanced at least one tael, taking quality into account. The small stock remaining is firmly held. In Scented Teas a good business has been done, fine qualities being scarce and common plentiful. The stock of Canton Greens is very heavy. The settlements of the fortnight are reported as follows:—Congou.—6 chops of Oopacks at 29 to 33½ taels, and 10 chops of Oonams at 25½ to 28½ taels. Scented Teas.—6 000 boxes Orange Pekoe at 22 to 33 taels, and 12,000 boxes Caper at 18 to 30 taels. Canton Greens.—2,000 boxes Gunpowder at 18 to 22 taels, 400 boxes Young Hyson at 26½ taels, 600 pkgs. Hyson Skin at 16 taels, and 200 ten catty boxes Hyson at 23 taels. The unsold stock upon the market is stated at 16 chops country Congou, 1 chop Souchong, 1,000 pkgs. Oolong, 600 chests Flowery Pekoe, 3,000 boxes plain Caper, beside a large quantity of common Scented teas and of Canton-made Greens.

Raw Silk.—Shanghai.—The past fortnight's business has been on a larger scale than the late unfavourable accounts from Europe would seem to warrant. The bulk of the transactions have, however, been in barter for imports which were otherwise unsaleable, and the prices paid for the silk show no decline on last mail's rates. The few purchases for cash have, however, been at a small reduction for the lower descriptions, but best silks, both Tsatlee and Taysaam, have fully maintained their value. From the interior the supplies have been large, those from Ningpo are again becoming considerable, whilst from Japan the absence of arrivals has alone prevented an addition to the stock. There is an excessive stock on the market, and although the Chinese seem more desirous to make sales, yet it is singular how very firm they are in their demands. Exchange having declined, has assisted them greatly, but as there are some signs of an advance in the rate, they may shortly become more anxious to realise and accept a reduction, which will doubtless lead to a considerable business. The following is a computation of the settlements and exports, for the season commencing 1st July, with a comparison of the past two seasons, and of the unsold stock now and at the corresponding period of those seasons. Settlements, 18,130 bales for the present season, against 22,000 bales for 1860-61, and 15,930 bales for 1859-60. Exports, 12,960 bales for the present season, against 11,985 bales for 1860-61, and 9,733 bales in 1859-60. The remaining stock unsold being 18,000 to 20.000 bales now, against 3,000 to 4,000 bales same time last season, and 7,000 bales the season before. The following are the current quotations:—Tsatlees, No. 1, 460 to 470 taels per picul; No. 2, 430 to 445; 3, 390 to 420; 4, 360 to 380; 5 and com., 315 to 340; Tayasams, No. 1, 355 to 365; No. 2, 320 to 340; No. 3, 290 to 310; 4, 5, and com., 225 to 265; Yuenfu, 290 to 400; Haining, 290 to 360; Hongchow Tsatlee, 345 to 365; Hong Tsatlee (nom.), 370 to 380; Sewhings, 290 to 325; Laeyongs, 240 to 255; Throwns, Old Silk (nom.), 300 to 365; New Silk (nom.), 380 to 420. This mail brings 2,625 bales raw, 68 bales thrown, and 38 bales Japan. The vessels loading for London with silk on board are, *Assyrian* 691 bales, *Bullarat* 795 bales, *Pegasus* 154 bales, *Queen of the Ocean* 112 bales.

Canton.—The supply is scant, and the demand limited, being mostly for India. The settlements of the fortnight are reported at 60 piculs. The quotations are given as under:—Loonkong, $390 to $400; Kumchook re-reeled, $435 to $440; short reel, $390; Kowkong No. 3, $375.

Drugs, &c.—The following is the report of the Macao market for the fortnight. Cassia Lignea, sales 800 piculs at $14.90 to $15, which is lower; stock, 2,000 piculs—Cassia Buds scarce and wanted at $40. Essential Oils: stock large and demand very dull; sales reported only 20 piculs; the quotations are, Cassia Oil $210 to $215, Aniseed Oil $148 to $150. Star Aniseed, no settlements; stock 200 piculs, quotation $14.50. Galangal, no settlements; stock 700 piculs, quotation $3.80 to $3.90. At Canton, not a single transaction is reported; in fact, the trade in these articles has left the place.

CHINA—IMPORTS.

At Shanghai.—Deliveries are reported as—Shirtings (grey), 40,750 pieces; white, 3,600 pieces; T-cloths, 5,945 pieces; spotted and blue, 4,850 pieces. American goods—drills, 32,925 pieces; stock, 218,580 pieces. Sheetings, 1,450 pieces; no stock. Jeans, 2,660 pieces; stock, 5,140 pieces; brocades, 750 pieces; chintzes, 2,500; damasks, 50 pieces; handkerchiefs, 1,100 dozen. Woollens—Spanish stripes, 175 pieces; camlets, 170 pieces; lastings, 140 pieces. Velvets, 736 pieces. Metals are in large stock, and no demand; and the same applies to Straits produce.

At Foochow.—The reported sales are, 1,550 pieces, 7½ lbs. Grey shirtings at $1.85, 500 pieces 8¾ lbs.; white ditto, at $2.70, 1,700 pieces 7 lbs.; T-cloths at $1.83, and 2,800 pieces; lead at $9 to $9.20.

At Amoy the deliveries are—cotton yarn, 331 bales, stock, 81 bales; shirtings (grey), 750 pieces, stock, 12,600 pieces; white, 500 pieces, stock, 3,850 pieces; T-cloths, 4,150 pieces; no stock.

At Canton, the sales comprise shirtings (grey), 9,000 pieces; white, 1,450 pieces; cotton yarn, 250 bales, and a large stock; coloured brocades 250 pieces; damasks, 480 pieces; American drills, 2,445 pieces; T-cloths, 1,200 pieces. Woollens—Spanish stripes, 150 pieces; long ells, 250 pieces; lastings, 320 pieces. Metals, 1,000 piculs nail rod iron; 1,500 piculs of lead; 420 flasks of quicksilver; sandal wood, 2,800 piculs of Australian.

At Hong Kong.—Sales have been made of damaged goods at auction, and are reported as follows:—Cotton yarns, 450 and 250 bales; shirtings (grey), 12,000 pieces; white, 1,800 and 3,000 pieces; T-cloths, 19,000 and 7,000 pieces; American goods, about 100 bales; woollens—long ells, 500 pieces scarlet, and 1,000 pieces assorted; Spanish stripes, 300 pieces assorted; camlets, 340 pieces; lastings, 400 pieces and a few bales of damaged woollens. Metals, 200 pigs of lead; 300 piculs Malacca tin; quicksilver, 150 flasks; dull, and large stocks.

JAPAN.

Kanagawa.—The market reports from Japan are not later than given in our last issue.

HANKOW.

There is a steady and gradual improvement in trade at this port. The native inhabitants are regaining confidence and show more desire to do business. Ningchow was free from the Rebels, and supplies of tea from that district were expected. The only quotations we have received are:—7 catty grey shirtings, 1.9.9 taels; 6¾ do., 1.9.4. taels.; 5½ catty T-cloths, 1.4.5 taels; American drills, 2.6.5 to 2.6.9 taels; long ells, 7.5.6 to 7.6.3 taels; brown sugar, 4.1.0 taels. These are the only quotations for cash. In barter higher prices are obtainable, say from 2 to 4 mace more. The total settlements of tea up to the 26th ult. were 130 chops, and there were 15 chops on the market.

TIEN-TSIN.

The native traders were arriving from the interior to lay in their stocks of goods for the autumn and there had consequently been a good business done in manufactured goods, though at lower prices; stocks were diminishing, and if supplies from Shanghai and the South were not very heavy an improvement was expected before the frost sets in.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	5s. 11½d. to 6s. 0½d.	6s. 0¼d.
Ditto	3 ditto	...	...
At Foo-Chow-Foo (per dol.)	6 ditto	...	...
At Canton, At Hong Kong, At Macao	6 ditto	4 5	4 5½ to 4 5½
Ditto	3 ditto	..	..
At Singapore	6 ditto	4s. 4½d. to 4 4½	4 5 to 4 5½

At Batavia (guilders.)	6 ditto	..	

The exchange on India at Shanghai was 294 to 295 rupees per 100 taels, and at Hong Kong 216 to 218 per $100. Bar silver at Shanghai taels 11¾ per cent. premium, and Hong Kong 10 per cent. The current quotation at Shanghai for Mexican dollars was 75 3c., and the rate of exchange on Hong Kong was 26¾ per cent. discount.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN

SEASON 1860-61.

	From Shanghai.	From Foo-chow.	From Canton, Macao, and Hong Kong.	Total lbs.	SILK. Total Bales.

EXPORTS FROM CHINA.

Per Polmaise, from Shanghai, August 20, to London.—Tea, 889,191 lbs.; silk, 730 bales; cocoons, 35 piculs; wool, 88; silk piece goods, 1,825; shells, 374; curiosities, 25 packages.

Per Charlotte Ann, from Shanghai, August 22, to London.—Tea, 292,242 lbs.; silk, 555 bales; silk waste, 33 piculs; cocoons, 88; wool, 323; cotton, 8; hemp, 267.

Per Wynaud, from Shanghai, August 24, to London.—Tea, 535,074 lbs.; silk, 476 bales.

Per Ceres, from Foo-chow-Foo, August 26, to Melbourne.—Tea, 243,200 lbs.

Per Earl of Hardwicke, from Foo-chow-Foo, August 30, to Adelaide.—Tea, 247,800 lbs.

Per James Stephenson, from Foo-chow-Foo, August 30, to Sydney.—Tea, 445,100 lbs.

Per Niphon, from Canton, August 26, to London.—Tea, 742,300 lbs.; sundries, 186 packages.

Per Kelso, from Canton, August 30, to London.—Tea, 833,700 lbs.

Per Emeu (mail steamer), from Hong Kong, August 28, to London.—Silk, 2,476 bales. To the Continent: 216 bales.

Per Pekin (mail steamer), from Hong Kong, September 11, to London and the Continent.—Silk, about 2,800 bales.

EXPORTS FROM PENANG.

Per Gwalior, for London, Sept. 16.—Tin, 1,949 piculs; sugar, 2,707; black pepper, 722; white, 106; tapioca, 752; indiarubber, 277; rattans, 209; gutta percha, 131; gum benjamin, 50; rum, 10,847 gallons.

Per Victor, for London, Sept. 20.—Sugar, 5,991 piculs; tin, 827; black pepper, 431; rattans, 400; tapioca, 213; nutmegs, 182; mace, 45; gum benjamin, 74; putch leaf, 3; isinglass, 3; croton seeds, 2; sundries, 1 case; rum, 8,950 gallons; nutmeg oil, 144 bottles; essential oil, 168; mace paste, 60 lbs.

Per Rocket, to Boston, Sept. 19.—Rice, 735 piculs; tapioca, 145; white pepper, 25; cow hides, 317; mace, 20.

EXPORTS FROM MANILA.

Per Northern Crown to Liverpool: Hemp, 7,442 pls.; sugar, 192,851.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: Aug. 17, Wellington, Julia; 20, Magniperb. From Liverpool: 18, Little Edith; 23, Kate Carnie. From Shields: 18, Kremlin; 23, Drusus. From Swansea: 17, Ocean Child; 29, Joseph Peabody. From Cardiff: 18, Clemens; 25, Colinsburg. From Hartlepool: 27, Carausius. From Melbourne: 23, Santiago.

At HONG KONG, MACAO, and CANTON.—From London: Aug. 31, Lauderdale. From Liverpool: 31, Valdivia. From Southampton: 28, Haddington. From Hamburg: 29, Richard. From Glasgow: Sept. 19, str. Nankin. From Philadelphia: 30, Hankow, str. From Melbourne: Sept. 3, Flying Cloud. From San Francisco: 10, Challenge.

At MANILA.—From Liverpool: Sept. 2, Clementina.

At SINGAPORE.—From Cardiff: Sept. 13, Noordster. From Newport: 14, Energy.

SAILED.

From SHANGHAI.—For London: Aug. 20, Polmaise; 22, Charlotte Ann; 24, Wynaud.

From FOO-CHOW-FOO.—For London: Sept. 4, Napoleon III.; 5, Clara Novello, City of Carlisle. For Cowes: Aug. 23, Nemesis. For Sydney: 30, John Stephenson. For Melbourne: 26, Ceres. For Adelaide: 30, Earl of Hardwicke.

From HONG KONG, MACAO, and CANTON.—For London: Aug. 30, Kelso; 26, Niphon; 31, Oscar Vidal. For San Francisco: 30, Lucretia.

From MANILA.—For Liverpool: Aug. 27, Northern Crown.

From SINGAPORE.—For London: Sept. 6, Palmerston. For Liverpool: 5, Antilla. For Melbourne: 11, Heather Bell.

From PENANG: For London: Sept. 16, Gwalior; 20, Victor. For Boston: 19, Rocket.

LOADING.

At SHANGHAI.—For London: Assyrian, Ballarat, Mallard, Magna Bona, M. Dundas, Pegasus, Queen of the Ocean, Raleigh. For Liverpool: Wellington. For New York: Leichardt.

At FOO-CHOW-FOO.—For London: Britannia, Gauntlet, Romeo, Peterborough, Runnymede, Southern Cross. For Australia: Esmeralda. For Melbourne: Macao.

At AMOY.—For New York: Miletus.

At HONG KONG, MACAO, and CANTON.—For London: Foam, Sea Snake, Tinzel, Keepsake, Shand. For Sydney and Melbourne: Formose, Pamella, Samuel Fales. For Australia: Metaris. For San Francisco: Bald Eagle, E. Cushing, N. B. Palmer.

At MANILA.—For London: T. E. Lemon. For Liverpool: Cervantes, Luisita, Rosarito. For Cadiz: Concepcion. For Cork: John Mathie.

At SINGAPORE.—For London: Electric. For Liverpool: Greyhound.

At PENANG.—For London: Abul Medjid, British Queen. For New York: Samuel Appleton.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: Tea, £3 to £3. 10s.; silk, £4 to £5. The business of the past fortnight has been one of extreme dullness, which, it is expected, will continue until the various abuses by the Chinese authorities are done away with. In the coast trade hardly a charter has been made for some time, and the amount of unemployed tonnage is 32,661 out of 54,036 tons in port of all nations. The principal inquiry for tonnage is to convey rice and timber from Siam and Maulmain to Hong Kong, also to England and Continent, but only one vessel has accepted. The charters reported are—Imperial to Maulmain, England, and (or) Continent, at £4. 10s. and £5; Sea Belle on coast of China at $1,450 per month; Asia to Wanchew, $900.

At FOO-CHOW-FOO.—To London: £3. 10s.

At AMOY.—Few vessels now remain in port disengaged, and amongst the charters reported are, Nancy and Java for six months each at $850 and $1,340 per month respectively; Therese Auguste, for three months, at $900 per month.

At HONG KONG, MACAO, AND CANTON.—The rates to Great Britain have fully declined 10s., and to the United States nothing at all is doing. A dullness also prevails at these ports from the action of the Customs mercenaries; and vessels are daily arriving from the North, expecting to find employment. For California a fair business is doing, but American ships can be got for a very low price. The emigration to the British West Indies, it is expected, will be very large, but only British vessels are taken for this trade. The Keepsake is on the berth for London, at current rates, and Foam and Marco Polo from Foo-chow-Foo. Blohm to Channel, for orders, at £3. 12s. 6d. Prince of Wales, for the Cape, at £4. 10s. Maria Phillipine, to Ningpo, at $1,100 in full. C. L. Bevan, to Nagasaki, at $8 per ton. Hasty, to Nagasaki and back, at $4,100 in full.

At MANILA.—To London: Sugar, £3 to £3. 5s.; hemp, £4. There are no vessels available for freight to Europe, and the Cervantes loads hemp for Liverpool at above rate.

At SINGAPORE.—Nearly all the disengaged vessels have been taken up, and a good demand for ships of moderate size for various quarters continues. The charters are:—Xulla, from two ports in Java to a port between Havre and Hamburg, at £4. 10s., or from Padang, at £5.; Alice, to Shanghai direct, for $5,150 in full; Kangaroo, to Bankok and back, for $2,800 in full.

At PENANG.—To London: £3. 15s. to £4. 5s. The Greyhound is shortly expected from Singapore, to fill up for Liverpool, with a cargo of rice, ex American ship Troy.

CASUALTIES.

The Santiago, from Shanghai, arrived at Hong Kong, on the 10th Sept., having encountered a violent gale, on the 30th and 31st August, from N.E., veering to E. and S.E., in which she lost several masts and sails. At one time she was expected to be blown on shore, the water shoaling so fast.

The Cruizer, from Swatow to Shanghai, was found on the 2nd Sept., by the Santiago, with nothing standing but the foremast. She had 62 Chinese coolies on board, and was supplied with bread and hands to assist rigging jury masts. The Cruizer took 8 men (out of some 200), from a raft which had been made from a junk that foundered. Six of these were transferred to the Santiago.

The Hilda Charlotte arrived at Hong Kong on the 7th Sept., having fallen in with the typhoon, and obliged to put back from her passage to Tien-tsin. She lost her fore and top masts, and was hove over on her beam ends for two hours. She reports seeing the Sing Wat totally dismasted in the same breeze.

The Maria, from Macao to Bankok, also put back on account of the heavy weather, totally dismasted.

The Kim-po-Sing (Siamese) was found on 31st August in the typhoon, with a crew of 47 men, which were brought into Foo-chow-Foo, by Esmeralda.

The John W. White also encountered the typhoon, and about one-third of the cargo was hove overboard, the remaining portion being put on shore, and will be sold by auction. She lost all the spars, had the decks swept, and is a complete wreck, and will most probably be condemned.

The Imperieuse, with Sir Hercules Robinson and the Admiral on board, got aground on the 1st Sept., on Cape Sagimi. The Ringdove took the Governor and Admiral on board, and the Imperieuse, by throwing her guns, shot, and coals overboard, was, with the assistance of the French transport Dordogne and some gunboats, got off again, and all her guns recovered. She is reported as not having sustained the slightest damage.

Several other ships have also been more or less damaged, amongst which are the:—Rajah of Sarawak, John Stephenson, loss of fore topmast, &c.; Star of the North, main mast and mizen topmast gone; Wilhelmina, loss of masts and sails; Georgiana, who will have to dock; Orestes, totally dismasted and leaking badly; Sirius, lost her sails; Elisa, lost three anchors; Jupiter, loss of all sails and masts.

PASSED STRAITS OF SUNDA.

From England and Continent to China: August 27, Tartar; 28, St. Louis; September 3, Cleveland. From New York: 2, Sam Russell; 7, Elmina. From China to England and Continent: August 27, Northfleet; September 6, Egmont. To New York: September 10, S. H. Snow. From Singapore to England and Continent: August 29, Burnside. From England and Continent to Singapore: 27, Xulla, Electric; 28, Richard Thornton, Wilhelmina Maria; September 2, Noordster; 3, Energy; 13, Otto. To Batavia: August 28, Weltevreden; September 2, Maria Anna; 4, Diligence. To Anger: 7, Breedeneck. From Batavia to England and Continent: August 26, Sarah; 30, Staatsraad van Ewyck; 31, Omega; September 4, Roach. To New York: August 28, St. Dacotah. From Manila: August 30, Wild Gazelle. From Melbourne to Anger: 27, Huzzar. To Batavia: September 3, Borneo.

Continental Intelligence.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

St. Petersburg, Oct. 16.

It is now understood that the Emperor will not return for the present to this city, and that the Empress will pass the winter at the beautiful palace of Livadia, in the Crimea, both on account of the mild climate of that part of the Russian dominions, and on the score of economy. The saving effected by such an arrangement must indeed be very considerable, when one reflects that the number of the officials and others belonging to and dependent on the Court amounts to the enormous figure of thirty thousand. In the absence of the Court during the winter, a great number of festivities would of course not be given, and thus a great saving of expense be effected. Besides this, the higher classes of society require some respite, in order to practise a little wholesome economy after the enormous expenses to which they are subjected in keeping up their establishments and giving the festivities required of them by their position in society, and which many of the nobles sadly overdo, in a spirit of emulation, to the serious deterioration of their financial means. More than twelve thousand noble families that usually spend the winter in this capital, have now repaired to their country estates to look after their pecuniary affairs on the spot. This has already had a favourable result in sensibly lowering the price of house rent, which had risen to a fabuloun height. The great national social reform of the emancipatios of the serfs, which is now beginning to come into operation, makes it requisite for every one—both nobles and plebeians—to look about them and arrange their affairs for the future. It is well known that many extensive estates belonging to the aristocracy were in pawn, together with "the souls" living on them—many of them twice over. It is therefore but a natural consequence that by the Emancipation Act enormous losses will be sustained and have to be made good, thus creating a painful reaction on the manufacturing and commercial interests.

Accounts received here from Peking reach down to the 24th of August, and were brought by special courier from the Chinese capital to Tomsk, with which we are in telegraphic connection. The most important intelligence, of which you will already have heard, is the death of the Emperor of China, or Bogdo-Chan, according to his Mandschurian title, and the publication of two Imperial edicts in the *Peking Gazette*. The first of these appoints the eldest son of the deceased as heir to the throne of the Celestial Empire, and the second nominates a sort of Regency or Council—as the young Emperor is not of age—during his minority. This Council is composed of the eight following nobles:—Ssai-yuan (Izin-wan), Duan-hua (Tchen-zin-wan), Ssushun, Zintow, Muin, Kuan-huan, Doo-han, and Ziao-yuin. The Emperor's brother, Prince Kung, does not figure in this list. All business is suspended in the Chinese capital for the cea of twenty days, according to the custom of the country. No disturbances are reported to have taken place.

The Russian corvette *Rowik*, bearing the flag of Rear-Admiral Popow, has left Cronstadt on a voyage round the world. The command of the corvette is entrusted to Captain Lieutenant Skryplew, who has orders to await in an English port the arrival of the rest of the squadron, which is fitting out as expeditiously as possible in order to get away before the winter sets in, as we have already had some sharp night frosts. The squadron is to proceed in the first instance to the east coast of Siberia, and will be absent for three years.

According to the opinion of the *Russian Invalide* the Chinese Empire is approaching the period of its final dissolution, and its days are numbered just as much as those of Turkey. Experience of the past teaches us that the former great empires of the world fell to pieces in consequence of the march of civilisation, and their presumption in thinking they had arrived at the highest point of development of the human understanding. China stood still whilst the rest of the world was making progress, and has thus fallen behind the civilisation of Europe, but its regeneration will not be impeded by religious fanaticism, as is the case in Turkey, and it is therefore to be hoped that European manners and customs will find a fruitful soil in China.

Colonel Romanow, of the Imperial Engineers, who lately published an interesting article in the columns of one of your contemporaries on the proposed telegraph through Siberia to America, was lately at Hamburg, where he ordered some more river steamers for the Amoor of Messrs. Godeffroy and Son, and then proceeded to Berlin to purchase telegraphic apparatus of Messrs. Siemens and Halske of that city, which will all be sent out together by Messrs. Godeffroy's vessel *Cesar and Helene*, now loading at Hamburg for Nicolayefsk on the Amoor. Colonel Romanow intended to proceed to North America to study the system of telegraphs and the latest improvements in that branch of science in the United States, as well as with a view of making some mutually favourable convention in connection with his grand proposal for establishing telegraphic communication between Europe and America, *via* Asia, but, in the present very unsatisfactory state of affairs in the United States, he has postponed his visit to a more convenient period.

Recent accounts from the Amoor state that an expedition is being organised for the purpose of proceeding next summer from Port Zincraine to explore the Arctic Ocean, and especially with a view to re-find the land discovered by Captain (now Admiral) Wrangel, forty-five years ago, but which has never been seen since. The object of the expedition is entirely scientific.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Amsterdam, Oct. 23.

Of course the great topic of the day in this city centres on the King of the Netherlands' visit to the Emperor of the French and his subsequent interview with Leopold King of the Belgians. The programme of the journey, as arranged beforehand, was observed by the King with his usual punctuality and military precision. With only a small retinue, consisting of Mr. F. L. de Kock, director of the King's private cabinet; Count J. M. van Lynden, H.M.'s principal aide-de camp and head of the military department of the King's household; Younker C. H. F. du Monceau, W. C. Baron van Snouckaert, van Schauburg, and J. H. van Capelle, ordinary aide-de-camp. His Majesty left the Hague at two o'clock in the morning of Saturday, the 12th inst., and passing through Rotterdam, reached Cologne at 9 A.M., and Jeumont, the French frontier station at 2 P.M. Here he found the Imperial railway saloon carriage waiting for him, which conveyed him by special train direct to Compiegne, where he arrived at half-past five the same afternoon. The Emperor received his Royal guest at the railway station, and the meeting is described as extremely cordial and satisfactory. The Emperor was dressed in a general's uniform, with the badge and riband of the Luxemberg Order of the Crown of Oak, out of compliment to his guest, whilst the King, who also wore a military uniform, displayed over it the insignia of the Legion of Honour. From the railway station their Majesties drove in the same carriage to the Palace of Compiegne, where the Empress, accompanied by the Imperial Prince, and surrounded by the ladies and officers of the court, received the King at the foot of the magnificent double staircase. In the evening there was a grand banquet, shortly after which the King, who was somewhat fatigued with his journey, retired at a rather early hour. The next day (Sunday) the King spent very quietly. He took a long walk in the forest, and inspected with great interest and very minutely the stables, kennels, flower-garden, greenhouses and park, and at his particular wish, there was but a small party at dinner in the evening. On Monday the principal part of the day was taken up by a grand stag hunt in which the Empress took part in an Amazonian riding habit of green and gold. On Tuesday the party went to Paris, inspected several of the public buildings, dined together at the Palace of the Tuileries, and in the evening honoured the Italian Opera with their presence, where they witnessed the performance of Rossini's opera "Il Barbiere di Seviglia," in which the principal characters were sustained by Mario and Signora Alboni. Wednesday was a comparatively quiet day, but Thursday was a rather fatiguing one. As early as half-past seven in the morning, three Imperial carriages, each drawn by four splendid horses, drove up to the hotel of the Netherlands Embassy in Paris—where His Majesty had passed the night—under the orders of Count Nieuwerkerke, the Director-General of the Imperial Museums, who had come to take the King to Versailles. Notwithstanding the early hour, the King had breakfasted and was ready to start on the arrival of the carriages, and they set out at a brisk trot, proceeding through the Bois de Boulogne, Neuilly, and St. Cloud. On arriving at Versailles at half-past eight, the King inspected the magnificent collection of paintings in the celebrated His-

Digitized by Google

torical Picture Gallery, which deeply interested him—as he is known to be a profound connoisseur of paintings—and he contemplated for a long time the battle-pieces representing scenes in the wars between Louis XIV. and the Dutch. At a quarter past eleven the beating of drums and the turning out of the guard announced the arrival of the Emperor, and the two sovereigns had an interview in the Long Gallery, overlooking the garden and basins. They then had luncheon, which was enlivened by the splendid band of the Artillery of the Imperial Guard. After tiffin they sauntered down through the gardens to Trianon, where a shooting party *(chasse à tir)* had been previously arranged under the immediate direction of the Prince de la Moscowa (the son of Marshal Ney). This wholesale slaughter of game, first driven into a corner and then obliged to run the gauntlet of the fowling-pieces of the whole party in succession, was carried on for three mortal hours, and it will, therefore, not surprise your readers to learn that the result was no less than 1,326 head of game killed, of which mighty holocaust the Emperor and his Royal guest each killed about 150 head,—chiefly hares. A battery of the Guard-Artillery was then manœuvred for the inspection of the King, who was so struck with their efficiency, precision of movements, and soldier-like appearance, that he complimented the colonel in command and gave fifty of the hares he had just shot to the men for their supper. It created afterwards considerable amusement to see the Artillery march off the ground with the hares dangling from their rifled guns and saddle-bows. On the return of the Royal party to Paris it had become dark, when the Emperor returned to Compiegne, taking a cordial farewell of the King, who honoured his Ambassador with his presence to dinner. The King was expected to appear again at the Opera, and all due are rangements were made for his reception, the Royal Staircase being opened, and the officials in attendance; but the public were greatly disappointed to find he did not make his appearance, the more so, when it transpired that he had gone to the Theatre du Cirque to witness the performance of a piece called the "Siege of Peking," which, from the brilliancy of the decorations and the manner of its being got up for scenic effect, has become extremely popular, drawing full houses at every representation. On the 19th inst., the King took final leave of the Emperor and Empress at Compiegne, and in the evening arrived at Liege, where he was received by the King of the Belgians and the Royal family. On the following day the King returned to his dominions, and on the next he laid the first stone of the railway bridge at Zutphen, after which he repaired to his palace of the Loo, where he is expected to remain some time.

The *Nieuwe Dagblad*, a new journal that was launched at the Hague on the 1st inst., and amongst the proprietors of which is Mr. Rochussen, the late minister, contains a leading article on the King's journey to France, from which I translate the following extract:—"Holland is bound by no agreeable reminiscences to the Napoleon dynasty, any more than Prussia is. Without wishing to make any invidious remark, or to refer to former historical facts, we consider it our duty to state openly that our national sympathies are by no means in favour of a closer alliance with the French Empire. It was for that reason that the news of the King's journey caused a painful astonishment, and the question is universally asked—'What is the object proposed by it?' This question is neither improper nor disrespectful, for the House of Orange and the Netherlands are inseparably united, and whilst the journals of all Europe are busying themselves with the objects and result of the King of Prussia's visit to Compiegne, we may well be permitted to ask what the noble House of Orange has to seek there. If the King travels as a private individual, we have no right to make any remark about it; but if he goes to France in his public capacity as King of the Netherlands, and holds private conversations with the Emperor Napoleon, which sooner or later may affect the interests of this country, then the journey becomes a political act, for which the Ministers are responsible, and are bound to offer proper explanation. The question therefore is, in what capacity did the King pay a visit to France? For our own part, we are inclined to believe that it was as a private individual, not being accompanied by any of his Ministers, or other Statesmen." After going on to prove that the King, as a constitutional monarch, has no power or right to make any political arrangements without the advice and consent of his Ministers, the article concludes with these words:—"We flatter ourselves with the hope that the visit of the King to Napoleon III. will prove to be merely a personal act and a visit of courtesy, in which the affairs of this kingdom are not mixed up. We even go so far as to believe we are right in recognising as a wise precaution of Ministers the subsequent interview between our own King and the constitutional sovereign of Belgium, in order to escape the odium of having even listened to the ambitious plans of the Emperor of the French and his projects of aggrandisement, and for this very reason we applaud the far-sighted policy of bringing about this interview between the two constitutional monarchs, to disarm beforehand any insidious remarks and combinations that may be made on the King's visit to the Emperor of the French."

It appears that the important question of cutting the long-talked-of navigable ship canal from this city to the sea, through the narrow strip of land that runs up to the Helder, has been settled in a manner least expected; for whilst the Government has invariably refused to admit the principle of confiding the execution of so important a work to any private individual or company—a great number of projects and proposals from such having been received from time to time, and consistently rejected—considering that a work of such magnitude and importance to the trade and navigation of this city should be undertaken by the Government, and executed at the public expense as a vast national improvement, the public were rather disagreeably surprised a few days ago at the announcement that the King has granted a "concession" to a private individual—one Mr. J. G. Jaeger, of this city—for the construction of the canal, under very favourable conditions, and that His Majesty signed the document previous to his departure for the visit to France. The particulars are not yet fully known, but it has transpired that the Government grants the concessionaire an unconditional guarantee of 4½ per cent. interest on eighteen millions of florins—amounting to 810,000 florins annually—during the progress of the works, and till the completion of the canal. On the whole, however, it cannot be denied that the intelligence has made a favourable impression here, though it is to be expected that the people of Rotterdam will make a great cry out, and perhaps even enter a formal protest against it; as there is now every chance of this great national improvement being speedily executed, and a short and direct cut made to the sea at its nearest part, thus saving a distance of nearly a hundred miles, to say nothing of the danger and expense of the navigation hitherto, in having to make so great a circuit to approach this city for all vessels coming from the westward, including the homeward-bound East Indiamen.

Owing to a long prevalence of rough weather off this coast, the diving operations for the recovery of the treasure and guns of the frigate *Lutine*, wrecked on the island of Tershelling nearly a hundred years ago, and which is being performed by a company formed for that purpose, have been interrupted from the 24th of June last to within the present week, when they were recommenced with considerable success. The workmen are furnished with Mr. Heincke's diving apparatus, and are thus enabled to remain under water for three or four hours at a stretch. They have ascertained not only that no further increase of sand has taken place from the late gales; but that on the contrary several parts of the wreck are now exposed, which were previously concealed by the accumulation of sand. Three large pieces of rusty iron were secured and drawn up by the tackle, as well as some metal guns, a heavy foot-block and a Spanish hammock, as well as a few silver coins. The diving apparatus in use fully answers the expectations entertained of its practical utility. The operations were carried on for several days successively, when it again came on to blow, and the diving-vessel was unable to remain longer at work on that exposed coast and has returned to the port of Terschelling, where it will remain till the weather again moderates.

I regret to state that the potatoe disease extends its ravages more and more, so that in many districts the crop this year is a complete failure, and the price of this useful vegetable has sensibly risen, to the great alarm and discomfiture of the poorer classes of the inhabitants. Already large quantities have been sent to this country from Germany, both by railway and water conveyance, and further supplies will no doubt arrive before the winter sets in. It is a singular fact that the only description of potatoe not affected by this disease is a new sort called *Zeeuw Jannen*, grown from roots imported from America about two years ago. They remain in a perfectly healthy condition, even in the same ground with

Digitized by Google

potatoes attacked by the blight, and are consequently in great request both for consumption and planting out.

The Netherlands Trading Company has chartered the following nine vessels to load cargoes of colonial produce in Netherlands India for the undermentioned ports :—

Amsterdam—Cornelia, Capt. J. H. Wit.
„ Mathilde, Capt. F. H. Groote.
„ Ortelius, Capt. J. H. Feckes.
„ India Packet, Capt. G. Diepering.
Rotterdam—Cornelie Anthonie, Capt. R. J. Reynders.
„ Jannetje, Capt. D. Blockziel.
„ Johannis Ludowyk, Capt. A. H. de Waal.
Middelburg—Marinus Willem, Capt. P. van Duyn.
„ Zeepaard, Capt. T. Tjebbes.

As recompense for good services performed in the expedition to the South and North Coast of Ceram from September to December, 1860, the King has conferred the Knighthood of the Order of the Netherlands Lion on Capt. C. V. Zwaanshals, R.N., and the Fourth Class of the Military Order of Willem on G. N. Bout and H. Tissot van Palot, both First Lieutenants of Infantry, and a sword of honour, with the inscription, "Royal acknowledgment of unimpeached bravery," to Colonel D. L. de Brabant, of the E.I. Infantry. It is further ordered that honourable mention be made in order of the day to all regiments at home and abroad of the following :—First Lieutenants R.N., Messrs. A. Droukers and H. A. Rappard ; Messrs. J. A. Greve, K. O. van de Veen, and N. A. de Vries, Second Lieutenants, R.N. ; Major K. G. Fritze, of the Infantry ; Capt. A. S. Hageman, Royal Engineers ; J. P. van Eysden, First Lieutenant of Infantry ; J. P de Broes, second Lieutenant of Infantry ; and a number of non-commissioned officers and privates.

The King has been pleased to confer the following distinctions on the undernamed gentlemen in Netherlands India :—C. F. Goldman, Governor of Molucca, to be Commander of the Order of the Crown of Oak ; W. A. Duvelaar van Kampen, Assistant-Resident of Saparoea and Haroekoe, and A. P. van Leeuwen, Assistant-Resident of Hila and Laricke, to be Officers of the same Order ; and, finally, Mr. T. H. der Kindere, member of the Supreme Court of Justice in Netherlands India, to be Knight of the Order of the Netherlands Lion.

By Royal decree of the 13th of October (No. 76) the corvette *Prince Maurice of the Netherlands* is ordered to be commissioned on the 1st of November at Vliessingen for general service, and the steamer, *De Linge*, at Helvoetsluys, on the same day, for the East India station. Captain-Lieut. H. Kemper is appointed to the command of the former, and First-class Lieut. P. M.van der Haak to that of the latter vessel. Twenty-seven naval cadets are ordered to join the *Prince Maurice* for practical instruction during her first cruise.

The frigate *De Ruyter*, which has been lengthened and converted from a sailing ship into a powerful steamer, was relaunched last week with complete success at the Royal Dockyard at Helvoetsluys, in presence of a large assembly of spectators.

On the 14th inst. the examinations of non-commissioned officers for commissions in the E.I. army commenced at the Hague under the presidency of Major-General Hardenberg. Eight non-commissioned officers of the 2nd Regiment of Infantry passed their examination, and will shortly be posted to different corps in India.

H.N.M. steamer *Bromo*, Captain-Lieutenant Brutel de la Rivière, which sailed on the 1st inst. for the East India station, was spoken on the 10th October in 50 deg. 20 min. north lat., and 1 deg. 58 min. west long., by the Dutch ship *Alcyone*, Captain Haake, arrived at the Texel from Batavia. All well on board.

The Dutch steam-corvette *Princess Amelia*, Captain-Lieutenant A. J. Kroef, which sailed for this country from Batavia on the 15th of August last, has not yet arrived, but as she will probably make a large part of her voyage under canvas no fears are entertained for her safety, and she can hardly yet be considered as overdue.

PASSENGERS SAILED.

Per *Australie*, Capt. Jochems, from Amsterdam, to Batavia : Mr. and Mrs. C. Boxmeyer and two children, Mr. and Mrs. J. H. Boxmeyer and four children, Mr. W. H. van Hallten, Mrs. C. Walter, born Blomlet, Miss A. Sangster and Miss M. E. Fynje, Miss E. and C. Antin ; two Javanese native servants.

Per *Telanak*, Capt. Popken, from Amsterdam, to Batavia : Messrs. W. F. Brandon, F. W., J. F., and K. D. Michel.

Per *Nederland*, Capt. Gaaf, from Amsterdam, to Batavia : Mr. and Mrs. Verwoert and two daughters, Mrs. Naula and daughter, Mrs. E. Dorrepaal-Coenen : one Javan native servant.

Per *Landbouw*, Capt. Kleinenberg, from Brouwershaven, to Batavia : Mr. and Mrs. Kroon, two children, and two servants ; Mr. and Mrs. Brevet, Mrs. and Miss Greiche, Mr. and Mrs. Jacobson, Messrs. Baddingh, Groeneveld, Nonni, J. Prins, J. Op de Laei, Gribling, de Mey Mellenie, Nichaut, Gobins, de Bruin, van Loenen, van Ginkel, Welffer, Sablairolles, Beyerinck, van Ham, van Eyk, Zembsch, Schoel Meyer, Weers, de Koch, van Rhyn, J. G. Koker, and Mrs. Bauer.

Per *Louise*, Capt. Buys, from Nieuwe Deep, to Batavia : Mr. and Mrs. Kuylenburg, the ladies A. S. and C. M. Dammers, Messrs. Schamper, Baninier, and Henning, Second Lieutenants of E. I. Army : de Grys, de Wilde, van den Berg, J. G. Spanjaard, Stoets, and Schaefer.

Per *Henriette Gertruda*, Capt. de Boer, from Nieuwe Deep, to Sourabaya : Mr. and Mrs. Eisinger, Quartermaster de Han.

Per *Cornelia Hendrika*, Capt. van Stralen, from Nieuwe Deep, to Hong Kong : Mr. A. Pagedas.

PASSENGERS ARRIVED.

Per *Burgemeester van Reenen*, Capt. van de Maer van Kuffeler, at Rotterdam, from Smgapore : Mr. Bayard.

Per *Jason*, Capt. Lammerts van Bueren, at Brouwershaven, from Padang : Mr. A. Gevers, Miss Home and a child, a Java servant, and twelve naval and military invalids.

Per *Alcyone*, Capt. Haacke, at the Texel, from Batavia : Mr. and Mrs. S. Eerdmans, three children, and Javanese native attendants ; Messrs. J. Baart de la Faille, J. Jacob, and C. Olie, Miss Vader.

Per *Johanna Maria*, Capt. Wilhelmie, at Brouwershaven, from Batavia : Mr. J. H. Querin, jun.

Per *Adriana Petronella*, Capt. Annockes, at Brouwershaven, from Batavia : Mrs. Tjarda van Starkenborg and child.

Per *Christina Helena*, Capt. Tjebbes, at Nieuwe Deep, from Batavia : Lieut. W. M. Visser, R.N., and Mr. C. Schaalje, medical officer.

COMMERCIAL.

Coffee continues in favour, and is a trifle higher than last post. The large deliveries of the fortnight go to prove that the demand is not of a speculative nature, but actually wanted for consumption as the dealers, in hopes of a fall at the last sale, had let their stocks nearly run out, and find themselves now obliged to renew them at the best price they can make. Good ordinary Java of clean taste is not to be had under 44 cents, which is 1½c. above sale prices. A cargo of 10,800 bags of Padang is arrived at Rotterdam, but not yet in the market.

Raw Sugar is looking up. There is a brisk demand for exportation, but hitherto the purchasers would not submit to pay more than previous rates. However, if the demand continues, stocks will be sensibly reduced, and importers will then insist on higher rates. At Rotterdam holders are more firm in their demands, which has caused the transactions there to be more limited than here. In the refined market ready goods are in request, but little is to be had, and even then an increase on former rates is demanded. A parcel of W and Z crushed has been sold here deliverable in January. Candy is getting scarce, and parcels offered for sale are rapidly taken for exportation to Northern ports before the close of their navigation. The imports and stocks of raw sugar in Holland are both considerably larger than at this time last year, the former being 103,250,000 kilogr. on the 30th Sept., against 86,500,000 kilogr. in 1860, and the latter being 18,125,000 kilogr. against only 6,250,000 kilogr. last year.

Rice commands an easy sale and the transactions have been large, although prices cannot be quoted higher than last mail. There are still some large orders in the market for exportation, and with the failure of the potatoe crop staring us in the face, holders are likely to further increase prices. Two cargoes of 18,000 bags Rangoon were placed at 7⅞fl. floating, to be sent on to their port of destination.

In Spices but little to report. A parcel of 1,302 bags brown pepper fetched at auction 21 to 22¼ cents ; black pepper is offered at 23c. ; Amboyna cloves, No. 2, is worth 21½ to 22c.

Stocks unsold in the Company's warehouses on the 30th of September :—

	1858.	1859.	1860.	1861.
Nutmegs, casks ...	333	269	240	318
Mace, do. ...	180	—	80	105
Cloves, do. ...	—	350	—	—
Cinnamon, bales ...	750	720	364	—

Tobacco in lively demand, and prices looking up. Java commands more attention, owing to the small stocks of American, and the difficulty of getting fresh supplies. A public sale went off as follows :—1,287 packages VDS, average 51½c. ; 287 bales BB, average 58½c. ; 1,539 bales BJCL, average 90½c. ; 49 bales GV KK, average 47c. ; 186 bales, average 28c. ; and 603 bales SBS, average 72c. All sold, and prices decidedly in favour of the sellers.

Indigo continues in favour. 185 chests of Java out of the late sales changed hands for exportation at 25 cents above the prices paid in the auction, and holders are not disposed to sell under 40 cents advance.

Cochineal in more request, as the sale prices were not so high in proportion as those of indigo.

Tin quiet. Some sales of Banca realised 70 and 70½fl.

Tea.—At the sales held here and Rotterdam the whole quantity (15,086 quarter chests, 15 eighths, and 1,094 twelfths at Amsterdam, and 10,110 quarters, and 749 twelfths at Rotterdam) found purchasers at improved rates. Since then a good many parcels have changed hands for exportation at a slight advance, and the market closes in a very firm and healthy condition.

Rattans.—Some large transactions are reported at very firm prices. One importer sold 13 000 bundles ; another, 6,463 bundles and 556 piculs.

Camphor calm.

Japan Wax.—Prices firm, but business limited.

A VISIT TO THE GREAT WALL OF CHINA.

The following interesting letter has been received at Berlin from an officer of the Prussian Expedition to the East, dated :—

His Prussian Majesty's ship *Arcona*, Harbour of Tchee-foo,
24th July, 1861.

On my return from an excursion to the metropolis of the Celestial Empire, I found the *Arcona* had left the poetical slimy coast of the mouth of the Peiho, and had gone on to Tchee-foo, with a view to taking in provisions as it affords a more easy communication with the shore, though it is but a small place, situated near Cape Shantung, so that I was obliged to follow her in an English steamer going to Shanghai, and found her after a two days' voyage, though not in the harbour, but behind a little island, at some distance off, where she was floating at anchor in company with our consort the *Elbe*, which had in the meantime arrived from Nagasaki. This place will probably become by-and-bye one of some importance, as it is the nearest good port to the mouth of the Peiho, but it now contains nothing remarkable, excepting perhaps its milk-white, soft stone, which is easily cut, and worked by the natives into bottles, caskets, candlesticks, and other articles—even flutes. The harbour is not often visited.

The roadstead is not so deserted as when we were here last time, for now we found more than thirty vessels, fourteen of which were under the Hamburg and Bremen flags, but as they drew considerably less water they were enabled to anchor at least five miles closer to the land than we could. Nevertheless we received frequent visits from the captains; and the old complaint of the unfortunate absence of unanimity in Germany formed a large share of our conversation.

In order not to give the Chinese further cause of offence, the ships were ordered to leave the Peiho, and on the 15th of July we proceeded to sea, but the next day altered our course; the *Elbe* was signalled to keep in our wake, and our captain informed us he was going to inspect the Great Wall of China, which comes down to the sea at no great distance from where we then were. Our astonishment and curiosity were only equalled by our joy at having an opportunity of seeing one of those wonders of the world of which our school books contain such wonderful descriptions. The next morning it came into sight. It begins close to the sea, with a ruinous fort on a gentle eminence, looking like one of our own German ruined castles, only the illusion was spoiled by the inevitable concave roof on a square tower which proclaimed its barbarous origin. From this point the Great Wall, with its numerous irregular towers and abutments, takes a northerly direction through a verdant and well cultivated plain. About ten miles from the sea rises a chain of mountains, over which the Wall is carried in zig-zags of different angles, till it disappears from view on the distant horizon. With the exception of what appeared to be two picturesque farm-houses near the ruined fort, there was no sign of human life or habitation; all solemn, silent, neglected, but grand. We had some difficulty in landing as a heavy surf was breaking on the beach, but as there was fortunately no wind stirring, we got ashore in safety, with only a little wetting. A little group of Chinese were assembled to witness our landing, and received us with their natural affability. Their whole demeanour showed us plainly they had seldom, perhaps never, seen Europeans before. We followed them to the above-mentioned farm-houses, which turned out to be nothing more than a guard-house for the Tartar cavalry picket stationed here to watch the frontier and give the alarm in case of an unexpected attack. The soldiers, of whom there were about twenty, received us as civilly as the peasants had done. They were tall, powerful, sunburnt men, with faces of a decidedly Tartar type, and all wore coats and trowsers of white linen, the peculiar boots of the Tartar cavalry, and low crowned straw hats with an ornament of red horsehair in a tuft hanging down. Their arms appeared to consist solely of a lance, and even that they do not carry about with them in a time of profound peace like the present. In the court-yard, however, stood their horses ready saddled and bridled, and in a very short time we saw two of the men mount and ride off in different directions probably to announce the fact of our landing to the authorities under whom they are placed. In a shady spot in an inner court the officers of the detachment were sitting calmly smoking their pipes. Their dress was similar to that of their men, and the only distinguishing signs of rank were the blue, white, and transparent glass balls they wore, and which marked them as Mandarins of the third, fourth, and fifth classes. They courteously invited us to be seated, and regaled us with tea and fruit. Our conversation was of course but very imperfect; still we managed to make ourselves pretty well understood. The Mandarins told us that European vessels come there but very seldom; but that they had seen Europeans at Tien-tsin and Taku. Perhaps they had even become personally acquainted with them in a disagreeable manner during the late war. Two of them had European watches in their girdle, and showed them to us with evident signs of pride and satisfaction. They were handsome silver anchor watches with second hands; but on examination of the works I could discover no name or place of residence of the maker. The Mandarins told us they are accustomed to buy those sort of things of the Russians.

After enjoying the friendship and hospitality of these men we took our leave of them and proceeded to the Great Wall, which was not more than a hundred paces distant. We entered the deserted courts of the ruined fort by a vaulted gateway, and then mounted the wall itself by a staircase in a good state of preservation. This Great Wall is now nothing more than a gigantic ruin; but even as such it strikes the beholder with astonishment and wonder. Its height differs materially in several places as it is carried alike over hill and plain, and varies from twenty to forty feet. I should think from what I saw that thirty-five feet was about the average height from the ground. The width of the wall in places where it was not in ruins I ascertained to be twenty feet, which would thus allow ten men to ride abreast of each other. But it must not be supposed that the whole of the wall is composed of solid masonry, as the latter is not more than five feet thick. The stonework on the southern or inner side appears to have been carried away to furnish building materials for the houses of the neighbouring towns and villages. The outer part of the wall rises about six feet above the terrace forming a parapet, through the openings of which the eye ranges over the verdant plains of Mandschuria. By far the greatest ornament of this imposing structure is the great number of square towers placed at intervals of two hundred yards, and jutting out from the line of wall, evidently built for the purpose of raking the space between them. The foundations of the wall consist everywhere of eight rows of massive granite slabs, while the super-structure is built of beautiful black bricks of great hardness. We wandered on the top of this surprising structure for four or five miles, and only saw one solitary native tending a herd of cattle at the foot of the wall. And so it goes on for fifteen hundred miles without intermission. What a gigantic conception to build such a wall of defence, and what immense labour and expense must the execution of it have cost! I may here add that this wonderful work is still in a condition to render it a formidable line of defence, even according to our modern knowledge of warfare. And who knows but what it may some day be turned into a railway, and thus be used for connecting distant places, as it was constructed for the very opposite purpose, viz., that of separating two kingdoms from each other.

We remained at anchor off the eastern end of the Great Wall of China for four days. In most European maps there is a town indicated at this spot, though the names differ. We could, however, discover no trace of its existence, but the name of the Tartar station is Nang-hae. Some of our party planned an excursion to the ridge of mountains inland before mentioned, and about seven or eight miles from the coast discovered a small town, but our friends the Mandarins who accompanied us would not allow us to enter it, giving us to understand that if we did so, they would be dismissed and severely punished. When we arrived at the foot of the mountains we abandoned the idea of climbing them on account of the great heat of the weather. The country we found, like every other part of China, admirably cultivated, chiefly with maize and the Ricinus plant, the oil from which latter is used in the native lamps. The plains of Mandschuria appeared to be neither so highly cultivated nor so densely populated as the country on the Chinese side of the Great Wall.

On our return from this excursion we weighed anchor and proceeded to this place, where we await the arrival of the next mail from Europe.

Literature.

The prospect for all book-lovers during the coming winter season is encouraging. Many works of great value and of general interest are promised in almost every department of literature. In our own field we have Mr. Swinhoe's "Narrative of the North China Campaign" (Smith, Elder and Co.), a review of which will appear in our next number; Mr. Hodgson's "Residence at Nagasaki" (Bentley), and the "Narrative of the China War, 1860," by Lieut.-Colonel Wolseley, published by Messrs. Longman. Mr. Kinglake's "History of the Invasion of the Crimea," so long looked for, is on the eve of publication; Lord Stanhope concludes his "Life of Pitt." "A Life of the Rev. Edward Irving."—the most eloquent of preachers, the most singular of men.—has been written by Mrs. Oliphant, and the "Private Diary of Richard, Duke of Buckingham and Chandos," promises to open up a new and strange chapter in the story of a melancholy life. Mr. Henry Chorley, whose friendship with Mrs. Hemans has made his name familiar, has written "Twenty-five Years' Musical Recollections." Mr. Charles Reade, who has more genius than taste, and whose literary pugnacity has been more than once curiously exemplified, has published a novel in four volumes, entitled "The Cloister and the Hearth," a book, so say the reviewers, "full of brilliant wit, of acute analysis of human emotion, of romantic narrative, and of veracious historical painting." We must confess, however, that although we have read "Sir Charles Grandison" and "Clarissa Harlowe"—which are about the longest, if not the best novels in the language—without feeling any weariness, Mr. Reade's work has deterred us by its magnitude. A new novel, in four volumes, is too much for any man in this busy age. We are glad to state that a new edition of Mrs. Barrett Browning's works is announced, and, better still, we are informed that the poems left by her in manuscript will be published at Christmas. By the way, in the present number of the *Edinburgh Review* there is an able, but not especially appreciative, article on Mrs. Browning. The writer has a keen eye for her defects, while he scarcely seems sufficiently alive to the splendour of her genius. He observes, however, very justly, that it is remarkable "that a mind trained as her's had been in the love of Greek literature should have been utterly devoid of the chaste, correct, and finished beauty of Greek art." In the same number of the *Edinburgh* is an extremely able article on Macaulay's fifth volume of the "History of England." *The Quarterly Review*, just published, is an admirable number of a periodical which, in spite of so many younger rivals, still holds its ancient fame. Nothing can be more appreciative or discriminating than the review of "Shelley's Life and Character," or more interesting to students and readers of poetry than the article on the "Growth of English Poetry."

A Register is kept of the addresses of all persons connected with the Far East, and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in China, Japan, Singapore, *and other parts of the* Far East, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, MONDAY, OCTOBER 28, 1861.

THE NEW RED SEA TELEGRAPH COMPANY.

We mentioned in our last number the proposal of Sir Macdonald Stephenson to form a new Company for the restoration of the Red Sea cable, and we showed that his plan was in every respect worthy of the support of the public. We have now to announce that a Company has been formed, called the "Telegraph to India Company (Limited)," under the auspices of this gentleman and several other well-known persons, whose names will be found in the prospectus in our advertising columns. The services of Sir Charles Bright and Mr. Latimer Clark have been engaged to fill the important office of Engineers. The Secretary of the old Company has also been engaged, and this implies a unity of action on the part of the old and new Companies which, we understand, will be fully carried out.

It appears that the Government have proposed to the old Company to convert the amount of their capital—£800,000—upon which they now pay a guaranteed interest of 4½ per cent., into an annuity, payable at the Bank of England, similar to other Government annuities; and a meeting will be held, on the 5th proximo, to procure the vote of the shareholders to enable the directors to accept this proposition. The matter having been already discussed, the meeting may be considered a matter of form only. On the settlement of this question, the new Company will commence operations on terms which may be considered highly favourable; and should they succeed in effecting the necessary repairs within the amount of their capital of £100,000, the Company will prove a most successful one, as the shareholders will possess property which cost originally £800,000. The following is an outline of the terms which the new Company have obtained the promise of from Government:—

"The Government agree to transfer the concessions, line, stations, and property of the old Company to the new Company free of charge, the new Company to endeavour to repair the line and work it when completed, beginning with the portion between Aden and Kurrachee.

"Possession is to be given so soon as two-thirds of the capital is subscribed and one-third paid up, a suitable vessel being despatched with not less than 200 miles of new cable on board.

"The new Company to be entitled to a clear dividend, out of the profits to 25 per cent. per annum on the money paid up, and the Government to have the power to repurchase the line on repaying the capital expended at the expiration of thirty years. Surplus profits are to be applied to reimburse the Government for the interest they have paid, and will have to pay annually upon the original capital expended, after which further profits which may accrue will be applied to the creation of a reserve fund.

"If the Company shall fail to restore or maintain the line in working order the Government are to possess the power of taking it into their hands again on repaying the capital actually expended by the new Company. Should the Government not exercise this right the Company are to be at liberty to dispose of the property to reimburse their outlay, the balance, after defraying actual expenditure, to be handed over to the Government."

COMMERCE WITH WESTERN CHINA.

We pointed out in our last number the impossibility of carrying on trade with Western China by the route 'through Northern Burmah and the Himalaya passes,' and we observed, that even if such an undertaking were practicable, the King of Burmah was scarcely likely to be propitiated to it by such an envoy from the Government of Calcutta as Dr. C. Williams. The truth is, that our Government is too well informed to expect any valuable commercial result from this mission; and, indeed, the only objects that can possibly be accomplished by it are of a political nature, unless, indeed, we except the geographical information which a sensible traveller will be certain to acquire. We intended to have proved, by a variety of carefully collected facts, in addition to those we have already brought forward, the geographical impossibility of opening up any trade with Western China, except by the direct and obvious route from Rangoon across Eastern Pegu; but we have received a letter from Captain Spry on the subject, so pertinent and suggestive, that we are glad to leave the topic in the hands of a gentleman who has devoted to it years of patient investigation. Captain Spry, as well as his son, are probably more familiar with the geographical details and commercial possibilities of 'Asia beyond the Ganges' than any men living. The letter which we now give *in extenso* does not, it will be perceived, exhaust the subject to which the Captain has requested permission to return on a future occasion.

(To the Editor of the *London and China Telegraph.*)

Sir,—In your paper of the 10th inst., you reprint, in a leader on 'Commerce with China across Burmah,' an article from the *Calcutta Englishman*, announcing the departure from Rangoon, in August, of Dr. Williams, of the 68th Regt., 'on a political mission to the King of Burmah, to negotiate for permission of way through Northern Burmah and the Himalaya passes, into the Chinese province of Yunnan.'

In your observations on that article, you showed that, with the exception of the portion of Asia occupied by Englishmen, the geography of that continent is imperfectly known to our countrymen there located; and as greater ignorance seems to prevail in this country, even among those who, from official position, if not education, should be better informed, I propose, with your sanction, to offer to your readers a few observations—the result of a long study of the subject—proving the impracticability of our commercially approaching Western China, from India, by any of 'the passes' of the extended Himalaya ranges, 'through Northern Burmah,' or by any other route than across the eastern part of our province of Pegu, and through the two Shan cities of Kiang-Tung and Kiang-Hung: the last of which cities, within 300 miles of our north-east Pegu frontier, stands on the Mei-kong (Kamboja) river, at a point where it is never less than 540 feet wide and 16 feet deep, though distant from the sea, as the crow flies, full 840 miles.

The Secretary of State for India, on announcing to the House of Commons, towards the close of the Session, the termination of our little contest with the petty Himalayan Rajah of Sikhim, eulogised the treaty the Rajah had been brought to enter into, as opening a road across his country for commerce between India and China; and so ignorant of Asiatic geography generally are the great body of England's representatives, that Sir Charles Wood's statement was received by them most approvingly as one of great promise for our commerce. My son, therefore, addressed a letter on the subject to the City Editor of *The Times*, which had place in the Money Article of that journal of the 6th of August. It was copied into other papers, the *London and China Telegraph* of the 15th of that month included. His intention was to have followed it with a succeeding communication, treating of other routes across the Himalaya ranges than the one he then wrote of; but absence from town having prevented him, your article above referred to leads me to undertake the task.

Since the Treaty of Peking, three missions, from very different distant points, have been patronised by our Home and Indian Governments, nominally for the object of promoting trade with Western China from our North Indian possessions. The one which went up the Yang-tse river to make its exploring way to Thibet, your late intelligence from China announces to have proved a failure. The one started from Simla, to proceed west through Thibet, to meet the mission from China at L'hassa, will, I predict, equally fail. While the third—Dr. Williams's—'through Burmah and the Himalaya Passes,' is geographically unintelligible. As in the nominally 'commercial' missions of Moorcroft, Stoddart, Conolly, and Burns—the three last of whom fell such sad sacrifices, in young life, to the *political* objects of their travels—the present exploring missions to which I have referred in connection with Western China have been sanctioned and started, we may be assured, not for commercial objects, but for political and military information, in case the events of that part of Central Asia should require the active display of our power north of the Himalayas, as in Affghanistan and the Crimea, to check the advance of Russia.

Both the Home and Indian Governments have at their command much more evidence than my son quoted in his letter to *The Times*, to prove that 'commerce' with any part of China proper *is* impracticable from any point of the entire North of India. At the same time we must suppose them to be somewhat informed of the present political proceedings of Russia throughout Central Asia, since these were not only discovered by the travels of our unfortunate countrymen in the north-west of India, as well as by Mr. Atkinson's researches further eastward, and by Count Ignatieff's superior treaty of Peking, but also by the now well-known proceedings of Russia's able envoys and agents at Khiva and Bokhara, at Ak-su, Kashgar, Yarkand, and Khotan; nay, even

Digitized by Google

at Leh and L'hassa. In concluding his official report of his mission to the Rajah of Bhootan, so long back as 1837, Pemberton wrote:—'That it is most desirable, on *political* grounds, to endeavour to ascertain the nature of the foreign relations of the L'hassa authorities, admits not of doubt. The information obtained during my residence in Bhootan would lead to the belief that the agents of Russia have found their way to that celebrated capital of Central Asia. With what views they have been sent may be safely inferred from the proceedings of that power in a still more conspicuous field further west. * * * The widely extended diplomatic influence of Russia may be moving in L'hassa the wires which agitate Nepal. As soon as my mission was known of, commissioners were sent from the Court of Katmandoo to L'hassa, to arrest its progress to the latter country; and the most decided and unqualified refusal was given by the Bhootan Government to my opening any communication with the authorities at L'hassa.'

And now that Russia, by her masterly acquisition from China of the vallies of the Amoor and Oussouri rivers, with the Pacific seaboard down to a commanding central position between Peking and Yedo, has outflanked China on the north-east, as by her onward progress at Kashgar, Ili, Tarbagati, &c., she has outflanked her Thibet and Tartar dependencies on the west, it has become the duty of our Government to gain a geographical knowledge of Thibet from west to east, and, if possible, to establish political relations not only with the authorities at L'hassa but also with their subordinates in all the out-provinces of Thibet: and *this* must assuredly be the real object of the present missions in that direction.

Every Oriental trader is aware that, from the earliest time a considerable traffic has been carried on between the plains of Hindostan and elevated Thibet by native traders, content, for small gains, laboriously and patiently to traverse the Himalayas by their different passes along the entire range. But to suppose that missions up the Yang-tse and from Simla to L'hassa and into Northern-Burmah, however desirable in a political and military point of view, will turn that native traffic with Thibet into a British-Indian commerce with China, or that the authorities who originated those missions have in view the creation of such a commerce, is idle in the extreme.

The ancient native traffic continues almost unchanged to our day; even from Iskardo in Balti, on the Upper Indus, on the west; to the mountain road on the east, running direct north from Gowatty on the Brahmapootra, to L'hassa, by Benkar on the Nurnjung and Sudungna on the Tsanpo. And as such a land traffic between Hindostan and Thibet cannot be destroyed by the discovery of a sea route between them as the ancient overland trade between Eastern Europe and India was destroyed by the finding of the route round the Cape of Good Hope, there can be no doubt that a sincerely pacific and friendly policy on the part of our Government towards the authorities and people of Thibet and of the intermediate Himalayan States, and towards their many wild mountain neighbour tribes, with a skilful improvement of the different lines of land and water carriage through our own territory up to eligible points of our frontier along the southern base of the ranges will, progressively, greatly increase that land traffic, under native conduct, with both Little and Great Thibet. But however pacific and commercial the policy of the Indian Government may now wisely become, however much the transit of goods may be facilitated throughout India by the improvement of the old roads and construction of new ones, and however greatly the traffic I have described as existing across the Himalayas may increase, the length of the route and the lines of wild lofty mountains throughout it must ever prevent its becoming a 'gold and silver road,' between India and China. And to satisfy your readers of this, I will in a future letter, with your permission, briefly describe the Himalayas from west to east, and portions of the Thibetan 'howling wilderness,' lying in the routes north of them and of Burmah.—I remain, Sir, your obedient servant, RICHARD SPRYE.

THE DUTCH TROOPS FOR BATAVIA.

Her Majesty's screw gunboat *Thrasher*, attached to the first-class steam reserve in the Medway, arrived at Chatham on the 26th instant, having on board the officers and Dutch troops from the Dutch transport *Constance*, which recently came into collision with a British ship off the Longships, the *Constance* being at the time bound for Batavia, with troops, as noticed in our last number. The *Constance* received such serious injuries in the collision that she was taken into Sheerness Dockyard to be repaired, the troops being transferred to the *Leonidas*, 42, which has been given up for their accommodation by the Admiralty during the time the *Constance* is under repair. The Dutch troops, to the number of about 150 men of all ranks, consisting of cavalry and light infantry, were, in charge of their colonel and several officers, permission having been freely accorded them by Vice-Admiral Johnstone, Commander-in-Chief up the Nore, taken to Chatham in one of Her Majesty's steam vessels, which was placed at the disposal of the officer commanding for that purpose.

MR. G. S. MORRISON, OUR SENIOR CONSUL IN JAPAN.

A portrait of this gentleman (of Shanghai Bund notoriety), appears in to-day's *Illustrated News*, with some remarks, and our readers will be amused at the imposition practised on that journal. We took exception at the time to his, and other juvenile appointments to Consular seats by a leap over the Vice-Consuls' chair with which they would have been fully rewarded until a few years had added that discretion and experience so indispensable to the holder of a Consulship, but we are at least glad to know that Government did not commit so gross an outrage on common sense, and incur so grave a responsibility as to nominate Mr. Morrison "Senior Consul in Japan," and eligible to relieve our Minister. The following is an extract from the notice alluded to:—

"At the commencement of our intercourse with a jealous, sensitive, and ignorant people like the Japanese, it was of some importance to the public interests that those to whom the conduct of affairs was in any degree intrusted should be men of experience and discretion. It was, therefore, complimentary to Mr. Morrison that, in anticipation of the rights we had acquired by the Treaty of 1858, he should have been offered the post of senior Consul in Japan, and to act as Chargé d'Affaires in the event of the death or absence of the Minister. This offer he accepted, though he had been only ten months in England and his health was far from re-established. He proceeded at once to his post, with the intention as soon as affairs should have become tolerably settled and in good train, to return to England and complete his unexpired term of sick leave."

Naval and Military.

The Russian Imperial corvette *Novik*, bearing the flag of Rear-Admiral Popoff, arrived at the Motherbank on the 16th inst., from Cronstadt, on her way to the Amoor and Pacific.

The *Chesapeake*, 51, screw steam-frigate, Captain Rochfort Maguire, was paid off at Sheerness on the 17th inst. The crew have been granted eight weeks' leave of absence. The following petty officers were awarded the silver medals and gratuities of the Admiralty for long service and good conduct:—Thomas Riggs, quartermaster; Thomas Dukes, captain of the forecastle; and Edward Hickman, chief gunner's mate. The *Chesapeake* is to be placed in the steam-reserve ordinary at Chatham; but, in consequence of the injuries she received to her keel by running on a sunken rock in the Red Sea, she will require very extensive repairs. A monument is about to be erected on the esplanade of Southsea-common to the memory of the officers and men belonging to this vessel, who were killed in action or died during the period of her recent commission in China. £100 has been subscribed by the officers and men of the ship, and to this sum a donation of £200 has been added by Admiral Sir James Hope, to carry out the object in an efficient manner. The Southsea Esplanade has already three monuments erected upon it—one to the memory of those of the army and navy who fell in the Black Sea and Baltic campaigns; one to the memory of Captain Sir William Peel, K.C.B., and the officers and men of the *Shannon* who fell during the Indian mutiny; and the last to the memory of a number of the officers and crew of Her Majesty's steamer *Trident*, who lost their lives by fever while serving on the West Coast of Africa.

The *Rifleman*, 8, screw steam-vessel, is now ready for the pendant, she having undergone a thorough repair at Deptford. She is, as already stated in a former impression, to be employed on the surveying service on the coast of China.

Lieutenant-General Sir Hope Grant, G.C.B., will leave England to assume the command of the Madras Presidency on the 20th of next month.

Major-General Windham has proceeded to India for the remaining term—about a year—of his period of Staff service in command of the Lahore division.

The *Orestes*, 21, screw steam-corvette, Captain Alan H. Gardner, got up steam and proceeded outside Plymouth breakwater to try her machinery and engines, under the inspection of Captain Astley C. Key, of the *Indus*. It appears that the trial did not prove satisfactory; but the defects in the machinery proved of a very trivial character, and she left Plymouth Sound for the Cape of Good Hope on the 17th inst.

Major the Hon. W. C. Yelverton, Royal Artillery, is *not* likely to obtain the promotion to the rank of Lieutenant-Colonel, to which, in the ordinary course, he would have succeeded on the death of General Dennis Herbert. Major J. C. Bartley, 5th Fusiliers, the next senior major, will therefore get the step of rank.

A meeting will take place in November, for the purpose of organising a national testimonial to Lord Herbert. The Duke of Cambridge will take the chair, and Lord Palmerston and many of our most distinguished men will be present.

The question of providing dock accommodation for the *Warrior*, and other war-steamers of the largest class, is stated to be under the consideration of the Government. From a survey which has been made, it appears that the tract of land lying east of Gravesend, between that town and Shorne battery, would afford the requisite facilities for the construction of docks of that character. There would be ample depth of water in the river opposite, while a straight channel exists from that point seaward, with sufficient water to allow the largest steamers to pass to and from the sea at low water, with sufficient width likewise to permit them to swing round at any point on this portion of the river, without causing obstruction to the ordinary traffic.

By the death of General Dennis Herbert a good service pension of £200 per annum was placed at the disposal of the General Commanding-in-Chief. His Royal Highness has apportioned £100 a-year to Colonel Pattle, C.B., 1st Dragoon Guards, and a similar sum to Lieutenant-Colonel H. A. Ouvry, C.B., late of the 9th Lancers, and Assistant-Quartermaster-General in Ceylon.

Government has determined to take preliminary measures for making our great naval seaports independent of Woolwich Arsenal in the manufacture of warlike materials, with probably the only exceptions of the rifled guns, and rockets and gunpowder. Eventually, at no distant date, the sub-arsenals at the out-stations will manufacture gun-carriages, cartridges, tubes, bullets, caps, fuses, and the multitudinous other materials and tools which now compose the really alarming and formidable lists of modern weapons of offence and defence.

It appears from the official return recently published that during the last three months nine new vessels of war have been completed at the various dockyards, viz., two at Chatham—the *Ganymede* and the *Rattlesnake*, the former of 400 horse-power and carrying 22 guns, and the latter of 400 horse-power and carrying 21 guns; two at Woolwich—the *Hyperion*, of 800 horse-power and carrying 26 guns, and the *Pegasus*, of 200 horse-power and carrying 7 guns; two at Deptford—the *Circassian*, of 200 horse-power and carrying 17 guns, and the *Portia*, of 80 horse-power and carrying 5 guns; at Jarrow, Newcastle-on-Tyne, the *Defence*, of 600 horse-power and carrying 16 guns; at Pembroke, the *Perseus*, of 200 horse-power and carrying 17 guns; and at Devonport the *Cynthia*, of 150 horse-power and carrying 11 guns. During the same time seven new vessels have been commenced, viz., at Portsmouth, the *Bruiser* and the *Cromer*; at Millwall the *Dromedary* and the *Tamar*; at Blackwall the *Orontes*; at Chatham the *Salamis*; and at Devonport the *Royalist*.

It is understood to be the intention of the Government to erect a breakwater on the coast of Yorkshire, at Scarborough, similar to that at Portland, the work to be performed by convicts sent from Chatham, Portland,

Digitized by Google

and the other convict prisons for that purpose; and it was, it is believed, in connection with this intention of Government that Lord Palmerston paid a visit of inspection to the breakwater at Portland.

The *Punjab* and *Assaye*, paddle-wheel steam vessels, the property of the late East India Company, having been rejected by the Board of Admiralty as unsuitable for the Government service, were yesterday paid off at Woolwich. The crews were discharged, and the vessels laid up in the Victoria Docks, to be disposed of by public competition.

The half-yearly inspection of the various regiments and batteries of Artillery stationed at the camp at Aldershott, is now completed. Major-General Lord George Paget, C.B., commanding the Cavalry Brigade, has inspected the 9th, 12th, and 16th Lancers, and also the 3rd and 4th battalions of the Military Train, although the latter corps has ceased to be attached to the Cavalry Brigade, and will in future report direct to headquarters. Colonel Gambier, C.B., commanding Royal Artillery at Aldershott, has inspected the 1 Battery Horse Brigade, and the F, G, and H Batteries, forming the head quarters of the 4th Brigade. All the batteries are now supplied with Armstrong guns. The 78th Highlanders have been inspected by Brigadier-General Brown, and the 1st battalion 60th Rifles by Brigadier-General Russell, C.B. In every case the inspections are stated to have been highly satisfactory, as was to be expected from the efficient appearance which the regiments have presented on the weekly field-days.

The Government, it is understood, have resolved to further increase the fortification of Shotly Point, on the opposite side of the harbour of Harwich, by the erection of a fort and extensive casemated barracks, at an outlay of nearly £30,000. A meeting of builders willing to contract for the work has been held, and Messrs. Lansdown, of Bedford-place, have been elected surveyors for taking out the quantities. Upon the receipt of their report the contracts will at once be entered into. The completion of these works is said to be be imperatively called for, the spot in question being unprotected and offering facilities for a descent upon the coast.

The *Java*, sailing frigate, 1,458 tons, built at Devonport in 1814, is being stripped of her copper and fittings in No. 1 dock at Portsmouth, for the purpose of serving as a target-ship to the *Excellent* in future iron-plate testing experiments, &c.

Her Majesty's screw troopship *Himalaya*, Captain J. Seccombe, returned from Corfu on the 13th inst., with invalids, &c., having performed the passage there and back in less than three days. She continued her route to Gibraltar and England yesterday, having on board Rear-Admiral G. R. Mundy, C.B., who is proceeding home on sick leave, a company of Royal Engineers, consisting of 1 officer, 93 soldiers 8 women, and 14 children, 49 naval and military invalids, and others.

In consequence of the numerous discharges of men of the Royal Engineers which have taken place for some time past at Chatham, chiefly on account of their unfitness for further service, that branch of the service is so considerably reduced that the corps is at present about five hundred men below its proper strength. Recruiting for the Royal Engineers is accordingly proceeding as briskly as circumstances will permit, but still the greatest difficulty is experienced in obtaining well-qualified mechanics, artificers, draughtsmen, surveyors, &c., of which class the corps is exclusively composed. By the sanction of the Duke of Cambridge volunteering from the regiments of the line for the Royal Engineers has accordingly been opened, and numbers of young men, some of whom are first-rate mechanics, have volunteered for the Engineers, where the pay and emoluments are considerably higher than in other corps. Notwithstanding, however, the numbers of volunteers who have arrived at headquarters, Chatham, several hundred men are still required to raise the companies of Engineers to their full strength, and the somewhat unusual course has, therefore, been adopted of opening volunteering in the cavalry regiments, a number of men of which branch of the service—chiefly from the 9th (Queen's Royal) Lancers—have already volunteered. Up to the present time the number of volunteers from cavalry and infantry regiments who have arrived at the head quarters of the Royal Engineers, Chatham, is close upon one hundred, the whole of whom receive the sum of one guinea on joining at Brompton-barracks. The volunteers as they arrive are attached to the 36th company.

An Admiralty circular has been received at Woolwich, announcing that a medal roll is in course of compilation of the officers and seamen who are entitled to medals and clasps for the late China war. In order to make the roll in question complete a list of the officers and men in each division of the Royal Marines is to be prepared, showing under the name of the ship in which each person served the number of clasps he claims in addition to the medal. Should any officer or marine have been engaged in any active operations against the enemy between the dates of the first and second periods of the China war—viz., the 27th of June, 1858, and the 31st of July, 1860, and not have been present either before or after that date, a separate list of such exceptions ought to accompany, but not be included in the roll to be forwarded.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, Oct. 15.

1st Regiment of Life Guards—Cornet and Sub-Lieut. William Hessey (Riding-Master) to be lieut., without purchase, vice the Hon. Cecil Duncombe, promoted.

2nd Life Guards—Cornet and Sub-Lieut. Frederick Stephens to be lieut., by purchase, vice Stewart, promoted.

Royal Horse Guards—Cornet Charles Fitzgerald Rushout Rushout to be lieut., by purchase, vice John Albert Craven, who retires.

6th Dragoon Guards—Cornet John Friar to be instructor of musketry.

2nd Dragoons—Surgeon Augustus Purefoy Lockwood to be surgeon-major.

5th Lancers—Cornet James Edwin Gwyther to be lieut., by purchase, vice John Henry Waterfall, who retires; Charles Edward Harene, gent., to be cornet, without purchase, vice Stephenson, appointed to the 1st Dragoon Guards.

14th Hussars—Cornet the Hon. Frederick Amherst to be lieut., by purchase, vice Claudius Buchanan Whish, who retires.

15th Hussars—Martin Farrington, gent., to be cornet, by purchase, vice Humphrys, promoted.

Royal Artillery—Capt. and Brevet-Major Miller Clifford to be lieut.-col., vice Samuel Cleaveland, deceased; Second Capt. and Brevet-Major John McCandie Campbell to be captain, vice Brevet-Major Clifford; Lieut. John Charles Francis Ramsden to be second captain, vice Brevet-Major Campbell.

The undermentioned Gentlemen Cadets to be lieuts., viz.:—

Campbell Boyd.	Henry Sheil.
Hon. Victor A. Yorke.	Charles J. M. Prother.
Theodore Carr.	

Scots Fusilier Guards—Ensign and Lieut. Francis William Garden Campbell has been permitted to retire from the service by the sale of his commission; the appointment of Lieut. and Capt. the Hon. Walter R. Trefusis as adjt., to bear date August 20, 1861, in lieu of September 17th, 1861, as previously stated.

2nd Regiment of Foot—Capt. Francis Lionel Octavius Atty to be major, by purchase, vice Brevet Lieut.-Col. Demetrius Wyndham Grevis James, who retires; Lieut. Henry Hurd Mulock to be captain, by purchase, vice Atty; Lieut. George Francis O'Grady, from 3rd West India Regiment, to be lieut., vice Claude Scott Stewart Pinkerton, who exchanges; Ensign Mello William Jackson to be lieut., by purchase, vice Muloch; Henry Hodges, gent., to be ensign, by purchase, vice Jackson.

7th Foot—William Daly, gent., to be ensign, without purchase, vice Henry William Loveridge, superseded for having broken his arrest and deserted.

8th Foot—Major and Brevet Lieut.-Col. Henry George Woods, from half-pay, unattached, to be major, vice Brevet Lieut.-Col. James Croft Brooke, who retires upon half-pay.

9th Foot—Thomas Farley, gent., to be ensign, by purchase, vice Wm. Queale, who retires, Huntley Bacon, gent., to be ensign, by purchase, vice Edward Collins, who retires.

10th Foot—Lieut. Percy Beale to be captain, by purchase, vice Brevet Lieut.-Col. W. Knox Orme, who retires upon half-pay; Ensign William Whitla to be lieut., by purchase, vice Beale; Gentleman Cadet Edmund James Young Armstrong, from the Royal Military College, to be ensign, without purchase, vice Whitla; Lieut. Ernest Archibald Berger to be adjt., vice Lieut. Beale, promoted.

16th Foot—Ensign Charles Henry Woodmass to be lieut., by purchase, vice James Henry Brabazon, who retires; Robert William Thompson, gent., to be ensign, by purchase, vice Alfred Seymour, appointed to the Rifle Brigade; Edward Julian Brigg Wither, gent., late Lieut. Northumberland Militia, to be ensign, by purchase, vice Woodmass.

18th Foot—Francis John Stewart Pringle, gent., late Lieut. Stirling Militia, to be ensign, by purchase, vice Macdonnell, appointed to the 19th Foot.

19th Foot—Lieut. James Robert Dalton to be captain, by purchase, vice L. Douglas Hay Currie, who retires; Ensign Augustus Mourant Handley to be lieut., by purchase, vice Dalton; Ensign George Albert Macdonnell, from the 18th Foot, to be ensign, vice Handley; George Fearon Thorp, gent., late Lieut. Dublin City Militia, to be ensign, by purchase, vice Edward Turner, who retires.

22nd Foot—Ensign Alexander George Fraser to be lieut., by purchase, vice Robert Arthur Denny, who retires; Michael Ryan Healy, gent., late Ensign Kerry Militia, to be ensign, by purchase, vice Fraser.

23rd Foot—Lieut. Edwin Utterton to be captain, without purchase, vice Gregorie, appointed adjutant of a depot battalion; Ensign Robert Albert Evans Hay, to be lieut., without purchase, vice Utterton.

24th Foot—Alfred James Godfrey, gent., to be ensign, by purchase, vice Charles Henry Fellowes, who retires.

27th Foot—Edward Austin Kenny, gent., late First Lieut. Tipperary Artillery Militia, to be ensign, by purchase, vice Cox, promoted.

31st Foot—Major George E. Brown Westhead, from a depot battalion, to be major, vice Charles James Orton Swaffield, who exchanges.

42nd Foot—Ensign George Thomas Carus Moore to be lieut., without purchase, vice Edward Arthur Elgin, deceased; Cornet Alan John Colquhoun, from the 16th Lancers, to be ensign, vice Moore.

47th Foot—Captain Savary, from the 49th Foot, to be captain, vice Taylor, not Lieut., vice Taylor, as stated in the *Gazette* of Sept. 27; Lieut. Ernest Peake Newman to be captain, by purchase, vice Charles Compton Abbott, who retires; Lieut. George Ourry Clarke to be captain, by purchase, vice Edward Croker, who retires; Ensign Dudley North to be lieut., by purchase, vice Newman; Ensign William Seton Dent to be lieut., by purchase, vice Richard Souter, who has retired; Ensign James Birney to be lieut., by purchase, vice Clarke; Samuel Lang, gent., late Lieut. East Kent Militia, to be ensign, by purchase, vice North; William Hare Larken, gent., to be ensign, by purchase, vice Dent; Richard Barclay, gent., late Ensign Clare Militia, to be ensign, by purchase, vice Birney.

59th Foot—Henry Richard Lacy, gent., to be ensign, without purchase, vice McMullin, promoted in the 13th Foot.

67th Foot—Lieut. Arthur Forbes Robertson to be captain, without purchase, vice George Turnour Horton Atchison, deceased; Ensign Alfred Adams Price to be lieut., without purchase, vice Robertson, Quartermaster Edward Pierson, from half pay, late Land Transport Corps, to be quartermaster, vice John Staniforth, who retires upon half-pay.

73rd Foot—Lieut. William John Lane Milligan to be captain, without purchase, vice Albert Henry Godfrey, appointed adjutant of a depot battalion; Ensign Arthur Hare Palmer to be lieut., without purchase, vice Milligan; William Gardon, gent., to be ensign, without purchase, vice Palmer.

84th Foot—Lieut. Hugh Pearce Pearson to be captain, by purchase, vice John Francis Sparke, who retires; Ensign John Henry Bradshaw Isherwood to be lieut., by purchase, vice Pearson; Ernest Edward Cator Nevile, gent., to be ensign, by purchase, vice Isherwood.

87th Foot—Ensign Charles Shortt Dicken to be lieut., by purchase, vice Smith, whose promotion by purchase, on the 6th of September, 1861, has been cancelled; Jonas Austin Dolmage, gent., to be ensign, by purchase, vice Dicken.

Digitized by Google

Rifle Brigade—Ensign Christopher Hatton Turnor to be lieut., by purchase, vice Arthur Ruck Keene, who retires; Charles Frederick Hulse, gent., to be ensign, by purchase, vice Turnor.

1st West India Regiment—Lieut. Herbert Gauntlett Panter to be captain, by purchase, vice James Alexander Fraser, who retires; Lieut. John McAuley to be adjt., vice Lieut. Panter, promoted.

3rd West India Regiment—Lieut. Claude Scott Stewart Pinkerton, from 2nd Foot, to be lieut., vice George Francis O'Grady, who exchanges; Albert Owen McDermott, gent., late Lieut. 2nd Lanarkshire Militia, to be ensign, by purchase, vice Gibb, promoted.

Cape Mounted Riflemen—Samuel Gun Raymond, gent., late Ensign Kerry Militia, to be ensign, by purchase, vice Wooldridge, promoted.

Royal Newfoundland Companies—Charles Andrew Irwin, gent., late Capt. Essex Rifles, to be ensign, without purchase, vice Gilmour, promoted.

Depot Battalion.—Major Charles James Orton Swaffield, from 31st Foot, to be Major, vice George E. Brown-Westhead, who exchanges.

Medical Department.—Staff Surg. George Thomas Galbraith, M.D., to be surg. maj.

Royal Military College.—Staff College—Cols. Napier and MacDougall should have been described as major and brevet-colonel in the *Gazette* of the 27th of September, 1861, not as lieut.-col. and brevet-col.

Chaplain's Department.—The Rev. W. R. Beach to be chaplain of the fourth class. The Rev. Charles J. Coar to be chaplain of the fourth class.

Brevet.—Lieut.-Colonel Philip John Bainbrigge, of the Royal Engineers, having completed five years' qualifying service in the rank of Lieut.-Colonel under the 8th clause of the Royal warrant of the 14th of October, 1858, to be colonel in the army. Paymaster, with the honorary rank of captain, John Biggs, 4th Dragoon Guards, to have the honorary rank of major, under the Royal warrant of the 27th of January, 1860.

The following officers, having served five years with the temporary rank of major-general, to have the honorary rank of major general:—Lieut.-Colonel and Brevet-Colonel Horatio Shirley, C.B., half-pay, 88th Foot Lieut.-Colonel and Brevet-Colonel Arthur Johnstone Lawrence, C.B., half-pay, rifle brigade.

October 16.

The Queen has been graciously pleased to give orders for the appointment of the undermentioned officer of the army of His Imperial Majesty the Emperor of the French, who was attached as French Commissioner to the headquarters of the British Forces in China, to be an Honorary Member of the Military Division of the Third Class, or Companions, of the Most Honourable Order of the Bath—viz., M. Charles Burrard Réboul, Chef d'Escadron au 6ième Régiment de de Houssards.

October 18.

Commissariat Department.—Assistant-Commissary-Gen. Edward Strickland, serving with the local rank of deputy-commissary-general in the West Indies, to be confirmed in the rank of deputy-commissary gen., vice Graham, placed on retired pay. Deputy-Asst.-Commissary-General James Long, to be Asst.-Commissary-Gen., vice Strickland.

THE NAVY.

PROMOTIONS.

Engineer.—E. G. Ashworth, additional of Cumberland, for the Fearless.

Assistant-Engineer.—First-class: D. Driscoll to the Firebrand.

APPOINTMENTS.

Lieutenants.—The Hon. C. D. R. H. Tracy and Clayton Mitchell to the Excellent; Noel S. F. Digby to the Warrior; B. L. Lefroy to the Fisgard; W. Moriarty and W. Tuffnell to the Britannia; Hamilton Dunlop to the Sanspareil; Count E. G. F. G. Visconte to the Conqueror; Duke D. Yonge to the Forte.

Masters.—E. C. Ball to the Collussus, for the Coastguard; E. M. Vincent to the Madagascar; William Mayes to the Mars.

Surgeons.—L. J. Monteith to the Aboukir; J. T. N. Bremner, M.D., to be superintendent of the Lord Dalhousie, convict ship; W. Patrick to the Porcupine.

Paymaster.—John M. Jefferson to the Impregnable, for disposal.

Master's Assistants.—F. H. Boys to the Sanspareil; R. Y. Hodges, H. E. Owen, F. J. Scott and John M'Farlane to the Nile, as supernumeraries.

Assistant-Paymasters.—W. H. P. M. Gillham (additional) to Victory; J. Campbell to the Cumberland.

Chief Engineers.—J. Ward (additional) to the Asia, for charge of the machinery of the Esk; W. Pilcher to the Asia, for the Vulture.

Engineers.—F. J. Taplin, confirmed in the Fisgard, as supernumerary; H. C. Jones to the Fisgard, of the Spiteful machinery.

Assistant-Engineers.—First class: J. Mather to the Fisgard, for charge of machinery of Investigator; George Hunt (B) to the Pembroke, for charge of machinery of Magnet; A. Lawton (acting) and John T. Harris (supernumerary) to the Indus; Peter M. Knight to the Doterel. Second-class: J. Plowright (acting) to the Megæra; C. T. Jordan, confirmed in the Cumberland, for the Bullfrog; J. Templeton to the Fisgard, as supernumerary; H. R. Gair and J. Laylands, confirmed in the Indus as supernumeraries; Samuel R. Brumage, John M'Pherson, and William Bremner, confirmed in the Doris; James J. Finch to the Industry; A. N. Miller (acting) to the Firebrand vice Jones.

The Armstrong Gun.—Sir William Armstrong has written a long letter to *The Times* denying most of the allegations made in the *Mechanics' Magazine*, and stating that the mischances which occurred on board the *Trusty* arose from special causes which can, he has no doubt, be "entirely obviated." "As to inquiry," he says, "I cannot have the smallest objection to it; but the fact is that the whole subject, even to the minutest detail, is, and always has been, subject to the control of the Ordnance Select Committee, who are fully acquainted with every particular. The *Mechanics' Magazine*, in consequence of this letter, has produce" another "strong article," and the efficiency of the guns is to be thoroughly tested.

THE MEDICAL STAFF IN CHINA.

The following letter has been addressed to the editor of the *Army and Navy Gazette*:—"Sir, A War Office letter, having retrospective effect from April, 1859-60, signed by Mr. Godley, was received by the senior Commissariat officer, Hong Kong, about six weeks ago, empowering the officers of the medical staff to receive their English pay and Indian allowances of their rank; regimental surgeons were to receive their present pay, no doubt considering that consolidated allowance and head money was a fair equivalent. The word "regimental assistant-surgeon" was not used; there was, therefore, some doubt whether the latter were entitled to their English pay and Indian allowances; it was decided that only staff assistant-surgeons were entitled; the consequence was, regimental assistant-surgeons, ranking as captains (six years' service), found staff assistant-surgeons, ranking as lieutenants (three years' service), in receipt of £10 per mensem more than they were, and that if the staff assistant-surgeon ranked as captain (six years' service) he received £20 per mensem more. There was a case in point when the troops were before Peking—a regimental assistant-surgeon of nearly one year's seniority to a staff assistant-surgeon (both ranking as captain); the former received £20 per month less than the latter, who was his junior. So much for the interpretation of Mr. Godley's letter by the senior Commissariat officer; it gives us the absurd fact that two medical officers may be serving in the same regiment under a surgeon, both of equal military rank—captains—one being senior to the other, that the junior of the two is entitled to receive £20 per mensem more than the senior, for no earthly cause save that he is called a staff instead of regimental assistant-surgeon. As Mr. Godby could never have entertained such a preposterous idea, I will leave the fact to speak for itself. A glaring case, and positively iniquitous, is at present in force in the two battalions of Royal Artillery; one, at Canton, is in medical charge of a regimental, and at the same time the senior, assistant-surgeon in China, ranking as captain (eight years' service); the other, Hong Kong, is in medical charge of a staff assistant-surgeon, and nearly the junior in China, ranking as lieutenant (four years' service). The former receives £10 per mensem less than the latter for the same charge; if the staff assistant-surgeon had two years more service, he would be actually receiving £20 per mensem more than the regimental, though he would still be his junior more than one year. The staff assistant-surgeon who is at present doing temporary duty with Her Majesty's 99th, receives £20 per mensem more than any of the regimental assistant-surgeons, though the staff are exempt from all regimental expenses, such as mess, band, &c., and a host of lesser monthly subscriptions.—I am, &c., A Regimental Assistant-Surgeon.—South of China, August 26, 1861."

CHEE YUI TANG.

This Chinese scholar, who came to England with Dr. MacGowan, and who has been engaged in teaching the Chinese language to the Messrs. Major and others, has, through the aid of Mr. Chapman of Messrs. Gregson and Co., commenced a course of instruction at the University College. His antecedents and connections are thus alluded to by the daily papers:—"He was at school five, and college six years, in what is considered the best city in China, Hang Chou. He passed two Government examinations—one among 8,000 scholars, at which he gained the third rize; and the other among 14,000 scholars, where he had the thirteenth prize. At the examination in the College he obtained the first prize. His father is the Governor of How Chou; his eldest cousin is now the fourth Minister of Po Ching or Pekin; his second cousin is now the Governor of Ton Hoo. The professor's Chinese title is Chou Yier, signifying Young Mandarin. He speaks fourteen dialects; is thoroughly acquainted with the Nan Ching and Poching, two Mandarin languages. He has taught seven young men the Mandarin language; six have gone to China, and one is still studying with him. He has come to this country for the purpose of learning the English language, manners, and customs and gaining information necessary for promoting the most friendly relations between the Governments of China and Great Britain. The professor is a native of Ching Wha, and is twenty-eight years of age. He was introduced to his class at University College by Mr. Gregson, M.P."

MILITARY ALLOWANCES IN CHINA.

Writing on the proposed withdrawal of some of our troops from Tientsin, the *Army and Navy Gazette* stated that our forces there obtained Indian pay and allowances. In reply to this assertion, Colonel Dunlop has written the following note to the editor of that journal:—"Sir,—You seem to take it for granted that Her Majesty's European troops whilst serving in China with Indian troops must necessarily draw Indian allowances. What is the fact? In the year 1857, when Native and European troops were sent from India to China, I applied to the Secretary of State for War for authority to draw Indian allowances for Her Majesty's troops then in China. This was decidedly refused. I next applied in my own case, as being actually in command of a mixed force of Her Majesty's and East India Company's troops. This was also refused. When I left China (from ill health) in the summer of 1858, Her Majesty's troops did not get Indian allowances. It is true that since that time a sum, stated to be six months' Indian allowance, has been granted to Her Majesty's troops who were then in China, without regard to the length of time they had been serving with those of the Company. But for the other nine months (during a considerable portion of which time I had Indian troops under my command) neither I nor the other officers serving with me received any Indian allowances.—I am, &c., F. Dunlop, Colonel Royal Artillery.'

Telegraph from Petersburg to the Amoor.—On the 11th inst. the New York Chamber of Commerce received a formal visit from Colonel Romanoff, of the Imperial Russian Engineers, accompanied by Mr. Collins, the United States' Commercial Agent at the Amoor River, the object of the interview being to bring before the American public the subject of the great Russian telegraph now in course of construction from St. Petersburg *via* Eastern Siberia and Behring Strait to Nicholeisk on the Amoor, with special reference to the project of extending it to the United States. The enterprise which has secured the sanction and guarantee of the Russian Government, and over 3,000 miles of the line being already built, is pronounced entirely practicable. The success of this stupendous undertaking would probably, it was believed, render unnecessary the ocean telegraphic cable.

THE CHINESE CUSTOMS'.

[From the *China Mail.*]

The foreigners' complaint is quite sound and just, as far as the payment of certain dues contrary both to the spirit and letter of the treaty is concerned, and they are right to demand, in the most forcible manner, that the collection of all such dues, if that word can apply to money which is not due at all, should cease. There has been a good deal of high-handed daring shown by the Chinese officials in demanding, as a regular tax, a sum which Article 28 of the treaty informs us is only payable at the option of the British merchant, should he desire to avail himself of certain immunities which that payment is supposed to confer. The Chinese officials, however, have, in direct violation of the treaty, given the trader no option in the matter, but made use of this commutation-half-duty as a means whereby to subject all exports and imports to a duty of seven-and-a half per cent. instead of five, as settled by the treaty. It should be stated, however, that the two-and-a-half is collected by a different house from the five, the first going to the local, and the last to the imperial revenue. Those who made the regulations contained in the treaty have perhaps not fully appreciated the genius of Chinese finance, and this consideration m es us suspect that the Foreign Customs Collectorate will never work with perfect smoothness, and never succeed in satisfying any but the imperial mind, if it ever achieve that much. The loss of the coasting trade in foreign bottoms is a severe, as well as a most unexpected blow to trade in China. It happened in this wise; the people at Peking sent down an order one day to the Custom-house at Canton, directing that no more exemption certificates should be issued by the authorities there, the effect of which order was to render import dues exigible at, say Shanghai, on goods which had paid export dues at Ningpo; and, as the native craft, though treated in the same manner, pay greatly smaller dues than foreign vessels, the carrying trade from port to port has passed into their hands. It is in such respects as this th at the Treaty wants mending, and a very slight change would be sufficient to restore a share of the coasting trade to foreign ships, and with it increased facilities for commerce. It is not necessary to suppose that the Chinese desire to protect the trade of their native craft, the whole thing is accounted for easily enough on other grounds. As it was before, when the exemption certificates were issued, we had this advantage over the native craft—that they had to pay, at every port they visited, certain duties to their own Custom-house, and as we escaped that, there was cause of complaint. Now we have to pay import duties at every port we visit, be the number of ports what it may, but such duties, collected as they are by a different House and under a different system, are large compared with the Chinese duties, so that we are now at a greater disadvantage in this branch of trade than the Chinese were before. It would be easy to remedy this by levying equal dues from Chinamen and foreigner in the trade from port to port. In taking another glance at the Chamber's recent statement, we are struck with the irrelevancy of those paragraphs which reflect upon the prudence of having the Foreign Customs collected by Englishmen at all. It is difficult to see what difference that can make to the fair trader who desires to pay the proper dues. They tell us that at Canton and Swatow the natives are averse to it as a foreign institution; and that the collisions arising from repression, and the employment by the Foreign custom of an armed force, is likely to lead to the "gravest complications." There is a suspicious diplomatic air about the last phrase which we would rather not see, but the Chamber surely cannot mean that smuggling may not sometimes called for armed repression. We are told, too, that they dislike being taxed by foreigners; well, that is their own affair, we suppose they can dismiss every foreigner in the Customs service to-morrow; most people dislike being taxed at all. We should have it fully settled how far these foreigners in Chinese pay are answerable for any of their wrong-doings to the English; but the use of foreigners at all in that service is not a matter that the Chamber can bring forward as a grievance, and to grievances, and well-authenticated grievances only, should all "statements" at present be confined.

FROM "THE TIMES'" CORRESPONDENT.

RUSSIAN ENCROACHMENTS IN THE FAR EAST.

The Russians appear to be indefatigable in their endeavours to occupy every position of importance in these northern seas, and without much regard to the rights of others. Under pretence of surveying they are quietly establishing themselves on the Island of Tsn-Sima, between Japan and the Corea, and have built there storehouses and a hospital. A glance at the map will show the importance of the island as a naval station, possessed as it is of magnificent harbours, and lying within two days' run of Shanghai and Nagasaki by steam. Admiral Hope has lately paid it a visit, and found a Russian man-of-war there, and the establishment above-named. The island is the property of one of the great Daimios of Japan, and it is believed that some high-handed doings of the Russians, who are there without the smallest sanction from the Japanese, inflamed the hostility of the Princes against foreigners generally, and led to the late lamentable attack on the British Legation.

OPENING OF TANG-CHAU AND NEW-CHWANG.

The same correspondent also writes:—The opening under the treaty of Tien-tsin of the two ports, Tang-chau and New-Chwang, in the Gulf of Pecheli, is made of no value to foreign trade. by the 4th clause of the 5th rule, appended to the treaty tariffs, which declares that "the export of pulse and bean cake from Tang chau and New-chwang under the British flag is prohibited. From any other of the open ports they may be shipped on payment of the tariff duty, either to other ports of China or to foreign countries." The only returns from these ports for imports are pulse and bean cake, and as no man would entrust his property to unin-surable Chinese junks, the ports are virtually closed. It is difficult to see what valid reason can be given in favour of this restriction that might not with equal justice be urged against any other branch of the carrying trade legalised at the other treaty ports.

TRIALS OF THE WARRIOR.

The *Warrior*, the first afloat of England's iron-clad navy, made her first experimental trip outside the Isle of Wight on the 14th inst. The Admiralty and navy were well represented on board. On clearing the Isle of Wight, the swell of the Channel was sensibly felt on board; but the disposition of the ship appeared to be rather to lift to the swell than roll in it. When, however, taking the seas under her quarter her movements became sufficiently lively to promise a fair roll on some future occasion. Fairly clear of the land, the revolutions of the engines were gradually increased until they reached 52. The engines did their work well, and with little noise. The log gave the vessel the speed of 12½ knots. The *Warrior*, even at this rate, contrasted favourably with previous war ships. Her readiness in answering her helm, as demonstrated by the time in which she made the circles, and the performance of her splendid machinery, rendered this preliminary performance quite a success.

The official trial of the speed of the *Warrior* was made on the 17th inst. at the measured mile in Stokes Bay, Portsmouth. Representatives of various interests connected with the vessel were on board. Government was represented by Sir John Pakington, with whom the order for the vessel originated. The weather was exceedingly favourable for the trial, a nice breeze off the land giving smooth water along the ship's course. The ship's head having been laid for the run, the five miles gave the following results, the ship going westward with and eastward against the tide:—First mean speeds in knots, 14·338, 14·338, 14·463, 14·278, 14·343; second mean speeds, 14·338, 14·400, 14·370, 14·310; true mean speed—that is, the actual speed attained by the ship as shown by the results of her six miles' trial—14·354 knots. It was on the fifth run the revolutions of the engines reached their maximum. The average time was thus 4 min. 22 sec., and the average speed, as we make it, 14·382 knots, and the average revolution 54½. The pressure was 21 to 22 lbs. The official average corrected for "true mean" is 14·354 knots, or more than 16½ miles. This is the greatest speed ever attained by any vessel of war. Mail steamers, which are intended to carry nothing but the postal parcels and a limited number of passengers, have indeed done more than this on their trial; but no ship either in the British or in any foreign navy has come up to it, except it be the *Gloire* on a certain mythical passage from Cherbourg to Brest. The *Warrior*, if furnished with a beak, could run down an enemy without Armstrong's guns. Her actual horse-power, as indicated, was shown to be about four times and a-half her nominal horse-power. The engines worked in a most satisfactory manner. There was a total absence of vibration in the ship, the only feeling approaching to that great destroyer of our steam ships of war being the mere beat of the screw in its revolutions through the water. At the conclusion of the trial, Captain Cochrane, entertained Sir John Pakington and his other guests at luncheon, when gratulations were interchanged.

SHAM FIGHT NEAR DOVER.

His Royal Highness the Commander-in-Chief left London on the 14th inst., on a tour of inspection of the troops in the south-eastern district, and arriving in Dover at eleven o'clock proceeded shortly afterwards to the heights between Dover and Folkestone, where were assembled more than 4,000 troops of all arms from Dover garrison and Shorncliff camp, under the command of Major-General the Hon. A. A. Dalzell. His Royal Highness arrived on the ground about half-past twelve, accompanied by Major-General Sir Richard Airey, K.C.B., Brigadier-General Garvock, Major-General Stotherd, Major the Honourable W. Colville, Captain the Honourable C. Chetwynd, &c. The troops being formed in close columns were at once inspected by His Royal Highness, and were then marched off the ground to attack a supposed enemy, advancing from Dover. The ground is admirably adapted for field manœuvres, being large open downs, falling to a hollow from the sea, the Dover-road being in the hollow, and a ravine crossing the line at right angles with the road. A deserted coastguard station on the Round Down-hill to the right was the first point of attack. The 10th Regiment deployed in line, in skirmishing order, covering two batteries of artillery on the right, and a battery on Hougham-hill to the left, a troop of Hussars being on each wing of the party on Round Down-hill. The enemy were soon driven from the shelter of the coastguard station and pursued along the hill and down the ravine, the 21st being in the first line of reserve, the 25th in the second line, and the 64th in the rear. On Hougham-hill, to the left, the 10th were supported by the Buffs, the Artillery forming the second line. At the bottom of the ravine the 21st advanced to the front, relieving the 10th, and pursued the enemy to the top of the next hill, where they charged with a lusty cheer. Then the 25th took the front, and at last the 64th. On the left the Buffs had relieved the 10th, and with the battery in a securely sheltered nook on its extreme left, drove the enemy up the hill on the right. When they had pursued the enemy to the top, the 64th ceased its fire, and the Artillery coming up to the support of the Buffs, a continued fire in line was kept up. The enemy at last took refuge behind some widely-separated haystacks near the cliff, and at length the Hussars, in compact body, charged down from the left, and cut up the invisible enemy, thus finishing the fight. After half an hour's rest the troops formed up and then marched past in grand divisions in quick time, the duke expressing aloud his approval to each company as it passed, with the exception of the companies of the 64th, in which one hundred and fifty marched who had joined the regiment only on Saturday last.

THE FORCE IN CHINA.—The *Army and Navy Gazette* says—"A week or two since we stated that the force in China was about to be reduced to two regiments, and we ventured to point out the imprudence of the reduction in the face of the exceedingly unsatisfactory state of our relations with the Chinese empire, which the death of the Emperor was not calculated to improve. We are glad, therefore, to be able to say that instructions from home have been given to the effect that Sir John Michel is not to send away any of the regiments now under his command until our Minister at Pekin, Mr. Bruce, shall be of opinion that they are necessary. We only fear that these instructions will not arrive before some of the force has left. By our last advices they were only waiting for shipping to leave the north."

COMMERCIAL POSTSCRIPT.

City, Monday Afternoon.

The accounts from the engineers of the Malta and Alexandria cable continue favourable as to the transmission of messages required by them, and it is expected to be open to the public early in December.

The applications for shares in the new Red Sea Telegraph Company closed on the 26th, and the shares are quoted at a small premium. Two hundred miles of cable and a staff of engineers will be despatched in a few weeks.

Arrivals not Included in the Table.—Oct. 24, at London, from Penang, Parsee; at Schelde, from Akyab, Alarm. 25, at London, from Foo-chow-Foo and Hong Kong, Panic. 24, at Cowes, from Rangoon, Sultan; at Falmouth, from Singapore, Elizabeth. 26, at Falmouth, from Shanghai, Sir Ralph Abercromby; off Falmouth, from Akyab, Maud. 19, off Sicily, from Batavia, President v. Ryckevorsel. 24, at Texel, from Batavia. Cortgene; Delft, from Sourabaya; Kalimaas, from Rangoon; Isabella Hamilton, 24, at Helvoet, from Batavia, Jacobus Martinus; at Brouwershaven, from Rangoon, Diligentia; at Antwerp, from Akyab, Frederick VII.

Departures.—October 23, from Liverpool, for Batavia, Stad Middelburg. 10, from Madeira, for China, Island Queen.

Spoken.—Vanguard, London to Hong Kong, 18th Sept., 10 N., 24 W.; Jacobus Martinus, Batavia to Rotterdam, 22nd Sept., 23 N., 32 W.; Ranee, Liverpool to Singapore, 15th Sept., 15 N., 29 W.

Monetary and Commercial.

It has been announced that the dividend and bonus of the Oriental Bank Corporation for the half year ended the 30th of June last will be 7 per cent., payable, free of Income-tax, on the 1st proximo. The meeting of shareholders takes place on the 29th inst.

A meeting of the proprietors of the Chartered Bank of India, Australia, and China is called for the 30th inst., to declare an *ad interim* dividend for the half-year ending the 29th of June.

A company has been formed called the "Telegraph to India Company," with a capital of £100,000 to carry out the original intentions of the "Red Sea Telegraph Company," which has long since suspended its efforts to repair the line in consequence of the want of capital. A notice of this undertaking will be found among our leading articles.

In consequence of the nature of the proposals of the Government for arranging the affairs of the Red Sea Telegraph Company, there has been an advance in the shares of nearly £2 per cent.

The Bar Silver by the last packet from Mexico has been sold at 60¾d.

A report has been issued by the Labuan Coal Company, giving advices furnished by their agents at Singapore and Labuan, from which it appears that the pumps are now in full working order, and the pits were expected to be cleared and coal raised during the present month. The directors have made a further call of £1 per share.

The directors of the Bank of Turkey have just issued a report recommending the dissolution of the company, the modifications of the original concession proposed by the Ottoman Government being considered inadmissible.

At the meeting of the West India Royal Mail Steam Packet Company, the dividend declared was at the rate of £2 per share, free of Income-tax. It appears by the working account for the half-year, compared with the corresponding period of 1860, that there is an excess of £30,032, £21,521 arising from the hire of the *Avon* by Her Majesty's Government, and the *Parana* by the Atlantic Royal Mail Steam Navigation Company. A considerable falling-off is noticeable in the outward passage-money and freight, the greater portion attributed to the effect of the French competition on the Brazil line, but it is said the increase in the receipts for homeward freight more than compensates for this decline; while the continued development of the through traffic with the Pacific ports affords satisfactory proof of the efficiency of the arrangements which have been made, in co-operation with the Panama Railway and other companies, for encouraging traffic in that direction.

An issue is announced of £100,000 Six per Cent. Debentures of the island of Ceylon, created under an Act authorising the raising of £400,000 to pay off the Ceylon Railway Company. The debentures will be of £50 each, to be paid off at par at the end of seven years from the 15th of next month.

The British Government have now under consideration a scheme of a line of 8,000 ton steamers, as troop transports and mail steamers between England and India *via* the Cape.

The new commercial system granted by France to her colonies of Martinique, Guadaloupe, and the Isle of Reunion, superseding the former prohibitive regulations, came into force in the beginning of last month. By this change the above islands are open to the commerce and navigation of the whole world.

Another dividend of 6d. in the pound has been announced on the estate of Messrs. Reid, Irving, and Co., who suspended in the crisis of 1847. The previous dividends have amounted to 7s. in the pound, and further collections from the Mauritius and the West Indies remain to be effected.

The following, on the half-yearly revenue and Mr. Gladstone's prediction, is from the *Economist*:—

"The quarter's revenue returns have naturally given rise to a little discussion, and they are frequently compared with the returns of last year, or of some other period, until the most irrelevant results are educed. It is clear, however, that there is only one standard, at once fair to the Chancellor of the Exchequer and accessible to the general public, by which the national accounts can be justly tested. The Chancellor of the Exchequer in every year anticipates in his Budget a certain revenue, and all we have to look for in the quarter's returns is an answer to the simple question, 'Is he getting that revenue?'

"Mr. Gladstone made an estimate of the revenue of the year (the property-tax excluded), which would be equivalent to the following for the half-year:—

Customs	£11,797,000
Excise	9,731,000
Stamps	4,230,000
Taxes	1,575,000
Post Office	1,750,000
Crown Lands	147,000
Miscellaneous	710,000
Chinese Indemnity	375,000
	£30,315,000

The reality has been:—

Customs	£11,803,000
Excise	9,392,000
Stamps	4,199,000
Taxes	1,523,000
Post Office	1,695,000
Crown Lands	133,000
Miscellaneous	675,000
	£29,420,000

"This gives an apparent deficiency of £900,000, but £375,000 is caused by the Chinese indemnity, which is not yet paid, and nearly a half by the diminution in the excise, which is attributable to the bad barley harvest of last year, and will probably be in part made up by the good barley harvest of the present year. A great deal, however, must be so made up, because during next half-year we fear the receipts of the revenue from the ordinary prosperity and general consumption of the country will not be so great as have been brought to the credit of the account during this half-year. The income of the property tax is also less than it should be for the present half-year, in consequence of some anomalies in the mode of collection, which will be made up, it is anticipated, during the next half-year. It will be seen from these figures that, though in the face of a deficiency of cotton, a slackened trade, a bad harvest in Ireland and in Scotland, it might have been wished (as we at the time suggested) that Mr. Gladstone should have kept a more ample balance, and should not have reduced the taxation of the country so much as he did in fact; yet that, nevertheless, there is no ground for the extravagant alarm or the vague anticipation to which mistaken calculations have given rise."

For some few months past the effects of the unfortunate Civil War in the United States has very seriously affected commercial matters in the Brazils, but more particularly Rio Janeiro, from which place both the Northern and Southern States draw their principal supplies of Coffee. The shipments of Coffee direct from Rio Janeiro to New Orleans and Mobile, is estimated to amount annually to 200,000 bags, and to the entire States nearly 1,000,000, or almost one-half of the whole crop of Coffee raised in Rio. The blockade of the Southern ports prevents any shipments, and very small shipments are made to the Northern ports. Coffee has consequently decreased in value upwards of 30 per cent., and from their financial affairs being thus disturbed, the exchange has fallen from 26½d. per milrea to 24d. Remittances to this country by reason of the low exchange, had been very small, and outward shipments of British goods to the Brazils are consequently reduced to a large extent.

The amount of bullion by the steamer *Ceylon*, on the 20th inst., from Southampton was—£1,090 gold, and £10,070 silver to Madras, £23,509 Calcutta, £5,717 Hong Kong, and £31,455 Shanghai; total, gold, 1,090; silver, £70,751.

ARTICLES OF IMPORT.

TEA.—The business of the past fortnight has again been on an extensive scale, comprising the sale of the cargoes of the *Falcon, Ellen Rodger*, and the great bulk of the *Flying Spur*; also the *Robin Hood* at Liverpool; in addition to which the trade have bought steadily of all grades of Congou at rather higher prices, whilst there have been some speculative purchases of good common Congous and Tayshan kinds, and the market closes with a very healthy appearance. Low to fair common Congous with leaf have advanced fully ½d. per lb., the dusty and broken leaf kinds are also rather dearer. Good common, owing to speculative purchases, is now quoted 1s. to 1s. 0½d. per lb. Fair to good flavoury kinds of old import have been more saleable at higher prices, in consequence of the high rates ruling for the new Kaisows. Common to good Ho-Hows and Ning-Chows are ½d. to 1d. per lb. dearer, in the absence of arrivals, as also second-class Monings and Wopaks; fine of these kinds are also dearer. Good and fine Kaisows of new season continue to sell freely at fully the opening prices—1s. 10d. to 2s. 3d. per lb. for the bulk, with a few from 2s. 4d. to 2s. 6d. per lb. Tayshans have been more saleable at ½d. per lb. advance. Fine Souchongs of the new season have been but little dealt in; other kinds show no material change. Fine Oolongs of new season have sold readily at 1s. 11d. to 2s. 3d. per lb. Common to fair have been rather more in demand. Flowery Pekoes have been taken to a considerable extent on speculation at a rise of 1d. to 2d. per lb. Common to fair scented Teas continue in limited demand, but prices for Caper are rather higher. Good and fine are in demand, and the new teas from Foo Chow have been taken readily at very full prices. Orange Pekoes up to 3s. 1d. per lb., and Capers 2s. 8d. per lb. Uncoloured Japan teas, ex *James Lemon* have sold freely at higher prices. Green teas have been taken readily for all the grades up to 2s. 6d. per lb., though the very high prices ruling have latterly given way, to the extent of 1d. per lb. Fine Moyunes, though relatively cheap, have been less ready of sale; the prices ranging from 2s. 11d. to 3s. 1d. per lb. for Gunpowders, and 2s. 6d. to 2s. 8d. for young Hysons, and upon which the trade find it difficult to get a profit. There have been three public sales, comprising 16,500 packages, of which 7,600 packages were sold, including 5,850 packages without reserve.

SILK.—Although some little business has been doing, it must not be set down as a marked and permanent improvement, but considered from this point, that manufacturers, both home and foreign (being bare of stock), are compelled to come into the market for the small quantity they require. Certainly warehousemen, both in London and Manchester, have been rather busier the last week or two, and this, perhaps, has caused a more sanguine feeling amongst certain classes of silk manufacturers, leading them to anticipate good results to their trade from the admission of English silk fabrics into France. This good result, however, if French accounts are to be relied on at all, seems not quite so certain as at first stated. The public sales on the 23rd and 24th inst. went off with their usual quietness, and few or no biddings were made, except for damaged lots, and a few parcels of Japan silk. The prices are just those current by private contract. As compared with June sales the decline is 6d to 1s. per lb. The quantity brought forward was, China, 6,143 bales; Canton, 537 bales; thrown, 130 bales; and Japan, 726 bales.

SUGAR.—The market has been very quiet, and although holders have given support by withdrawing largely, the small business done has been at a decline of 6d. per cwt. The sales have been:—1,712 bags Penang, all sold at—middling to fine brown, 32s. 6d. to 35s. 6d.; low to good middling yellow, 36s. to 40s. 6d.; good and fine grocery, 41s. 6d. to 42s. 6d.: 370 bags China, partly sold at 43s. to 43s. 6d. for good grey. Several parcels of Manila have been sold privately; also 800 bags Penang, at 32s. 6d. to 38s.; and 3,429 bags common clayed Manila were withdrawn.

COFFEE.—Market firm, and transactions have been somewhat restricted. 67 casks, small to bold palish Neilgherry, were realised at 72s. 6d. to 80s. 6d.

RICE.—A good business has been done till within the last few days, when operations were more restricted, but prices maintained. Sales of Bassein have been made at 11s., old Nakranzie Arracan at 10s. 9d., and good old Rangoon at 11s., and new 11s. 9d.

PEPPER.—Black: rather dearer, particularly Penang; 3,308 bags Singapore sold at auction at 3⅞d. to 4⅛d. per lb., and 3,120 bags Penang at 3½d. to 3¾d., with Trang at 3¼d. to 4d. White: demand less active; and of 230 bags Singapore, and 379 bags Penang at auction, one-third sold at 6¼d. to 6⅜d. per lb. for middling.

SAGO.—Good private business accomplished at very firm prices, chiefly at 22s. to 23s. per cwt. for small and medium pearl: 742 cases at auction all retired. FLOUR.—A fair private business has been done at 16s. to 17s.

SPICES.—Cinnamon: quotations remain as before quoted. Cassia lignea: rather easier; of 1,831 cases at auction, half sold at 85s. to 92s. for third to first pile. Cassia buds: very scarce. Cloves: quiet; 225 bags Zanzibar, and 2 casks Amboyna, all retired at auction. Mace: without change, and 11 cases Penang, and 5 cases Singapore at auction, sold at 8d. to 11d. per lb. for red and reddish. Nutmegs: firm, with rather more enquiry; auctions limited to 37 cases Penang, 28 Singapore, and 14 indirect; one-third sold at 2s. to 2s. 7d. per lb. for fair bold, and 11d. to 1s. 9d. ordinary shrivelled to very good medium.

HEMP.—Manila has again obtained more money, and of 4,675 bales at auction, about one-fourth sold at £22 10s. to £24 15s. per ton for fair to fine roping.

COTTON.—A further advance of ⅛d. per lb. has again been obtained, with continuously animated demand, and a very large quantity has changed hands. Middling fair old to good new Dholera is quoted 6⅝d. to 8d.

JAPAN WAX.—The quotations are, saucers, 65s. to 75s.; block, 52s. to 60s. per cwt.; the former scarce and wanted; of the latter 812 boxes offered at auction, and a few sold at 58s. to 58s. 6d. per cwt. for good, with 10 cases superior at 66s. 6d.

TOBACCO.—The market continues without any alteration either in prices or sales.

TIN.—This market has again been very quiet, with the most limited business privately. Banca is quoted £118 to £120; Straits, £116 to £118; Antimony Ore, £16 2s. 6d.

GAMBIER.—Firm. 980 bales at auction sold at 17s. 6d. per cwt. for good, and 16s. 6d. to 17s. 3d. heated. Privately, a fair business has been done. CUTCH.—Demand has latterly revived, and prices have improved to the extent of 6d. 3,641 bags at auction, nearly all sold at 21s. 6d. to 23s. 6d. for middling to very good.

MISCELLANEOUS.—India rubber: Of 714 baskets Penang at auction, the whole were retired, and of 69 baskets and 2 tons Assam, three-fourths of the baskets sold at 8d. to 8¼d. per lb. Latterly demand has sprung up, and about 50 tons have been sold at 1s. 1d. to 1s. 2d. Camphor: Inactive. Sales of about 20 chests at 210s. per cwt. Sapanwood: Quiet. 24 tons Siam at auction all retired. Soy: Firm. 49 hogsheads China, and 160 tubs Japan all retired. Mother-o'-Pearl Shells: Of 210 chests Manila nearly one-half sold at 82s. 6d. to 89s. for middling to fair. Star Aniseed: Of 152 cases at auction, one-third sold at 60s. 6d. to 62s. for fair quality but broken. Sticlac: Firm. 100 packages chiefly ordinary wood retired above the value. Gum Benjamin: Rather cheaper. Of 29 chests Siam at auction, two-thirds sold at £9 to £22 per cwt. for third to first quality, and £3 15s. low; 39 chests Sumatra sold at £11 5s. to £12 2s. 6d. for second. Damar: Quiet. 140 cases at auction, all retired. Gamboge: Continues dull. Nothing doing. Rattans: 6,496 bundles Singapore, and 2,321 bundles of Penang sold at 2s. 6d. to 7s. 7d. per 100. Saltpetre: Rather more enquiry, and better prices are offered. Gutta Percha: Of 42 tons and 152 baskets, half sold at 1s. to 1s. 6d. for ordinary to good genuine, and 8¾d. to 9d. good reboiled. Rape Seed: Prices higher and large business done. Elephants' Teeth: Large, £38 to £40. Vermilion, Wanted, and no sellers at 2s. 2d. to 2s. 4d. Galangal root: Firm. 510 bags at auction, half sold at 23s. to 23s. 6d. for good. Cubebs; 70 bags at auction all retired. Dragons' Blood: Dull. 10 cases retired. Galls: Steady. Good China and Japan are quoted 40s. to 50s. Rum: Moderate enquiry; a small quantity Penang sold at 1s. 6d. Tapioca: 59 bags common Penang sold at 2¾d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. 0d.; nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £8. 15s. to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5 to £5. 5s.

STEEL.—Swedish keg, £15. 10s.

COPPER.—Sheet and sheathing, 11d.; yellow metal, 9¼d.

TIN.—120s. for block; 121 for bar. Tin plates, best charcoal, I.C., 28s. to 28s. 6d. per box.

LEAD.—English pig, £19. 10s. to £21. 10s.; shot, patent, £22. 5s.; sheet, £20. 5s. to £20. 10s.; spelter, £19. 2s. 6d.; zinc, English sheet, £24; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.

MANCHESTER MARKETS.

The following is from the last circular of Mr. S. Mendal:—"The rapid advance in the value of cotton since the last few days compels spinners and manufacturers to raise prices to a point that for the moment checks sales. Demand to-day is on a limited scale, but there is no pressure to sell at other than full quotations herein. Production is likely to be further contracted with each coming week."

From Batavia.—At Liverpool: Kerr. At England: William Simpson. At Outports: Omega.

From Bankok.—At Falmouth: Hannah Salkeld. At Liverpool: G. W. Browne.

FREIGHTS AND CHARTERS.

£50 per keel is obtainable for coals from the North of England to Shanghai, £28 to Calcutta, £24 to Bombay. The Peninsular and Oriental Steam Navigation Company have received tenders for the supply of 6,400 tons of coal at Point de Galle, and 2,400 tons at Singapore; also one of the Railway Companies, for the delivery of 10,000 tons of coals at Bombay.

Current Rates of Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s. to 60s.

CASUALTIES.

The Johanna Maria, having on board the crew of the Hero, of Liverpool, which foundered twenty miles from the Equator, was spoken by the Imogen, Ferguson, arrived in the river Thames.

The Hero, Young, of Liverpool, from Cardiff to Manila, sailed from Milford, July 13.

Margate, October 11.—The Amazone, Hamburg barque, Riese, from Shields for Shanghai, with coals, got on the Long Sand this morning, but was assisted off in the afternoon, leaky and with damage, and brought up in the roads; she proceeded to London, October 13, in tow of a tug.

The Speedy, Stranach, from Akyab, which arrived at Falmouth, October 16, had thrown part of her cargo overboard.

The Harwood, Forsyth, which arrived at Falmouth, October 12, from Akyab, had thrown part of her cargo overboard, and had main piece of rudder and mainmast sprung, and lost sails, &c.

New Ship for the China Trade.—On the 23rd inst., Messrs. Green, of Blackwall, launched a very beautiful vessel called the *Highflyer*, which is to be commanded by Captain Enfield, late of the *Chrysolite*. Her dimensions are:—Length between perpendiculars, 193 ft. 9 in.; do. of the keel for tonnage, 168 ft. 2¼ in.; breadth extreme, 35 ft. 6 in.; do. moulded, 34 ft. 6 in.; depth in hold, 21 ft. 9 in.; burthen in tons, 1,116 25-94ths.

Messrs. Dorabzee, Norojee and Co.'s steamer, which has already been described, was launched on the 19th inst., from the yard of Messrs. Mare, and Co., Blackwall, and named the *Nurgis*, which is the Persian name for the flower Narcissus. She is to be prepared with all despatch for China, under command of Capt. Gibson. The two steamers building at the same yard for the Bombay and China line are also in a forward state.

Messrs. Apcar and Co., of Calcutta, have ordered a tug boat to be built by Messrs. Hendersons on the Clyde. The *Arratoon Apcar*, lately built for this firm by the same builders, will, it is expected, reach Calcutta early in November, the notice in our last of her sailing being in error.

SECRETARY—C. L. Peel, Esq.
OFFICES—62, Moorgate-street, E.C.

A very brief explanation is alone required of the objects of this Company.

I. The Red Sea and India Telegraph Company, upon the guarantee of Her Majesty's Government of 4½ per cent. per annum for 50 years, have expended £800,000 in laying a cable between Suez and Kurrachee.

II. Every section of this line worked satisfactorily for a period of several months, and the whole line carried through messages between Kurrachee and Suez for several days. Faults subsequently occurred in several of the sections, which have never been repaired.

III. The Government have agreed to transfer the line, stations, and property of the Company to a new Company, to be formed for the purpose, on very liberal terms. These are in substance:—

1. That the cables, land-lines, instruments, stations, concessions, &c., belonging to the old Company shall be made over to the new Company free from charge.

2. That the new Company shall use their best endeavours to repair the line and to work it when completed, beginning with the line between Aden and Kurrachee; and are to have possession so soon as two-thirds of the capital is subscribed, and one-third paid up, and a suitable vessel despatched with not less than 200 miles of new cable on board.

3. That the new Company shall be entitled to a clear dividend out of the profits to 25 per cent. per annum on the money paid up. And the Government is to have the power to re-purchase the line on repaying the capital expended at the expiration of 30 years.

4. That any surplus profits shall be applied to reimburse the Government for the interest they have paid and will have to pay annually upon the original capital expended; after which any further profits which may accrue will be applied to the creation of a reserve fund.

5. The accounts of the Company will be audited at the Treasury half-yearly. After the restoration of the line, any outlay of capital to be subject to the approval of Government, and the Government is to have the right (subject to arbitration) of disallowing working expenditure which they may consider excessive.

6. In the event of the failure of the Company to restore or maintain the line in working order, the Government are to have the power of taking it into their hands again on repaying the capital actually expended by the new Company. Should the Government not exercise this right, the Company are to be at liberty to dispose of the property to reimburse their outlay, the balance, after defraying the actual expenditure, to be handed over to the Government. Failure is to be defined to be the non-working of the line from end to end after reasonable allowance of time for restoration.

7. All differences between the Government and the Company are to be decided by arbitration.

8. This arrangement presupposes the concurrence of the Shareholders of the old Company, in the terms proposed to to them by Her Majesty's Government; and any Parliamentary powers necessary to give effect to these arrangements are to be obtained by Her Majesty's Government.

IV. Of the vast importance, in a national point of view, of telegraphic communication with the British dominions in India, there can be but one opinion, and now that the communication is complete from London to Suez, and throughout all India by Kurrachee, it is impossible that the matter can be left in its present condition, and the wanting link unsupplied.

V. The grounds which commend the subject as a speculation are these:—£800,000 has been expended in laying out a line which for a time was perfectly successful. This line will be handed over to the Company free of all charge or liability. No attempt has as yet been made to restore the communication between Aden and Kurrachee. On the other hand, the Company's Superintendent, Mr. Brunton, has expressed a confident opinion that the faults are many of them very trifling, and all capable of repair. This view is confirmed by the opinions of Sir Charles Bright and Mr. Latimer Clark, who have been consulted on the subject. In one of the sections, of nearly 500 miles, there has never been any fault, and those which do exist in the other sections are believed to be in shallow water. An estimate has been made by Messrs. Bright and Clark of the cost of repairing the line between Aden and Kurrachee, which they consider can be effected for a sum not exceeding £50,000. The venture is small, while the returns will be on the scale of an original expenditure of £800,000.

VI. It is proposed to limit the first operations to the repair of the line between Aden and Kurrachee. When this is effected the period of a message to all parts of India will be abridged to five days. This will be not only a vast public object, but there is no doubt, from the experience of the line when partially open, that the number of messages will be very great.

VII. When this eastern division has been completed there will remain only that between Suez and Aden, which can undoubtedly be made good by restoration of the existing cable, in whole or in part. If it should be decided to make any part of it a land line, it can be done at comparatively small cost.

VIII. The intention is, as soon as the capital or a sufficient amount has been subscribed, to despatch a steamer with 200 miles of new cable, so as to complete the communication up to Aden early in 1862.

Forms of application for shares and information may be obtained at the offices, or from the Company's brokers, Messrs. Knight and Coleman, No. 1, Royal Exchange-buildings.

EDWARD WHITE,

(From DENT'S, of Cockspur-street.)

CHRONOMETER, WATCH AND CLOCK MAKER,

20, COCKSPUR-STREET, PALL MALL,

LONDON.

E. WHITE, for several years PRINCIPAL ASSISTANT at MESSRS. DENT'S, of COCKSPUR-STREET, having COMMENCED BUSINESS ON HIS OWN ACCOUNT, at the premises formerly occupied by Messrs. Green and Ward, begs respectfully to direct the attention of Officers and Residents in India, China, and Australia, to his PATENT KEYLESS LEVER and DUPLEX WATCHES. They are especially adapted for Tropical Climates, having an Adjusted Chronometer Balance to compensate for variations of temperature, and keep clean much longer than ordinary Watches, as the Cases are made Air-tight and never require to be opened.

ORDERS WITH REMITTANCE FAITHFULLY AND EXPEDITIOUSLY EXECUTED.

E. WHITE,
20, COCKSPUR-STREET, PALL MALL,
LONDON.

*** To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

KEATING'S COUGH LOZENGES.

JUDGED by the IMMENSE DEMAND, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

KEATING'S COD LIVER OIL just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the Fish being unusually fine, and the Oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St. Thomas's Hospitals, have analysed and pronounced the Pale Newfoundland Oil the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. No higher price need be paid than the following:—Light Brown, 1s. 8d. per pint, or 3s. per quart; Pale, 1s. 6d. half-pints, 2s. 6d. pints, 4s. 6d. quarts, or in 5 pint bottles 10s. 6d. imperial measure.

First Class Awards at the London, Paris, and New York Exhibitions for

HOLLOWAY'S PILLS.—AUTUMN AILMENTS.—There are diseases peculiar to each season; but autumn usually much increases the sick list. Fever, diarrhœa, cholera, and many chest complaints, frequently prevail at this time. Purifying the blood is the most rational and certain antidote to all of them. This can be accomplished most readily and effectually by a course of Holloway's estimable Pills, which act directly by expelling all impurities, and healthily stimulating every organ. They wonderfully assist digestion, and promote wholesome activity in the kidneys, liver, and lungs; and strengthen the nerves. These Pills may be taken with benefit and safety by all invalids, whatever be the malady, for their purifying and harmless nature admirably adapts them to all ages, constitutions, and climates.

THOMAS HUNT AND CO.'S

SHIP, DOCK, AND SPAR YARDS, WHAMPOA AND HONG KONG.

W. F. THOMAS AND CO.'S,

PATENT SEWING MACHINE.

TO TAILORS, SHIRT COLLAR, GLOVE, BOOT AND SHOE MAKERS SADDLERS, AND OTHERS.

FOREIGN, Colonial, and Country users of SEWING MACHINES, who cannot get them adjusted or repaired when imperfect or out of order, must necessarily rely on the respectability of the maker for obtaining a really servicable Machine, suitable to their requirements. The high reputation which during the last 14 years the Machines made by W. F. Thomas & Co., have acquired for the perfection of their workmanship, insuring uninterrupted action and non-liability to derangement, entitle the makers to the confidence of persons residing in the country and abroad, and of intending emigrants, to whom any disappointment in the quality of the Machines must be attended with serious inconvenience.

The MACHINES are made of various sizes, and adapted for every kind of work. The stitching produced is alike on both sides of the material; there is no cord or ridge, and the thread cannot be pulled out.

Lists of Prices and Specimens of the Work can be had from W. F. THOMAS & Co. (Original Patentees).

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1885.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

An inspection is earnestly requested of the Magnificent Stock in the Oxford Street Show Rooms of Electro-Silver Plate of every description, and of Plain and Elegant or richly ornate designs.

MAPPIN AND COMPANY,

ROYAL CUTLERY WORKS, SHEFFIELD,

AND OF 77 AND 78, OXFORD STREET, LONDON, OPPOSITE TO THE PANTHEON.

MAPPIN & CO. have no connection whatever with any Firm of a similar name in London.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, Mauritius, Reunion, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices 122, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

FOR HONG KONG, to follow "the Beautiful Star," the HELEN'S BANK, 317 tons register, A 1, 10 years, A. BUNNING, Commander; to loadin the London Docks.

For freight or passage apply to W. O. Young, Newman's-court, Cornhill.

WITH QUICK DESPATCH.

FOR HONG KONG & WHAMPOA, the splendid new Al Aberdeen Clipper ship, BEAUTIFUL STAR, Commander ——, 539 tons register; loading in the East India Docks. This fine vessel, built expressly for the China trade, by William Duthie, Esq., builder of the celebrated ships "Huguenot" and "Rifleman," so well known for their rapid passages, offers a first-rate opportunity to shippers. Excellent accommodation for passengers.

W. O. Young, Newman's-court, 74, Cornhill, E.C.

REGULAR LINE OF PACKET SHIP.

FOR HONG KONG and WHAMPOA, the splendid clipper ship, STAR QUEEN, A 1, 13 years, 769 tons register, A. BARBER, Commander; lying in the East India Docks. This ship has proved herself to be one of the fastest ships afloat, and has very superior accomodation for passengers.

For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange Buildings, E.C.

FOR SHANGHAI.—NOTICE TO PASSENGERS.—The magnificent new clipper ship GLENAROS, 1,000 tons (built expressly for the China trade), W. P. BUCKHAM (late of the "Star of the North"), Commander, will sail from Sunderland for the above port about the 10th of November, and has superior accommodation for a limited number of first-class passengers. Apply to Captain Buckham, on board; or to Adamson and Ronaldson, 1, Leadenhall-street, E.C. N.B. Has vacancies for three or four Midshipmen.

FOR SINGAPORE, the well-known ship SALVADOR PACKET, loading in the London Docks. Will shortly sail. For freight and passage apply to Robertson and Co., 5, Newman's-court, Cornhill; or York Chambers, 55, King-street, Manchester.

FOR HONG KONG & WHAMPOA, with quick despatch, the well-known fast sailing ship FLYING SPUR. Will load in the West India Docks. This vessel has superior accommodation for passengers, &c.

For freight and passage, apply to Messrs. Robertson and Co., 5, Newman's-court, Cornhill, London; or York-chambers, 55, King-street, Manchester.

FOR SHANGHAI, with quick despatch, will load in the West India Docks, the splendid fast sailing ship ZIBRA. Has excellent accommodation for passengers, and will be found the best opportunity for shippers.

For freight and passage apply to Robertson and Co., 5, Newman's-court, Cornhill; or, King-street, Manchester.

FOR SHANGHAI, will shortly sail, the celebrated British built clipper ship CANTON, A 1, 11 years, 429 tons; to load in St. Catherine's Docks. Has superior accommodation for passengers.

For freight and passage apply to Ellis, Son, and Fickling, 132, Leadenhall-street, E.C.

FOR SINGAPORE and PENANG with immediate despatch, the fine, fast-sailing clipper barque WILLIAM AND JANE, A 1, 489 tons per register, JOHN SHIELL, Commander; loading in the East India Docks. This ship has excellent accommodation for cabin passengers.

For freight or passage apply to James Thomson and Co., 1, Billiter-court; or to Douglas and Mills, 23, Billiter-street.

FOR SHANGHAI, the well-known clipper ship FALCON, A 1 13 years, 794 tons register, JOHN KEAY, Commander; lying in the East India Docks. Has superior accommodation for passengers.

For freight or passage, apply to Phillips, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

NON-ARRIVAL OF THE SEMI-MONTHLY MAIL.

In consequence of the arrangements for continuing the semi-monthly mail not having been completed in time to advise the P. and O. Company's agent at Bombay to despatch a vessel to carry the mails of 20-26 July to Singapore, China, &c., the corresponding return mails, which should have left Hong Kong on the 28th of September, and Singapore on the 7th October (due here on the 12th inst.), have been omitted, consequently we have no later dates or news from these places by the mails arrived this day from India. We have therefore occupied the space usually awarded to our Summary of News with several interesting subjects connected with our field.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. str., 4th Nov., from Southampton to Singapore: Dr. Treacher, Captain J. T. A. McNair, Mr. J. Dawson. To Hong Kong: Mr. and Mrs. F. Smith, Mr. A. Cohen, Mr. L. Moore, Messrs. A. Hogg, Limbey, P. F. Bird, Lieut. Maud. To Shanghai: Mr. Ernest Saton. From Alexandria to Singapore: Mr. and Mrs. J. J. Blankenhagen, T. Blankenhagen and native female servant. From Suez to Hong Kong: Mr. W. Pustau, Mr. Reesema. From Marseilles, 12th Nov., to Singapore: Mr. J. F. Arnold, Mr. C. T. Deines, Mr. Mederbergen. To Hong Kong: Mr. Armand.

Per P. and O. str., 12th Nov., from Southampton to Shanghai, via Bombay: Mr. E. Spence. To Hong Kong, via Bombay: Mrs. Williams. From Marseilles, 20th Nov., to Shanghai, V.B.: Mr. Hearn. To Hong Kong, V.B.: Mr. Fritz Alegg. To Singapore: Mr. T. R. van den Broeck.

Per P. and O. str., 20th Nov., from Marseilles to Singapore via Bombay: Mr. J. H. Mege. To Shanghai: Mr. Meynard.

Per P. and O. str., 20th Nov., from Southampton to Shanghai: Mr. Gore Booth. To Hong Kong: Mrs. W. H. Fittock. To Singapore: Mr. Marshall. From Marseilles, 25th Nov., for Singapore: Mr. and Mrs. Kernel. To Hong Kong: Mr. J. W. Meili. To Shanghai: Mr. G. Lemaire. From Suez to Singapore: Mr. D. Hooglandt.

Per P. & O. str., 4th Dec., from Southampton to Singapore: Mr. A. C. Babington, and Miss Babington. To Penang: Capt. and Mrs. Hilliard, infant, and servant. To Hong Kong: Mrs. Caine, two infants, and E. I. servant, Mrs. Kane, Mr. Mackintosh, Mr. Fred. Adams, Miss Cruickshank, Miss E. Barnes. From Marseilles, 12th Dec., to Hong Kong: Mr. Diego Snares, Mr. and Mrs. J. M. Hazeland.

Per str. 20th Dec., from Southampton to Shanghai: Mr. Gibbon; to Hong Kong: Mr. Stewart, Mr. R. H. Payne, Mrs. Hamilton. To Singapore: Mr. D. K. Mason, Mr. Paterson, Mr. Littledale. THE NEW EMPEROR OF CHINA.

Information received from our St. Petersburg correspondent announces that the son of the late Emperor of China was proclaimed sovereign on the 25th August with all the usual ceremonies.

THE TRANSFER OF THE STRAITS SETTLEMENTS.

WE have much pleasure in announcing that this long protracted question is now nearly settled. As already stated, the principal obstacle to the transfer of these Settlements was the question of who was to pay for the outlay made by the Indian Government on the fortifications, which were constructed without the advice or request of the Straits authorities, and are considered by many as unnecessary. This difficulty has now arrived at a satisfactory solution, by the Indian Government agreeing to forego any claim on that account. This is as it should be, and we must compliment the Duke of Newcastle in objecting to saddle the settlements with such a debt. As this was the main thing which "stopped the way," we trust a Bill is now being framed which will obtain the consent of Parliament at its earliest sittings in the next session. The resources and geographical position of Singapore have made it a place of great importance, but we feel certain that a more rapid development of internal prosperity and wider facilities for trade would have taken place had the Settlement been left free of the Indian Government, which was too far distant and too much engaged in India to give it a fostering care, and yet too near or too jealous to permit greater local administration.

NEW STEAMERS FOR CHINA.

A new screw steamer, of 790 tons, has been constructed by Messrs. Lawrence and Folkes, New York, by order of P. S. Forbes, Esq., the well-known and much-respected merchant in the China trade. She is intended for the coasting trade in China, and is called the *Flambeau*. The steam-power is not great; the cylinders, we understand, being only fifty inches, and the stroke five feet.

Messrs. Laird, of Birkenhead, are making rapid progress with the boats for this company, as noticed in our last, and on the 2nd inst. launched the first vessel, which is a paddlewheel, and named the *Titan*.

The following account of the trial-trip of the *Express* on the Clyde is taken from the *Glasgow Herald* of the 7th inst.:—

"This beautiful and commodious paddle-steamer, designed and built by the eminent firm of J. and G. Thomson, of this city, for the Chinese river trade, left the Broomielaw yesterday forenoon on her trial-trip; and after steaming down the river until the Cumbrae lighthouse was passed, she returned to her moorings about five o'clock in the afternoon, having completely realised the most sanguine anticipations of her builders and owners. The *Express* presents many features which are novelties in this country, her construction and arrangement being somewhat similar to the magnificent steamers which ply between New York and Albany on the river Hudson. The extreme length of the vessel is 222 feet by 30 feet in breadth, while the engines are upwards of 200-horse power, and the measurement of the hull fully 489 tons. The wings extend fore and aft from the paddle-boxes, and will be fitted up with elegant cabins, while a magnificent saloon will be erected on the promenade deck, 60 feet in length by 25 in breadth. The main deck will be occupied by a ladies' cabin, furdished with bath-room, dressing-rooms, and drawing-room; also spacious accommodation for steerage passengers, officers, and crew. The whole passenger accommodation will be amply provided with the ventilation so necessary in hot climates, by means of "jalousies" and other appliances; while the lower deck will form an extensive and airy steerage. Altogether, we think the new model is a great improvement on the ordinary class of river steamers, and we hope soon to see a few such navigating the waters of the Clyde.

"The engines of this fine vessel are constructed on the diagonal principle, with jacketed cylinders, and they are so arranged in conjunction with the boilers, four in number, that the whole forms a perfect girder—and

Digitized by Google

thus acts as a valuable element in strengthening the steamer longitudinally. The *Express* is the property of Lyall, Still, and Co.; she is commanded by Captain Castilla; and it is intended to take her out to China under canvass, and place her on the station between Canton and Hong Kong. She is intended to compete with the Yankee-built steamers in the East, and as she is provided with all the accommodation of the American river boats, with the stability and elegant finish of British workmanship superadded, there is little doubt that the *Express* will prove a dangerous rival to the American traders in the Chinese waters. A number of scientific gentlemen and other friends were invited by the Messrs. Thomson to accompany them on the trial trip, and all without exception were highly satisfied with the appearance, construction, and sailing qualities of the vessel. The personal comforts of the excursionists were not the least interesting portion of the day's proceedings, an elegant and substantial dinner having been provided, to which all and sundry did ample justice, and in other respects enjoyed their day's sailing in an agreeable manner.

THE FOREIGN ELEMENT IN THE CHINESE CUSTOMS.

The institution known as the Foreign Inspectorate of Customs, and which received the especial countenance of the Earl of Elgin, is the main stumbling block to trade. According to the late advices from China, it appears that a new construction has been put on the 45th Article of the Treaty of Tien-tsin. The Chinese now require that goods which have been exported from one port in China to another should not only pay export duties at the port of shipment and import duties at the port of landing, but if required to be re-shipped they are again subjected to an export duty. Under the old *regime* the custom was that goods having once paid the duty were not liable to be again taxed, and this practice had obtained for many months after the treaty of Tien-tsin came into force. Suddenly, however, a new order of things has been substituted, and one British firm in China has actually been compelled to pay export duties on a parcel of goods at Ningpo, import duties at Shanghai, and on re-exporting, another export duty. Another case, which we alluded to in a late issue, was that of a parcel of silk exported from Canton to England, which on being found inferior and unsaleable, was re-shipped to that port. The Commissioners of Customs not only refused to allow the drawback on the parcel, but actually insisted on the payment of import duties.

Now, all this is manifestly absurd, and whether justly or not the foreign Inspectors are supposed to have instigated this sharp practice. To such anextent do the merchants of China feel the injustice, that they have decided in laying this and other grievances against the Customs before the Home Government. The 45th Article of the Treaty is as follows, and the *China Overland Trade Report* very properly points out that, as this Article was worded in the same manner in the last Treaty (Nanking), the interpretation and action on it should also be the same:—

"Art. 45.—British merchants who may have imported merchandise into any of the open ports, and paid the duty thereon, if they desire to re-export the same, shall be entitled to make application to the Superintendent of Customs, who, in order to prevent fraud on revenue, shall cause examination to be made by suitable officers, to see that the duties paid on such goods as entered in the Custom-house books correspond with the representation made, and that the goods remain with their original marks unchanged. He shall then make a memorandum on the port-clearance of the goods, and of the amount of duties paid, and deliver the same to the merchant; and shall also certify the facts to the officers of Customs of the other ports. All which being done, on the arrival in port of the vessel in which the goods are laden, everything being found on examination there to correspond, she shall be permitted to break bulk, and land the said goods, without being subject to the payment of any additional duty thereon. But if, on such examination, the Superintendent of Customs shall detect any fraud on the revenue in the case, then the goods shall be subject to confiscation by the Chinese Government.

"British merchants desiring to re-export duty paid imports to a foreign country shall be entitled, on complying with the same conditions as in the case of re-exportation to another port in China, to a drawback certificate, which shall be a valid tender to the Customs in payment of import or export duties.

"Foreign grain brought into any port of China in a British ship, if no part thereof has been landed, may be re-exported without hindrance."

There have been violent declamations by a portion of the foreign communities in China against the foreign element, but we have not joined in it, knowing the very grave abuses which existed in evading the proper duties; and there is no doubt that this was the view taken by Lord Elgin, coupled with the desire to give the Chinese all the assistance he could in securing a revenue which had for a time, to be devoted towards our own claims, and which he knew would be regarded with great solicitude by the Chancellor of the British Exchequer.

There is yet a more grievous complaint against the foreign inspectors—viz., that of introducing armed revenue vessels manned by refuse sailors and rowdies, who for the most part deserters, and in fact men who would not scruple to commit any crime in the Calendar of Newgate. One of these vessels is a steamer of foreign build, and on a late occasion she made a raid on a number of Chinese boats in the Canton river, and, after being worsted in the affair, made for Hong Kong, to effect repairs, and procure more of these renegade sailors, for the purpose of repeating the act. Now, the conclusion on the part of the Chinese is, that the whole affair is the work of foreigners, and as these cases are likely to be enacted at the other ports, we leave the public to judge of the injurious effects it is calculated to produce on our prestige. When the system was first inaugurated by Sir John Bowring—who had watched with heavy heart the iniquity of his smuggling countrymen at Canton—it was confined to gentlemen of education and intelligence, who transacted their dutics in the Custom-house; and that is the point it should have remained at; but if the inspection to which they were suitably confined leads to the introduction of such measures as we have described, it must end in the dismemberment of the institution, and we must express our surprise that our Ambassador has not seen the matter in this light. There are several merchants who gave their warm support to the undertaking when first inaugurated, who now loudly remonstrate against these new inventions.

SHIPS OF WAR AND TROOPS ON THE CHINA STATION.

According to the official lists the following are the ships of war and regiments serving in China:—

ARMY.—The 8th and 10th Regt. R.E., all in China; also portions of the 31st, 44th, 60th, 67th and 69th Foot.

NAVY.—Actæon, 26 (ordered home); Algerine, 3, screw gunboat; Atalante, steamer, at Shanghai; Banterer, gunboat, in Yang-tsze river (Chinkiang); Beagle, 4, screw; Bouncer, 2, screw gunboat, in Yang-tsze river (Kinkiang); Bustard, gunboat, at Hong Kong; Centaur, 6, steam vessel, at Yang-tsze river (Nanking); Charybdis, 21, screw, Hong Kong; Clown, screw gunboat; Cockchafer, 2, screw gunboat; Coromandel, 5, steam vessel, Hong Kong; Couper, steamer, Hong Kong: Dove, 2, screw gunboat; Drake, screw gunboat; Encounter, 14, screw; Firm, 1, screw gunboat, in Canton river; Flamer, screw gunboat; Forester, gunboat, at Hong Kong; Grasshopper, 2, screw, in Canton river; Hardy, 2, screw gunboat, at Foochow; Haughty, gunboat, at Hong Kong; Havoc, 2, screw gunboat, in Yang-tse river (Kinkiang); Hesper, screw steamship; Hornet, 17, screw; Insolent, screw gunboat; Imperieuse, 51, screw, flagship; Janus, 1, screw gunboat; Kestrel, 1, screw gunboat; Leven, 3, screw gunvessel; Odin, 16, steam vessel; Oppossum, gunboat, at Hong Kong; Pearl, 21, screw, at Hong Kong; Pioneer, 6, screw; Princess Charlotte, receiving ship, at Hong Kong; Renard, 4, screw, at Shanghai (ordered home); Ringdove, 4, screw, at Shanghai; Saracen, 4; Scout, 21, at Shanghai; Simoom, 8, screw; Slaney, 1, screw steamer, at Hong Kong; Snake, 4, screw, in Yang-tse river, at Hankow; Snap, 2, screw gunboat, in Canton river; Sphinx, steam vessel, at Hong Kong; Starling, gunboat, at Shanghai; Staunch, gunboat, at Hong Kong.

PROGRESS OF HONG KONG.

In the *Nairnshire Telegraph* we find a notice (written by a correspondent) of Hong Kong as it is, from which we extract the following. It is evidently written by one who is familiar with the place and knows how to describe what he sees:—

"The astonishing progress made by the colony of Hong Kong affords perhaps one of the most striking instances on record of the energy and enterprise of British character. The island was taken formal possession of, and the British flag hoisted upon it in 1840. The site selected for the capital, now called Victoria, was of very limited space for being built upon. It was chosen on the Northern shore of the island, and, as I have stated, at the foot of the highest mountains, which are washed by the sea, now forming the fine harbour of Hong Kong. Here the Government began making an excellent road, called the Queen's-road, but up till nearly the end of 1841 not a single house was built upon it. By June, 1842, the town was considerably more than two miles long, consisting of storehouses and shops in which every article of Eastern and European produce could be procured. At the present time the town is about five miles in length, and not only is the declivity of the highest mountains dotted over with buildings, but the demand for building sites is so great that the harbour has actually been encroached upon—deep water being no impediment—for more than 250 feet, and that, too, for miles along the frontage. In 1845 the population of Hong Kong was about 50,000, and in 1860 it was 93,000 of all nations and colonies. To give some idea of its growing tendency and importance, it may be mentioned that at a Government sale which took place in July last, the sum of $180,000 was realised in a few hours by M'Ewen and Co., Government auctioneers, for a few lots of land—almost entirely rock—measuring from 3,000 to 80,000 square feet each, and paying a fixed annual rental to Government of from £1 to £100. One lot, actually under water, brought $7,000.

"This demand for building-sites continues unabated, especially among the wealthy Chinese merchants, who are leaving the now almost ruined city of Canton, and seeking British protection, for the double purpose of making money and escaping the wrath of the mandarins, who are disposed to "squeeze" them so unmercifully.

"Orders respecting the allotment and disposal of our newly-acquired possession of Kowloon, on the opposite shore, are anxiously awaited from the Government. The distance across the harbour to the mainland is about one mile and a quarter, and, when sold, it is conjectured that a rival town will spring up, which will detract from the trade and affect the rental of property in Hong Kong. This, however, is very doubtful. Some of the merchnts may have their residences over there, but I think it will be a Chinese settlement."

Digitized by Google

THE RED SEA AND INDIA TELEGRAPH COMPANY.

A meeting of this Company was held on the 5th inst., for the purpose of considering the proposition made by Government as to the transfer of the Company's property to a new Company, which had been formed by Sir Macdonald Stephenson, as detailed in our last issue. Considerable discussion took place, arising principally upon the option claimed by the Government to redeem the annuity, which some of the shareholders thought ought not to be claimed. Eventually, however, resolutions were unanimously passed to the following effect:—

"Resolved,—That the proposition contained in the letter addressed by the Secretary of the Treasury to the directors of the Red Sea and India Telegraph Company on the 15th of October last be, and is hereby accepted, on the understanding that it be made clear in the arrangement with the Government that the intention of clause 3 in the proposition is, that in the event of the Government deciding to redeem the annuity, they shall pay a capital sum which will be sufficient to purchase a Government annuity of £4. 10s. per annum on each £100 of the stock or capital of the Company for the unexpired residue of the term.

"Resolved, that the directors be. and they are hereby authorised to take all necessary measures for carrying this arrangement into effect."

On the part of some of the shareholders it was suggested that the shares in the new Company should be distributed rateably among the shareholders in the old Company. It was pointed out, however, that this was not possible, consistently with the appropriation that had already been made; but the directors stated that they would receive applications for the remaining shares on the part of old shareholders, which they would comply with as far as they consistently could, the allotment having been of necessity deferred until after the shareholders in the old Company had decided to accept the Government proposals relative to their annuity.

Sir Macdonald Stephenson, the Chairman and promoter of the new Company, addressed the meeting as follows:—He congratulated the meeting on the course it had pursued, and they would perhaps permit him to make a few observations, as one of the new Company, the re-establishment of which was an essential condition to the Government arrangement now about to be carried out. The necessity which existed for telegraphic communication with India admitted of no doubt—it was universally admitted, but to carry it out was a great undertaking. In great undertakings success was not immediate; it must be gradually attained as experience was acquired, and the greater the undertaking, the greater the difficulties to be overcome; and happily in this country—for it was one of the distinctive characteristics of its people—the greater the difficulties, the greater the determination to overcome the difficulties. The importance of telegraphic communication with India required no argument on his part; his conviction was that in a few months it would be complete, and one merchant told him a short time ago that he could have saved £50,000 by a single message; and to the Peninsular and Oriental Company its information as to their steamers would be most valuable, and it would be generally beneficial to the country. The false position in which the old Company was placed by the determination of the Attorney-General very nearly put an end to all hopes of telegraphic communication with India, but for the active interference of the gentlemen who so effectually endeavoured to remedy the impression created, insuperable difficulties would have existed. The shareholders of the new Company, if it was successful in working the line, had the prospect of a large dividend; if, on the contrary, they failed, they had the certainty of receiving all their capital back, for all that was asked by the Government was, that if their Company was successful, surplus profits should be paid to the Government to defray the interest on the original capital; and if it was unsuccessful, that after the shareholders had been repaid their outlay, the balance should go to the Government. The capital (£100,000) was small, but sufficient to repair the cable from Aden to Kurrachee, which would reduce the distance between India and England to five days. The shares were nominally £2, but virtually £1, and the prospect of success was universally admitted. Two-thirds of the capital had been subscribed, as the Government made it necessary that this should be done in the first instance, but the directors had refrained from incurring additional expense until it was decided what terms were to be agreed on. As an Englishman, he felt that an enterprise once undertaken by this Company could not be abandoned without a diminution of its national prestige, and he had contributed, as far as it was in his power, his aid to prevent it in this instance, and in this he had been ably assisted by the officers of the Company. The Government had met the question in a very liberal and comprehensive manner. He could assure the shareholders in the old Company that the new one would be quite willing that they should take shares in it. He asked for their co-operation, and he was sure he would not have to appeal in vain.

A vote of thanks to the Chairman closed the proceedings.

A DISPATCH FROM THE GOVERNMENT OF JAPAN TO THE COURTS OF EUROPE.

THE unsatisfactory state of our relations with Japan is, just now, the most prominent question in Asiatic politics. The late dastardly nocturnal attack on HER MAJESTY'S representatives, demands not only full compensation for the national affront, but also satisfactory guarantees against the repetition of similar infringements of the law of nations at any future period. There can be no doubt that in every country the life and property of the diplomatic representative of a foreign potentate ought to be, and are generally, held to be inviolate, and the precincts of his residence admitted to be as sacred an asylum as the "horns of "the altar" used to be considered in the Middle Ages.

It may be difficult to say how far the Government of Japan was compromised in this diabolical affair; but it will be admitted by all that a Government is responsible to foreign nations for the acts of its own subjects, and in this case must be required to give full satisfaction for the affront, and inflict summary punishment on the offenders. At the same time it cannot fairly be denied that the Government of Japan is placed in a very peculiar position, whilst the country itself is in a state of transition from semi-barbarianism to civilisation. After being shut out from intercourse with the rest of the world for nearly three centuries, the thin end of the wedge was first inserted by the American Commodore PERRY'S modest demands for admission to two ports (Simoda and Hakodadi), to re-fit and purchase provisions. Scarcely was this granted than UNCLE SAM appeared again with greater claims, and backed by an imposing naval squadron to enforce them, which resulted in the second American Treaty, negotiated by Mr. TOWNSHEND HARRIS; and when the ice was fairly broken, and the breach considered practicable, other nations—England, Holland, Russia, and now, as we learn, Prussia—stepped in to secure their part of the supposed advantages to be derived from a commercial intercourse, however restricted, with a nation numbering at least thirty millions of inhabitants. It is well known that this sudden change from a state of isolation to comparatively free intercourse with the rest of the world, was not effected without great opposition and internal dissensions, which it required all the energy of the Government to suppress. It is clear that the authorities of Japan have been well aware for a long time of the dangers to which they are exposed from native fanaticism on the one hand, and on the other from any hostile collision with foreign powers, and that they have done their best to steer clear of both. In the month of May last, the Government of Japan came to the decision that it was inexpedient, for the present, to increase their relations with other nations besides those with whom they had concluded treaties, and the unusual—or, indeed, for Japan, unprecedented—step was taken, of addressing a circular note to all known and unknown governments of the world to inform them of this determination. This curious document was entrusted for delivery to the care of the United States Minister resident at the Court of Japan, and has been transmitted by him to the Austrian cabinet. We are enabled to subjoin, for the information of our readers, a full translation of the text:—

"During the course of nearly three centuries, our empire held no intercourse with foreign nations. The native produce and manufactures of the country sufficed for the wants of the inhabitants; the usual articles of general consumption were plentiful, and to be had for moderate and nearly stationary prices; the country was flourishing, and the people were peaceful, happy, and contented.

"In the meantime the law prohibiting intercourse with foreigners was repealed by the advice of the President of the United States of America, and a treaty concluded on the 31st March, 1854, between the Government of Japan and Commodore Perry, the Envoy Extraordinary of the United States, by which American vessels were permitted to enter the ports of Simoda and Hakodady for the purpose of obtaining supplies of fresh water and purchasing wood and provisions. Subsequently a second treaty was signed on the 29th of July, 1858, by our Government and Mr. Townsend Harris, Minister Plenipotentiary of the United States, granting permission to the citizens of that State to trade with Japan; and since then five other similar treaties have been concluded with foreign nations, and are now either in full operation or about to become so.

"But the admission of foreign trade to the ports opened has been attended with results very different from our expectations; for the more wealthy and intelligent part of the inhabitants are unable to appreciate its advantages, whilst the poorer classes derive no profit from it. The objects of daily use and consumption are becoming from day to day scarcer and dearer from the quantities exported, whilst the poor are no longer able to supply their wants, but are now frequently exposed to cold and hunger, and ascribe their privations to the foreign trade and the measures taken by the Government. The system of excluding foreigners from all access to the country and all intercourse with the people, which has been pursued for so long a period, may be described as identified with the Japanese natives, and forming one of the most striking and fundamental traits of their national character. It will therefore be easily understood, that even if the above-mentioned difficulty were not in existence, it would surpass the power of the Government, or anybody else, to control or alter public opinion in this respect, or even to mitigate the uncomfortable feeling that predominates in this country, and which is generally ascribed to the admission of foreigners.

"There can be no doubt that the time is not very far distant when the inhabitants of this country will be able to appreciate duly the advantages that necessarily ensue in trading with other nations; but in the present excited state of public opinion it would be highly dangerous to conclude fresh treaties with other powers, and might even bring about a serious rebellion and all the horrors of a civil war. As it has been deemed advisable, in the present state of affairs, to propose a postponement of the opening of the ports of Hiogo and Niegata, as well as of the cities of Yeddo and Osacca, to foreign trade, as stipulated in the treaties, so we are bound to confess our inability at this moment to enter into negotiations with other States for the conclusion of new conventions; and it is the object of this dispatch to communicate reliable information of the present state of affairs in this country, and thus to prevent embassies

Digitized by Google

being sent to us to open proposals for fresh treaties, which, to our deep regret, could not at present be entertained.

"It is the earnest wish of our Government that the above explanations be communicated to the different Governments of the more important States throughout the world."

THE CHINESE IN CALIFORNIA.

(From Mr. Wilson, late Editor of the *China Mail*.)

We very gladly transfer to our columns an account of the Chinese in California, from the pen of a gentleman who knows how to handle the subject, and do the Chinese common justice :—

"San Francisco, 11th May, 1861.

"You know how difficult it is to get any general information from Chinamen, and how they nearly drove the interpreters mad, last year at the North, with their answers to the questions put to them. They are nearly as bad as that Arab Sheik who, when Mr. Layard made inquiries of him as to the trade of a certain town, replied,—'Many camels come and go, but how many, and what they bring, is known to Allah alone.' The Chinese, however, often conceal their knowledge purposely. The front of stupidity which they present is often assumed as a protection to themselves, and assumed, at times, with much profound policy.

"Such an appearance of stupidity is especially common among the Chinese in California, because they are there held down with a very strong hand, and feel somewhat depressed. As an Englishman, they were more ready to talk to me than to Americans; for, however it may be at Canton, here in California the 'Ameli kee' man is by no means regarded as a benevolent friend by John Chinaman. But, of course, the information I could gather from the Chinese themselves as to their condition, could only be got incidentally, and they were a little alarmed when at first I began incautiously to ask them questions.

"There is no doubt that there is a great 'down' upon the Chinese in California, but I think that the capitalists of the country are favourable to the introduction of them, and that the prejudice against them is softening rather than increasing. Their timidity and aversion to fighting is one reason why they are despised in a new country, where personal courage is of so much importance and is so highly valued. One of the hits which caused most laughter in a theatre I was at last night was made by the actor who represented the coward of the piece, and who, on being forced to fight, cried out in pidgin English—'No can fightee: can wash clothes.' This was received with shouts of laughter; but I am told that the Chinese are beginning to use knives and revolvers, when they are too much 'put upon;' and the up-country papers often contain little paragraphs headed 'Fight with Chinese,' which abundantly show that John is beginning to learn some of the characteristics of the bolder and manlier race among whom his lot has here been thrown.

"I was much obliged to the Rev. Mr. Loomis, a missionary to the Chinese in this place, for his kindness in taking me about among them, and acting, when necessary, as an interpreter. They may be divided into two classes: The merchants who carry on the trade with China and with the gold districts, and the labourers who are on their way to and from the mines. These last are to be found in the 'Kumpanee Houses,' of which there are a number in San Francisco, each house being usually filled with men from some particular district or of some particular clan. Thus the people of Sunon—the district of Kwang-tung opposite you in Hong Kong—have got a house of their own, and you would meet there faces that had perhaps become familiar to you on shooting excursions.

"On entering one of these houses, we at once see that John Chinaman, like John Bull, carries his country about with him wherever he goes. Instead of the uncorking of beer bottles, we meet the odour of the opium-pipe; and I was told at the Custom House that about six hundred thousand dollars' worth of prepared Opium came last year to San Francisco, besides what may have been smuggled. There, also, are the little *c'ha-pui* from which the Chinaman drinks his sugarless tea, the chop-sticks, the rice-bowls; and see if that dirty cook in the corner is not cutting up the identical pieces of pork fat which forms such a stumbling-block to the European debutant in Chinese chow-chow. There is also a joss-house, richly ornamented, as it ought to be in this land of gold; and the sleeping rooms are the same little wooden boxes in which we have spent so many pleasant nights when there was scarcely room for us and the mosquitoes in them together.

"The grand complaint raised by the Californians against the Chinese is, that they are most of them coolies held to servitude—in fact *Slaves*, who unfairly compete with free labour; but I could find no ground for this allegation. The head of the 'Kumpanee Houses,' the lodgers in the houses, and the respectable merchants, agreed in giving a different account of the state of matters. They said—and this you in Hong Kong know to be the case—that nearly all the Chinese who come over to California have had some little property of their own sufficient to pay their passage, or else have been able to raise the necessary sum on the security of their friends. It frequently happens that they reach San Francisco without funds, or are reduced to poverty by some unfortunate speculation at the diggings. In these circumstances the 'Kumpanee Houses' are prepared to advance money if the poor Chinaman can get a friend or two to indorse the bill. The rates of interest thus charged vary considerably, according to the character and prospects of the borrower, and run up sometimes so high as ten per cent. per mensem. A very respectable and pleasant Chinese merchant, who wished his countrymen to stand well in my estimation, was at pains to explain that the high rates of interest charged were necessitated, not so much by any tendency to unfaithfulness on the part of the debtors, but because their lives and their earnings at the diggings were so insecure that many of them were unable to pay up.

"But the Chinamen who thus borrow are not engaged to the company as labourers. They are free to go where they please, and to work as they please, so long as they pay the percentage. As a general, rule the work done by Chinamen at the mines is of such a kind that it does not require much combination amonsgt them. Capital will of course exercise its legitimate influences—here and there a wealthy Chinaman will hire a few labourers of his own race—and all men who are in debt must work at a disadvantage (to their employers, I believe, as well as to themselves); but white miners are in the same position; the most extensive works for obtaining gold have been undertaken by wealthy capitalists, and are carried out by means of white hired labourers. So far as I could discover, there were no indications of any 'peculiar institution' among the Chinese in California in regard to ordinary labour different from the ordinary influence of capital in this and other free countries.

"There is, however, one species of slavery among the Chinese here, as well as in Hong Kong, which gives colour to the allegations brought against them. I allude to that unfortunate class of females who are really held as slaves, and of whom the very dregs are imported into California. As a general rule, Attai is not very beautiful; but the California Attai—ugly, pock-pitted, not young, and diseased, is an object to fill gods and men with shudderings and pity. Being, as I have said, the very lowest of this unfortunate class of women, they are often treated by the Chinese with great inhumanity; and when—from whatever cause—no longer able to serve the purpose of bringing money to their masters or mistresses, they are flung aside to die miserably in any corner, without any alleviation of their sufferings. Cases of this kind, brought before the police, create much indignation against the Chinese, and naturally support the idea that Chinese coolies are worked on a system to which no white labourers would submit, and which secures them toleration and the ordinary offices of humanity only so long as they are profitable by being under-worked. This feature of the Chinese system and character brings its own punishment in this part of the world.

"I have said that there is a disposition among capitalists to favour the introduction of Chinamen, and little disposition among the people to make a crusade against them. Several intelligent men, possessing farms and gold claims, told me that they were desirous of seeing more Chinese brought over, and that the cry got up against them a few years ago, and which resulted in an illegal law prohibiting their importation, was more the work of a few cunning politicians than an expression of the feelings of the people. The few gold miners with whom I had the opportunity of conversing, and who were working in the vicinity of Chinese, spoke of these latter with no dislike, and with no wish to get rid of them. One man complained that the Chinese were given to pilfering; 'but, sir,' he continued, 'when we miss anything, we just go and take its value from the first Chinamen we come across, and so that puts everything square again.' Under this comprehensive judicial system I do not see that the white miners can have any objections to the neighbourhood of pilfering Chinese; and the question of competition is settled in an equally summary manner. Whenever the white man finds the Chinaman entering into competition with him, and threatening to under work him, he simply requests John to make tracks, and if he delays, quickly drives him out to some other field of labour. Washing clothes and selling China goods appear, by common consent, to be given over to Chinamen in San Francisco; but when Irish Biddy has appeared here in sufficient strength, I question whether she will allow John to dabble in soap-suds. The Chinese work at a woollen manufactory near this, and are found to be admirably suited for that kind of labour; but I suspect that the other emigrants to California do not much care about being shut up in a close factory, when they, perhaps, get large sums at the mines, or thirty dollars a month, with their keep at a ranch, and when such advertisements as the following appear in the papers :—

"'To Republicans.—Wanted, four good men, *of any politics*, to split rail fences at four dollars a day.'

"When they are kept from competing in the fields which white labour arrogates to itself, the influx of Chinese to this new country, where labour is so scarce and so highly valued, cannot but be advantageous to all the parties concerned. There are numerous sources of development which are left untouched just from the want of labour. Thus, from want of labour, whole crops of peaches are allowed to rot upon the ground, while preserved peaches are largely used, imported from the Eastern States, where labour is cheap; and almost all the gold procured by Chinamen is got from places which have been dug over and deserted by white men. The objection that the Chinese carry gold out of the country is thus met; for it is gold that would otherwise be unprofitably reposing in the ground; and they do spend large quantities in the country. They travel in steam-boats and railways, and are fond of riding about in carriages. The clothes they wear, the implements they use, the food they eat, are in great part purchased here; they themselves, with the rice and tea they use, are brought over in American ships; at the mines they pay a monthly tax of four dollars a head; they are robbed frequently by white rowdies; they pay highly for house-rent; they use a certain quantity of wine and of other European luxuries; and—viewed in every light, the objection that they carry money out of the country is one of the most ridiculous ever advanced, and I doubt very much of their doing so in any considerable quantity. I suppose, too, that some money—ay vast sums—is 'carried out of the country' to England, to Germany, and to the Eastern States, without any outcry being raised. But, oh John! unhappy friend! until you learn to fight in a civilised and manly manner, even Political Economy will fail to do you justice.

"On entering a shop in San Francisco or Sacramento, the Chinaman is a great favourite. It is all 'Good John! buy this; good John! buy that.' He is patted on the back, and asked high prices, it being known that he never tries to beat down; but if he fails to find what he wants, or does not meet the expectations of the owner, then the scene is changed with a vengeance, and the 'dirty stinking Chinaman' is very ignominiously dismissed. I rather think, however, that, as a general rule, the Chinaman is not ill-treated so long as he does not interfere with white labour. There is a good deal of strong feeling among the people of California against the ill-treatment of Chinamen; it is not thought right or manly to do so; and in American communities this public feeling has more power than among ourselves. The respectable merchants in San Francisco complain much of their not being allowed to bear witness in courts of justice. When the Bishop of Victoria (Hong Kong) was here, he published a letter in the local papers, eloquently calling on Californians to allow the Chinese to make statements in courts of justice against white men, leaving

Digitized by Google

it to the judge and jury to attach what value they pleased to these statements. To this proposal there could be no reasonable objection; but nothing has come of it as yet. The question is too much mixed up with that relating to negroes to be settled on its own merits. It would scarcely do to allow the Chinese coolie to testify against a white man and to refuse the same privilege to an intelligent negro. Another matter in which these two races are classed together, along with the Indian, is that of marriage. A law has been introduced lately forbidding what are called 'mixed marriages;' that is to say, marriages of white persons with black, yellow, or copper-coloured. The absurdity of such legislation scarcely merits exposure, and could only be tolerated where much prejudice and ignorance exist on the subject. In Australia the Chinaman often takes an Irish wife unto himself, and no evil, but some good, has resulted from the practice; but here, where he is prohibited from marrying white women, there are scarcely any white of a class likely to marry him, so the prohibition is in every sense uncalled for.

"On the whole, the conclusion to which we must come in regard to the state of the Chinese in California is, that they are very much kept down, and have not a fair field for the employment of their energies or the development of their character. They struck me as much more stupid and impassive than men of the same class in China. Their numbers here are estimated at about fifty thousand, and at present they are on the increase."

Continental Intelligence.

FRANCE.

Letters from Saigon, dated the 20th of August, give the following particulars as to the state of affairs in Cochin China:—

"The bands which had retired to the South have been completely defeated. On the 28th of July one of them, which we had been long pursuing, was attacked and destroyed; the chief who commanded it was killed, and on his person were found documents emanating from the Court of Hué, and most clearly demonstrating the hostile feeling of the Emperor Tu Duc towards us. The expeditionary corps does not remain inactive. The works it has undertaken are actively prosecuted. The road from Saigon to Mytho is already terminated. The lighthouse on Cape St. James is built, and the lighting apparatus brought from France is about to be installed. This light will be most serviceable to navigation. Two other fixed lights are to be established on the same coast, with the resources of the colony. The internal organisation of the country works satisfactorily. Its establishment has been all the easier, owing to the fact that the Annamites possessed administrative divisions something like our own—that is to say, prefectures and sub-prefectures subdivided into cantons and communes. Under these circumstances, nothing remained to be done but to name the officials. The prefects and sub-prefects are French, but they are aided by a native council with a consultative voice. The mayors and chiefs of cantons are Annamites, and, after numerous trials, persons have been found who fill these offices very satisfactorily. The Emperor Napoleon's fête was celebrated with great pomp at Saigon, and produced a deep impression on the native population."

A despatch had been received at Toulon from Suez, announcthat the steam corvette *Forbin*, which was conveying Admiral Bonard to Cochin-China, had her machinery so seriously damaged in crossing the Red Sea that she was forced to enter the port of Aden, where the Admiral found the steam transport *Rhin*, which was proceeding to Suez to embark troops. The Admiral transferred his staff and baggage to the transport and proceeded with her to Saigon. The corvette is endeavouring to return to Suez under sail.

"The evacuation of Tien-tsin by the allied troops," says the *Pays*, "commenced on 1st Oct. The marines, which are to keep garrison there and at Shanghai, had arrived. The French and English Governments have taken every measure that the garrison may, without fear of being disquieted, accomplish their task. The Chinese authorities have on this subject given every guarantee required by the Powers."

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, Nov. 3.

The heavy fogs we have had here for several weeks are considered by our meterologists as the sure forerunner of severe frost, and great activity is therefore prevalent in the port to enable the vessels to proceed to sea, or else they must inevitably become ice-bound for the whole duration of the winter. But these very fogs are almost as great an impediment to the navigation as ice itself, and the steamers that kept up the communication with Cronstadt have been obliged, in consequence, to suspend their usual trips.

Owing to these fogs, the departure of the new screw-steam corvette, *Bogatyr*, has been delayed for nearly a fortnight, and it is only within the last few days that she was enabled to proceed to sea, and commence her long voyage to the distant mouth of the Amoor.

Accounts from Nicolayevsk mention the arrival there of the Japanese schooner of war, *Kamito-Maro*, from Hakodadi. Besides the Captain, who rejoices in the name of Misupu-Ssuoday, she has four other officers on board, two native pilots, and a crew of twenty-seven men, together with some Japanese merchants, who came as passengers with a view to reconnoitre, in a commercial sense, the Russian settlements on that coast, for which purpose they brought with them samples and specimens of their native produce and manufactures to try the market. The schooner was to remain at Nicolayevsk till the return of the Governor, Rear-Admiral Kasekewitsch, from a tour of inspection to the newly-acquired territory, although the Captain denies that his mission has any political tendency.

By the same post we are informed that a protocol, as an integral addition to the Treaty of Peking, had been signed by the Russian and Chinese Commissioners at Turi-rog, the Russian frontier town on Lake Hanki, by which the boundary line from the mouth of the Belenche, where it runs into that lake, down to the coast on the sea of Japan, has now been definitely settled.

There is no foundation for the report mentioned by the *Pays* and other journals, that a Russian eighty-gun ship had been lost on the coast of Japan and all her crew perished. Russia has no ship of the line in the Pacific at present.

Great exertions continue to be made for the completion of the electric telegraph to the Amoor. A further purchase of wire for this purpose has been ordered at Berlin, of the value of 45,000 silver roubles, making the total sum thus expended amount to 105,000 silver roubles, which will suffice for 2,200 wersts (about 1,500 miles) of land telegraphs. By means of this wire, telegraphic communication will be effected between St. Olga, Wladiwostock, De Castries Bay, the Port of Nowogorod, and Nicolayevsk. For the greater facility of putting up the lines along the banks of the Amoor, three more iron river-steamers of 15 horse power each, and a larger one of 35 horse power, have been ordered at the establishment of Messrs. J. C. Godeffray and Sons, at Hamburg. The three former will be completed in December, and the latter in February next.

The young Emperor of China, who is only seven years old, was proclaimed sovereign with all the usual ceremonies on the 25th of August at Zehol, where his father died. Although the late Emperor's brother, Prince Kung, is not a member of the new Regency, he has been requested by them to remain at the head of the Foreign Department. This is considered an act of great importance for the future good understanding between the Court of Peking and the representatives of the European Powers.

Count Eulenburg has at length succeeded in concluding the Treaty between Prussia and China, but it contains nothing about the right of having a resident Embassy at Peking, which is left for the present an open question and subject to future negotiations. The Count has forwarded to Berlin an official letter from the Japanese Government, announcing their intention to send a special Embassy to the Prussian capital in the spring.

The imperial steam-corvette *Rynda*, of 350 horse-power bound for the Amoor, has just got away to sea from Cronstadt.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Nov. 8.

Scarcely six months have elapsed since the formation of the present Cabinet, and I have again to report a Ministerial crisis. It is understood that Mynheer Loudon, the Colonial Minister, has tendered his resignation, and that several other members of the Cabinet have followed his example. Among those named are Mr. van Tets van Goudriaan, Minister of Finance; Mr. J. A. Jolles, Minister for the Ecclesiastical Affairs of the Reformed Church; and Baron Huyssen van Cattendyke, Minister for the Naval Department. The reason assigned for the resignation of these four Ministers is, that the Minister for Foreign Affairs, Baron van Zuylen van Nyefelt, had sent off circular despatches to Foreign Governments connected with the recognition of Victor Emanuel as King of Italy, without the knowledge and consent of his colleagues.*

Mr. Rochussen, the former Minister, has left the Hague for the Royal Summer Palace of the Loo, in obedience to a summons from His Majesty. It is not unreasonably supposed that the has been sent for to give his advice respecting the formation of the new Cabinet, in which it is expected he will have a seat, if not placed at its head.

One of the first visible effects of the King's late visit to Com-

* Telegraphic advices announce the resignation of the Baron, and tha he has been temporarily succeeded by M. Streno.

Digitized by Google

piegne and his subsequent interview with King Leopold at Liege, is the recognition of the Kingdom of Italy by Belgium.

A letter from Curaçao of the 7th of October gives the following list of vessels forming the Dutch squadron assembled in that port:—Steam-frigate *Zeeland*, 51, Captain Fabius, commodore of the squadron; *Cornelis Dirks*, Commander Koopmann; *Vesuvius*, Commander A. Schotbergh; *Djambi*, Commander Jansen, and the schooner *Atalante*. The *Stad Leeuwarden* was expected from this country. In the face of the civil war going on in Venezuela and the United States, as well as the very unsatisfactory state of affairs in Mexico, it is considered necessary to have a naval squadron of adequate strength to protect the Dutch commercial and maritime interests in that quarter of the globe.

A letter from Delft states that the professors of the Oriental languages in Netherlands India belonging to the Royal Academy in that ancient city, have forwarded to the King an address, unanimously signed, complaining of the transgression of the rules on the part of the Director of the Academy, which alike interferes with the dignity and self-respect of the professors, and the comfort and education of the pupils.

At a meeting of the Chamber of Commerce of Carlshaven situate in the centre of one of the most important manufacturing districts of this country, three separate proposals were brought under discussion with regard to the Government plan for the new Indian tariff. They were as follows:—

"1. A regular annual reduction of the existing duties at the rate of ½ per cent. every year from 1862 till 1866, and then a further reduction.

"2. A reduction once for all from 25 to 20 per cent. on foreign goods, and from 12½ to 10 per cent. on Dutch produce, to come into immediate operation; and

"3. To reduce all duties to an uniform rate of 16 per cent. on foreign imports and 8 per cent. on Dutch produce."

The first proposition was carried by an overwhelming majority, and the other two negatived.

The Netherlands Trading Company advertise for tenders to convey 300 tons of coke and 500 tons of coal from Newcastle to Sourabaya, as well as 500 tons of smithy coal from Cardiff to the above-named port.

The King of the Belgians, as a proof of his respect of and attachment to the reigning dynasty of this country, has sent the insignia of the Grand Cross of the Order of Leopold to H.R.H. the Prince of Orange.

Orders go out by this mail for a new expedition to Banjermassing, with a proclamation offering a reward of 20,000 florins for the head of the rebel chieftan Antasari.

A letter from Harderwyk states that the Sergeant van der Horst, of the East India army, who so greatly distinguished himself in suppressing the late disturbances at Samarang, has been decorated by the King with the insignia of a Knight of the Fourth Class of the Royal Military Order of Willem. At the same time a handsome gold watch was presented to the gallant Sergeant by the Major in command of the East India depot in that town, in the name of the inhabitants of Samarang, and which had been subscribed for by them as a mark of their gratitude and admiration of van der Hörst's courageous conduct under the most trying circumstances of conspiracy and danger.

The King has been pleased to appoint Mr. J. J. Meyer, Civil Governor of the District of Tanah-Laut, in the Island of Borneo, to be Knight of the Order of the Crown of Oak.

The Company's sale of 2,013 chests of lacquered ware and other Japanese produce, commenced on the 28th October, and will last till the 12th instant. The articles were on show a week before the commencement of the sale, and attracted a very large number of dealers and others, among whom was an unusual concourse of ladies. It is not likely that the Company will make any great profit by their spirited enterprise, but it will have the good effect of familiarising the people in this country with the industry of Japan, and open the door for a future demand for the produce and manufactures of that interesting country.

LIEUT.-COL. SAREL'S EXPEDITION.

At the first meeting for the season of the Geographical Society, held on the 11th inst., Lieut.-Colonel Sarel's paper on his journey up the Yang-tse-Kiang towards India was read. Our readers will be aware from the notices which have appeared in our Journal from time to time, that this expedition was intended to terminate in India, but that owing to the insurmountable obstacles offered by the Chinese, the members of it were compelled to return without accomplishing their purpose. On the reading of the paper, the chairman, Sir R. Murchison, made the following remarks:—

"Some two months ago he received a letter from Monsignore G. D. Flechè, the vicar apostolic at Se-chuen, in which it was stated that when the expedition landed at that place the inhabitants were so alarmed at the costume of the Europeans that they threatened the wearers, who had to stay on board some time till the inhabitants were enlightened as to the peaceful character of the expedition. He thought they were much indebted to the members of the expedition, who had prepared the papers, for they had done much to fix the longitudes and latitudes of various places before unknown to this country; and they had also collected a vast amount of valuable statistics, which, when read in detail, would be found most interesting and important."

THE CONSULAR OFFICERS IN JAPAN.

We understand the following movements are about to take place among the British Consular officers in Japan, besides the return to England of Mr. Oliphant, Secretary of Legation, which we have already noticed:—Mr. Ensden returns to Yedo from Hakodadi. Mr. Euslie, relieves Mr. Ensden as Acting Consul. Mr. Meybergh, from Yedo, returns to Nagasaki as Acting Consul, in the room of Mr. Morrison, who, on being relieved, will proceed to England for the benefit of his health. Dr. Jenkins proceeds per *Odin* from Nagasaki to Yedo. Mr. Schmid is re-appointed Interpreter and assistant at Nagasaki.

RETURN OF MR. OLIPHANT.—Mr. Oliphant has reached England, bearing considerable traces of the severe injury he received during the late murderous assault in Japan. He has the scar of a deep wound across the left arm, which has so affected the hand that the fingers are quite powerless. Mr. Oliphant received another wound over the clavicle, which went within an inch of the jugular vein, and thus very narrowly escaped with his life.

LONDON MISSIONS IN CHINA.—We are sorry to learn that the Rev. Mr. Dawson, a gentleman of fortune, who, with his young wife, had dedicated themselves to the mission work in China, is now on his way home, being obliged to leave on account of his ill-health; and that Mrs. Edkins, the wife of one of the most able missionaries in China, died in August—a sad loss to all the mission. The season in the North of China has been this year extremely unhealthy for Europeans.

Literature.

Narrative of the North China Campaign of 1860. Containing Personal Experiences of Chinese Character, and of the Moral and Social Condition of the Country; together with a Description of the Interior of Peking. By Robert Swinhoe. Smith, Elder, and Co.

Mr. Swinhoe's volume will be read with avidity by his countrymen, both in England and in the Far East, for he tells a story which has not hitherto been told so connectedly or so well. The main facts of the North China campaign, and the official documents which have been published in connection with it, will be familiar to most of our readers; but, for singular incidents, for picturesque or lively descriptions, for those touching or amusing details which give vitality and interest to the dry narrative of military operations, they will do well to refer to the able work before us.

Mr. Swinhoe deprecates criticism on the literary defects of his narrative, owing to his absence from England and consequent inability to see it through the press. The excuse is in the main a valid one, yet it will not exonerate him from an error into which he has several times fallen. Fine writing is generally the fault of very young or very feeble authors; but Mr. Swinhoe's account of Formosa, published some time since in the journal of the Royal Asiatic Society, proves that he is far from being a literary neophyte. Yet, again and again we meet with passages in his volume which may attract schoolboys or very young ladies, but which are simply annoying to the reader whose taste and judgment are matured. The truth is Mr. Swinhoe is not blessed with an imaginative temperament, and his attempts to be poetical are singularly unsuccessful.

Every writer has his weak point; and having alluded to Mr. Swinhoe's, we are glad to pass from it to more attractive matter. "It has been my object," he says, "to write a complete account of the campaign, in conjunction with my own experiences in it, and I have thought it best to note every event in order as it occurred; for, if any portion were cut out, it would spoil the free course of the narrative." Such a plan may be injurious to dramatic effect, but it adds greatly to the historical value of the narrative, and we think that the author has done wisely in thus acting as a chronicler rather than as an historian. The cream of the volume, then, as our readers will conclude from what we have stated, is to be found in its

Digitized by Google

details. Of a few of these we shall willingly avail ourselves, and by so doing shall best recommend the work to the attention of the public.

An interpreter, during the late war in China, had strange and onerous duties to perform; and one which fell heavily on Mr. Swinhoe was to bargain with the natives for the price of provisions and of cattle. The commissariat department of the British army afforded a striking contrast to that provided by the French Government—and equally striking was the difference between the strict discipline of the British commanders and the laxity which prevailed in the French army. At Pehtang, for instance, all looting was absolutely forbidden, and "many a poor fellow was flogged unmercifully for picking up a trifle," while Frenchmen were constantly to be met with, with big sticks in hand, "rushing into the houses, and ransacking right and left."

"What articles they did not carry away they ruthlessly destroyed. The few natives who still lingered by their unusurped domiciles quietly watched with the eye of despair the destruction of all the property they possessed in the world, and the ruin of their hopes, perhaps, for ever. A few, both men and women, committed suicide, but the majority quietly escaped to the neighbouring villages, and many others were still to be seen retiring from the scene of destruction with their packs of worldly goods on their backs. But I grieve to say that even these poor wretches did not pass away scathless. As soon as they reached the open beyond the village, they were met by prowling soldiers who had watched for them, and made to exhibit the contents of their packs before they were allowed to depart in peace."

The French soldiers were in evil plight enough themselves, and looting became, indeed, a necessity of existence. They were forced to search the streets for pigs, and, failing these, were glad to sit down to their *bouillon* of dog or cat. We have always maintained that our connection with France in the late campaign was most undesirable, and that the interests of that country in China were not only trivial when compared with our own, but were in character utterly dissimilar. Mr. Swinhoe does not commit himself on this subject to any decided statements, but it is easy to see that his views are identical with our own. He notes, with quiet indignation, the French habit of always claiming to be the first in entering a fortification or in attacking the enemy, and thinks it monstrous that our allies should have claimed the same indemnity as Lord Elgin demanded. But the best, or worst, story which Mr. Swinhoe has to tell of the Imperial forces is in connection with the capture of the Yuen-ming-yuen. General Montauban, it seems, solemnly protested that he had strictly prohibited his troops from entering within the walls of the Palace until the British came up, that all might have an equal chance. Yet, while our interpreter was proceeding to examine the curiosities of the Palace, the French officers began seizing everything they could lay their hands upon.

"After allowing his people to load themselves as fast as they could for about ten minutes, the general insisted upon them all following him out, and kept on repeating that looting was strictly prohibited, and he would not allow it, although his officers were doing it without any reserve before his own eyes. He then told the brigadier that nothing should be touched until Sir Hope Grant arrived. Just as we were walking out of the chief gateway an officer accosted the general, and informed him that they had caught a Chinese stealing a pair of old shoes out of the Imperial grounds. 'Bring him here,' said the indignant general; 'have we not said that looting is strictly forbidden?' The prisoner came forward trembling, and the gallant general exhausted his wrath with his cane about the shoulders of this luckless scapegoat. The brigadier then went to breakfast with General Montauban and staff, and I sought my friends of the *Bureau Topographique*. The French camp was revelling in silks and bijouterie. Everybody had some rare curios to show me, asking me their worth, as, being an interpreter, and having the eunuch with me, they looked upon me as quite a connoisseur. One French officer had a string of splendid pearls, each pearl being of the size of a marble (this he afterwards foolishly disposed of at Hong Kong for £3,000); others had pencil-cases set with diamonds; others watches and vases set with pearls. Indeed, it would be an endless task to enumerate all the valuables already appropriated from the Palace, and yet the French general had asserted that nothing had been taken, as looting was strictly prohibited!"

Such a general must be highly esteemed by his master, who is equally prone to make strong protestations and to act in direct contradiction to them. Lord Elgin spoke against the looting in very plain language, saying, "I would like a great many things that the Palace contains, but I am not a thief. After the release, however, of Messrs. Parkes and Loch the looting became general. "What a terrible scene of destruction presented itself! Officers and men, English and French, were rushing about in a most unbecoming manner, each eager for the acquisition of valuables. Most of the Frenchmen were armed with large clubs, and what they could not carry away they smashed to atoms. In one room you would see several officers and men of all ranks with their heads and hands brushing and knocking together in the same box searching and grasping its contents. In another, a scramble was going on over a collection of handsome state robes. Some would be playing pitch and toss against the large mirrors; others would be amusing themselves by taking 'cock' shots at the chandeliers. Respect for position was completely lost sight of, and the most perfect disorganisation prevailed."

Sir Hope Grant's after orders to call in the loot, and to submit the various articles acquired to public sale, together with his generous gift to the men of his own share in the spoil, are among the familiar incidents of the war. The saddest page in the whole story—we mean the murder of the English prisoners—as written by Mr. Swinhoe, is also necessarily a recapitulation of well-known and mournful facts. The indignation and sorrow excited in the camp, the burial of the murdered men in the Russian Cemetery, and the destruction of the Summer Palace are described somewhat minutely, and Mr. Swinhoe does not fail to note the inconsistency of our allies in refusing to co-operate in firing the Palace when 'the chief mischief had been committed by themselves, not only in purloining and demolishing everything that the Palace contained in the way of art, but also in having permitted their men to incendiarise the choicest rooms of the Emperor."

Mr. Swinhoe makes no attempt in his account of the campaign to take a broad view of British policy in China, neither does he venture to give any opinion as to whether the course to be pursued in the future should be that of strict neutrality or of interference on the Imperialist side. He accepts the war as a necessity, and hopes that Chinamen will be grateful for it, as having been the means of introducing the blessings of Christianity. That good will be "the final goal of ill" we do not doubt; but human nature in China must be quite different from what it is in civilised and Christian countries if, in anticipation of the ultimate gain, the Celestials are thankful for the violation of their women, the destruction of their property, and the death or mutilation of their friends.

In conclusion, we recommend Mr. Swinhoe's narrative of the recent campaign as a faithful and honest description of an eye-witness of the scenes recorded, and of one who in many of them performed no unimportant part.

The Russians on the Amoor; its Discovery, Conquest, and Colonisation; with a Description of the Country, its Inhabitants, Productions, and Commercial Capabilities. By E. G. Ravenstein, F.R.G.S. Illustrated by Maps, Plates, and Engravings. Trübner and Co., 1861.

This volume, the labour of several years, supplies a want in English literature, and is, at the same time, a valuable contribution to geographical science. There is a breadth and massiveness about the work which mark it off very distinctly from the light books of travel or history which are written to amuse a railroad traveller, or a subscriber to Mudie's. It is impossible to over-estimate the importance of the subject which Mr. Ravenstein has chosen for his theme, and yet it is one with which most Englishmen are but slightly acquainted. The fact that Russia has advanced within six hundred miles of Peking, that her recent acquisitions in China comprise mighty provinces rich with the capabilities of commerce; that she has founded military stations, and peopled cities, and formed companies, and launched steam-ships, and established lines of telegraph, by means of which news from the capital of China is first carried to Europe—proves, however, that we, as Englishmen, cannot afford to remain indifferent to the progress thus made, and to the success which has hitherto crowned it. By the aid of the map which accompanies the volume, and a copy of which we are glad to present to our subscribers, it is as interesting as it is profitable to follow Mr. Ravenstein in his narrative of geographical explorations, and of the rapid advances made by Russia in these comparatively unknown regions of the world.

We propose to return again shortly to Mr. Ravenstein's work, and to consider some of the subjects suggested by it, which are of special interest to the merchant and politician. Many of the historical statements made by the writer are worthy of attention, and the chapter which is devoted to a consideration of the commercial resources of the country contains much fruitful matter, of which we shall gladly avail ourselves. In the meanwhile, we recommend every one who wishes to understand the position and prospects of the Russians on the Amoor not only to read, but thoroughly to master, the facts put forth by Mr. Ravenstein.

LONDON, THURSDAY, NOV. 14, 1861.

FRENCH PROGRESS IN COCHIN-CHINA.

THE conduct of the French in Cochin-China, unlike that of the French EMPEROR in Europe, is not so complex as to be unintelligible to those who are acquainted with the geography of that quarter of the world. It has ever been a dream of France to found an Empire in the East, and nothing, perhaps, save the defeat at Waterloo is more galling to her pride than the utter failure of the hopes which were excited upwards of a century ago by the genius and ambition of her Governor of Pondicherry. But while it is not difficult to understand the present policy of France in Cochin-China, it is difficult to ascertain the nature and extent of her operations in that country. Almost all the information which reaches us is derived from French sources; and in the efforts we have made from time to time to furnish details of the progress of French arms in Cochin-China, we have often been perplexed by the obviously one-sided accounts from which we have been compelled to form a judgment from the information recorded in our columns. One thing, however, is, we think, at least clear, that in Cochin-China, as in Algeria, the French have resolved to found a colony, and to conquer a country, partly it may be, for the peaceful purposes of commerce, but mainly to occupy an important naval and military position. It, therefore, behoves our Government to be fully alive to the consequences which may grow out of this policy. There is no cause for irritation on our part, still less for fear: but at the same time we should be prepared for the contingencies—possible at least, and as we believe probable—which are liable to arise from the military occupation of Cochin-China and command of the mouths of the Kamboja river by our rivals and allies. But although we believe this is the main object of the French in establishing themselves in that country, there are other advantages to be gained from the annexation to which they are evidently not insensible.

Russia, having possessed herself of the great Asiatic river, Amoor, which runs a course from the west of full 1,800 miles to the Pacific Ocean, is laying down tramways and setting up telegraphs from her European wires to her new port and arsenal at the mouth of the Toumen, in the Sea of Japan. It is through St. Petersburg that we now receive intelligence of the events which occur in the North of China; and it was, as our readers are aware, through that channel that we were first informed of the termination of the last Chinese war, of the death of the EMPEROR, and the recent conclusion at Tien-tsin of a treaty between the Chinese and Prussia. In fact, no one can doubt that the progress of Russian encroachment along the whole west, north, and east of the Chinese Empire, has given her the position and power to domineer, henceforth, over both the Chinese and Japanese Governments, and to hold command of the Sea of Japan and adjacent waters. While Russia has thus progressed, almost by stealth, in the Northern part of the "Far East," France has been securing a territorial position in its more Southern part. Her hostile acquisition of Cochin-China and formal annexation of it to the French Empire, the occupation of its extensive coast, its rich country and its navigable rivers, her improvement of the originally formidable fortifications of Saigon, with the construction of docks and erection of lighthouses in that direction, show a systematic imitation of the course pursued by Russia in the North.

We do not say that we should view these rapid Asiatic acquisitions of those two naval and military European Powers as hostile. It would be narrow-minded in us to regard all the rich and populous countries of the East as a trading preserve of our own. There is in the those countries ample room for the commercial enterprise of all civilised nations. It has been for England to lead the way; and we should neither wonder or begrudge that others, free from the cares and cost of wars in Europe, should essay to follow our example in Asia. At the same time, we should carefully remember the new relations in which these two leading European Powers now exist to ourselves and to others. For purposes of both commerce and war, steam navigation, railroads, and telegraphs, have changed the face of the earth. And where different powerful nations penetrate, though at far distant points of it, into a distant country, for the peaceful pursuits of trade, there commercial rivalries and jealousies are sure to arise, and create a struggle between them for supremacy in the councils of the country into which they have intruded. Their very position and opposing interests in such a country place them within the range of those great causes of strife that affect, at times, even the most civilised nations.

The original expedition to Cochin-China was professedly to redress wrongs French missionaries had sustained at the hands of its Sovereign. That object, however, accomplished, the invasion has continued, and annexation of the country to France been formally proclaimed: thus showing that political objects in that quarter influence the French ruler. The very imposing fort of Saigon stands on the most navigable of the several mouths of the Kamboja river. That river has its rise in the lofty snow ranges of north-western Thibet, and, after flowing a length of several hundreds of miles through that country, enters Western China a large stream, at the extreme north of the province of Yunnan, flows nearly due south for some more hundreds of miles through that province, until it reaches eastern Burmah, and flows still southward until it enters the territory of the inland States of Laos, from which it runs, south-easterly, to the new French territory of Cochin-China, entering the sea at about 60 miles below the French Cochin-Chinese capital of Saigon, at about 10 deg. N. lat.

Now, when we state that at the Burman city of Kiang-Hung, which is 860 miles direct from the sea, this river measures 1,600 feet during the floods, and in the dryest season is never less than 540 feet in width and 16 feet in depth, and that it is navigable from Kiang-Hung far up into Western China, it becomes at least highly probable that the eyes of French merchants, if not of the EMPEROR, have been directed to Cochin-China, as offering a route by this stream to a future exclusive commerce with the western inland half of China. This idea, too, is not a little strengthened when we call to mind that, although the policy of our Government has, strangely enough, hitherto discountenanced the exchange of friendly missions between our Sovereigns and the Kings of Burmah, yet that the last occupier of the Golden Throne at Amarapoora sent Ambassadors to King LOUIS PHILIPPE at Paris, and that the now peaceful occupier of it has sent Envoys to the present EMPEROR of the French, and entered into Treaty relations with him, the particulars of which have never been made public, nor, we imagine, been correctly ascertainod by the diplomats of our Foreign-office.

DEATH OF THE EMPEROR OF CHINA.

THAT HIEN FUNG died on the 22nd August last, in the 30th year of his age, is nearly all we know with absolute certainty respecting the departure of a monarch who ruled, or imagined that he ruled, an enormous Empire. His reign has been marked by great events. Eleven years seems a short time in the history of a country that carries back its chronicles and traditions into far distant ages; but those years have been pregnant with eventful circumstances, which give them a strange significance in the long and somewhat monotonous chapter of Chinese history. Though the late EMPEROR died in the early prime of manhood, he lived long enough to incur an indelible disgrace, and to know that he could only purchase peace by implicitly submitting to the demands of his conquerors. And not only had he to contend with the pressure imposed upon him from without, he had also to maintain a conflict with rebels, in the heart of his own dominions, a conflict that seems to betoken a chronic disease in the political condition of the country which no remedy in the possession

Digitized by Google

of the Imperialists is strong enough to reach. If, as has been reported, the late EMPEROR surrendered himself to luxury and dissipation, it cannot be denied that his temptations to such a course were powerful, and that in yielding to them he proved his unfitness for empire more even than his moral degradation. The standard of right is indeed the same all the world over; but the position occupied by an heathen EMPEROR at the head of a Government so utterly and openly corrupt as that of China —by a young man surrounded at once by boundless luxuries, and by perplexities which threatened every day to increase,— renders the conduct of HIEN FUNG if, indeed, it has been correctly described, a subject for our pity rather than our blame.

We can but vaguely conjecture the effect of the EMPEROR'S decease on our future relations with China. To us the monarch of the Celestials has been little more than a puppet—a name rather than a person, and the news of his death has been received in England with comparative indifference. Contrary to the usual custom in China, the infant son of the EMPEROR has been proclaimed as his successor. This fact, while it is ominous of evil for the country in its present distracted state, concerns us mainly in its relation to British interests. If Prince KUNG acts as Regent all may be well; if the old war party comes once more into power, our Treaty rights may be again repudiated, and the hopes we have formed for the future, overclouded.

It is singular that the death of the EMPEROR should have afforded a solution to the difficulty which has been hitherto kept in abeyance. By our recent treaty the EMPEROR was bound, on returning to Peking, to receive our Ambassador; but months have passed on and HIEN FUNG has carefully avoided a return to his capital. Probably he dreaded the humiliation of such an ordeal, and so delayed until death came to his relief and cut the gordian knot.

Naval and Military.

The Queen has been pleased to give and grant unto Sir James Hope, K.C.B., Rear-Admiral of the White Squadron of Her Majesty's Fleet (holding the temporary rank of Vice-Admiral), Commander-in-Chief of Her Majesty's ships and vessels on the East India and China station, Her Majesty's Royal License and Permission that he may accept and wear the insignia of the Imperial Order of the Legion of Honour of the Second Class, which His Majesty the Emperor of the French hath been pleased to confer upon him in approbation of his distinguished services before the enemy during the recent combined operations of British and French forces against China.

Rear-Admiral Erskine, whose flag was recently flying on board the *Edgar*, 89, screw, as second in command of the Channel fleet, is to succeed Rear-Admiral Sir James Hope, K.C.B., as commander-in-chief in the East Indies and China. Captain Edward Tatham goes out as flag captain of Admiral Erskine.

Notice is given of a distribution of bounty awarded for the destruction of pirates in the China Seas on the 26th of June and 4th of July, 1855, by Her Majesty's ship *Racehorse*. Persons interested are requested to transmit their claims to the Prize Branch of the Department of the Accountant-General of the Navy, Admiralty, Somerset-house.

Vice-Admiral Sir Michael Seymour, K.C.B., M.P. for Devonport, accompanied by his late flag captain, M. K. Hall, visited the gunnery-ship *Cambridge*, Captain Jerningham, in Hamoaze, and, after inspecting the ship, witnessed target practice, at various ranges up to 1,200 yards, with shot and shell, the ship being rolled heavily during the practice.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

COBBOLD—On the 27th ult, at Broseley Rectory, Salop, the wife of the Rev. R. H. Cobbold, late of Ningpo, of a son.

FEARON—On the 4th inst., at 4, Palace-road, Roupell-park, Streatham-hill, the wife of Charles A. Fearon, Esq., of a daughter.

LAMMEREE—On the 5th inst., on board H.M.'s ship Leonidas, at Sheerness, the wife of Lieut.-Col. Lammeree, of the Dutch East India Army, of a son.

MELBOURN—On the 3rd inst., the wife of G. Melbourn, Esq., of Java, of a son.

VAN STRAUBENZEE—On the 9th inst., at Sandgate, the wife of Major van Straubenzee, A.D.C., of a son.

WADMAN—On the 28th ult., at Lindfield, Sussex, the wife of E. Wadman, Esq., late of China, of a son.

WISE—On the 3rd inst., at Fulshaw-house, near Wilmslow, Cheshire, the wife of John Wise, Esq., late of China, of a son.

MARRIAGES.

KEPPEL—WEST.—On the 31st ult., at St. Paul's Church, Knightsbridge, by the Rev. Richard West, Rear-Admiral the Hon. Sir Henry Keppel, K.C.B., to Jane Elizabeth, eldest daughter of Martin J. West, Esq, and the Lady Maria West, of Cadogan-place, Belgrave-square.

DEATHS.

NEWBOLT—On the 30th ult., at Bath, Anne Frances, widow of the Rev. W. R. Newbolt, vicar of Somerton, Somerset, aged 63.

PASTRE—On the 30th ult., at Marseilles, aged 61, Joseph Pastre, Esq., of the firm o Pastre Brothers, of Marseilles, London, and Alexandria.

PONDER—On the 26th ult., at Brixton, Surrey, Mrs. Mary Ponder, relict of the late Stephen Ponder, Esq., in her 79th year.

Monetary and Commercial.

At the meeting of the Red Sea and India Telegraph Company on the 5th inst., the propositions made by Government were accepted, on condition that the annuity proposed should be made clear. A report will be found in another column. The capital of the new Company has been subscribed, and the preparations are now being made for despatching the necessary cable, estimated at 200 miles, for the repairs of the sections between Aden and Kurrachee, on the successful completion of which, the sections between Suez and Aden will be proceeded with. The working of the Aden-Kurrachee line will shorten the communication with India, but only in an indirect manner with the Straits, China, &c., viz., by passing messages from Kurrachee to Calcutta, and thence to Ceylon, where they may occasionally catch a steamer in advance of the mail. When the Suez-Aden section is working, the communication with China will, by the aid of the lines lately opened between Malta and Alexandria, be reduced to twenty-six days.

The arrangements necessary to be made for the transmission of messages by the Malta and Alexandria Cable, on behalf of the public, have been completed earlier than expected, and the line is now open from London to Alexandria, at a cost of £2. 6s. 9d. per twenty words. This reduces the time of communication with India, China, &c., by six days. The line to Malta is now working more satisfactorily, in consequence of English clerks being placed at all the stations *en route*.

It is understood that there are some new Indian banking projects about to be brought forward, and one, if not more, it is said, will be influentially supported. The object, it is stated, is to take advantage of the field of enterprise presented in that locality, particularly under recent changes, the prospects connected with which are steadily improving. Institutions of the kind, however, will involve serious responsibilities, and therefore it is to be hoped their organisation will be delegated to properly recognised individuals.

The bar silver brought by the last steamer from Mexico has been disposed of at 60⅞d. per oz., and the dollars at 59⅜d., showing an advance of ⅛d. in both cases.

A half-yearly meeting of the Oriental Bank was held on the 29th ult., Mr. H. G. Gordon in the chair, when a dividend was declared at the proposed rate of 14 per cent. per annum, free of Income-tax. There was no report, the present meeting being merely for the declaration of a dividend; but the annexed account was submitted, showing the progress and satisfactory position of the establishment:—

BALANCE-SHEET FOR THE HALF-YEAR, ENDING JUNE 29, 1861.

Liabilities.	£	s.	d.
To promissory notes in circulation not bearing interest	686,464	5	0
To bills of exchange, in circulation not bearing interest	4,302,733	6	9
To balances due to other banks	100,181	17	2
To cash deposited, not bearing interest	1,664,258	0	7
To cash deposited, bearing interest	4,244,249	6	11
Total due to the public ...	£10,997,886	16	5
To capital paid up 1,260,000	0	0	
To reserve surplus fund 252,000	0	0	
To insurance fund 50,000	0	0	
To dividends remaining unpaid ... 3,862	0	0	
To balance of profit and loss after defraying all current charges ... 109,015	9	9	
	1,674,877	9	9
	£12,672,764	6	2

An extraordinary general meeting of the shareholders in the Chartered Bank of India, Australia, and China, was held on the 30th ult. at the London Tavern, for the purpose of declaring an interim dividend for the half-year ending 30th June last; T. M. Mitchell, Esq., M.P., presided, who made the following statement:—

"That this was the half-yearly meeting at which it was not the practice to present the accounts. He had to move that a dividend of 6 per cent. per annum, free from Income-tax, be declared for the half-year. Although they did not furnish accounts, he could inform them that, after paying the dividend, they would be able to carry forward about £5,000. He wished he had not to add that, since the accounts were made up, one of their agents had incurred a liability of £20,000. They appointed this gentleman as their agent in Bombay, he having had considerable experience in another bank in the East, and being strongly recommended. He had not fulfilled their expectations, but had involved them in a liability of £20,000 with some Hindoos who were under a contract with a railway company there. As soon as they heard of it, and before the embarrassments of the parties were known, they reprehended it severely, and subsequent circumstances which had come to their knowledge led them to believe that their agent in making this loan was guilty of a breach of duty, and they have been advised that in case a loss were incurred—which was not certain—they would be able to recover the amount of his bond (£5,000) from the Guarantee Society. The agent was no longer in their service."

The motion was agreed to unanimously, and the meeting separated.

The rags imported from Kanagawa have not as yet been realised. A fresh lot arrived lately by the *Vision*, and another is daily expected per *Antagonist*. The freight, at £3. 10s. per ton of fifty cubic feet, is equal to fully £6 per ton weight. Large quantities of these rags are also obtainable in India, but a recent experiment to import them resulted unsatisfactorily, as their value was found to be small, owing to the wear to which they had been subjected.

The amount of bullion by the steamer *Indus* from Southampton on the 4th inst. was:—In gold, to Alexandria, £100; Madras, £628. In silver: Calcutta, £2,040; Hong Kong, £5,106; Foo-chow-Foo, £1,300; Shanghai, £12,915.

EXPORTS TO CHINA, &c..

The exports to HONG KONG and CANTON of plain cottons for 12 months ending Oct. 17, 1861, are, 91,277,300 yards, against 57,938 036 in 1860, and 49,580,753 in 1859. Of coloured cottons, in 1861, 4,173,980, against 5,533.672 in 1860, and 5,626,483 in 1859. Of printed cottons, 1,015,396 in 1861, against 1,201,835 in 1860, and 2,291,616 in 1859. Of Twist, 8,908,110 lbs. in 1861, against 7,633,860 in 1860, and 9,096,989 in 1859.

To SHANGHAI.—Plain cottons, 172,954,352 yards in 1861, against 116,954,568 in 1860, and 109,001,875 in 1859. Coloured cottons, 10,205,272 yards in 1861, against 21,677,666 in 1860, and 11,905,087 in 1859. Printed cottons, 2,664,143 yards in 1861, against 3,206,629 in 1860, and 3,088,875 in 1859. Twist, 22,240 lbs. in 1861, against 1,000 in 1860, and 55,100 in 1859.

To SINGAPORE.—Plain cottons, 46,266,674 yards in 1861, against 53,150,730 in 1860, and 41,214,867 in 1859; coloured cottons, 7,964,917 yards in 1861, against 9,246,854 in 1860, and 9,367,352 in 1859; printed cottons, 2,415,823 yards in 1861, against 3,232,896 in 1860, and 3,480,567 in 1859; twist, 1,983,704 lbs. in 1861, against 3,416,937 in 1860, and 3,540,198 in 1859.

To BATAVIA.—Plain cottons, 31,539,534 yards in 1861, against 31,523,920 in 1860, and 26,669,595 in 1859; coloured cottons, 15,294,326 yards in 1861, against 19,021,046 in 1860, and 12,205,143 in 1859; printed cottons, 12,138,253 yards in 1861, against 12,017,244 in 1860, and 7,006,809 in 1859; twist, 1,008,835 lbs. in 1861, against 1,389,790 in 1860, and 1,238,555 in 1859.

To MANILA.—Plain cottons, 16,157,197 yards in 1861, against 20,663,608 in 1860, and 13,473,052 in 1859. Coloured cottons, 11,930,443 yards in 1861, against 15,732,750 in 1860, and 5,592,432 in 1859. Printed cottons, 727,625 yards in 1861, against 277,899 in 1860, and 348,800 in 1859. Twist, 134,640 lbs. in 1861, against 172,597 in 1860, and 259,720 in 1859.

ARTICLES OF IMPORT.

TEA.—The market during the past fortnight has shown great activity, The trade have bought largely of the new season's teas, and also of most other kinds, while there have been also considerable purchases on speculative account in common to medium qualities of Congou and common to fair kinds of Scented Teas; and the rise established in all descriptions of Black Tea is from 1d. to 1½d. per lb., whilst Green Teas have barely maintained the very extreme rates ruling last month for the finer descriptions. The deliveries continue to show a considerable improvement on last year, chiefly, however, in Exports, the increase as compared with last year for the first nine months being nearly 4,000,000 lbs., 3,000,000 lbs. of which is in exports. Low to fair common Congous, with leaf, have advanced fully 1d. per lb. The dusty kinds are also about 1d. per lb. dearer. Good common Congou must now be quoted 1s. 1d. per lb., and with but little to be met with at that figure. Fair to good flavoury kinds of old season have been more inquired for, and prices have advanced 1d. to 1½d. per lb. Common to good Ho Hows and Ning Chows, as also second class Honams, Monings, and Wopaks, have been in good demand, and prices rule 1d. to 1½d. per lb. dearer. The few fine Monings offered have realised a similar advance. The new season's Kaisow Congous continue to command great attention, and fully the opening prices have been paid for the later arrivals, whilst in many cases for the grades about 2s. per lb., 1d. to 2d. per lb. advance has been obtained. The sales comprise nearly the whole of the cargoes of the *Falcon*, *Ellen Rodger*, *Flying Spur*, *Robin Hood*, and *Beemah*. Tayshans have been bought speculatively at an advance of fully 1d. per lb. on the lower qualities, whilst good and fine show a similar improvement. Souchongs of common to good kinds show an advance of 1d. per lb.; some of the new season's fine kinds have been sold from 2s. 8d. to 3s. 3d. per lb. Common to good Oolongs have been in better demand at 1d. per lb. higher prices; the new season's have sold readily from 1s. 11d. to 2s. 3d. per lb. There has been a steady demand for Flowery Pekoes, and sales made, both privately and at public auction, at an advance of 2d. to 3d. per lb. There have been large speculative purchases of common to fair Scented Capers, and an advance of 1d. to 1½d. per lb. has been established: good and fine kinds, both from Canton and Foo-Chow, continue in request at full prices. There have also been speculative purchases of common to fair scented orange Pekoes at a rise of fully 1d per lb.; good and fine of these are also in demand, and some from Foo-Chow have sold up to 3s. per lb. Uncoloured Japan Teas continue saleable at from 1s. 7d. to 2s. per lb., with a few extra fine from 2s. 3d. to 2s. 4d. per lb. In Green Teas there has been less to notice in the absence of fresh arrivals, but the extreme rates ruling have not been quite maintained for the finer kinds of Moyune, which, owing to the high prices, are less in demand than the commoner kinds. The *Sir Ralph Abercrombie's* teas have as yet only been partially offered, but the sales made have been at fair prices. There have been four public sales during the month, comprising 37,000 packages, of which 16,300 packages were sold, including 8,230 packages without reserve, and about 1,500 packages Assam tea, which sold rather dearer, especially for the commoner kinds. The stock on the 1st of November of all descriptions of Black was—in London, 44,235,935 lbs., and of Green 2,966,285 lbs. The total delivery was—of Black 63,092,304 lbs., and of Green 8,701,058 lbs. The stock at Liverpool was 3,711,210 lbs. of Black, and 13,634 lbs. Green. The total delivery of Black was 6,808,383 lbs., and of Green 505,857 lbs. The imports in London to the 1st of October have been, of Black 61,192,723 lbs., and of Green 5,523,293 lbs.; at Liverpool, of Black 8,408, 539 lbs., and of Green 488,504 lbs.

SILK.—We have again an unsatisfactory report to give of Silk. Transactions generally have been upon a limited scale, and prices barely supported. The deliveries are less unfavourable than the previous month, but still not good. In China Silk there has been an occasional appearance of business and sales of parcels of decent extent, but this has been only occasional, and the market generally has been heavy—so much so, that notwithstanding the continued small supply of "classical" Chops, the prices of these Silks have given way 6d to 1s., thus reducing them to about their usual parity. Chinese Thrown Silk continues neglected. In Japan Silk fair business has been done—the sales fairly keeping pace with the arrivals. Bengal Silk shares the general quiet, unfortunately, to the fullest extent. In Italian Silk we have very little doing. In Brutia and Persian Silk nothing.

SUGAR.—A better tone has prevailed in the market, and a fair amount of business has been done at firm prices. The public sales of East India were confined to 1,600 bags Bengal, of which 528 bags good and fine white Benares met ready buyers at stiff rates, 46s. to 47s., the rest, Gurpattah Date, was withdrawn at 38s. 6d. to 39s. 6d., scarcely any offers being made.

COFFEE.—A steady demand has existed, and although from importers of Colonial sorts continuing free sellers, a slight decline has occasionally been submitted to. The sales have been 177 casks, 138 barrels and bags, Plantation Ceylon publicly at 73s. to 77s. 6d. for fine fine ordinary to low middling. 590 bags dull brownish Singapore brought 66s. 6d. to 67s.

RICE.—There is no demand for this article, and transactions have been unimportant. 400 bags good midding white Bengal sold at 14s. There have been no sales of East India.

PEPPER.—White is again the turn dearer. 2,158 bags Penang sold at auction at 3¼d. to 3⅜d. per lb. for fair to good; moderate trade privately in Singapore at 4d. to 4⅛d. Black: Transactions confined to a few small lots, sold upon former terms.

SAGO is 1s. per barrel dearer, and of 253 packages at auction, three-fourths sold at 21s. 6d. to 23s. per cwt. for fair small. Good business privately up to 23s. 6d. for good small. FLOUR.—No auctions. Fair trade privately at 16s. 6d. per cwt. for good.

SPICES.—Cinnamon: The quarterly sales went off with very fair spirit at a general advance of 1d. to 2d. per lb., nearly all offered selling. They were thus composed:—110 bales 1st at 1s. 4d. to 2s. 3d. per lb., with superior at 3s. 1d.; 970 bales 2nd, 1s. 1d. to 1s. 10d.; 600 bales 3rd, 10d. to 1s. 3d.; and 100 4th and Jungle, 8d. to 10d. Cassia Lignea: Quiet, and of 306 cases at auction a few lots only quitted at 87s. to 92s. per cwt. for 2nd to 1st pile; 153 chests Japan at 37s. to 54s. for coarse to good thin, fair flavour. Cassia Buds: Very scarce. Cloves: Of 848 bags of Zanzibar at auction, two-thirds sold at 3¼d. to 3⅜d. for middling to good. Mace: Quiet, and without change. Nutmegs: 18 cases Penang sold at auction at previous terms.

HEMP has been in improved request, and good business has been done privately up to £25 per ton for good roping, but of 1,502 bales at auction, the damaged only (700 bales) sold at relative prices.

COTTON.—Prices have fluctuated to the extent of ⅜d. to ½d. per lb., and business to some extent has been accomplished in middling to good Dhollera at 7¼d. to 8⅛d.; good to very good Broach, 8⅜d. to 9d.

JAPAN WAX.—Saucer is now quoted at 65s. to 75s.; block, 52s. to 60s., the former is scarce and wanted, and a few sales have been made of block at 60s.

TOBACCO.—Very large imports have taken place from Holland, and holders are asking higher prices, which checks the consumption, manufacturers turning their attention to other growths.

TIN.—A slight drooping was felt in the market, but recently an improvement has taken place and is now firmer.

GAMBIER.—Firm. Sound, 18s; heated, 17s. 6d. CUTCH: An increased demand and rates have further advanced 1s. 6d. per lb.; 1,983 bags at auction sold at 24s. 6d. for good.

MISCELLANEOUS.—India-rubber: Private sales have been effected to some extent, but lately the market has become quieter. Camphor 75 chests at auction sold at £8 to £8. 5s. Sapanwood: 6 tons at Bombay sold at £6. Soy: Steady. Mother-o'-pearl shells: Market quiet. Star anniseed: Of 17 cases two only sold at 64s. per cwt. for good quality. Sticklac: Firm. Gum benjamin: Without change; and 30 cases Siam at auction, all sold at £9 to £12. 2s. 6d. for dark brown, and £6 to £7 dust and block. Damar: Quiet, and 4s. to 5s. per cwt. lower. Of 213 cases at auction, one-third sold at 49s. to 50s. 6d. for good picked. Gambouge: In some request, and 13 cases at auction chiefly sold at £7. 10s. per cwt. for good pipe. Rattans: Firm. Saltpetre: Prices have advanced 6d. per cwt. with a firm market. Gutta-percha: Less demand; a small portion has been sold at 1s. 3½d. per lb. for fair genuine. Rape seed: Small supply and good demand. Elephants' teeth: No alteration. Vermilion: Inquiry but no sellers. Galangal root: Steady; of 160 bags half sold at 22s. to 22s. 6d. for middling. Cubebs: 50 bags at auction all retired. Dragoons' blood: Dull; 2 cases at auction retired. Galls: 75 cases China at auction, retired at 60s.; good China and Japan is quoted 40s. to 50s. Rum: East India sorts have been restricted to retail quantities of Penang at 1s. 6½d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. 0d.; nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £8. 15s. to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5 to £5. 5s.

STEEL.—Swedish keg, £15. 10s. to £16.

COPPER.—Sheet and sheathing, 11½d.; yellow metal, 9½d.

TIN.—120s. for block; 121 for bar. Tin plates, best charcoal, I.C., 28s. to 28s. 6d. per box.

LEAD.—English pig, £19. 15s. to £21. 10s.; shot, patent, £22. 10s.; sheet, £20. 10s.; spelter, £19. 5s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

The total export of metals from London and Liverpool to China for the first ten months of 1861 have been:—Iron: rails, 77 tons; pig iron, 556; bars and nail rods, 5,300; hoops and sheets, 500. Steel: English, 39; Foreign, 131. Copper: cakes, ingots, and tiles, 1; sheets, rods, and nails, 103; yellow metal, 237. Lead: pig lead, 4,565; sheets and pipe, 114; spelter, 429; zinc, 21; tin plates, 8,904 boxes; quicksilver, 520 bottles.

EXCHANGES.

On Singapore (dols.) Bank Bills	4s. 7¼d.	Buy at	4s. 1½d.
On Hong Kong, ditto	4s. 7¼d.	Do.	4s. 1½d.

MANCHESTER MARKETS.

There has been a large business in yarns lately, and prices have considerably advanced. A large business has been done for Germany, India, and China. The home trade houses have also been buying freely at fully ¼d. per lb. advance. The market is, in fact, very strong in neary all kinds of yarn, whether for home manufacture or for export. In the cloth-market we hear of no improvement. A telegram from India has been received announcing a rather large business at advanced prices, but there are no quotations given. There has not been much business offering for any kind of goods. Manufacturers are firm, and for the business that was done we hear that speculators, who have become rather anxious to realise, have undersold producers.

From Samuel Mendel's circular we learn that the advance in the price of Cotton since last April has been 4¾d. per lb., the price then being 8¼d., and now 13d. for fair to good fair Orleans, which is the highest price known for thirty-six years. The advance in Yarn has been 2d., the prices for Water being respectively 10½d. and 12½d. In Grey Shirtings the advance has been 1s. 4½d., the prices being for 40 in. 8-6ths respectively, 8s. 10½d. and 10s. 3d. The present stock of American cotton held at Liverpool is less by 236,550 bales than at this time last year. The shipments from the United States during the four months ended Decem-31st, 1860, amounted to 1,000,000 bales, whilst this year they will be *nil*. The high prices now being realised for cotton, of all grades, will, most certainly, attract increased supplies from all other countries, but these must fall far short of the deficiency for a long time forward.

COMMERCIAL POSTSCRIPT.

CITY, THURSDAY AFTERNOON.

The final settlement of the conditions between the Government and the Red Sea Telegraph Company for the establishment of the new Company and the termination of the old one, has not yet been executed, and as so much time has been lost by Government, it is now doubtful if the necessary repairs to the line can be effected this season.

Advices from New York state that San Francisco has been brought into telegraphic communication with Cape Race, the wires being stretched across the continent to the Pacific. The line will now be extended by the way of Behring's Straits to the mouth of the Amoor river, to which point the Russian Government is extending its wires from its European frontier. Thus the Government and merchants of the United States, as well as of Russia, will soon enjoy the incalculable advantage over us of telegraphic communication with China. A notice of this matter will also be found in our St. Petersburg correspondent's letter.

Mr. Mendel's circular of the 12th says:—"There is a decidedly better inquiry in the Manchester market to-day, with increased sales both of yarns and goods, at prices not obtainable on Tuesday last."

ARRIVALS NOT INCLUDED IN THE TABLE.—Nov. 6, at Brouwershaven, from Sourabaya, Maastroom; at Cuxhaven, from Singapore, Elizabeth; 7, at Texel, from Batavia, Almelo, Koning Willem III., Bilderdyk; at Flushing, from Maulmain, Edouard and Julie; 11, at Falmouth, from Akyab, Aloe; at London, from Singapore, Corvermatia; 10, at Falmouth, from Maulmain, Jane Henderson; from Rangoon, Henry Reed; 11, at Deal, from Singapore, Granville; from Akyab, Royal Charlie; 12, at London, from Rangoon, Essex; from Shanghai, Glenclune; Off Falmouth, from Akyab, Garland; 9, at Texel, from Batavia, Alblasserdam; from Padang, Trynje Fenna; 8, at Brouwershaven; from Batavia, Buitenzorg; from Passaroeang, Maria Diederika; 12, at Queenstown, from Rangoon, Seringapatam; 10, at Texel, from Batavia, Jacoba; 12, at Liverpool, from Akyab, Harola; 14, at Falmouth, from Akyab, Prins Oscar.

DEPARTURES.—Nov. 12, from London, for Cardiff and China, Kate Swanson; off the Wight, for Singapore, Western Continent; 9, from Cardiff, for Shanghai, Mahe; 9, from Mumbles, for Shanghai, Bonny Lass; 12, from London, for Shanghai, James Miller; from Deal, for Batavia, Constance.

SPOKEN.—Martha and Jacoba, London to Batavia, Aug. 1, 28 S., 1 W. Christina Agatha, Liverpool to Batavia, Sept. 17, 11 N., 23 W. Salatiga, London to Batavia, Sept. 26, 8 N., 25 W. Bankok, French barque, Bordeaux to Singapore, Oct. 2. City of Glasgow, Singapore to Liverpool, Sept. 7, in the Straits of Banca. Bride, barque, London to Singapore, Aug. 4, 30 S., 27 W. Minerva, Newcastle to Shanghai, Aug. 11, 35 S., 4 W. Cornelius Anthonie, Rotterdam to Batavia, Oct. 25, 42 N., 13 W. Elise Henrietta, Batavia to Amsterdam, Oct. 2, 8 N., 24 W. Minister Thorbecke, Amsterdam to Batavia, Oct. 26, 47 N., 10 W. Medea, Rotterdam to Batavia, Oct. 8, 9 N., 25 W. Jan van Schaffelaar, Batavia to Rotterdam, Nov. 8, 49 N., 10 W.

Laid on at London, for Hong Kong and Canton, Banian.

LAID ON AT GLASGOW.—For Batavia and Singapore: Colonsay.

CASUALTY.—Cuxhaven, Nov. 7, the Neuhof (Danish barque), Kros from Hamburgh to Singapore, parted her chain last night, and is now on shore on Krautsand. She is expected to be got off to-day by the assistance of a steamer, after being lightened.

The Prompt, Whittle, from Rangoon to Liverpool, was thrown on her beam-ends about eight to ten miles N. by E. of the Bell buoy, and suddenly foundered in eight fathoms of water, master, mate, pilot, man, and a boy saved; fifteen hands lost. Her cargo is washing up.

The Neuhof, which got on Krautsand, Nov. 7, has been assisted off, and has anchored in the roadstead.

From Batavia.—At England: William Simpson, Sarah. At Outports: Omega.

From Bankok.—At Falmouth: Hannah Salkeld.

FREIGHTS AND CHARTERS.

Somewhat more business has been done in charters, but there has been little or no improvement in the rates of freight offered. Contracts have been entered into for the delivery of 6,000 tons of coals at Point de Galle, and 2,400 tons at Singapore, but the supply of ships is fully equal to the demand, and consequently several vessels have been engaged at low rates. For coal ships to China there is rather more inquiry.

Current Rates of Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s. to 60s.

CASUALTIES.

The Meg Merrilies, which sailed from Cardiff, Oct. 30, for Shanghai, was run foul of by another vessel, and sustained considerable damage. She returned to Cardiff, Nov. 4.

The Whirlwind, Edgell, from Hong Kong and Demerara, which arrived at London, Nov. 5, whilst swinging round off Blackwall to enter the West India Docks, got foul of a tier of vessels, carrying away a brig's bowsprit, &c., and receiving some damage herself. She was towed off and into the East India Docks.

At St. Helena, Sept. 18.—The Procymatia, of Newcastle, Loram, from Singapore for London, arrived here Sept. 1; shipped four extra hands for pumping, and sailed, Oct. 3, for her destination.

At Ascension.—Sept. 28, Marchioness Londonderry, Smith, from Manila. Off Ascension, Sept. 19, Victor Emmanuel, from Manila. 24, Tigris, from Singapore for Liverpool.

At St. Helena.—Sept. 2, Buitenzorg Ruhaak, from Batavia, and sailed 4 for Rotterdam. 4, Huidekoper, Block, from Batavia, and sailed for Rotterdam. 6, Regina Maris, Ouwehand, from Batavia. 8, Amerika, Meermans, from Batavia, and sailed 9 for Rotterdam. 9, Staadraad van der Houven, Heymeriks, from Batavia, and sailed 10 for Rotterdam; Granville, Laker, from Singapore, and sailed for London; Schelde, Hoffman, from Batavia, and 10, Jacoba, Schaap, from Batavia, and both sailed 10 for Amsterdam. 10, Carribbean, Winchester, from Hong Kong and sailed 11 for London. 11, Koning Willem III., Zeylstra, from Batavia, and sailed 12 for Amsterdam. 12, Golden Eagle, Oldham, from Whampoa, and sailed 13 for London. 16, Eliza Henrietta, Debering, from Batavia, and Bilderdyk, Loochen, from Padang, and both sailed or Amsterdam; Robertus Hendrikus, Muller, from Batavia, and sailed, 17 for Rotterdam. 22, Ternate, Cars, from Batavia, and sailed 23 for Rotterdam. 23, Julio de St. Vincent, from Manila, and sailed 24 for Liverpool. 26, Kate, Mowat, from Manila, and sailed for London; Prioress, Mitchell, from Manila. 27, Banian, Graham, from Foo-chow-Foo, and sailed for London.

At Table Bay.—Sept. 21, Soberane, Guardiola, Manila; 10, Granger, Hansen, from Hong Kong; 17, Thetis, Kimball, from Sumatra.

At Simon's Bay.—Sept. 13, C. S. Lemon, transport, Campbell, from Hong Kong.

At Rio Janeiro.—Maria, from Boston, for China, leaky.

Steamer "Nankin."—This vessel arrived, under canvas, at Hong Kong from Glasgow on the 9th Sept. Off the Cape she met with very heavy weather, but proved quite equal to it, and sustained but little damage. After fitting up her machinery at Hong Kong she would proceed to Shanghai and Ningpo, and be employed in the trade between those two ports.

The Port of Newchang.—In consequence of the shallowness of the harbour, the port of Ying-tsze, about forty-five miles distant, has been substituted.

AND
DYERS' HALL WHARF, 95, UPPER THAMES STREET, LONDON.

Manufacturers of Stoves, Grates, Fenders, Economic Kitchen Ranges, Hall Stoves, Cabin and Ship Stoves, Hat and Umbrella Stands, Hall and Garden Tables and Chairs, Iron and Marble Mantelpieces, Rain-water Pipes, Spouts, and General Castings for Building purposes.

A LARGE STOCK KEPT CONSTANTLY ON HAND, BOTH AT ROTHERHAM AND IN LONDON.
Books of Drawings and Prices Supplied Gratis.

HUBBUCK'S PATENT WHITE ZINC PAINT.

BY their process, which is patented, Pure Zinc Paint is cheaper than White Lead
It does not change colour with the London atmosphere.

Adulterations.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes from 10 to 30 per cent. No workman can produce good work with such material. Those who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

Cheapness.—Not only is it cheaper per hundred weight, but two hundred weight of this Paint with six gallons of Oil, covers as much surface as three hundred weight of White Lead and twelve gallons of Oil. Each cask is stamped "HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, and PAINT WORKS,
24, LIME-STREET, LONDON.

TO HOUSE PAINTERS, GRAINERS, BUILDERS, RAILWAY COMPANIES, SHIPBUILDERS, &c.

ONE of the Greatest Improvements of the age is KERSHAW'S PATENT GRAINING APPARATUS for producing an imitation of the various woods. They are very extensively used and with great success. They are very cheap, and will repay the cost of them in two days' working. They only require a trial; any person studying his interest would not be without them. A prospectus will be sent on receipt of a stamped directed envelope addressed to T. KERSHAW, Patent Graining Tool Manufacturer, 33, High-street, Marylebone, London, W.

N.B.—One of the Patent Graining Tools will be forwarded on the receipt of a remittance for 22s. These Tools are peculiarly well adapted for the Export Trade, and for use in India, China, Japan, and our foreign dependencies.

Orders can be sent direct to the Manufacturer, or through Messrs. JOHN ROBERTS and SON, Hong Kong.

PHOTOGRAPHIC APPARATUS, LENSES, AND PURE CHEMICALS.

BLAND & CO. beg to state that they supply Portrait, Landscape, and Stereoscopic CAMERAS of the most improved form, and also fitted with tested and warranted Achromatic Portrait and Landscape Lenses. Tripod Stands, Portable Tents, Printing Frames. Nitrate of Silver Baths, both plain and water-ight, Positive and Negative Collodions, Varnishes, Photographic Papers, Colours, and every article connected with Photography.

THE CAMERAS, APPARATUS, COLLODIONS, &c.,
Are prepared under their special superintendence, and suited for warm climates.

*** *Price Lists and Catalogues Forwarded by Post on Application.*

Orders from abroad must be accompanied by a Remittance or Order for payment in London.

Submarine Engineer to the English, French, Russian, Spanish, Portuguese, Sardinian Canadian, Peruvian, Brazilian and Indian Governments

---

*** To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

KEATING'S COUGH LOZENGES.

JUDGED by the IMMENSE DEMAND, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

KEATING'S COD LIVER OIL just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the Fish being unusually fine, and the Oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St. Thomas's Hospitals, have analysed and pronounced the Pale Newfoundland Oil the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. No higher price need be paid than the following:—Light Brown, 1s. 8d. per pint, or 3s. per quart; Pale, 1s. 6d. half-pints, 2s. 6d. pints, 4s. 6d. quarts, or in 5 pint bottles 10s. 6d. imperial measure.

Overland prices current, embracing tabular work, executed on the shortest notice.

HOLLOWAY'S OINTMENT and PILLS.—One chance of restoration yet remains if the sufferers from disease have not yet made trial of these wonderful medicaments. This Ointment rarely fails in removing external ailments, while the Pills are equally efficient in internal complaints. Holloway's preparations are composed of the finest balsams, whose actions are so reciprocal that few diseases can resist their combined curative powers. However severe or long-continued the malady, hope must not be abandoned till these noble remedies have had a fair trial, the issue of which will be successful. In sores, ulcers, tumours, glandular swellings, and similar diseases, the application of Holloway's Ointment is followed by the happiest effects, whilst his Pills maintain the appetite and digestion unimpaired.

THE "SHANGHAI TIMES."

THE Editorial Department of the "Shanghai Times" will be under the charge of a gentleman who for many years connected with the Eastern press, and latterly as editor and managing proprietor of the "Straits Times" at Singapore—has acquired considerable experience in newspaper management.

The "Shanghai Daily Times" will be of the same size as the "North China Herald," and will be published at thirty taels per annum in advance, or three taels per month.

The "Shanghai Weekly Times" will be double the size of the North China Herald, and will contain all the reading matter of the six preceding daily issues. It will be published every Saturday evening, at fifteen taels per annum in advance, exclusive of postage.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment o their cases.

Summary of News from the Far East.

JAPAN.

The news from Japan by this mail is of no special interest. H.M.S. *Ringdove*, which had arrived at Shanghai, brought dates to the 21st Sept. from Yokuhama, and 1st Oct. from Nagasaki. All was quiet at Yedo; Mr. Alcock was at Yokuhama, and intended to reside at that place and Yedo alternately, the Residency at the latter place being still retained for the Legation. Admiral Sir Hope Grant had returned from his cruise round the northern part of Japan, in the *Encounter*. He visited Tsu-sima, Hakodadi, and several other places. He left Yokuhama again on the 21st in the *Imperieuse* for Chefoo and Tien-tsin.

An extract of a letter, dated Yokuhama, 6th Sept., says:—"Everything is very dull here except in silk and tea, in which there is something doing. The Consul says that the Japanese now grant all their demands; but that may be only a temporary lull, consequent on the presence of a strong naval force. We have had a very dry summer, and pleasant weather—only rather hot at times—as high as 93 deg. in the shade."

It appears that the Russians have taken possession of two islands in the Strait of Corea named Tsu-sima, which are under the jurisdiction of Japan. Between these two islands there is a sound which forms a magnificent harbour. There is also a seaport, named Fatchu, containing a population roughly estimated at thirty thousand. The climate is healthy, the scenery exquisite, and the country abounds with the luxuries, as well as necessaries of life. The story runs that H.M.S. *Ringdove* lately entered this lonely bay, and her officers were amazed on rounding a headland to see three Russian frigates lying at anchor, while the standard of the Czars waved from a high flag-staff, erected in front of a large and substantially built edifice. On inquiry, it was stated by the Russians that they had obtained permission from the Damios to locate themselves there for the purpose of repairing boats and recruiting their sick people. It was uncertain how long they should remain, as that depended on the naval officer in command of the fleet cruising about the Japan and China seas. On the other hand, the Japanese said that these foreigners had deceived them, and that when they obtained permission to come on shore, it was only for a short period, to careen their ships, repair some boats and recruit the sick. If the Russians have in this underhand manner annexed Tsu-sima to the empire of the Czars, the act is a direct violation of their own Treaty with Japan.

The following is from the correspondent of the *New York Herald*:—

"The British Ambassador has stopped our Minister from passing British subjects to Yedo. This was because our Minister did not inform the British Minister of his action. Mr. Hyatt, our Consul at Amoy, China, was stopping with our Consul at Kanagawa. The Government had informed the Foreign Ministers that it could not protect foreigners. A threatened attack on the foreigners resulted in the arrest of a few desperadoes, but it was not known what the Government would do with them. The Japanese people declare that the opening of their ports is the greatest evil that ever befel the Japanese nation. The Governor of Kanagawa has requested the American Consul to remove the New York missionaries to a place of greater safety than they occupy at present. The British Consul received a similar notice, and acted upon it, while our Consul consulted Mr. Harris, believing there was no danger."

The Nagasaki *Daily Shipping List* is to be transferred to Kanagawa.

CHINA.

PEKING.

The Emperor Tsai Ch'un appears to have ascended the throne without the slightest opposition. The following autograph decree by Hien Fung determines the constitution of the new Government:—

Digitized by Google

"Our eldest son, Tsai Ch'un, being now constituted Heir Apparent—let Tsai Yuen, Twanhwa Kingse'ou, Sushun, Muyin, Kw'ang Yuen, Tu Han, and Tsiau Yu-ying, with all their might aid him as Councillors in all things pertaining to the administration of Government. A Decree Extraordinary.

"Tsai Yuen, Prince of I, as the prefix Tsai shows, is of the Imperial House, in the same generation as the Crown Prince.

"Twanhwa. Prince of Ching, Commander-in-Chief of the Gendarmerie of Peking, elder brother of Sushun.

"Kingsh'ou, husband of the sixth of the aunts of the Heir Apparent.

"Sushun, one of the two junior members of the Grand Secretariat.

"Muyin, the Prince of I's colleague as Commissioner at Tung Chow, 1860; a President of the Board of War.

"Kw'ang Yuen, a Chinese, some time in the Great Council; a Vice-President.

"Tu Han, Vice-President of the Board of Civil Office, son of Tu Shau-tien, tutor to the Emperor.

"Tsiau Yu-ying, Vice-President of one of the Lower Courts."

The decree of the new Emperor was published on the 24th August, and at the same time a curious Imperial manifesto appeared, announcing the death of the late and succession of the present Emperor. It is too long for quotation, but we extract a few of the more notable paragraphs, describing the illness and character of Hien Fung:—

"Last summer it chanced that he was affected with a cough and expectoration, but under medical treatment he recovered, and after the Imperial tour to Lwan Yang (Je Ho) in the autumn, the person of the Sainted One was as well (as much at ease) and strong as formerly. But the continued disorders of the provinces occasioned by the pestilence of rebellion gave him anxiety by night and by day; and, in the spring of this year, a cold he had caught caused his malady to break out afresh, while in the sixth moon he was attacked by a dysentery, which by degrees so reduced his strength, that in the 16th day of this moon he made an effort, ill as he was, to summon before him Tsai Yuen, Twanhwa, Kingshan, Sushun, Muyin, Kw'ang Yuen, Tu Han, and Chiau Yuying, and gave them a special command to write for him a decree in the vermilion pencil, constituting us *Hwang T'ai Tsz'* (heir apparent) With bitter tears we received his commands, grieving and anxious trembling and awe-struck. We hoped that the person of the Affectionate One might yet be saved. But after we had in person been informed of the will of him that regarded us fondly, his malady attacked him with increasing violence, bringing him presently to the last extremity, and on the 17th day in the *yin* watch (3 to 5 A.M.) he sped upwards upon the dragon to be a guest on high. We tore the earth and cried to heaven, yet reached we not to him with our hand or voice. With reverence we call to mind that his late Majesty, during the eleven years that he sat upon the throne, with earnest zeal, with painful solicitude [so toiled that], he rested little amid the more than myriad [affairs that demanded his attention]; that on no day did he fail in showing respect to heaven, or in following in practice the example of his ancestors. Diligence in his administration of the State, love of his people, were his chief consideration. He remitted taxes, or gave time for their collection. He chose men of ability. In everything that concerned the policy of the empire or the well-being of the people, the Sacred One was ever unceasingly forethoughtful. Touching the observances of burial and mourning, the last decree of his late Majesty, which we have with reverence received, ordains that, as of old prescribed, the mourning shall end in twenty-seven days. Our heart cannot indeed allow that this should be. It will be our duty, in devout conformity with the ancient limitation, to mourn solemnly for three years, that the sincerity of our babelike affection may be, in some degree, satisfied.

It will be seen that Prince Kung is not a member of the new administration. His name only occurs among those who are graciously excused prostration on all except occasions of high state. The foreign policy of the new Government is not yet known, but there are not wanting indications of its friendliness to foreign nations.

There can be no question after all that the main barrier to trade is the movement of the Taipings. No body politic can be healthy with such a canker at the heart of it. The *China Mail* states that there are strong grounds for believing that foreign neutrality runs the risk of being speedily broken in favour of the Imperialists. If this be true, it is the most important and serious news which has reached us for many months past from the Celestial Empire. We sincerely trust that no prospect of contingent advantages, no imaginary insults to be avenged, or rights to be maintained, will again involve us in a war with China. Neither on political, moral, or commercial grounds, shall we be justified in fighting either on the side of Imperialists or Rebels.

TIEN-TSIN.

The intelligence received by this mail confirms the announcement given in our issue of the 17th of October, relative to the departure of troops from Tien-tsin. The *Simoon* takes the 60th Rifles to England, and the *Urgent* the Land Transport. Fane's Horse has left in the *Vulcan* for Calcutta.

CHEFOO.

The following letter, dated 25th September, gives an account of the movements of the Rebels in this quarter:—

"They have taken the cities of Kaichu to the South and the city of Laichu to the Westward, these are important places and the key of the promontory. Another gang have also come by water to Whang hyen and taken that place. At Tung-chow-foo there has been a panic, and many people had left the place.

"Here all business is put an end to. The trading people have all left, and most of the hongs are closed. For Chefoo itself there is no fear, as the French have it under their protection, besides which there is nothing to get in the way of plunder. The French have landed two hundred men and three guns, and the militia are out all round. So with these and three or four men of war in port, we are pretty safe.

"Tung, the prefect of this place, is applying for a man-of-war to go to Whang-hyen to drive what he calls the pirates away; but we all know there are no pirates up here. These are men that have given San-ko lin-sin the slip—that worthy has been out-manœuvred. Some mandarin is, I hear, at the head of the Rebels at Kai-chu. The whole province is in open rebellion."

SHANGHAI.

The Chinese tradesmen living on the Yang-king-pang have petitioned the Municipal Council to erect defences and maintain a guard round their quarter, as the loose marauders who leave the Rebel ranks are becoming a dangerous nuisance; the expense of such protection, if granted, will be paid gladly by the petitioners.

Mr. Medhurst, H.M.'s Consul, has issued the following notification in reference to Mr. Bruce's opinion on the late impositions of the Customs, which, it will be seen, only partially touches the grievance, and a full settlement of this question must be looked for at the hands of Earl Russell, who has been addressed in a memorial which will be found in another column:—

H.M.'s Minister Plenipotentiary, &c., &c., at Peking, has pronounced an opinion on the questions at issue between the Chinese Superintendent of Customs of this port and the undersigned, relative to the indiscriminate levy of transit dues on all Chinese produce, whether brought down from the interior or purchased at a seaport, and the abolition of exemption certificates.

With respect to the six rules issued by the Custom-house on the 22nd July, 1861, H.M.'s Minister declares,—

1st. That the British merchant has nothing to do with the payment of transit dues, unless the goods are carried into the country, or brought down from the place of production, under certificate as British property. It is optional to the British merchant to take out the certificate or not as he pleases; but if he does not, and he buys or sells at the port of shipment, he has nothing to do with the payment of any duty, but the one specified in the tariff on imports and exports.

2nd. When Chinese produce is procured at one port, and carried thence to be shipped at another port for the foreign market, such produce is only liable to the export duty at the first port of shipment, where all duties in the nature of transit duties due by the British merchant ought also to be levied.

H.M.'s Minister thinks the above is the fair construction of the Treaty.

As regards the exaction of transit dues at Shanghai on goods despatched up or brought down the Yang-tse river, H.M.'s Minister does not admit the principle on which it is founded, as he considers the arrangement adapted for payment of tariff duties at Shanghai as one eminently favourable to the Chinese Government; and the payment of transit dues by the foreign merchant is dependent, as has been stated, on his taking out a certificate at the port of shipment, which is in this case either Hankow or Kiukiang.

As to exemption certificates on produce carried coastwise from one Chinese port for consumption in another, H.M.'s Minister is ready to agree that tariff-duty be paid at the port of shipment, which shall be brought to account for indemnity, and half-duty at the port of discharge, which being in the nature of a transit-duty, shall not be subject to deduction for indemnity. The rule will apply to cargo of the above denomination carried up or down the river Yang-tsze.

Imports and exports in the coast trade being liable, under the understanding now declared, to pay a half tariff-duty more than imports and exports in the trade between China and Foreign merchants, H.M.'s Minister thinks that the Custom-house will be entitled to make such arrangements as shall prevent the loss to the revenue that would be occasioned, were goods, nominally imported for reshipment outwards, detained and consumed within the port.

Pulse and beancake are declared by H.M.'s Minister to be separately provided for by the 5th Article of the Tariff Rules.

The Superintendent of Customs has received instructions from Peking corresponding to the opinion above detailed; and the undersigned is now in consultation with him regarding a few rules which he proposes to issue in pursuance thereof, as also in respect to arrangements for the refund of all duties which have of late been levied in contravention of the principles now laid down by H.M.'s Minister.

A memorial has been presented to the Municipal Council for an increase in the police force within the settlement, as the native population is said to be disaffected. At the same time, the vicinity of the Rebels is said to require preparations for defence. It is stated that the Artillery now in Shanghai are so located as to be almost useless in case of any sudden attack; that "the building in which they are housed is unfit for a stable, and open to the piercing winds and heavy rains of the north-east monsoon," and that it would cost more to make it suitable than to provide suitable quarters in the settlement.

The *North China Herald* writes in strong language as to the necessity of having a Harbour-Master at Shanghai, and states

Digitized by Google

that the appointment to the office rests with His Excellency the Taoutai, who, in appointing Mr. Lay Inspector-General of the Customs, has empowered him under the Treaty, Rule X., "of his own choice, and independently of the suggestion or nomination of any British authority, to select any British subject he may see fit to aid him in the administration of the Customs revenue, in the prevention of smuggling, in the definition of port boundaries, or in discharging the duties of harbour-master."

The new Race Course is completed.

Accounts from the ports on the Yang-tse continue satisfactory for trading operations, and all the steamers find ready employment at 15 to 20 taels per ton. The Rebels are losing ground.

HONG KONG.

Mr. Mercer, the Colonial Secretary of Hong Kong, proceeds to England by this mail, on leave of absence.

It is intended to increase the police force, and a proposition has been thrown out to send to Madras for an additional number. A long report appears in the *China Mail* from the pen of the Rev. I. J. Roberts at Nanking.

At a meeting of the Victoria Library, it was announced that the affairs of the society were in a flourishing condition; and a vote of thanks was passed to Captain Charles Willson for the use of his premises at a reduced rental.

The Civil Service abuses inquiry is at an end. The long and intimate connection which Mr. Caldwell had with Machow Wong has been viewed as affording sufficient grounds for recommending that officer's dismissal from the public service.

In another column will be found the details of a French kidnapping expedition, intended for Callao. It is reported that the French authorities have sent the captain to France for trial.

CANTON.

The evacuation of the city by the Allied forces, it is reported would be completed on the 19th Oct., on which day the forma resignation of the Allied Commissions into the hands of the Chinese would take place.

An accident resulting in loss of life has taken place Lieut and Adjutant Sandwich, of the 3rd Regiment, B.N.I., was riding from the heights towards the Commissariat, on duty, when his pony shied at a kite and threw him. He fell on his head, producing concussion of the brain, and lingered a few hours, quite unconscious to the last. Medical assistance was at hand, but proved of no avail. Lieutenant Sandwich was Secretary of the Committee of the Soldiers' Institute, and was first and foremost in promoting the cause of temperance among the troops. Not only did he abstain himself from the use of all intoxicating drinks, but he advocated temperance as a public lecturer, when not only the natural earnestness of his manner, and the modesty with which he gave his own opinions, but the evident care with which he had studied his subject, procured him always an attentive hearing. Not only will his loss be felt deeply by his brother officers and the Canton garrison, but by a large circle of friends, whom he encouraged in every good work by his consistent conduct as a soldier and a Christian.

The *Friend of China* contains some very interesting items in connection with the daily occurrences at Canton. We regret our space will not permit a larger extract than the following:—

"The death of the Emperor must cause great distress among the barbers, singing girls, and others, who, for one hundred days, are not allowed to follow their vocations. As for the Canton river, the usual theatre of song and viol from sunset to early morn, it is as quiet nightly as a desert, only here and there being heard the voice of some damsel whose thrilling notes cannot be stilled. Debarred music, the debauchees who haunt the river flower boats indulge in gambling, large sums changing hands occasinoally."

SIAM.

BANGKOK.

We very gladly avail ourselves of the following which we have received from an occasional correspondent, and is under date 26th Sept.:—

The Kralahom, with his suite, has returned from Singapore, in his ship the *Enemy Chaser*, a fine screw steamer. An accident occurred on board during the passage. From some cause or other, the water was allowed to get too low in one of the boilers, and the consequence was the fire burned out the bottom of the boiler. The Kralahom, on the arrival of the steamer, made a claim of $1,200 against the first and second engineers (Englishmen), referring the matter for decision to the English Consul. Accordingly, a Court was held composed of the principal English residents, but no evidence could b brought forward that they had culpably neglected their duty; however, it appeared that they could not command sufficient authority over their Siamese subordinates, who would occasionally fasten down the safety valves, shut off the water supply to the boilers against orders, in order to drive the ship faster, and meddle otherwise with the machinery, against the instructions of the English engineers. The Court found that the defendants were not guilty of the charge brought against them.

The first King has had the misfortune to lose his first wife, who died on the 10th inst. very suddenly, from breaking a blood vessel. All the Consuls sent circulars to the ships in port, and to others whom it concerned, instructing them to lower their flags half mast, and to cross the yards. A few days after the King sent a letter to each of the Consuls, thanking them in the most sincere terms for their marks of commiseration, at the same time sending a present of $8, "to defray any expenses incurred by the steps they had taken."

The Krhrom Hluang Wongra, who was seized with a paralytic stroke in his left side, is slowly recovering. His illness has caused much sympathy and not a little alarm to the community here, as he is renowned not only for his cordial and friendly treatment to Europeans, but also for the interest he takes in, and influence he exercises for their protection and comfort.

A large fire occurred on the 25th September, at the house of a Chinese Mandarin, residing between the houses of Messrs Remi, Schmidt, and Co., and the Borneo Company. The building was of brick, and contained many valuables. There was no wind at the time or the damage would have been much more considerable than it was, for the owner, a very rich man, was building a large schooner in his dock, which is only about fifty feet from the house. The heat was so great on the side of the vessel that they were obliged to keep throwing water on it to prevent the wood catching fire. The house was completely destroyed, nothing but a few brick pillars remained standing.

COCHIN CHINA.

A series of regulations have been published for the government of the resident Chinese. There is no further intelligence of the military progress of the French.

MALACCA STRAITS.

An interesting account of the departure of Sir James Brooke will be found in another column.

The *Singapore Standard* of the 28th of September states that the paper ceases with that number, and that the *Standard* and *Singapore Daily Press* will be embodied in a new daily paper to be entitled the *Singapore Daily Press and Shipping Gazette.*

The case of the collision between the P. and O. Co.'s steamer, *Madras*, and the American ship, *Argonaut*, has been decided by each party paying their share of costs and damages.

The French steamer *Japan*, with troops for Saigon, arrived at Singapore on the 30th Sept., from Suez.

ADDITIONAL PASSENGERS INWARD.

By this mail from Singapore to Marseilles—Mr. and Mrs. Lens, three children and servant, Madame Rozy, infant and servant, Mr. Deschamy and infant, Mr. St. John, Mr. Blangamdardt. To Southampton—Rajah Sir James Brooke and European servant, Captain Wellstead. From Penang to Southampton—Major Snow. From Singapore to Egypt—Major and Mrs. Sangford. From Penang—Captain Coleridge.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

AITCHISON—On the 11th inst., at 4, Devonshire-place, Portland-place, W., the wife of General Sir John Aitchison, of a son.

BARTON—At Hong Kong, on the 6th October, the wife of Captain Z. Barton, of Swatow, of a son.

BAXTER—At Rose Cottage, Singapore, on the 14th October, the wife of James Baxter, Esq., of a daughter.

CAMPBELL At Leonie Hill, Singapore, on the 12th October, the wife of T. H. Campbell, Esq., of a daughter.

FINCHAM—At Hong Kong, on the 16th September, the wife of Alfred Fincham, Esq., of a daughter.

GASSET—At Spring Gardens, Hong Kong, on the 26th September, the wife of Edward Gasset, Esq., of a son.

LAMBERT—At Hong Kong on the 26th September, the wife of Mr. John W. Lambert, of a son.

M'GRIGOR—On the 25th inst., at 3, Gloucester-place, Portman-square, the wife of Sir Charles Roderic M'Grigor, Bart., of a son.

TURNER—At Canton, on the 3rd October, the wife of the Rev. F. S. Turner, of the London Missionary Society, of a son.

WILLAUME—At Hong Kong, on the morning of the 19th September, the wife of Mr. John Willaume, of a son.

WILKINSON—At Osborne House, Singapore, on the 25th Sept., Mrs. William Wilkinson, of a daughter.

WOODFORD—At Hong Kong, on the 14th September. the wife of Mr. James D. Woodford, of a son.

MARRIAGES.

DUDDELL—ROHL.—At St. John's Cathedral, Hong Kong, on the 14th September, by the Rev. J. J. Irwin, Mr. W. H. Duddell, to Ida Rohl.

HOGG—PARSONS.—On the 18th inst., at Brighton, by the Rev. James Vaughan, Fergusson Floyer Hogg, Esq., of the Bengal Civil Service, third son of Sir James Weir Hogg, Bart., to Elizabeth Helen, daughter of the Hon. Laurence and the late Lady Elizabeth Parsons.

ICK—THOMAS.—On the 12th inst., at St. Bride's Church, Liverpool, by the Rev. T. G. Leigh, M.A., E. G. McDougal Ick, Esq., 2nd Royal Cheshire Militia, to Maria Eliza Bridget, third daughter of the Rev. Lewis F. Thomas, B.A., and granddaughter of the late General Lewis Thomas, C.B., some time Acting Commander-in-Chief in the East Indies.

JOHNSON—HEAD.—On the 20th inst., at St. Mary's in the Castle, Hastings, by the Rev. Thomas Vores, Francis Bulkeley Johnson, Esq., of Hong Kong, China, to Jane Sophia, daughter of the late Lieut.-col. Charles Franklin Head.

KING MARIA.—On the 21st inst., at the parish church of Twickenham, by the Rev. George S. Master, M.A., H. J. King, Esq., Major late 3rd Buffs, to Harriett Augusta Maria, third daughter of the late George Barnard, Esq., of Cross-deep, Twickenham.

LARKEN—TENNANT.—On the 14th inst., at St. John's, Leeds, by the Rev. E. R. Larken, M.A., father of the bridegroom, Thomas Lancas er Larken, of Foo-chow, China, to Sarah Ursula, only daughter of John Tennant, Esq., Leeds.

MCDOWELL—RYNN.—At St. John's Cathedral, Hong Kong, on the 23rd September, by the Rev. J. J. Irwin, Mr. Edmund Gresawold McDowell, to Miss Hester Matilda Rynn.

Digitized by Google

DEATHS.

BARTON—At Hong Kong, on the 9th October, of consumption, Sarah, wife of Capt. Z. Barton, of Swatow, aged 35.

JANSEN—At Shanghai, on the 1st October, of fever, Philip Jansen, formerly of Malacca, aged 23 years 8 months and 23 days, deeply regretted by a numerous circle of relatives and friends.

NICKELS—At Hong Kong, on the 28th September, Capt. Edward C. Nickels, of Charlestown, Mass., U.S.A., aged 52 years, of the American ship *Bald Eagle*.

SANDWITH—At Canton, on the 24th September, from concussion of the brain, caused by a fall from his pony, Lieut. and Adjutant H. M. B. Sandwith, of H.M.'s 3rd Bombay Native Infantry.

WEBB—On the 31st ult., Frederick Parry Webb, sen., Lieut. H.E.I.C. Naval Service, at 6, Thurloe-square, Brompton, and late of Shanghai, China.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—The opening of the Yang-tse to trade, and the expeditions made into the interior in the neighbourhood of Shanghai, have combined to give a great stimulus to the trade of that port. Considerable supplies arrive thither from Hankow, the trade of which place in Tea will doubtless become permanent and important. The exports to Great Britain are unprecedentedly large, and stand thus:—From 1st July, 34,072,169 lbs.; same period in 1860, 29,615,284 lbs.; in 1859, 22,746,915 lbs.; in 1858, 6,777,545 lbs.; in 1857, 17,845,708 lbs.; in 1856,22,608,144 lbs. To the United States the trade has, of course, been influenced by political events. The exports since the 1st of July have been 3,978,703 lbs. this season, against 10,017,025 lbs. last season, and 10,710,253 lbs. the season before.

SHANGHAI.—Black: The supplies from Hankow have continued upon a fair scale, though latterly they have rather fallen off. Shipments and resales for the month have taken place to the extent of 30,000 chests congou, making a total for the season to date 65,500 chests, against 15,000 chests at same period last year. Latterly the bulk of the arrivals have been of inferior qualities. Good and fine are scarce, and fully maintain previous rates, but middling and inferior are considerably lower, and, from the nature of the advices just to hand per August mail, it is likely that rates may still further decline. Fair to good Oopack are saleable at 28 to 31 taels; fair are quoted at 23 to 26 taels. The stock on the market is estimated at 20,000 chests Oonam and Oopacks, mostly inferior, 1,000 chests Hoochow, 1,500 chests old common teas, 800 chests New, and 200 chests old Flowery Pekoe. Green: Prices are extremely high. Supplies to some extent had reached Ningpo. The stock for sale upon that market is computed at 25,000 half chests. The settlement of a large portion will most probably be advised next mail. A little more was doing in the early part of the month, but latterly business has fallen off. Pingsueys are higher, Japan teas lower. The settlements of the month are reported at 15,000 half-chests China and 1,500 ditto Japan tea, making for the season 42,000 half-chests China and 8,000 ditto Japan, against 25,000 half-chests and 5,000 ditto, respectively, at corresponding period last season. The stock on the market is stated at 3,000 half-chests Pingsuey, 1,000 ditto Moyune, 2,500 ditto Hoochow, and 1,500 ditto Japan.

FOO-CHOW-FOO.—The sales of the month are stated as follows:—Congou, 55,500 chests, at 8.2 to 16.14 taels for low, trashy, and common; 17.4 to 24 taels for good common to flavoury; 24.7 to 28.2 taels for good flavoury to Kaison: Souchong, 4,600 chests, at 18.7 to 34.7 taels; Flowery Pekoe, 1,000 chests, at 20.7 to 25.7 taels; Oolong, 6,000 packages, at 17.7 to 25.7 taels; Scented Teas, 17,500 boxes, at 16.7 to 30.7 taels; in addition to which, some 20,000 packages of Oolongs have been settled on terms which are kept secret. The market for that description may be said to have opened at [ship off] 17.7 to 20.7 taels for common to good cargo, and 21.7 to 28 7 for fine to finest. Of Congou, the supply this season has been 375,000 chests, against 394.000 same period last year, and 247,000 the year before. The settlements have amounted respectively to 250,000 chests, 292,000, and 182,500; the unsold stock on the market being 125,000 chests, against 102,000 in the corresponding period last year, and 64,500 the year before.

AMOY.—Plain Orange Pekoes: This description has again commanded but a small share of the attention of buyers, the settlement for the month reaching only 1,458 half-chests at 12 to 14 per picul, short for ordinary to common quality. Arrivals to date are, market, 9,235; settlements to date are, 7,772 half-chests; stock, 1,463 half-chests; contract, 1,914; total, 11,149 half-chests, against 14,674 half-chests and 2,536 boxes last season. Congou settlements during the past month comprise 2,635 half-chests at $11.00 to 16.50 for inferior to clean common cargo, and $18.50 for preferable to good common cargo quality. Arrivals to date are, market, 20,530; settlements are 10,294 sent coastwise; on native account, 1,229; stock, 9,017; contract, 1,163. Total, 21,694 half-chests, against 19,652 half-chests last season. Oolong and Ankoi: Of the former all grades have been taken rather freely during the past month, and settlements amount to 19,899 half chests at $17.25 to $19.00 for mixed Ankoiesh to good common cargo, and $12 to $24 for fair to good cargo qualities. The business done in Ankois amounts to 1,315 packages at $9 to $14 per picul for common to good clean tea. Arrivals to date are market, 69.219 half-chests and 340 boxes; settlements, 37,132 half-chests; sent coastwise on native account 4,874 half-chests; stock, 26,513 half-chests and 340 boxes; contract, 4,710; total arrivals, 73,929 half-chests and 340 boxes, against 77,517 half-chests and 738 boxes last season. Plain Capers: 2,868 ten catties boxes of good quality have been taken at $13 to $13.50. Arrivals are, market, 5,876; settlements, 2,868; sent coastwise on native account, 1,240; stock, 1,768; contract, none; total, 5,876 boxes, against 32,754 boxes last season.

CANTON.—This market is in rather an unsettled state. The business of the month has been small, and although foreigners appear determined upon reducing the standard of rates, the teamen are hard against them. More supplies than were expected are on the way from Hankow, and but for a settlement of 3 chops Oonams and Oopacks a few days since at 25 to 27 taels, the teamen might have yielded. Scented Teas have fallen 2 taels, whilst Canton Greens have advanced a little owing to a demand for the United States. The following are the sales of the month:—Congou, 8 chops Oonam at 25 taels 8 to 32 taels 8, and 2 chops Oopacks at 27 taels 8 to 27 taels. Scented Teas, 5,500 boxes Or. Pekoe at 22 to 37 taels, and 6,500 boxes Caper at 16 to 28½ taels. Canton Greens, 1,500 half-chests and 2,300 boxes Young Hyson, at 17 to 22 taels; 7,600 boxes Gunpowder, at 17 to 29 taels; 1,000 boxes Imperial at 19 to 21 taels, 1,300 chests and 1,000 half-chests Hyson skin at 14 to 15 taels.

RAW SILK.—SHANGHAI.—Supplies have continued on a large scale, and the unsold stock has become unprecedentedly heavy. The unfavourable accounts from England, the advance in the rate of exchange, and the accumulated stock, combined to make foreigners very cautious buyers, and the tendency of rates has consequently been downwards. Fine qualities being very scarce are fully maintained, but middling and inferior have fallen 10 to 15 taels, and even at that reduction purchases are only made in barter for goods. The sales of the month are estimated at 5,500 bales, making the total sales for the season to date 23,500 bales against 32,000 bales same time last season and 23,000 bales the season before. The unsold stock is now 25,000 bales, against 7,000 bales same time last year, and 13,000 the year before The following are the latest quotations:—Tsatlees, No. 1, 450 to 460 taels per picul; do., 2, 420 to 440 taels per picul; do., 3, 385 to 415 taels per picul; do., 4, 340 to 340 taels per picul; do., 5 and common, 300 to 330 taels per picul; Taysaams, No. 1, 350 to 360 taels per picul; do., 2, 320 to 330 taels per picul; do., 3, 280 to 300; do., 4, 5, and common, 215 to 260 taels per picul; Yuenfa, 280 to 400 taels per picul; Haining, 280 to 360 taels per picul; Hongchow Tsatlee, 335 to 360 taels per picul; Hongchow Taysaams, 250 to 260 taels per picul; Hong Tsatleee (nom.), 370 to 380 taels per picul; Sewhings, 280 to 315 taels per picul; Laeyongs, 230 to 250 taels per picul; Throwns. coarse, 270 to 300 taels per picul; middling to fine (nominal), 330 to 400 taels per picul.

DRUGS, &c.—From the export tables it will be seen that the *Verbena* took a cargo of these articles from Macao to London in August. The shipments of essential oils by her, and by the *Blohm* to the Continent have been, it will be observed, enormous. The following is the report on the Macao market, to which port the trade in these articles appears to be exclusively directed. Cassia lignea is quoted $14 to $14 25c., with a stock of 2,500 piculs. Cassia buds are quoted $32 to $33, no stock. Cassia oil $200 to $210, stock 60 piculs. Star aniseed $14½ to $15, stock small. Aniseed oil $145 to $148, stock 100 to 200 piculs. Golangal $4 to $4 25 c., 600 piculs on the market.

CHINA—IMPORTS.

The import market is thus noticed in the *Overland Trade Report*:—At the Northern Ports but very little business in imports appears to have been transacted, and that little has principally been in barter for tea and silk. At Tien-tsin a better feeling existed, and woollens and heavy cotton goods were in more demand in anticipation of the cold weather. At Hankow more confidence existed, owing to the Imperial forces having captured Nganking, but prices are nominal, and very little doing. From Newchwang there is not any intelligence of interest; trade is dull, and quotations nominal. For full particulars of sales, prices, &c., readers are referred to pages 15 and 16, where also the Japan market intelligence will be found.

Inactivity in imports is still the prevailing feature to notice at Shanghai. American drills are saleable, and grey and spotted shirtings, chintzes, T-cloths, and handkerchiefs show a fractional advance. For white shirtings there is not any demand. There has been a fair business done at Foochow, but principally in barter against tea. American goods have advanced, and the transactions in grey shirtings and T-cloths have been large. Fancy goods are almost entirely neglected. At Amoy more business has been done, especially in medium and heavy goods, and T-cloths, which were wanted—the latter have advanced in price. Grey shirtings are quiet, and white are reduced in price, and large sales have been made. Yarns have advanced. Swatow: Manchester goods have come forward freely. Yarn has advanced; and American drills, Turkey red cloths, and dyed damasks are inquired for. Great inactivity prevails at Canton. The sales have been very small, as reference to the subjoined particulars will show. In the Hong Kong market even greater dullness, if possible, than has been reported for several mails past prevails, except for T-cloths and scarlet long ells, for which there has been a slightly better demand. Even the auction sales for damaged goods have fallen off

FOO-CHOW.—The prices and deliveries of this market are reported a —Shirtings (grey), 10.700 pieces at $1.80 to 2.50; white, 500 pieces a. $2.70; T-cloths, 27,500 pieces at $1.66 to 1.95: American drills, 7,875 pieces at $3.60 to 4.00; lead, 3,000 piculs at $9.00 to 9.50; and a few small sales of stripes, long ells, twills, and damasks, amounting in all to about 1,600 pieces. The deliveries at Amoy are reported as—Yarns, 283 bales; shirtings (grey), 1,950 pieces, stock, 12,500 pieces; white, 2,900r pieces; stock, 12,900 pieces; T-cloths, 350 pieces, no stock. Othe manufactures are without demand, and call for no remarks. There is not anything to be said about metals or Straits produce, as in this, as in other markets, neither one or the other meet with any attention.

CANTON.—The deliveries are reported as foliows:—Shirtings (grey), 6,550 pieces; white, 900 pieces; yarn, 191 bales; coloured spot shirtings, 720 pieces; coloured brocades, 768 pieces; chintzes, 1,560 pieces; American drills, 5,500 pieces; jeans, 600 pieces; T-cloths, 4,480 pieces; long ells, 1,100 pieces; lastings, 1.200 pieces.

HONG KONG.—The sales for the month are about 250 bales yarns; 6,500 pieces grey shirtings, chiefly 8¼ to 8¾ lbs.; T-cloths, 31,300 pieces; 1,700 pieces long ells, principally scarlet; 800 pieces Spanish stripes; 800 pieces camlets, and 400 pieces lastings.

COALS—HONGKONG.—Stocks unaltered, and no sales reported during the month. For English and Welsh steam the price is $13 to $14, with a small demand. Sydney are not liked, and are quoted $6 to $8 according to quality. Shanghai—The quotations are, English 12 taels; Japan 4¾ to 5¼ taels; Sydney 9½ taels.

TIEN-TSIN.—There are no new quotations from this place. Business is reported to be dull.

CHEFOO.—There is very little business at this port, the few quotations given below are nearly nominal. Money was very scarce. The Mandarins were sanctioning the exportation of peas and bean cake on payment of a small duty.

HANKOW.—Imports: Not much demand for imports, second hands selling the goods taken in barter for produce at rates much below importers'

Digitized by Google

demands. The prices given below are only obtainable in barter.—Exports: Tea has been quiet during the past fortnight, and the arriivals small. The market is very firm, and the dealers show no disposition to accept lower rates. 15 chops have been settled since the 9th, at from Tls. 18.5 to Tls. 21.0. A few Ningchows have arrived, but principally contracts. Silk: Yellow, 160.0.0 to 210.0.0 per picul; white, 160.0 0 to 220.0.0. Oil: Sew-Yen varnish, 2.8.0 to 2.9.0 per tub; Pih-Tong-En, 3.9.0; Cha-Yen, 5-2.0. Tallow: None on market, 4.8.0 to 5.4.0. Wax: White, 32.5.0; yellow, none. Lead: 7.4.0 per picul. Coal: 3.2.0 to 5.0.0. Musk: — per catty. Tobacco: 5.0.0 per picul. Grass: Finished for the season: —. Hemp: White, —; green, —. Exchange.—Gold-leaf per tael, Tls. 152; gold bar per tael, Tls. 15; copper cash, 6m. 2c. per 1,000. Freights.—To Shanghai, Tls. 15 to Tls. 20 per ton.

BATAVIA.—Imports: The Market has been very dull, owing to sales of damaged goods ex. Weber exports. Coffee Java: The market continnes tairly supplied, and it can be produced at *f* 34 to 34.50 per picul. Coffee Padang: Government sells at auction at Padang at the end of the month 40,000 piculs. Possibly the price thereof may be slightly effected by the new tariff imposed by the United States Government. Sugar: On the 15th Government sold at auction 40,000 piculs, which averaged *f* 15 9 per picul. This high average is entirely owing to some Armenian merchants paying extreme rates for some lots; otherwise for shipment to Europe none was bought above *f* 15 for No. 16. Since the sale several parcels of sugar have changed hands at *f* 14.75 for No. 16, and this is now the market price.

SINGAPORE.—IMPORTS: Holders gradually became firmer in consequence of the advancing prices in Manchester, and considerable purchases of grey goods were made on speculation. During the past fortnight the feeling in the market has improved, and aided by a limited demand for Cochin-China, and some little inquiry for the native prows, a slight advance has been obtained in twist and plain grey goods. Stocks, however, are considerably in excess of those on the 30th June, and unless the inquiry is aided by some further export demand, it will be long ere, at the advanced prices now demanded, they will be cleared off.—EXPORTS.—Tin: The market has been nearly cleared. Gambier also advanced rapidly on receipt of last mail's advices, and has been purchased freely at gradually rising prices. Black and white pepper continue in moderate demand at about former rates, and are not very plentiful. Coffee has come to hand freely, and has been taken readily at former quotations. Sago flour has continued steady, and pearl sago, which gave way in price slightly, has again rallied to about last price. India rubber is again somewhat dearer, and is rather scarce. Gutta percha without change. Rice is looking up, and rather scarce. Mother-o'-pearl shell is readily taken at at former prices, but tortoise shell is less inquired for, and only parcels of superior quality find purchasers.

JAPAN.

KANAGAWA.—IMPORTS:—The business of the past month has been unusually large. In the early part of August the transactions were almost entirely confined to sales of grey shirtings and dyed brocades against tea, but latterly a demand for camlets has sprung up, and 1,500 to 2,000 piculs must have found buyers; rates are unchanged, heavy stocks and anxiety of importers to realise preventing any improvement in price. EXPORTS:—Silk.—Early in August the market was very active, and large settlements made at an advance of $15 to 20; subsequently prices gave way on large supplies coming forward, but lately rates were again higher. Quotations, Mybash 1 and 2, $495 to 505; 2 and 3, $465 to 480; Cotia No. 1 and 2, $400 to 420. Total export from 1st July to 2nd September, 1,245. Stock on board ship and in the hands of foreigners estimated at 1,000 to 1,500 bales. Tea.—The transactions of the month have been mostly in barter. Settlements estimated at about 4,000 piculs. Stock light and of inferior quality. Exchange.—Drafts on Shanghai, 10 days' sight, 2¼ to 2½ discount. Itz 230 per $100. Freight.—To England, £6 10s. to £7. To Shanghai, silk, $3 per picul. Measurement, $6 per ton. To Hong Kong, $8 per ton.

NAGASAKI.—IMPORTS:—The improvement in the import market before advised is confirmed. Large transactions have taken place in barter against tea at fair rates. Cash sales are difficult to effect, but inquiries have lately been made for goods which have been entirely neglected during the past six months.—EXPORTS.—Tea: Large supplies arriving, holders becoming anxious to realise, but buyersholding out for lower rates. Stocks estimated at 5,500 to 6,000 piculs of new fair to good quality, at from $12 to 22; 2,500 to 3,000 piculs common and bad, at from $1.50 to 5. Settlements in the past month 1,750 piculs, fair to good.—Silk: Only a few parcels of the new crop of inferior quality have arrived. No settlements reported.—Exchange: Drafts on Shanghai 1 to 2 per cent. discount, Itzebos 233 to 234 per Mexican $100.—Freight: For Shanghai. $4 to 4.25 per ton of 40 feet. For Hong Kong $8.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.

EXPORTS FROM JAPAN.

Per George Washington, from Kanagawa, August 25, to London,—Tea, 300,000 lbs; galls, 106 piculs; camphor, 318.

Per Eloise, from Yokuhama, September 7, to London.—Full cargo of rags and bones.

Per Carrington, from Yokuhama, September 17, to San Francisco.—Tea, 1,125 packages; cassia, 18; lacquered ware, 460; rags, 550; tallow, 15; chow-chow, 18; hides, 1,350.

EXPORTS FROM CHINA.

Per Assyrian, from Shanghai, September 13, to London.—Tea, 614.899 lbs.; silk, 826 bales.

Per Pegasus, from Shanghai, September 16, to London.—Tea, 570,198 lbs; silk, 174 bales.

Per Margaret Dundas, from Shanghai, September 21, to London.—Tea, 353,132 lbs.

Per Ballarat, from Shanghai, September 21, to London.—Tea 700,748 lbs.; silk, 1,497 bales.

Per Queen of the Ocean, from Shanghai, September 30, to London.—Tea, 742,407 lbs.; silk, 395 bales

Per Raleigh, from Shanghai, October 2, to London.—Tea, 620,348 lbs.; silk, 328 bales.

Per Leichardt, from Shanghai, September 22, to New York.—Tea, 557,113 lbs.

Per Napoleon III., from Foo-chow-Foo, September 2, to London.—Tea, 950,559 lbs.

Per Clara Novello, from Foo-chow-Foo, September 7, to London.—Tea, 565,000 lbs.

Per City of Carlisle, from Foo-chow-Foo, September 7, to London.—Tea, 1,062,500 lbs.

Per Romeo, from Foo-chow-Foo, September 18, to London.—Tea, 478,000 lbs.

Per Gauntlet, from Foo-chow-Foo, September 18, to London.—Tea, 816,300 lbs.

Per Runnymede, from Foo-chow-Foo, September 21, to London.—Tea, 797,200 lbs.

Per Southern Cross, from Foo-chow-Foo, Oct. 8, to London.—Tea, 787,500 lbs.

Per Marco Polo, from Foo-chow-Foo, Sept. 28, to Falmouth.—Tea, 243,600 lbs.

Per Theodore and Julie, from Foo-chow-Foo, Sept. 28, to Falmouth.—Tea, 192,300 lbs.

Per Macao, from Foo-chow-Foo, Sept. 14, to Melbourne.—Tea, 381,200 lbs.; opium, 23,400 taels; sundries, 3,276 packages.

Per Florence Nightingale, from Foo-chow-Foo, Sept. 21, to Sydney.—Tea, 557,000 lbs.

Per Esmeralda, from Foo-chow-Foo, Sept. 21, to Sydney.—Tea, 393,000 lbs.

Digitized by Google

Per Miranda, from Foo-chow-Foo, Oct. 7, to Sydney.—Tea, 297,500 lbs.

Per Peterbcrough, from Amoy, Sept. 11, to New York.—Tea, 593.000 lbs.

Per Miletus, from Amoy, Sept. 28, to New York.—Tea, 741,809 lbs.

Per N. B. Palmer, from Hong Kong, Sept. 16, to San Francisco.—Tea, 1,906 packages; sugar, 7,000 piculs; rice, 5,550; matting, 82) rolls; opium, 9,400 taels; firecrackers, 2,400 boxes; China goods, 3,603 packages; peas, 875 piculs; pepper, 530; gunnies, 25 mil.; whiskey, 161 barrels and 50 tons.

Per Bald Eagle, from Hong Kong, Oct. 10, to San Francisco.—Tea, 2,107 packages; sugar, 8,040 piculs; rice, 3,750; oil, 50; matting 260 rolls; opium, 16.500 taels; China goods, 7,904 packages; peas, 150 piculs; hemp, 500 bales.

Per Verbena, from Macao, August 21, to London.—Sweetmeats, 150 boxes; anniseed and cassia oil, 670; soy, 100 packages; sundries, 281; cassia lignea, 1,700 piculs; sugar, 1,500; tobacco, 169 boxes.

Per Blohm, from Macao, September 28, to Falmouth.—Cassia oil, 1,350 boxes; anniseed oil, 40; cassia buds, 49; sugar, 2,000 piculs; rice, 5,000; matting, 200 rolls; fire crackers, 1,000 packages; sundries, 693.

Per Hero, from Canton, September 13, to London.—Tea, 867,600 lbs.; sundries. 18 packages.

Per Shand, from Canton, September 14, to London.—Tea, 936,530 lbs.; matting, 350 rolls; sundries, 300 packages.

Per Finzel, from Canton, September 19, to out ports.—Tea, 480,606 lbs.

Per Lord of the Isles, from Canton, October 3, to London.—Tea, 851,500 lbs.; sweetmeats, 251 boxes; sundries, 409 packages; china ware, 95.

EXPORTS FROM MANILA.

Per Luisita, to Liverpool, Sept. 14.—Hemp, 5,830 piculs; sugar, 12,900; cigars, 165 mil.

Per Rosarito, to Liverpool, Sept. 12.—Hemp, 2,270 piculs; sugar, 3,600; sapanwood, 30.

Per Cervantes, to Liverpool, Oct. 3.—Hemp. 7,200 piculs; sugar, 11,456; cigars, 380 mil; indigo, 142 quls.

Per C. E. Lemon, to London, Sept. 25.—Hemp, 5,300 piculs; sugar, 16,110; coffee, 126; cigars, 5,276 mil; indigo, 838 quls.; tortoise shell, 642 catties; mother-o'pearl shells, 393 piculs; buffalo horns, 243.

Per John Mathie, to Cork. Sept. 23.—Sugar, 12,318 piculs.

EXPORTS FROM PENANG.

Per Samuel Appleton, to New York, September 30.—Tin, 1,028 piculs; black pepper, 3,532; india rubber, 283; buffalo hides, 139; cow hides, 178; nutmegs, 263; mace, 33; wild cinnamon, 693; gum benjamin, 25; rattan chairs, 24.

From Amoy.—For New York: Sept. 27, Miletus.

From Hong Kong, Macao, and Canton. For London: Sept. 12, Hero; 14, Shand; Oct. 3, Lord of the Isles. For Falmouth: Sept. 28, Blohm. For New York: Oct. 3, John Jay. For Sydney: Sept. 25, Kestrel; Oct. 9, Samuel Fales. For San Francisco: Sept. 16, N. B. Palmer; Oct. 10, Bald Eagle. For Cape of Good Hope: Sept. 30, Prince of Wales.

From Manila.—For London: Sept. 25, C. E. Lemon. For Liverpool: 12, Rosalita; 14, Luisita; Oct. 3, Cervantes. For Cork: Sept. 23, John Mathie.

From Singapore.—For London: Oct. 12, Electric. For Falmouth: Sept. 27, Neptune. For Liverpool: Oct. 2, Greyhound. For Bordeaux: 21, Singapore.

From Penang.—For London: Oct. 10, British Queen; 15, Abdul Medjid. For New York: Sept. 30, Samuel Appleton.

LOADING.

At Shanghai.—For London: Anglo Saxon, Cyclone, Drusus, Kate Carnie, Mallard, Queen Bee, Silent, Spirit of the Deep, Wagoola. For Liverpool: Wellington. For New York: Queen of May. For Sydney or Melbourne: Ngapuhi.

At Foo-chow-Foo.—For London: Britannia, Foam, Hanover, Ocean Mail. For Hamburg: P. C. Kinch. For Australia: Isis. For Sydney: Juverna.

At Hong Kong, Macao, and Canton.—For London: Dunmail, Sea Snake, Keepsake. For New York: Christopher Hall. For Sydney and Melbourne: Formose, Margaret Eliza. For San Francisco: Dictator, Fortuna, Mary Whitridge.

At Manila.—For Liverpool: Clementina. For Cowes: Oscar Vidal.

At Singapore.—For London: Harmonia, Myrtle, Oryx. For Liverpool: Constance. For Hamburg: Franziska.

At Penang.—For London: Ceylon. For Liverpool: Greyhound.

FREIGHTS AND CHARTERS.

At Shanghai.—To London: Tea, £3 to £3. 10s.; silk, £4 to £5. To New York: Tea, $14 to $15; silk, $25. A large fleet of merchant vessels are in port, with but few charters, either coastwise or to Japan, and the prices of all descriptions of Japan produce being very low, there is but a poor inducement to proceed there. The charters since our last have been—Anna Maria, Chefoo to Swatow, with 45 lay days, $3,500; Griefswald, 25 lay days, $1.600; and several to load at Newchwang for southern ports. The following vessels have also been sold:—May Queen (Am.), $7,000, Cricket (Br), $25,000; Rose (Am.), $43,000; Chrystal (Am.), 5,000 taels; Granada (Am.), $4,500; Madras (Fr.) 14,000 taels.

At Amoy.—Moderate rates are now ruling here, and several vessels have obtained employment, amongst which are—Macassar, to Saigon and back, 50 days, $5,400; Wodan, Ningpo and back, 30 days, $2,000; Wilhelm, $1,225; S. Friederika, $1,700; Bantang, $1,250—each to Taiwan and back.

At Hong Kong, Macao, and Canton.—To London £3 10s. The shipping prospects at these ports are decidedly better, and likely to continue throughout the winter with improved and satisfactory rates. The dispute regarding the duties on native produce have been settled by the British Minister at Peking by a compromise. Government have taken up between 4,000 and 5,000 tons for transport service. The emigration and coolie trade to the West Indies and Havana is certain to require a large amount of tonnage, and for the latter no American vessels will, at present, be used. The Manila market is also bare, and draws its supplies from here. These reasons, and the amount of disengaged tonnage being very small, are assigned for the improvement. The charters reported are Dunmail, from Canton to London, at £3 10s. Valdivia, Manila to United Kingdom, £2,000 in full. Christopher Hall and John Jay, to New York, on owner's account. Miranda, Foo-chow-Foo to Australia, at £4, and Despatch, at £4. 5s. Marguerite Elisa, Sydney, £1,500 in full. Mary Whitridge and White Swallow, to San Francisco, at $12,000 in full, Dictator, at $13,500, and Fortuna, at $7 50c. per ton. Haddington Euphemus, Good Success, to Bombay, at current rates. Rajah of Sarawak, from Macao to Batavia and Samarang, 5,000 guilders in full, and then to Europe, at £4 per ton. A few to Bangkok and back, at 50c. to 55c. Westminster, Minerva, and Lauderdale, to Bombay, with troops, at £10 12s. 6d. per man, and £3,500 each for cargo in full. Challenge, to Bombay, with troops and cargo, at $30,000 in full.

At Manila.—All the tonnage in port is employed, and the Valdivia has been chartered at Hong Kong from here to Liverpool.

At Singapore.—To London £2 to £3 15s. To Liverpool £3 to £3 10s. Fair employment is still to be found here, and there are but few disengaged vessels in port. The engagements made have been Johanna Stoll, from Batavia and another port to Great Britain, at £4 15s., or from Padang, with coffee, at £5 10s. Norma, from hence to Bremen, at £3 10s. dead, £4 light freight. Avondhu, from Siam back here, for $2,900 in full; thence from a rice port to Great Britain, at £3 15s., if between Havre and Hamburg, £4, or Holland and Belgium, £4 5s. The Black River Packet has been sold for $1,750, and the Swiftsure for $6 800.

At Batavia.—Tonnage continues in good demand, and ready employment has been found for all available ships. The Antonia loads for the Gulf of Persia, and the Hassar for Holland at rates that have not transpired.

CASUALTIES.

The Sabrina, from Amoy to Chefoo, was wrecked off House Hill or Red Bay. The crew remained on board till morning, when they left in the long boat, and arrived at Amoy.

The Swan parted her anchors in Tongsang Harbour, and soon became a total wreck.

The Albion has been totally wrecked, and the hull and cargo sold in Kelung for about $2,000. Master and crew were to proceed to Shanghai.

Digitized by Google

The Malakoff foundered on the 8th Sept. in lat. 29, 17 N., long. 128, 51 E. The crew were saved by the schooner Shanghai.

The Valle de Luz, from Nagasaki, struck on a bank about 12 miles from Gutzlaff on the 13th Oct., and in spite of all endeavours, the crew were obliged to leave her, and take refuge on board the Chene, bound to Chefoo. The ship and cargo are totally lost.

The Leontine was lost on the 21st Sept. in a typhoon inside Reiss Islands. The crew arrived at Hong Kong on the 3rd Oct. in the steamer Swatow.

The Jose Maria, from Amoy to Manila, has been totally lost on the coast of Hocos, on the 13th Sept. The crew have been saved.

The Benjamin is reported as being wrecked near Wanchew Bay.

The Faust has been lost with all hands but one.

The Spirit of the North, from Macao to London, struck on a sunken reef on the 21st Sept., and put into Singapore, making six feet of water per hour. She has had to discharge, but will soon reload and proceed on her voyage. The cargo is not much damaged.

The Peregrina has been lost on the coast of Cochin China, and all hands were saved, but taken prisoners by the natives. A gunboat has been sent to the scene of the disaster.

The Orion, from Foo-chow Foo, for Shanghai, was totally lost on the 22nd Sept., on one of the Ocksen Group of Islands, and went to pieces in two hours after striking. Two of the crew were lost, the remainder reached Foo-chow on the 11th Oct.

The Napoleon III., from Foo-chow-foo to London, put into Singapore on the 19th Oct., with loss of rudder, and will proceed on her voyage after repairs.

The Caduceus, from Canton, passed St. Helena on the 28th October; 73 days out.

THE CUSTOM-HOUSE EXACTIONS.

The following is a copy of the protest addressed by the Shanghai Chamber of Commerce to Earl Russell, Secretary of State for Foreign Affairs:—

My Lord,—We, the undersigned members of the British Chamber of Commerce of Shanghai, beg most respectfully to draw your lordship's attention to a matter which gravely affects our commercial interests in this country, and in many respects, in our opinion, most seriously trenches upon our Treaty rights.

It is to the administration of the Imperial Maritime Customs of China, as regards foreign trade, that we allude. Your lordship is aware that the Maritime Customs at this port have now for many years been directed by foreign inspectors, and within the last eighteen months the same system of a foreign inspectorate has been extended to most of the ports opened to foreign trade by the Treaties of Nanking and Tien-tsin. The very fact of an administration by foreigners has necessarily involved a much greater strictness in matters of detail than prevailed under the previous and more lax supervision of the native authorities; and many facilities formerly granted, both as regards the hours and the mode of passing business through the office of the Customs, have been withdrawn. These restrictions have at several times caused considerable dissatisfaction amongst the community of this port, and called forth remonstrances and applications for improvement from this Chamber of Commerce; but it has always been acknowledged that if the great argument adduced in favour of a foreign inspectorate could be practically borne out—viz., that it insured an equal collection of duties from all concerned, and afforded a sure protection to the honest trader against evasions of a Treaty tariff by unscrupulous competitors, and that if the system were equally applied to all the ports of importance open to foreign trade it would be unbecoming to oppose such an institution solely on account of the additional trouble in the transaction of business, to which, from its constitution, it must necessarily give rise.

In thus premising, we desire to assure your lordship that even on the present occasion our remonstrance is not intended to be directed against the system of the Foreign Inspectorate, but against those illegalities which, in infringement of our Treaty rights, have lately been attempted by the Imperial Maritime Customs, even when enjoying the advantage of foreign experience and advice in their administration.

This Chamber of Commerce has, during the last two years, more than once addressed Her Majesty's Minister and Chief Superintendent of Trade, the Hon. F. Bruce, upon the subject of the Customs administration, but has not been favoured in reply with any exposition of the views of His Excellency, nor has it, to its regret, been able to observe as the result of official, although silent, action, any amelioration in the state of things so much complained of. On the contrary, the latest infringements of our Treaty rights have proved so much more serious than any which have preceded them, that it has become incumbent upon us, in our own defence and in that of the important interests confided to our care, whilst again drawing the attention of Her Majesty's Minister to the facts of which we complain, to present them with the utmost respect to your lordship's most serious consideration.

We take, therefore, the liberty of enclosing to your lordship a printed pamphlet, containing the Minutes of the late Annual General Meeting of this Chamber, of the resolutions passed at that meeting, and of certain cases submitted to the Chamber wherein it is affirmed, and justly so in our opinion, that the Imperial Customs have exceeded their own rights, and infringed upon those of British subjects in three particulars, viz.:—

First. In exacting duties upon ships' stores, contrary to Rule 2 attached to the tariff of the Treaty of Tien-tsin, and in accompanying such illegal collection with the obvious inconsistency complained of by the storekeepers of Shanghai (Case No. 5); any levy at all upon such articles placing equally their importers and British shipping which consumes these stores, in a worse position than that held under the Treaty of Nanking.

Secondly. In claiming to collect transit duties upon Chinese produce purchased by foreigners within the actual limits of this port—in claiming them upon Chinese produce merely transported from the open port of Hankow to the open port of Shanghai—and in claiming them upon British goods forwarded from this, their port of importation, to the open port of Hankow—such claims being entirely at variance with Article 28 and Rule 7 attached to the Treaty of Tien-tsin.

Thirdly. In refusing to continue to grant exemption certificates in the case of imported merchandise, &c., exported to another port, such refusal being in direct contravention of Article 45 of the Treaty of Tientsin; and in refusing to continue to grant exemption certificates upon the export of merchandise from one Treaty port to another—the latter refusal enforced without a moment's notice, being in opposition to long-established custom under the Treaty of Nanking, and to the spirit pervading the Treaty of Tientsin, that merchandise shall, except in the case of becoming subject to transit duties, be only once liable for the amounts laid down in the tariff.

The first irregularity complained of will depend upon the interpretation to be given to the term "ships' stores;" and we most respectfully submit that this, as well as the term "household stores" immediately preceding it, should be read in its widest sense, as is evidently to be deduced from the context of Rule 2, and from the practice universally in vogue under the Treaty of Nanking.

In the second instance, in which transit duties have been claimed, we need but refer to the terms of Article 28 of the Treaty of Tien-tsin to refute the position lately assumed by the Imperial Maritime Customs; and it is entirely beyond our comprehension how that Article, or its explanatory Rule No. 7, can be read in any other sense than that transit duties become leviable, in certain cases, upon produce purchased by a foreigner inland and conveyed to a port, or upon imports of a foreigner conveyed from a port to an inland market, and that conveyance from one Treaty port to another will not of itself subject either produce or goods to such impost.

There is one point, however, in connection with transit duties which has lately been raised, and to which we beg to draw your lordship's particular attention. It is now asserted by the Imperial Maritime Customs, and we believe that the opinion is also held by Her Majesty's Minister in China, that by Rule No. 7, which is to be "equally binding on both countries with the Treaty itself," the payment of transit duties, as now commuted for one-half of the tariff duty, is no longer a matter "at the option of any British subject," as is expressly laid down in Article 28, but that the half tariff rate is in all cases to be applied.

With all due submission, we cannot interpret Article 28 and Rule 7, intended for "the better explanation of that Article," as correctly bearing any such interpretation. By the Article it was provided that within a certain stated time, the Chinese Authority, appointed to superintend "the collection of duties, should declare the amount of duties leviable on produce between the place of production and the port of shipment, and upon imports between the Consular ports and the inland markets, and that a notification thereof should be published in English and Chinese for general information."

After inspection of such notification, it was to be at the option of any British subject to pay the duties in accordance with the notification, or to commute them by the payment of a single charge, which was to be "calculated as nearly as possible at the rate of two-and-a-half (2½) per cent. *ad valorem*," and to be "fixed for each Article at the conference to be held at Shanghai for the revision of the Tariff."

At that conference, no doubt in view of the fact that the tariff duties are supposed to be established on a basis of five (5) per cent. *ad valorem*, it was determined that instead of declaring a rate for each article half tariff duties should constitute the fixed rate for transit duties, and that the notification required under Article 28 of the Treaty should be dispensed with; but we most respectfully submit to your lordship that Rule No. 7, being in explanation of and not over-riding Article 28 of the Treaty of Tien-tsin, the option conferred upon a British subject in the body of the Treaty has not been removed by the Rule; but that it still remains within his province to decide whether he will pay on his goods or produce the rates levied at the inland native Custom-houses, or avail himself of a commuted charge in the form of the transit duty.

One practical illustration will, we trust, suffice to show your lordship that our view of the question is in accordance, not only with the wording, but the evident intention of the Treaty to limit the transit duty to two-and-a-half (2½) per cent. *ad valorem*. The native inland duties from the tea districts surrounding the important port of Hankow do, in fact, represent about two-and-a-half (2½) per cent. of the value of the produce, amounting, as they do, to five or six mace per picul; but if the option of selecting this mode of payment be now denied to a British subject, and one tael, two mace and five candareens (T.1.2.5) be enforced, in accordance with the present claim of the Customs, he not only is inflicted with a payment one hundred per cent. heavier than that imposed on the native dealer who is competing with him, but all the benefits of the transit duty clause, hitherto regarded as the main advantage obtained by the Treaty of Tien-tsin, become neutralised and destroyed.

In respect of the refusal of the Imperial Maritime Customs to continue to grant exemption certificates on Chinese produce, the Customs rely upon their interpretation, that Article 45 applies only to foreign merchandise. We

Digitized by Google

on the other hand, rely upon the text of the Treaty of Tien-tsin, and submit that there is no reservation implied or expressed by which the reading of the Imperial Maritime Customs can be supported; on the contrary, that the term "merchandise" applies inclusively to all articles, whether of foreign or native production.

Moreover, two practical illustrations will, we think, exhibit to your lordship the manner in which the principle claimed by the Customs would affect British interests. Article 45, in its application, must, it is evident, affect all articles of Chinese growth or manufacture or none; and if all, as the Customs maintain, it is clear that the two staples of trade with Great Britain, tea and silk, as well as such articles as rhubarb, wool, oil, tallow, hides, hemp, and many others, a great extension in the shipment of which must have been anticipated as resulting from the Treaty of Tien-tsin, will equally be included with Chinese medicines, drugs, or cottons.

A reference to the cases of Messrs. Adamson's tea, and Messrs. Fletcher and Co.'s silk, imported from Ningpo to this port (Cases Nos. 6 and 7 in the pamphlet sent to your lordship), will exhibit the result of applying the principle thus claimed by the Custom-house. Those firms have only been driven to avail of an expensive and circuitous route by way of Ningpo, owing to the state of anarchy from which the Imperial Government is unable to free the intermediate districts between the place of production and Shanghai. The produce is therefore forced to Ningpo, and the trade of that port in tea and silk not being sufficient to enable ships to be laden thence direct to Great Britain, the tea and silk has to be brought to this port for shipment.

The Imperial Maritime Customs at Ningpo and Shanghai would then claim on such produce, as Chinese merchandise, under Articles 45 and 28 and Rule No. 7, the following sums:—

Transit duties to Ningpo	Tls. 1.2.5.	Tls. 5.0.0
Export duty from Ningpo	2.5.0.	10.0.0
Import duty at Shanghai	2.5.0.	10.0.0
And as is shown by the letter of the Commissioner of Customs of 26th July to Messrs. Fletcher and Co., the Imperial Maritime Customs further consider themselves entitled to export duty from Shanghai	2.5.0.	10.0.0
Making in all	8.7.5.	35.0.0
Instead of the extreme, as provided by Treaty, of	3.7.5.	15.0.0

So that it will be clear to your Lordship that a charge of five (5) taels per picul or threepence per pound on tea, and twenty (20) taels per picul or one shilling per pound on silk must be imposed upon the consumers in Great Britain, in order to satisfy the interpretation placed upon Article 45 by the Chinese Maritime Customs; that the exportation of either article would now be conducted at a disadvantage to the above extent as compared with an operation carried on under the protection of the Treaty of Nankin.

We further protest to your Lordship against the present refusal to grant exemption certificates on the export of merchandise from one port to another. It is argued by the Customs that Chinese traders in native craft are forced to pay both an export and import duty, and that it would not be reasonable that foreigners should be placed upon a more advantageous footing than the native merchants.

We admit at once the correctness of the statement and the justice of the argument, with this important qualification, that it is a well-known fact that the two duties levied from the Chinese do not equal in amount the single one imposed upon foreign trade, that we are in practice to be placed on a par with the native dealers, and that the imposition of a second duty, whether import or export, is quite foreign to the whole spirit of the Treaty of Tien-tsin.

We have thus endeavoured to point out the enhanced price of produce forced upon the consumer in Great Britain by the Chinese reading of Article 45. We assure your lordship that its effect upon the interests of British Mercantile Shipping will be equally disastrous; and that the coasting trade, to which it is by Treaty admitted, must inevitably to a great extent revert to uninsurable native craft should such a reading of the Treaty be consented to. And it will be apparent to your lordship that we are not overstating the case when we mention that since 22nd July, on which date the various new rules complained of were put in force, several vessels bound hither from the ports of Foochow and Ningpo, having full cargoes engaged for them from Chinese merchants, had to come to Shanghai in ballast, in consequence of the increased duties to be paid, which became quite prohibitory upon the intended operations.

We therefore commend these our views to your lordship's favourable attention, and trust we may be considered as claiming no more than is stipulated for us, both in letter and in spirit, by the Treaties under which we carry on our transactions in this country.

Whilst thus entering upon the subject of Customs administration in China, there are two further points connected with it to which we would direct the serious attention of Her Majesty's Government, in the hope that your lordship may see fit to intimate to Her Majesty's Minister in China a concurrence in the views entertained by this Chamber, and transmit instructions to carry such views into effect at as early a date as possible. We would strongly urge—

1st. That in future no alterations in the Custom House regulations, initiated by the Imperial Maritime Customs, should be considered as binding upon the foreign community without having been first submitted to the British authorities, and without giving timely notice of their intended introduction into the local Custom-house system. In urging this request we do not intend to allude to any harbour police regulations which, in the protection of its revenue, the Chinese Government may find cause to establish; but to those which apply to the shipping and landing of cargo, hours of business, payment of duties, and all the ordinary administration of the Customs.

2nd. In the second place, we would urgently represent to your lordship the advisability of effecting a complete change in the administration of Custom House cases, in which foreigners are accused of having infringed the provisions of the Treaty, and are deemed liable to fine or confiscation of their goods. The power of jurisdiction in these cases is assuredly at present somewhat undefined, and the uncertainty which exists is most detrimental to the interests of the British merchant. We have always maintained that it is not competent for the Chinese Custom House authorities either to fine a British ship or subject, or to confiscate British property, without the active intervention of the British Consul; and we are unable to see any valid grounds why any divergence should be allowed in this one particular instance from the principle of ex-territoriality so wisely insisted on in our Treaties, merely because the case in question is one in which the Chinese Government is interested in its own person and not in that of its subjects. We trust, and have some reason to believe, that the feelings of dissatisfaction with which we regard the present state of this question of jurisdiction are shared by Her Majesty's Minister in China, and we hope that he may accord his support to the proposition which we beg respectfully to lay before your lordship, that all such Custom-house cases should be taken before the British Consul and decided by him in open court; but should such proposition be deemed impracticable, we would then respectfully suggest that a joint court should be instituted, in which the Chinese and British authorities would act in concert, in the exercise of an equal authority and in open court, by which course of procedure at once ample justice will be secured to both parties, and the publicity of the proceedings will prove an additional deterrent from infractions of the Treaty. We must add, that in our opinion, the element of foreign administration now introduced into the Imperial Maritime Customs appears to us an additional reason for the change we have just advocated to your lordship, inasmuch as both from the arbitrary tendency which has occasionally been exhibited on the part of such foreign *employes*, and their irresponsibility, as Custom-house officers to their own authorities, the foreign merchant stands more in need of the active protection of his Consul than under the Custom-house system, worked by the Chinese officers only, which was previously in operation.

We would further beg respectfully to suggest that, in concert with the Chinese authorities, who, we imagine, could entertain no reasonable objection to the change, arrangements should be made by which, in lieu of the exemption certificates provided for on the re-exportation of imported merchandise under Article 45, drawbacks should be allowed at the port of original entry and the duty really be collected at the port of actual consumption.

By such a change the native authorities at each port would receive the duties attaching to the trade of their own locality—a fact, the importance of which under the peculiar system by which the Government offices are farmed in China, cannot be over estimated, and to the neglect of which, and the prevalence of a contrary system, we have to attribute those very considerable impediments to a free trade which have lately been experienced at the new port of Tien-tsin.

Lastly, we feel forced to call your lordship's attention, in the most urgent manner, to the heavy imposts with which the local trade, not only at this but at all other Treaty ports, has lately been visited at the hands of the Chinese authorities. The fact at the same time brings prominently before us the importance of the Imperial Government in its present state of impoverishment and want of power of the duties levied on foreign trade and the futility of attempting to impose by way of punishment upon the Government of China any stated indemnity in the way of direct payment, if accompanied by the idea that a similar sum will not be extorted by indirect means from the foreign trade. It is an undoubted fact that the payment of two-fifths of the Imperial Maritime Customs to the French and British Governments in part payment of the war indemnities is the real cause of all those exactions under which our local trade has lately suffered so severely. It may be replied by the Chinese authorities that the propriety of these imposts is beyond the discussion of any foreign Powers, being in the form of taxation upon the native trade, and the real causes may be incapable of direct and tangible proof or exposure at our hands: but as their enforcement is unfortunately too well known to us, their origin is equally clear, and their opposition to the whole spirit, If not to the actual letter, of the Treaty of Tien-tsin, is quite incontestable, The practical result is, that the burden of the indemnities falls, not, as intended, upon the Chinese Government, but upon the foreign trade, and that on the resident merchants in China devolves the heavy bulk of these serious impositions.

We, therefore, most respectfully crave your lordship's careful consideration of the various contents of this our memorial. We solicit your active intervention to prevent the recurrence of such illegalities as those of which the Imperial Maritime Customs have of late been guilty. We desire to urge upon Her Majesty's Government the high advisability of reconstructing the course of judicial proceedings in Custom House cases, and we earnestly solicit a powerful remonstrance to the Court of Peking on the excessive imposts to which foreign trade is now made subject through the medium of local taxation at the Treaty ports.

We have the honour to be, my lord, your lordship's most obedient and humble servants,

Continental Intelligence.

FRANCE.

The reef in the Red Sea, said lately to have been taken in by England, has set the French press in an uproar. *La Patrie* asks—

"If Europe be not tired of England's continued encroachments, already mistress of Aden and Perim, it is not distasteful to England further to fortify herself in the Red Sea, where all the navigation in that sea, at the straits of Babel Mandeb, and in the Indian seas, will be placed at the mercy of her guns? We might call to recollection that the points the most insignificant in appearance, becomes in the hands of England formidable fortresses."

The *Débats* of the 12th inst. contains, too, a violent article with regard to Madagascar and British preponderance at sea, from which we extract the following passage :—

"Situated on the eastern flank of Africa, the island of Madagascar occupies one of the strongest positions in the globe, commanding as it does the two great maritime passages between Europe and Asia: to the north the straits of Bab el Mandeb; to the south the Cape of Good Hope. To add to the importance of this place, nature has endowed it with many admirable ports, already disfigured under English names and English maps. If these ports are once opened to the squadrons of a power which already occupies Perim, possesses Aden, several points on the African coast, Bombay, Ceylon, Calcutta, Mauritius, &c., it is all over with our authority, and the independence of our little colonies. The entire commerce of the Indian Ocean would pass under a single influence. What could be opposed to India and Madagascar in the same hands? Our old establishments in India, our recent establishments in Cochin-China and the Ocean would be paralysed; the Suez Canal would only serve the aggrandisement of one European Marine, and our future steam-boats for the East would be stifled in their birth. It is not the colonisation of land, it is the liberty of the seas which is lost."

La Patrie has the following :—"We have news from Cochin-China up to the 10th of September. At that date the condition of our colony of Cochin-China was satisfactory. A slight opposition still manifested itself in some parts. The first detachments sent out from France under the orders of Chef-de-Battalion of the Marine Artillery Sapia had arrived. The new Governor, Rear-Admiral Bonard, was shortly expected, and it was then supposed he would advance against the capital."

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Nov. 22.

The Ministerial crisis, mentioned in my last, is over for the present. Baron van Zuylen van Nyefelt has been made the scapegoat, and was obliged to resign, the King preferring to sacrifice him rather than lose the services of the other Ministers. As a plaister to the wound, the King has, however, conferred on him the insignia of Knight-Commander of the Order of the Netherlands Lion. It is not yet definitively settled who is to be the new Minister for Foreign Affairs, but the Minister for the Catholic Religion, Mr. Strens, is provisionally entrusted with the *portefeuille* of the Foreign Department. The other members of the Cabinet, whose resignation I chronicled in my last, now remain in office.

At the Hague great curiosity is felt to know what has become of the ex-Governor-General of Netherlands India, Mr. Pahud. The last heard about his movements was that he breakfasted at Alexandria with Mr. Ruyssenaers, the Consul-General of the Netherlands in Egypt, and was about to proceed to Marseilles. It would make but little difference when an ex-Governor-General returned to this country, if it were not a question intimately connected with the national finances, and as such, brought home to every man's door, for it appears that in addition to the handsome salary he receives when in office (£12,000 per annum during his period of five years' service in the appointment), they enjoy a so-called "non-activity salary," at the rate of 100,000 florins per annum from the day they lay down their functions, till their arrival in Holland. Therefore the longer they stay away, the greater the sum they are entitled to draw for travelling expenses. When Mr. Duymaer van Twist gave up the office of Governor-General, he was understood to have defrayed his expenses of returning home out of his own pocket, whilst his predecessor, Mr. Rochussen, on the other hand, remained for six months in the colony after he had ceased to be Governor-General, and then made a long journey through British India, claiming on his return the sum of 100,000 florins, which was paid him by Mr. Pahud, then the Colonial Minister, out of the Colonial funds.

Last year people saw with astonishment in the list of pensions those granted to Mr. P. Myer and Mr. G. L. Baud, both formerly officers of the East India Civil Service and ex-Ministers for the Colonies, for services they might have performed, but did not. These unjustifiable pensions were granted under the sanction and authority of Mr. Rochussen, who was then at the head of the Colonial Department. It is therefore to be hoped that some independent member of the Second Chamber will ask for an official explanation.

The Board of Trade of the important manufacturing district of Twente has sent in a petition to the Colonial Minister, showing the disadvantages attending a sudden reduction of the duties on the imports and exports of Netherlands India as affecting largely their interests.

It is stated on good authority, that the Government intend no longer to advertise for tenders in this country, for the supply of uniforms and other requirements of the army in Netherlands India, intending in future to make their purchases on the spot when needed.

Despatches have been received at the Naval Department announcing the safe arrival at Santa Cruz, Teneriffe, on the 25th of October, of the war-steamer *Sindoro*, Lieutenant of the First Class J. M. de Jongh. She was to proceed on her voyage to the East India station on the 30th of the same month. All well on board.

The King has been pleased to amend the Royal Decree of the 31st of December, 1860 (No. 15), which fixed the number of the contingent of fresh troops to be sent out to Netherlands India in the course of this year, at 1,500 men, by increasing the number to 1,900. As the number hitherto embarked in this country amounts to 1,495, preparations are making for sending out about 400 more.

Rittmeister Baron Snouckaert van Schaumburg, of the Staff, one of the King's aides de-camp, who accompanied His Majesty on his late visit to Compiègne, has been decorated by the Emperor of the French with the Cross of Officer of the Imperial Order of the Legion of Honour.

Somewhere about the year 1825 two young German noblemen, the sons of the late Prussian Captain von Beulwitz, left their native country, and entered the military service in Netherlands India. Nothing having since been heard of them, they are now officially invited by the authorities of Hof, in Bavaria, to appear before them, or communicate by letter, on or before the 30th of August, 1862, or else they will be considered dead in the eye of the law, and their inheritance go to the next of kin. Their names are Ludwig Ernst Ferdinand von Beulwitz, formerly captain in the Prussian army, and Adolph Friederich Alexander von Beulwitz, formerly lieutenant in the Bavarian service. Perhaps this notice may attract their attention, or that of some one acquainted with them.

It is by no means an unusual thing in all the Continental armies to see non-commissioned officers, and occasionally even privates, decorated with orders of knighthood, as a reward for extraordinary services in times of danger, and personal courage displayed in the field of battle. This custom is also observed in the Dutch army, and I have more than once had to chronicle in your columns such rewards for meritorious conduct. I have to-day to report a similar case, the King having decorated Sergeant E. H. Schanfelder, of the East India Sappers, with the insignia of the Fourth Class of the Military Order of Willem, in recognition of the bravery he displayed in the expedition to the South and East District of Borneo, and the landing in the river Kapoeas on the 28th of April, 1860; and the same honourable distinction has been conferred of P. F. O. de la Raparlier, corporal in the East India Army, for his gallant conduct in the expedition to the coast of Cereao, from September to December, 1860.

The City of Amsterdam now contains 269,523 inhabitants. The Corporation have just published the budget for 1862 of the local receipts and expenditure, each of these items amounting to 4,343,928fl. 50 cents. The municipality of Rotterdam have also published theirs for the same period, amounting to 1,763,650fl.

A pamphlet has just appeared here under the title of "Must the Dutch Commerce, Navigation, Ship-building, Industry, and our Commission Houses in Netherlands India be totally ruined? A question answered by the proposed new tariff for the East Indies, forwarded to the Chambers of and manufactures for their opinion, by the Minister for the Colonies." It has been sent to all the Members of the Second Chamber of the States General.

The King has granted a "Concession" to Messrs. A. Mendel

Digitized by Google

and H. L. J. Haakman, both domiciled at Amsterdam, and Mr. A. N. van der Berg, of Riouw, in Netherlands India, represented in this country by Mr. H. J. van Buren, advocate of Rotterdam, permitting them to establish a Joint-Stock Association, with limited liability, under the name of the "Karimon Tin Mining Company."

The Netherlands Trading Company having again advertised for tenders of ships to bring cargoes of produce from Java to this country, the vessels to sail hence not later than the 10th of December, and those on the passage out to be placed at the disposal of the Company's Factory at Batavia, on or before the 10th of April next, a good many fine vessels have been offered and the following accepted to bring cargoes to the undermentioned ports :—

Port.	Vessel.	Captain.
For Amsterdam..	Batavia	J. D. van Dolder.
" ..	Christine and Juliette	N. Rademakers.
" ..	Admiral Piet Hein	L. Hazewinkel.
" ..	California	M. de Wyn.
" ..	Almonde	H. J. Surie.
" ..	Minister Thorbecke	C. van Duyn.
Rotterdam ...	Jacoba Cornelia..	H. Etz.
" ..	Diligentia	D. Bentveld.
" ..	Tryntje Fenna	O. Ingerman.
" ..	Henriette Gerardine Susanna ..	A. Sissingh.
Dordrecht ..	Jason	J. H. Lammerts van Bueren.

The arrival of the Overland Mail without the usual semi-monthly post from China and Java has created much disappointment both here and at Rotterdam, the more so as few appear to be aware of the reason, as stated in your paper.

Mr. Israel S. Diehl has been recognised by the Government of the Netherlands as Consul at Batavia for the United States of North America.

The Royal permission and licence is granted for the formation of another new Insurance Company in this city, with limited liability, to be called the "Marine Insurance Company of the River Y."

The King has presented his portrait to Count de Fiquelmont, formerly of the Dutch E. I. army.

H.N.M. steam corvette *Djambi*, Lieutenant Jansen, acting commander, now stationed at Curaçao, has been suddenly ordered to take in immediately the needful supplies of provisions, stores, and water, and proceed direct to Batavia without loss of time. It is stated here in naval circles that she is to take part in the new expedition to Borneo.

P.S.—By a letter just received from the Hague, I learn that the ex-Governor-General Pahud has safely returned to the capital, and is to have an audience of the King to-morrow.

PASSENGERS ARRIVED.

Per *Huydekoper*, Capt. Blok, at Brouwershaven, from Batavia: Messrs. van Rhyn and Dentz.

Per *Vrede*, Capt. Tirbruggen, at Brouwershaven, from Batavia: Mr. and Mrs. Favricius and two children, Mrs. Hubert and son, Mr. Bergoelet; 22 military invalids.

Per *Staatsraad van der Houven*, Capt. Heymeriks, at Brouwershaven, from Batavia: Messrs. Ryk and Arend, officers of the Netherlands Royal Navy, Capt. Severin, of the E.I. Infantry, and family, Mr. Lobby; four invalided seamen and seven D. soldiers.

Per *Tryntje Fenna*, Capt. Ingerman, at Nieuwe Deep, from Padang: Capt. P. A. Muller, of East India Army, and lady.

PASSENGERS OUTWARDS.

Per *Wassenaar*, Capt. Hofstee, from Amsterdam, to Batavia: Capt. W. J. Visser, of E.I. Infantry, and lady, Messrs. H. Daarnhouwer and H. Hofstee, Miss M. Hofstee.

Per *Triton*, Capt. Adriaans, from Rotterdam, to Batavia: Mr. and Mrs. H. H. Schiff, two children, and maid-servant; Mr. and Mrs. Ossemann, Mrs. Mullemeister, Messrs. W. K. van Dedem, W. van Geen, ten Klooster, Pattin, J. A. Bekking, and Zuur.

COMMERCIAL.

COFFEE has been for the past fortnight in considerable request, at successively improving rates, and the market closes remarkably firm and decidedly higher. Good ordinary Company's Java, No. 18 and 19, has been paid with 45 cents., and no more is to be had at that figure. 6,000 bags private trade Padang have come in, but are not yet in the market. Owing to the large deliveries that have been made from the warehouses lately, our stocks of East India are 200,000 bags less than last year, so that there is every probability in favour of a further improvement.

SUGAR presents a very unsettled appearance. The sales of raw E.I. have been not inconsiderable, but with very irregular prices, varying for the same qualities from ½ to 1 fl. under September sale value. There is still some enquiry for the higher numbers, but they are getting scarce. Amongst the sales may be noticed 19,494 mats of Manila, No. 6-7 at 27 fl. Refined market very lively, and several large transactions reported. Amongst others 1,100,000 kil. crushed ASR, No. 1, at 37½; No. 2, at 36½; and No. 3 at 35½ fl., deliverable end of January; 200,000 kil. B and H., No. 1, at 37½; No. 2, at 36½ fl. per February and 150,000 kil. W. and Z at 36½ fl., per March. At Rotterdam about 1,800 tons have been sold at about the same rates. Ready goods are in brisk demand for exportation before the close of the shipping season, and in many cases a premium has been paid for the transfer of contracts for crushed deliverable in this month and December.

RICE continues to play an important part in our market, and prices may again be quoted higher than last mail.

TEA firm, with low stocks, which greatly restricts business. In the absence of China tea Java is much sought after. At a sale of 263 quarter chests at Rotterdam Congou sorts fetched 62 cents.: Oolong, 70 to 83 c.; black leaf, do., 95 c.; Schin, 61 c.; and Congou Oolong, 70 c. All sold.

SPICES firm, but little doing, with the exception of pepper, of which several sales are reported at about former prices.

INDIGO again very lively and higher. 400 chests Java taken at a profit of 25 to 30 cents. on last sale prices.

TOBACCO.—Java in high favour, with a well-assorted market, so that great facility is offered to buyers, who come forward very freely.

TIN rather firmer. Purchases cannot be made under 71 fl.

SUNDRIES.—At a sale here last week 273 chests (about 18,000 kil.) pearl sago, fine-grained, clean quality, sold at 13½ to 13¾ fl.; 200 bales (about 13.000 kil.) sago flour, of good quality, fetched 12 fl.; 28 chests (about 1 300 kil.) tapioca, fair Penang in large pieces found buyers at 18 to 18½ fl.; 266 blocks (about 1,060 kil.) gutta percha, of which 33 pieces AA, good clean, 152 B, good clean, and 83 BB, good, but less clean, averaged 111 fl.

HAMBURG.

(FROM AN OCCASIONAL CORRESPONDENT.) NOV. 20

Last week a large party, comprising many of our principal notabilities, foreign ambassadors, officers, and ladies, were assembled at the ship-building and steam-machinery works of Messrs. Godeffroy and Son, at the Reiherstieg, on the banks of the Elbe, opposite this city, to witness the launch of a splendid vessel, built at that establishment for the Russian Government, and intended to be used as a transport for the conveyance of telegraph wire and other stores to the Amoor. The launch was effected with the greatest possible precision, leaving nothing to be desired. The vessel was christened the *Giljack*, and presents a very handsome appearance, her dimensions being 145 feet in length, 33 feet in breadth, and 19 feet in depth below the orlop deck. She is sheathed with yellow metal, and will be barque-rigged. After the launch she was in due formality given up to the Russian Ambassador to the Hanse Towns, Councillor of State, Baron von Koudriaffsky, who represented his Sovereign on the occasion, and had received the needful instructions to be present at the launch. He then transferred the command of the vessel to Capt. Inquist, of the Russian Navy, who lately arrived here in a ship of war from Cronstadt for that purpose, together with a full complement of officers and seamen to navigate the vessel to her ultimate destination. Capt. Inquist is displaying great energy in rigging the *Giljack* in order to proceed to sea before the navigation is interrupted by the frost, which sometimes commences in December. As part of her cargo the vessel will take in an iron schooner, fitted with a lifting screw and engines of 60-horse power, constructed at the same establishment for the Imperial navy, for employment on the Amoor; two iron-screw steamers of smaller dimensions to be used as tugs on the Amoor; and, further, four iron steamers for the telegraph service, one having 35-horse power, and the other three 15-horse power each, none of them drawing more than twelve inches of water. All these are ready for shipment, being a full month in advance of the time stipulated in the contract for their completion. This is also the case with the *Giljack*, and reflects great credit on the diligence and punctuality of the manager of the establishment. After the launch the company sat down to a collation, provided by the proprietors, at which Mr. Senator Godeffroy presided, and proposed as a toast the health and prosperity of the Emperor Alexander II. of Russia, which was duly responded to by his diplomatic representative, and the military band of the Hanseatic Brigade played the Russian Hymn, whilst a lively conversation was being carried on by the assembled guests, in German, Russian, Polish, Swedish, English, French, and Dutch.

It may be well to take this opportunity to caution merchants in the Far East *against chartering vessels under the Oldenburg flag* for shipments of goods to this port, as they are still subject to the payment of the Stade Dues, which have now been abolished for several months for the flags of those nations whose Governments signed the treaty with Hanover, which includes all maritime States, with the single exception of Oldenburg, whose Grand-Duke, strange to say, though so nearly allied to the Guelphs (the Queen of Hanover and the Grand-Duchess of Oldenburg being sisters), has hitherto consistently refused to enter into any negotiations for the abolition of the Stade Dues, probably considering the quota fixed for him out of proportion. But be that as it may, he is rendering his shipowner subjects but a poor service by his obstinacy, for it naturally places them

Digitized by Google

at a great disadvantage as compared with the flags of other nations, and merchants will therefore do well in chartering Oldenburg vessels for this port either to stipulate for a lower freight than that for any other flag, or else to insert a clause in the charter-party, making it binding on the vessel to pay the Stade Dues on the cargo shipped, to compensate for the disadvantage.

Correspondence.

(To the Editor of the *London and China Telegraph.*)

SIR,—It is a common saying that men who make money easily lose it as fast; and though I should be sorry to think that this is the case with most of my countrymen in China, yet I have myself seen many instances in that country in which their generosity has been egregiously imposed upon. I know at this time one charlatan who is trying to live at their expense, and whose true character, although known to many, has never been publicly exposed. In truth, we foreigners in China are too busy for several hours in the day, and a great deal too hot and tired during the remainder, to investigate the dirty tricks of a pretender. However, having myself returned from the Far East, I am anxious to do my friends at Macao some service, by drawing their attention to the sayings and doings of an individual who is living there under false pretences, and trading on their kind-heartedness. This man has found it convenient, I believe more than once, to change his name, but he is now assuming that of "Count Scala." Here, then is my first charge against him. He asserts that he is a French nobleman, and a first cousin to the Marquis de Larochejacquelin, and married the Princess of Salm, with whom he received a dôt of 1,400,000 francs. Now, sir, from inquiries made in Paris and in London, I am prepared to state that both the claim of kindred and the statement of his marriage are utterly false, and that Count Scala's name is not to be found among that of the French nobility. The man with a false title is generally false throughout; and so it is in this instance. "Count Scala" asserts that he has held high official appointments under the Emperor — that, in consequence, he is well known to all the leading men in France—that he left Paris in consequence of a misunderstanding between Louis Napoleon and himself —that he has travelled in Egypt and Abyssinia, the entire length and breadth of the American Continent, and made the grand overland journey from the river Amoor (where he once had a settlement of his own) to Moscow and St. Petersburg, and written several standard works in the French language—that he has an ancient family chateau at Grenoble—that he was once the principal editor of the *Moniteur*, held the Political Portfolio for two years, and became the chief director of the Telegraphic department. These and many more statements, all alike capable, if correct, of being easily substantiated, but which are all equally false, have been made by this man, whose object in visiting China, according to his own account, was to act as an agent of the "Credit Mobilier" of Paris - but according to better authority than his own, has been to escape from justice in his own country, and to lead an idle and dissipated life by palming upon the credulity of merchants in Macao. I forgot to mention, by the way, that this "Count" is a bit of a philosopher, and that he sometimes visits the Chinese gambling house, simply, as he states, to study the philosophy of chances, on which subject he is —or, rather, says he is writing a dissertation. He also asserts that he is a celebrated chemist, and has discovered the art of preparing opium by chemical process, equal in every respect to Patna opium, and that he is now in negotiation with the Bengal Government to sell the secret for a large sum of money. In all communities such a man as I have described Scala to be would be voted a pest, but in a small community his presence is still more annoying; and I am anxious through your columns to warn my countrymen and others in the East against having any transactions with this impostor. "Who steals my purse, steals trash," says *Iago*; but Scala tries also to filch the good name from any man to whom he is inimical. In turns he has abused and criticised the French Minister M. Bourboullon, his lady, and every member of the Legation, and has also grossly libelled the Governor of Macao, and other officials, merely because they shunned him as a *mauvais sujet*. He does not hesitate to abuse private persons in the newspapers by inuendoes so transparent that they are at once understood in Macao and Hong Kong; and it is the opinion of those who have most narrowly watched him that he is playing a deep game, which will ruin many, if they do not receive timely warning. Those from whom he has borrowed money, or received any other favours, are scarcely likely to be again deluded; but the "Count" will, if let alone, always find fresh material to work upon: and it is precisely because such a man ought not to be let alone that I ask for the insertion of this letter. If substantially incorrect on any one point, let the "Count," if he will, vindicate his character by stating plainly the names and addresses of his friends and quondam colleagues in office, his actual place of residence when in Paris, the titles and publishers of his standard works, and last, though not least, the names of the despoiled jewellers in the Palais Royale whom he favoured with his commands, and who I have no doubt will be glad to know the whereabouts of their late patron Marion Louis Honoré François Hippolitto Antoine, Prince Salm, alias Marquis of Negropont, alias Count Scala.—I am, sir, your obedient servant,

MACAO.

London, November 23.

SUBURBS OF LONDON.

(To the Editor of the *London and China Telegraph.*)

SIR,—Frequent inquiries are made by India, China, and Australian friends as to the suitableness of suburban localities for permanent or temporary residence; thinking I might afford information likely to be of value to visitors from the Far East, I offer the same through your journal.

English people, long resident abroad, unquestionably have peculiarities which distinguish the Anglo-Indian, Chinese, or Australian from the "old folks at home," and each are distinct in style. Many feel disappointed with the change on returning to the country of their birth—ladies in particular—but, after a few months, what they were accustomed to in youth gradually comes back, and a good round of beef and plum pudding is considered better than mulligatawny soup or highly-spiced dishes of curry —the latter can be imitated here equal to the best abroad, but the roast beef and plum pudding of old England is not to be excelled.

The principal West-end suburbs sought by Easterns are Kensington, Bayswater, and St. John's-wood. The first is the locality of the Great Exhibition of 1862, and mansions are building fast in this fashionable neighbourhood; rents, of course, in proportion to the altitude—six or seven stories the average.

Bayswater, called "Asia Minor," has long been sought by Indians, and is a short drive from that resort of fashion, Regent-street. Houses in this locality are decidedly improved in style of architecture, but the "rage" appears to be to build lofty edifices, and in squares, intersecting the gardens with a couple of rows of houses—rents £120 to £600 per annum. Now, lastly, St. John's-wood is, in my opinion (and I say it conscientiously from experience), the most pleasant neighbourhood at the West-end of London. My friends, accustomed as they are to large bungalows, surrounded by gardens, will meet in this suburb with something to remind them of the East. As a locality, it is a garden. Houses are mostly built detached, or semi-detached, inclosed in their own grounds. The enervated lady, or her ayah, need not fear mounting several stories to retire. Seldom have the houses more than two stories. In fact, I call the class of buildings chiefly pretty English bungalows.

Kensington lies low, being on the banks of the Thames. In November and during the winter months, should a fog be desired, it can be obtained there to the "heart's content." The locality is S.W.; and the cold north or eastern wind blows the smoke and fog in that direction. It is supposed also that this suburb is warmer than the others, but the idea is a false one. I have tested the fact for several years, and been nearly choked by the fog into the bargain. Bayswater is higher considerably, and to the north of Kensington, but the neighbourhood is not rural.

St. John's-wood is elevated about two hundred feet above the Thames, but so gradual is the ascent from the City that this will scarcely be believed. It is sheltered from the north-east winds by the Hampstead hills; and the scenery around is charming. During foggy weather in London. Kensington, or Bayswater, the sun shines bright and unclouded here. I have no hesitation in stating from experience that St. John's-wood is as healthy a suburb as any around London. Contiguous to the "West-end," a drive of a quarter of an hour takes you to the clubs, theatres, or that fashionable resort of promenaders, Regent-street. Omnibuses and cabs are well appointed. The neighbourhood abounds in schools for young ladies; and the healthy rosy looks of the young lassies taking their morning walks testifies to the salubrity of the place.

To conclude, the City merchants are numerous residents; and within the last two years I recognise many old Australians, and friends from China and India, who are quite satisfied that I am right in my choice of residence. I am confirmed in my opinion by one of the most eminent scientific physicians of London; and I must say that I have had to treat that most serious of Indian diseases, chronic dysentery, especially in females, in other parts of England, and have found that some who, at my request, resided at St. John's-wood, recovered perfectly.—I am, sir, yours obediently,

J. McGRIGOR CROFT, M.D., M.R.C.P. London, F.E.S.,
Late Staff-Surgeon to H.M.'s Ceylon Rifles, China and Ceylon.

Mandarin-villa, St. John's-wood, Nov. 20, 1861.

CHINESE PERSECUTIONS IN NEW SOUTH WALES.—A Bill for the better regulations of gold fields has afforded an opportunity for discussing, to a certain extent, the great "Chinese question." An amendment, which had for its object the entire exclusion of Chinese from the gold fields, was rejected by the large majority of twenty-two to ten. It was next sought to make the power of restricting aliens to particular localities applicable to the Chinese alone, but by the casting vote of the chairman of committees the existence of this power as to all aliens was retained. The miner's fee was reduced from £1 to 10s. per annum. While the assembly has thus been dealing more rationally than might, all circumstances considered, have been expected with "the Chinese question," many anti-Chinese meetings have been held outside, and many petitions for the exclusion of this race have been laid before Parliament. On the other hand, there have been several petitions for redress from such of them as have been plundered and maltreated during the late riots at Burrangong.

THE sum of £4,000 has been awarded for salvage to the ships *Cyclops* and *Furious* for the P. and O. steamer *Alma*, wrecked in the Red Sea.

SIR HOPE AND LADY GRANT have sailed for Madras by last mail.

LONDON, THURSDAY, NOV. 28, 1861.

THE BRITISH EMBASSY AT PEKING.

WHEN the right of a resident British Minister at Peking was established or wrested from the Chinese after a very serious loss of blood and treasure—for our readers must remember that the misfortunes to our fleet at Taku arose on this account—we certainly expected to meet with our reward in the speedy removal of any injustice attempted on our trade. We regret that such hopes have been doomed to disappointment, and that on the first emergency our merchants are driven back to the old resource of submitting their grievances to the Home Government. In fact, so useless do they consider a Minister at Peking, that at a public meeting lately held in Hong Kong, it was stated that, for all the purposes of giving redress to British subjects, Mr. BRUCE, our present Ambassador at Peking, might as well be at Kamschatka. We ventured two years since to predict that such would be the case, and that the introduction of Ministers at Peking would be productive only of jealousies between European Ministers, as already abundantly proved in Turkey and Persia. A copy of the memorial to Earl RUSSELL will be found in another column.

Judging from the very unsatisfactory accounts received from Peking as to the actions of our Minister, and his inability to produce any good work by virtue of his contiguity to the Imperial Court, and also of the state of terror in which he daily lives, we are not surprised to hear that Mr. BRUCE has requested that he may be relieved. The fact of Mr. BRUCE being induced to forego the right of British subjects entering Peking pretty clearly shows how far he is compelled to study his personal safety, and how he is prevented from enforcing the faithful discharge of other Articles in the Treaty. The present mail brings intelligence of the retirement of our troops from Tien-tsin, and we shall not be surprised to hear before long of the retirement of our Embassy to Tien-tsin, where it can be protected by our men of war, combined with the small garrison which has been stationed there.

In our last number we recorded several infractions of the Treaty on the part of the Chinese Custom-house authorities, and that a petition was about to be forwarded to the Home Government to procure the redress of these grievances, evidently showing that the sufferers did not deem it of any service to forward their remonstrance direct to Mr. BRUCE. While noticing these cases we omitted to point out that the Chinese had also put an outrageous construction on the 28th Article of the Treaty of Tien-tsin. By this Article the British merchant is entitled *at his option* to pay an *ad valorem* duty of 2½ per cent., in commutation of the inland transit duties. Will it be believed that the Chinese have twisted this clause so as to inflict even a greater injustice than on Article 45, and insist that the 2½ per cent. is leviable on the foreign trade, irrespective of any inland imports. The result of this is, that goods, whether imports or exports, which formerly paid a duty of 5 per cent., are now taxed with 7½ per cent., and by way of consolation, it is stated, that only the 5 per cent. goes to the Imperial revenue, while the 2½ is appropriated by the local authorities. The working of the 45th Article, according to the Chinese version, will have the effect of stopping the coasting trade, carried on in foreign bottoms, and our ship-owners at home are therefore interested in the question as well as the merchants, and should bestir themselves in the matter. With such interpretations we should certainly have been better off with the old Treaty and a Plenipotentiary stationed at Shanghai, where he could watch the operations of the Chinese Customs, and procure from the authorities at Peking a proper settlement on his periodical visit to that city, which we have before advocated as more advantageous than a permanent residence. As it is, our Minister in China feels that he is practically helpless when difficulties arise, and he is powerless while paralysed by his isolated position among a treacherous people, who hold human life in common with all Asiatics, at so little value.

THE PROSPECTS OF PEGU.

WE have before us the annual report on the province of Pegu for the official year ending 30th April, 1861. Blue-books, whether published at home or abroad, cannot boast of much that is generally attractive. We bear with them because we find them helpful; we tolerate their dignified prosiness because we are certain to gain from it suggestions and useful data. In spite of CANNING'S assertion that nothing is more fallacious than facts except figures, we must own to a large, and perhaps credulous amount of belief, both in the one and the other. Now, in the report before us we have a goodly number of figures and facts, and accepting them, which we are bound to do, as faithful testimonies to the condition of Pegu, we shall be enabled to glean from them some serviceable information. England is now in the eighth year of her rule over Pegu, and even a hasty glance at the contents of the report will show that our Government has instituted a widely-extended system of official organisation. What with courts of justice, criminal and civil, a well disciplined police force, a dockyard and flotilla, military positions at Rangoon, Thayetmyo, and Toungoo, grants for education, topographical surveys and agricultural experiments, it is evident that British energy, and perhaps, too, British red-tapeism are at work in the province. It concerns us greatly to know the success or non-success of our experiment in governing Pegu, because it is across the eastern portion of the country that we must eventually open a road to all Western China. Let us see, then, what obstacles stand in our way, and what facilities are offered to us from the present state of the province.

The population of Pegu for the past year was 1,041,340, showing a considerable increase over the returns for 1859. Among the races, however, we observe a diminution in the number of Chinese, a fact which is to be regretted, and which demands explanation. There are scarcely more than 300,000 men in the country—a number utterly inadequate for developing its resources. In Pegu the patient industry and energy of the Chinaman would be of real service, especially as the Indian appears averse to settling there. However, during the last year an immigration from the Burman territory has taken place, and this circumstance may in one respect be regarded as favourable, since it proves that no invincible dislike to British rule is entertained by the Burmans. But, on the other hand, by receiving these people, or rather welcoming them, for to each a share of territory is allotted, we run the risk of another rupture with the King of BURMAH, with whom it is on every account desirable to keep on friendly terms. With a sufficient supply of labour, the resources of Pegu may be developed a thousandfold. Rice is the staple food of the country, and in the year ending April 30, 1861, beyond the supply requisite for home consumption, about 110,000 tons were exported from the province. The cotton crop has not hitherto been of much value, but experiments are now being made with foreign varieties of seed, which promise to be successful. From the teak forests, although at present the expenditure exceeds the revenue, there appears every prospect ultimately of a profitable return. These forests contain, it is said, a million and a half of trees of the first class, and already this invaluable wood is being largely employed in our British dockyards. A large sheep-breeding establishment at Thayetmyo has entirely failed; so also has the attempt to introduce foreign tobacco—and "the

Digitized by Google

only agricultural product which the Burmese peasants have accepted as a welcome improvement on their own stock is a variety of paddy from the Island of Belooguen." Thus we see that, although the soil and climate of Pegu are adapted for almost all tropical products, the agricultural resources of the province remain yet to be developed.

There is also ample room for improvement in other departments. We have alluded to the want of population as the main difficulty with which Government has to contend in Pegu. But the course adopted by the Government seems exactly and admirably adapted to keep down the increase. MALTHUS himself could not have devised a remedy more effectual. Taxes are necessary evils, and in England we endure them with philosophic equanimity, grumbling a little, indeed, at the iniquitous and inquisitorial nature of the income-tax, but paying it with a good grace notwithstanding. But then in England our finances are elastic enough to allow of a certain pressure, just as a burly brewer in a crowd can endure a considerable amount of squeezing. The inhabitants of Pegu are not so happily situated. Yet the demand made upon them is enormous. From a total population of 1,041,340, Government received during the last year 5,152,035 rupees, while in the same year the local taxation, not included in the imperial revenue, amounted to 209,194 rupees. Capitation-tax, income-tax, tax upon salt, inland and marine customs, port dues, and land-tax, figure conspicuously among the items of revenue. This last-mentioned tax amounts, we believe, to about a tenth of the real produce of the crop, for it is in reality on the crop and not on the rent that this impost is levied. This in itself is a weighty burden, but when we look also at the other taxes, we are forced to believe that though it is safe to live under British rule in Pegu, it is at the same time exceedingly unpleasant.

THE "COUNT" AT MACAO.

WE call the attention of our readers to a letter which will be found in another portion of the paper, relative to a pseudo-count, who is endeavouring to live by imposing on the generosity and good nature of merchants in Macao. The statements made in our correspondent's letter can, we have no doubt, be fully substantiated, as other circumstances similar in character have come to our knowledge relative to this impostor. When at Singapore, some time since, he figured under the name of "Mr. SALM," after which he removed to Batavia, taking, in the first place, the title of the "Marquis of NEGROPONT," but, almost immediately after his arrival, that of "Count SCALA." The French Consul, however, informed the Dutch authorities that no such person was known in France, and ere long the "Count," finding that he was not properly appreciated in Batavia, bent his way to Macao, where he has been living, we believe, about three years. How he has subsisted during that period those can best tell who are living at that port. Certain it is that many Europeans residing there have found that the acquaintance of this Frenchman has involved a pecuniary disbursement. The Vicar of Wakefield, if any of his poor relatives appeared too unfortunate and too willing to feed upon his bounty, was wont, he tells us, to lend them an old coat, or a lame horse, which they invariably forgot to return. Thus, at a small expense, he escape a great annoyance. We leave the suggestion with our readers in Macao, who may possibly deem it prudent to adopt a similar expedient. At any rate, in one mode or another, it will be necessary to ostracise "Count SCALA."

THE TAX UPON OPIUM.

At Bombay the opium merchants have presented a petition to Sir George Clerk, affirming that "in consequence of the great fall in the price of opium in the China market, that drug will not bear so heavy a pass fee as rupees 600 per chest, much less the sum of rupees 700, to which it is to be increased from and after the 1st October, according to the Government notification, dated the 2nd April, 1861." They state that the present price in China is less than the actual cost, charges of conveyance, and pass fee, and add, that if the fee is increased the opium trade of India will be ruined, as the Chinese will consume in preference the home-produced drug. On the subject of this memorial, the *Times of India* (Oct. 21), has a well-digested article, from which we extract the following:—

"It is vain for our opium merchants to protest against the increase of the Excise upon the Malwa drug, unless they are prepared to show that a lower rate of duty would yield a larger revenue. The vague statements of the memorials periodically presented by these gentlemen are worth nothing, while the revenue continues to rise as steadily as the Excise. To tax the drug up to the highest productive limit is the duty of Government; and it will be time enough to listen to remonstrance when the revenue returns show that that limit has been passed. Were the drug consumed in India instead of being exported to China, we should still have to be guided by the same principle. For as all duties are prohibitory in their tendency, it is the duty of the State to tax up to the highest productive limit such commodities as the people can best do without. Society is not entitled to prohibit either the growth, manufacture, or use of the drug; but as the public liabilities must be met in some way, and as it is wiser to prohibit the consumption of opium than of sugar, tea, or any other commodity, we are clearly entitled to raise the highest revenue we can from the former; and no memorial can be listened to that raises any other issue than the effect of the duty upon the revenue. The short reply, therefore, of the Government to the new memorial that has been subscribed, is to refer the gentlemen who have presented it to the revenue returns of the last few years, which will be found to have risen as steadily as the Excise. If it did not pay to send opium to China at the prices the drug realises at the Calcutta sales, the auctions would cease to command the prices they do. The astonishing increase in the production of Malwa opium shows plainly how profitable the cultivation and manufacture of the drug are on this side of India. In other words, the increase of the production shows the Excise, so far from exhausting the profits of the producer, leaves a margin that is stimulating his exertion to the utmost. That this is the fact the records of the last few years show plainly:—

DUTY 400 RS. PER CHEST.		
1853-54	24,005	Chests.
1854-55	27,491	„
1855-56	25,141	„
1856-57	28,913	„
1857-58	40,405	„
1858-59	36,111	„
DUTY 500 RS. PER CHEST.		
1859-60	32,506	„
DUTY 600 RS. PER CHEST.		
1860-61	45,072	„
Estimate 1861-62	50,000	„

It is clear from these statistics that the cultivation of the poppy is being largely extended in Malwa, under the influence of the prices ruling at the Calcutta sales which regulate those of this market.

THE COOLIE TRADE.

This odious traffic to Peru, had, we hoped, been fairly cried down by the voice of public opinion, and we regret to record the following account which is taken from the Hong Kong *Daily Press*:—

"The French ship *Ville d'Agen* put into this port a few days ago leaky under the following peculiar circumstances.

"The vessel was chartered to take coolies to Peru. The captain thought that his engagement ran to the effect that he was to load at Macao, but it turned out that the charterers had the option of sending him to a port on the West Coast of China. He accordingly went as directed to a place called Kin-chow-wong, which is situated about half way to Hainan, and just behind the island of Now-chow. It is not marked on any chart, and is formed by one of those indentations of the land for which the neighbouring coast is so famous. It stands in a large splendid bay, the mouth of which however is shallow. Here it appears that for some time past the Macao barracoon and lorcha people have been pursuing their unholy traffic. Three lorchas had been sent beforehand to obtain victims for the *Ville d'Agen*, but owing to it being harvest time their success had not been very great. Besides which there seemed to be a paucity of funds at the disposal of the charterers, who however must be people of immense influence as the ship had a Consul especially appointed for her, to seal the contracts, &c.

"The coolie people have been in the habit of resorting to this place for victims for some time, but only one ship, the *Pomone*, has ever been despatched thence prior to the *Ville d'Agen*. Coolies to the number of twelve thousand have in all been shipped thence during the past year or two by the dealers. The patience of both the people and the authorities would appear at last to have become exhausted, for these three lorchas sent to supply the *Ville d'Agen* soon fell into grief. The crew of one of them being on shore catching coolies, the people rose and seized several of their number. The lorcha people, in retaliation, seized forty-five villagers and confined them in the hold. The tocsin was sounded, and the lorcha containing the prisoners was menaced. She slipped her cable and proceeded towards the *Ville d'Agen*. On the way the imprisoned villagers rose but were subdued with much bloodshed. Being secured below they scuttled the lorcha, which sunk to her decks, and all were lost to a man—the lorcha's crew escaping. The *Ville d'Agen* was then menaced, and the captain had to hurry to sea. She struck on the bar at the mouth of the bay, and leaked so badly that she had to put in here. She had but two hundred and odd coolies, not half her complement, as she is a large ship.

"There is a Roman Catholic priest down at Kin-chow-wong, named Father Amat, who has been there for fourteen years, and who has so entirely identified himself with the natives that he cannot be detected as not being of their kith and kin. He has made many converts, and has fallen into disfavour about this coolie business. He is considered to be now in imminent jeopardy, and something should be done to save him. The neighbourhood of Kin-chow-wong abounds with pirates. Not a day passed on which daring acts of piracy were not witnessed from the decks of the *Ville d'Agen*. The fishermen are all pirates, and might makes right."

CAPTAIN PEAGRAM, OF THE CONFEDERATE STEAMER "NASHVILLE."

Captain Peagram, of the Confederate navy, is not unknown to British naval officers, and his name has been honourably mentioned in Admiralty despatches. Rear-Admiral Sir James Stirling, when reporting the success of extensive operations against the pirates in the China Seas, makes honourable mention of this officer. The following despatch of Admiral Stirling to the Secretary of the Admiralty will be read with interest :—

"SIR,—On the 28th of May I had the honour to report that Commander Fellowes, of Her Majesty's steam-sloop *Rattler*, had made a successful attack on a piratical horde near Hong Kong; and I have now the satisfaction to forward herewith reports from that zealous and attentive officer of further and more important successes.

"To the last of the operations therein reported I venture to solicit the particular attention of their Lordships, for I feel assured that while they will deeply regret that so many brave men should have fallen and suffered in the execution of the services described, they will appreciate highly the gallantry and resolution exhibited equally by the officers, seamen, and marines of the United States frigate *Powhattan*, as well as by the officers, seamen, and marines of Her Majesty's ships who were engaged, and will perceive that the success obtained reflects great credit on Commander William Abdy Fellowes, who planned and directed the attack. Every attention shall be given to promote the recovery, and provide for the comfort, of the wounded men, and to afford such of them as may desire it an early return to their native country.—I have, &c.

"JAMES STIRLING,
"Rear-Admiral and Commander-in-Chief.

"The Secretary of the Admiralty."

The despatches contained an enclosure from Commander Fellowes, giving a detailed account of the engagements, of which the following is a copy:—

"H.M.'s steam-sloop *Rattler*, Hong Kong, Aug. 6.

"SIR,—My last letter apprised your Excellency of pirates being once more abroad committing depredations. Now I have the honour to inform you that I started from Hong Kong on the 30th ult., after these plunderers, touching at Macao for information, which led me on the 31st to look into all the bays for some distance to the southward of Macao; but seeing nothing, I crossed over to the Ladrone, taking a turn round all the islands in the neighbourhood with the like want of success. Not despairing, however, of finding their haunt, I retraced my steps back to Macao, where, with the assistance of Mr. Caldwell, late Government interpreter, I obtained some Chinamen, who stated that they knew their whereabouts. Standing again to the southward as far as Tyloo, I came up with part of the junks the pirates had captured; but the pirate chief, with several armed junks, keeping in shore, where the water is shallow, prevented the ship reaching him, or our shot and shell doing him or his vessels any harm. Suspecting the pirates would remain in their fancied security, I hastened back to Hong Kong, landing the Chinamen at Macao on my way, called on his Excellency Sir J. Bowring on the 2nd, and, with his concurrence, had an interview with Captain McCluny, of the United States frigate *Powhattan*, who, on my personal application, placed a volunteer force at my disposal, consisting of two paddle-box boats and a cutter, fitted each with a 12-pounder howitzer, and manned with sixty-six seamen and twenty-eight marines, under the command of Lieut. Peagram. With this additional strength and the *Eaglet*, a small steamer, drawing seven feet of water, lent by Mr. Caldwell for the occasion, I quitted Hong Kong once more on the 3rd inst., with the steamer and boats in tow of the *Rattler*, and anchored the same night as near the point on the north side of Kulan as practicable. At daylight on the 4th all the boats of the *Rattler* and *Powhattan*, armed and manned, were taken in tow of the *Eaglet*, the depth of water not permitting the *Rattler* to proceed farther, and stood at once for Kulan, which was found to be empty, but looking round, a creek, apparently on the main land, was discovered, where the mastheads of several junks could be distinctly seen, and about the same time a lorcha was observed to leave the creek with the evident intention of escaping; but to prevent her doing so I dispatched the *Rattler's* pinnace, in charge of Lieut. Wrey, and *Powhattan's* cutter, to endeavour to cut her off. The boats on coming up found she was in possession of the usual sailing letter, and the master stated he had that morning made his escape after being plundered of everything of value. The *Eagle* soon towed the boats abreast of the creek, the pirates, as we neared, fired several ineffectual guns, by way, I suppose, of defiance. We returned in exchange five 24 pounder rockets that I had procured before starting. These fired from the steamers alarmed the pirates, numbering in all thirty-four junks, crowded with guns and men, as they immediately hoisted their sails and made for the head of the creek. Perceiving this, the boats pushed off in chase. On reaching a small island at the head of the creek, the larger junks made a stand with their broadsides towards us, firing with much rapidity, and in an excellent direction, but the boats returning their fire with shell and grape, and closing rapidly amidst a shower of shot, made a dash, and the junks were ours—the crews taking to the water. Leaving a small party of men in charge, the boats pursued the others, who had, with a light air, gained the middle of a large bay or rather lagoon, which opened out of the creek, and succeeded in taking many of them. Nine war-junks, mounting 130 guns of all sizes, and nine small junks (traders) the pirates had detained, were captured. We felt ourselves obliged to burn and destroy the war-junks, as also two of the trading junks. Night approaching, and being a great distance from the steamer, compelled us to do this, to prevent them falling into improper hands. This success obtained from a regularly-organised pirate fleet was, I am sorry to say, attended with the loss of two men killed and eleven officers and men wounded on the part of the Americans, and three men killed and seven men wounded belonging to this ship, while the loss of the pirates must have been immense, for, taking the number of men in the junks at the time of our opening fire to be 1,000 men, their killed, wounded, and drowned could not have been less than 500 men, the shell and grape from the gunboats and musketry of the Marines must have told upon them severely, as they stood fighting at their guns with unusual firmness. Five of the junks are deserving more than ordinary mention, being built of very substantial materials, large and roomy, evidently built for war purposes, as they differed in many respects from trading junks; their armament, besides the usual complement of spears, muskets, stinkpots, &c., comprising many large guns. There was a 16-pounder and a large 18-pounder, not weighing less than 50 cwt., 32, 24, 12, and 6-pounders. One junk had 21 guns mounted. It is impossible to speak too highly of the American co-operating party engaged. They were with the *Rattler's*, emulating each other in the thickest of the attack.

"It was in capturing a junk which blew up, killing two and wounding eleven of the Americans, and capsizing my gig, that I witnessed the cool bravery of Lieutenant Rolando, United States' Navy, to whose timely rescue I am indebted for my life; but my warmest thanks in particular are due to Lieutenant Peagram, the American senior officer; his encouragement of the men and coolness under a heavy fire, and determined bravery when surrounded by a persevering and revengeful foe, was conspicuous to all; indeed, every officer and man belonging to that frigate acquitted themselves much to my satisfaction. While bestowing all due credit on our American friends, I cannot pass over the conduct of Mr. R. Brownsden, paymaster, in charge of the first cutter, whose boat, in an attack on a junk, had three men killed and seven wounded by stinkpots and spears; nor that of Mr. J. James, the boatswain, who gallantly attacked a junk in a five-oared gig with musketry, till Lieutenant Peagram generously came to his aid, and enabled him to take possession.—I am, &c.,

"W. A. FELLOWES, Commander.

"To His Excellency Sir James Stirling."

Literature.

The Russians on the Amoor; its Discovery, Conquest, and Colonisation; with a Description of the Country, its Inhabitants, Productions, and Commercial Capabilities. By E. G. Ravenstein, F.R.G.S. Illustrated by Maps, Plates, and Engravings. Trübner and Co., 1861.

Mr. Ravenstein's work, to which we have already called the attention of our readers, contains, in an acceptable form, a complete digest of all the information which it is possible to procure relative to the prospects and progress of the Russians on the Amoor. Mr. Ravenstein's knowledge of his subject may well be termed encyclopædic, and if we miss occasionally in his volume those fresh, genial, life-like touches which fall, as it were incidentally, from the pen of a writer who has himself seen what he describes, we gain, on the other hand, all the advantages which are to be derived from the thorough and impartial investigation of a very interesting subject

The Amoor drains with its tributaries a basin of 766,000 square miles. The country through which it passes is known to us chiefly through the writings of Russian travellers and the painstaking researches of German writers. To the literature of the Amoor England has contributed comparatively little, and the only popular volume on the subject—we allude to Mr. Atkinson's—is founded upon Professor Maack's noble work which was published at St. Petersburg in 1859. We have before observed, and Mr. Ravenstein corroborates our statement in his appendix, that Mr. Atkinson never visited the Amoor, since the furthest point in the East reached by that traveller was the north-eastern extremity of Baikal Lake, a distance of more than four hundred miles from the river. From almost every known source of information Mr. Ravenstein has drawn his materials for a description of this mighty stream, and he has also in many instances given the very words of the travellers who have explored it. The ethnological details contained in the volume may be noted as especially worthy of attention; for although the native population of the Amoor in the territory owned by Russia is estimated to be only 24,000, the differences existing between the tribes, their nomadic life, their strange habits, and their rites of idolatry and superstition—so similar to those which have been observed in other and far distant regions—all serve to excite our interest in these poor savages, who are likely to become rapidly extinct. The Chinese (says Mr. Ravenstein) classify the natives of the Amoor according to their way of dressing the hair; so among the tribes we have the long-haired people, the red-haired people, and the people who shave the head. There is a tribe called the Aino, which occupy the southern portion of Sakhalin, part of Yeso, and some of the Kuriles. They are subject to the Japanese, and those who inhabit Aniva Bay show their submission to their conquerors by shaving the crown of the head and wearing a Japanese dress; but the rest of the tribe are strikingly distinguished from their neighbours and from Eastern Asiatics generally by the quantity of hair which they are accustomed to wear; the nails are allowed to grow long, the skin is of a tawny colour, the average stature only five feet four inches. The women are much smaller than the men. Like the Aino, the Gilyaks, a fierce people, who will be remembered as the murderers of the Missionary De la Brunière,

Digitized by Google

do not shave the head, but wear the hair tied up into a thick tail or in tresses.

"The Russians," says Mr. Ravenstein, "describe their women as frights, but tastes are not always the same, and Rinso, the Japanese, says they are very comely, and doubly attractive on account of their daily ablutions. In addition to dogs the Gilyaks sometimes keep an ermine to kill rats. Wealthy individuals keep a tom cat. They have also bear-cages near their villages, and when they kill the beast they split the skull and suspend it in their houses. If we may credit the statement of Rinso polyandry prevails among the Smerenken Gilyaks, and the women are treated with the greatest indulgence. Only those, however, skilled in the use of the needle can expect to get married. The children, as among the Galdi, are strapped down on a kind of board serving as a cradle, and hung up in that position to a rafter in the roof."

Bears and bear-cages appear to be kept in all the villages by the different tribes. Mr. Ravenstein describes the hunting of the bear by the Tunguzians as follows:—

"When it is not desired to secure a bear alive, the Tunguze uses a spear, which he holds firmly planted in the ground, with the point directed towards the bear, upon which the beast throws himself. It is much more exciting sport to catch a living beast. A party of ten men or more enter the forest provided with straps, a muzzle, and a collar, with a chain attached to it. Having discovered the whereabonts of the bear a battue is instituted. The individual near whom the bear debouches jumps upon his back in the twinkling of an eye, and seizes hold of his ears. Another man then rapidly throws a running knot round the neck of the beast and almost suffocates him. He is then muzzled and the collar is fastened round his neck, and the chain passed between the hind legs. He is led in triumph to the village and put into his cage. These bear hunts do not always pass without accident, and one frequently encounters an individual frightfully mutilated, a living witness of the dangers encountered with this redoubtable denizen of the forest. Once in his wooden cage the bear is fattened on fish. On high festivals, when it is desired to lead him forth, some of the planks of the roof are taken out, and the beast is teased until it stands upon its hind legs, when a sling is thrown round its body and the roof uncovered sufficiently for him to get out. Having succeeded in dragging him forth, one of the men jumps upon his back, again getting hold of the ears, while the others tie his paws and place an iron chain in his mouth. He is then bound between two fixed poles, an involuntary witness of the frolicking going on before him. On very grand occasions he takes a more direct share in the festival by being killed with superstitious ceremonies scrupulously observed on all such occasions. Sometimes Bruin escapes his fate by scraping a large hole beneath his cage and escaping to the forest."

There is much in Mr. Ravenstein's volume which calls for praise, but not for comment. The historical chapters, for example, will be found extremely serviceable for reference, since the information they contain is alike accurate and succinct; but we do not find any subject treated in them which calls for discussion and criticism. The account of the Roman Catholic Mission in Manchuria would almost raise a smile, if the subject were not so serious. M. de la Brunière's letter, addressed to the Directors of the Seminary for Foreign Missions, is given *in extenso*, and in it he relates all the incidents of his travel, and the strange methods he adopted of converting the people to the Roman Catholic faith. "My hearers," he says, "found the religion very fine, but the new doctrine, and the new preacher who announced it, stopped them short at once." One evening he tells them that he possesses an infallible secret, by means of which they can go straight to heaven. They eagerly demand what that secret is.

"The next day three long beards of the village made their appearance in my chamber armed with a jug of brandy and four glasses. 'Your secret,' said they, 'is of awful consequence.' If our importunity does not hurt your feelings we would wish to know in what it consists; let us begin by drinking. Notwithstanding the natural repugnance which I have for Chinese brandy, I thought it necessary to accept the invitation in order to avoid incurring the aversion of these poor people who could be made to know and understand nothing but through this channel. I then commenced to develop my 'secret' by explaining the dogma of original sin, of hell, of the salvation brought by Jesus Christ, and the application by the sacraments of the merits of the Saviour. But, unluckily, my interrogators taking ten or twelve bumpers to my one, became in five or six minutes incapable of understanding any thing. However, I gained favour."

We have glanced at some of the lighter portions of Mr. Ravenstein's volume, and have done so, not because we deem them the most worthy of attention, but because they serve to show the varied character of the work. To the statistical information it contains, and to the thoughtful remarks propounded on the commercial capabilities of the country, we shall find frequent occasion to recur.

Naval and Military.

Notwithstanding the comparatively short period which has elapsed since orders were given for the construction of the batteries and fortifications at the entrance to the Medway, for the protection of Chatham and Sheerness, very considerable progress has been made by the several contractors engaged in the undertaking. The works connected with the batteries at Folly-point, and on the promontory north-east of Pinope-reach, a short distance below Chatham-dockyard, are being prosecuted with vigour. These batteries will have a complete command of a most important part of the Medway, that at Folly-point having an extensive range eastward, and being capable of engaging any vessel rounding the headland of Darnet-ness, while the guns of the latter will have a direct bearing to the westward, towards Chatham, crossing their fire with the armament mounted at Folly-point. The works lower down the river, which are so placed as to have a complete command of the entire estuary of the Medway, are also making good progress. The principal battery at this point will be the powerful casemated fort at Garrison-point, on the south-east side of the river, which is already in a very forward state so far as the first portion of the contract is concerned, comprising as it does the enormous foundations on which a massive superstructure is to be raised. Upwards of half a million bricks have already been used in laying the basement wall on a thick concrete bottom extending in turn to a great depth. This battery will be built of sufficient strength to defy attack from any kind of artillery. Some idea of the durability and strength of the old Half-moon Battery, which is in course of demolition to make way for the new structure, may be inferred when it is stated that above two millions of bricks from the inner portion have already been removed, leaving about an equal number still undisturbed. The erection of the superstructure of the new fortifications will constitute a separate contract, tenders for which will shortly be received at the War-office. Although at the commencement of the undertaking it was thought that three years would elapse before this portion of the line of defences would be completed, sanguine hopes are now entertained that by this period next year the casemated portion of the battery will be so far advanced as to be ready for the reception of its Armstrong guns. The erection of the formidable batteries on the opposite shore is progressing, notwithstanding the almost insurmountable difficulties which the contractors have had to contend against during the progress of the undertaking. The principal battery in this line of defences will command the channel of the approach to the Medway and bear on the entrance to the Thames. It will be placed on a very commanding position in the spit of the Isle of Grain, the guns having the range of rather more than three-fourths of a circle. The second battery will be built further west, nearly facing Sheerness-dockyard, on the western side of the recently-erected martello tower, which will require to be removed, as the site on which it stands intercepts the range of the flank guns of the new fortifications, preventing their being used if required for the purposes of defence. The cost of the two batteries is estimated at £80,000.

Admiralty orders have been received at Chatham for the *Minotaur*, old 74-gun sailing ship, attached to the reserve, to take the place of the *Duncan*, lazaret ship, employed on the quarantine service at Standgate Creek, Chatham, the latter having been ordered to be broken up.

The whole of the fittings of the *Comus*, 14-gun sailing sloop, were removed by the joiners at Chatham-dockyard, preparatory to the vessel being handed over to the convicts to be broken up. The *Comus*, although a very old ship, is still sound, but she is a class of vessel not adapted for the present requirements of the navy. She was one of the vessels composing the blockading squadron under Admiral Gambier in the expedition against Copenhagen, and the capture of the Danish fleet in 1807, and was for a long time stationed at Canton.

The preliminary trial trip of the *Black Prince* at light draught took place at Portsmouth on the 19th, under circumstances highly unfavourable for developing the ship's speed under steam, but attended with very satisfactory results, both as regards the working of the machinery and the speed attained, the mean of the runs made at the mile being nearly 14½ knots. The ship weighed her anchor at Spithead at 12 30 P.M., and steamed away for the trial ground in Stokes Bay. First run, with the tide: Time, 3 min. 43 sec.; speed in knots, 15·859; pressure of steam, 18½ lb.; revolutions of engines, 55½. Vacuum - forward, 25½; aft, 25½. Second run, against the tide: Time, 4 min. 38 sec.; speed in knots, 12·950; pressure of steam, 19¾ lb.; revolutions of engines, 56½. Vacuum—forward, 25½; aft, 25. Third run, with the tide: Time, 3 min. 55 sec.; speed in knots, 15·319; pressure of steam, 19 lb.; revolutions of engines, 56. Vacuum—forward, 26; aft, 25½. Fourth run, against tide: Time, 4 min. 36 sec.; speed in knots, 13·043: pressure of steam, 19 lb.; revolutions of engines, 55½. Vacuum—forward, 25½; aft, 25½.

The proposed augmentation in the Royal Regiment of Artillery having, on the recommendation of His Royal Highness the Duke of Cambridge, received the sanction of Her Majesty, a redistribution of the three divisions stationed at Warley, Sheerness, and Woolwich will shortly be effected, in order to establish a depôt for the brigades serving in India. The first division, quartered at Sheerness, will be augmented at the end of the present month by a detachment of 100 gunners to be transferred from Warley, which latter station will be replenished by an equal number of recruits to be sent from head-quarters, Woolwich.

One of the most important screw trials which have taken place for some time in Her Majesty's Navy took place at Portsmouth on the 20th inst. being the official trial of the *Octavia*, 51, screw. This ship was built some years since at Pembroke, from the designs of Sir William Symonds, the then Surveyor of the Navy, as a sailing frigate, but has never yet been placed in commission. In 1860 she was placed in dock at Portsmouth for conversion to a screw frigate, and was taken out of dock on completion of her conversion in the early part of the present year. Her alterations of form consequent on conversion comprised cutting in two parts and lengthening amidships, and an alteration to her stern to adapt it for the propeller. The following are the results of the six runs made at the mile with full power:—First run—Time, 4 min. 29 sec.; speed in knots, 13·383; pressure of steam, 20lb.; revolution of engines, 68. Second run—Time, 5 min. 30 sec.; speed in knots, 13·939; pressure of steam, 20½lb.; revolution of engines, 70. Third run—Time, 4 min. 24 sec.; speed in knots, 13·636; pressure of steam, 20lb.; revolutions of engines, 70. Fourth run—Time, 5 min. 32 sec.; speed in knots, 10·843; pressure of steam, 20lb.; revolutions of engines, 70. Fifth run—Time, 4 min. 23 sec.; speed in knots, 13·688; pressure of steam, 20lb.; revolutions of engines, 70. Sixth run—Time 5 min. 29 sec.; speed in knots, 10·942; pressure of steam, 20lb.; revolutions of engines, 71. The vacuum was the same in all the runs—28½lb.

In consequence of the St. Helena Regiment being below its proper complement, and in want of volunteers to augment the service companies, volunteering has been opened among the 1st battalion of the 3rd Buffs,

Digitized by Google

under the sanction of the Duke of Cambridge, and has been attended with much success.

It is officially settled that the establishment of the Bengal Artillery in its reconstituted form, as part of the Royal Regiment of Artillery, will be Army on the approaching retirement of Colonel Mayhew. Upon Lieut.-Colonel Norman, as Deputy Adjutant-General, will fall the principal seven brigades of six batteries each.

The spirits of the expectants of Indian prize money will be somewhat raised by an official notification that no applications for Delhi, Lucknow, or Pegu prize money will be received after the first proximo.

Colonel Haythorne, 1st Royals, now Adjutant-General "Queen's Troops" in Bengal, will become Adjutant-General of the Amalgamated charge of the native portion of the troops.

Orestes, 21, screw steam corvette, Captain Alan H. Gardner, arrived at Teneriffe from Plymouth on the 29th of October, on her way to the Cape of Good Hope.

Lieutenant-Colonel W. Lameree, commanding the detachment of Netherland troops en route for the East Indies, who were temporarily on board H.M. ship *Leonidas*, during the repairs of their ship, *Constance*, in the docks at Sheerness, occasioned by collision in the English Channel, begs to return, for himself and officers, sincere and heartfelt thanks to the Naval, Military, and Civil authorities of that place, and particularly to Vice-Admiral Hope Johnstone, for all the proofs of kindness and assistance shown by them to the detachment.

The *Swallow*, 9, 60-horse power, has been commissioned at Sheernes by Mr. H. N. Harris] for surveying operations on the coast of Japan She is to have a comp ement of ninety men, including marines. A com modious office has been erected on the quarter-deck for the accommodation of the officers employed on the surveying duties.

DEPARTURE OF SIR JAMES BROOKE FROM SARAWAK.

On the 23rd September the Sarawak steamer, *Rainbow*, reached Singapore with Sir James Brooke, who had just taken a final leave of the settlements of Sarawak. Before leaving, Sir James assembled the chiefs under his sway, and said that the state of his health requiring repose he had made over the Government to Captain Brooke, as Rajah Mudah. If any future event should again require his presence he was ready, he said, to return to them again. The Natives were deeply affected at this parting interview, and many of them testified by tears the sincerity of their attachment for their white Rajah. Sir James has left Sarawak in a state of happiness and commercial prosperity. The steam mills of the Borneo Company, the manufactories of the Chinese, the establishment of a sugar company, the large plantations of tapioca and of sago, all testify to the well-being of the settlement. In future, the steamer *Rainbow* is to run twice a month between Sarawak and Singapore, and it is stated that a steam gunboat will also be employed to preserve order on the coast.

At Singapore Sir James Brooke has met with a warm and richly-merited reception. On the evening of the 7th Oct., a grand entertainment, in the shape of a ball and supper to him, was given by the merchants and other residents at Singapore, which appears to have passed off very pleasantly. After supper, Mr. Read (of the firm of Messrs. A. L. Johnston and Co.), who occupied the chair, in proposing the health of Sir James Brooke, dwelt with considerable felicity on his romantic and beneficial career, observing that the Rajah had, in the highest degree, adorned the character of an English gentleman, and had proved himself "a gallant soldier, a clement conqueror, a benign ruler, a steadfast friend." Sir James Brooke, in returning thanks, reverted to the establishment of his Government at Sarawak. His system had been to associate the Natives as much as possible with Europeans in the Government. It was only by their superior moral and intellectual character that Europeans could hope to attain their ascendancy in those countries. If ever the Natives attained an equality in these respects, the European rule would cease, and deservedly so. He believed that there would be a considerable increase of commerce in Borneo and much improvement in the Native race. Sir James Brooke concluded by expressing his pleasure in the thought that his conduct was now understood. The remembrance of that night, he said, would cheer him in his solitude and strengthen him in public life, if he should again enter that scene.

THE TRIAL FOR SCANDAL AT HONG KONG.

The following is a report of an action for slander, tried in the Supreme Court, the particulars of which we have already noticed in a previous number :—

RUTHERFORD v. MEDHURST.

(Before the Chief Justice and a Special Jury.)

This was an action for slander. The plaintiff is a staff surgeon in the Hong Kong garrison. The defendant is a captain in the 60th Rifles, and fills the post of town major.

Mr. Pollard was for the plaintiff, and Mr. Green for the defendant.

The merits of the case are well known. The slander affected the fair ame and credit of the plaintiff's wife, who, the declaration stated, the defendant had told one Purveyor Macdonnell, had been seen in a carriage with Mr. A Coxon in an unbecoming position.

The plea did not aver the truth of the slander, nor did the defence set up deny the utterance thereof. The difficulty which the plaintiff had to contend with was, the proof of such pecuniary damage as would induce the Court to allow the matter to go to the jury.

Mr. Pollard admitted in his opening speech that he feared the difficulty wes insurmountable. The law was most defective on the point. In the case of libel, all the burden of proof fell upon the libeller, and the meshes of the law pressed heavily, perhaps unjustly upon him. The damages in that case were left to the jury, and nothing special need be proved. But the law of scandal was very different – there the burden of proof falls upon the plaintiff, and unless actual pecuniary loss could be proved, the law could give no redress. It was a sad reflection on the law of England, that any man who chose could slander a lady, causing all that anxiety, heart-burning, and intense annoyance, which must be the necessary consequence in a family, and still be almost safe from the law. He might be able to prove pecuniary damage, but he had misgivings.

Purveyor Macdonnell was called, and testified to the utterance of the slander by the defendant.

The plaintiff was called, and gave evidence already made known. It seemed that Mr. Purveyor Macdonnell, as our readers well know, had been already tried by a court martial for uttering this scandal, but that he was acquitted, because it was proved that he had derived his authority from the present defendant. An attempt had been made to have a court martial held upon the latter, but that attempt had failed. No redress remaining but to resort to the civil authority, this suit was brought.

Mr. Pollard then urged the Court to be allowed to call Mr. A. Coxon. It was true that the plea did not rely on the truth of the scandal, and therefore it was, legally speaking, superfluous to give proof of what was not set up; but still he hoped the Court would allow the plaintiff the satisfaction of a public rebuttal of a calumny which had been very rife.

The Chief Justice assented, and Mr. Coxon being called and sworn, solemly denied all and every particle of the scandal. He admitted having driven the plaintiff's wife out on the morning in question, but utterly denied that he had tied her bonnet, arranged her dress, or had acted in any manner whatever which could in the most remote degree offend decency or propriety.

Now came the question of proof of damages. Mr. Pollard said he could prove lawyer's fees $150. The Chief Justice said that would not do. The fact was, that the plaintiff had gained his point—had rebutted the scandal, and had fastened its utterance on to the defendant.

The Chief Justice, in a very able manner, laid down the law of slander as Mr. Pollard had given it--fully agreeing that it was defective to a degree. His Lordship suggested that a retraction was the proper mode to settle the matter. The parties left the Court with their respective counsel, and in a few minutes returned. The defendant admitted that he had uttered the slander, acknowledged it was untrue, and apologised. Each party to pay his own costs.

The jury declined their fees, as the plaintiff would have had to pay them.

PRESENT STATE OF AMOY.

Our communications from this port are so very few and far between that we are glad to extract the following from a correspondent's letter in the *Nairnshire Telegraph* :—

"Amoy is a very ancient city: I cannot trace to you its history, but I had ocular demonstration that the beautiful island of Koo-lung-soo, in the centre of its fine harbour, is the grave of many of my gallant countrymen who fell, not before the Chinese *braves*, but from the effects of climate and pestilence, after the taking of Amoy in 1843. Death played sad havoc amongst the military quartered in this island at that period, and the tombstones are the only momentoes of those brave and gallant men in this distant land. Amongst others, I observed some placed to mark the last resting-places of English ship captains who, from the inscriptions, had been interred upwards of one hundred and fifty years ago. It is gratifying to observe that those graves are unviolated by the Chinese, who have the greatest respect for the tombs of the dead.

"The island of Koo-lung-soo is about two miles in length, and three-quarters of a mile broad. It is of rather a rocky and barren nature, interspersed with spots of arable land, and is becoming a favourite place of retirement for some of the wealthier citizens and merchants of Amoy. Amongst others, the British, American, and Dutch consuls reside on the island; the London Missionary Society have also built two fine residences on it for their missionaries; and it is likely soon to become a thickly-populated island, and a favourite resort, instead of an English and Chinese cemetery, to which purpose it has hitherto been appropriated.

"The harbour of Amoy is commodious and safe. The scenery around the bay is mountainous and picturesque. Several large rivers disembogue into this bay, and afford a mode of communication with the interior. The city is about eight or ten miles in circumference, and contains about 400,000 inhabitants. It is certainly one of the filthiest towns which can well be conceived. The streets, like those of most other Chinese cities, are only a few feet wide, covered over with matting to protect the inhabitants from the rays of a burning sun; and in the various divisions, and at the end of each street, gates are fitted up, which are closed at night and on the occasion of clan fights, common among the Chinese in this quarter. To wend one's way along these narrow and densely-crowded streets is not at all times very safe or agreeable. I was kindly accompanied in my rambles by a gentleman who has a knowledge of the language, and is acquainted with many of the inhabitants—the Rev. Mr. Swanson, of the London Missionary Society, a native of Thurso. He is a young man of great talent. Although only twelve months resident in Amoy, he has already mastered the language, in which he is able to preach, and has ingratiated himself into favour with a great many of the Chinese inhabitants.

"Amoy is a place peculiarly adapted for the extension of European trade, and its inhabitants certainly display greater ardour of mercantile spirit and enterprise than those of any other port in China. They are a better-looking race of people than I have seen in Shanghai, Canton, or any other part of the empire."

London Gazettes.

WHITEHALL, Nov. 19.

The Queen has been pleased to give and grant unto Lieutenant Henry Chad Cattley, of Fane's Irregular Cavalry, Her Majesty's Royal license and permission that he may accept and wear the Insignia of the Imperial Order of the Legion of Honour of the Fifth Class, which His Majesty the Emperor of the French has been pleased to confer upon him, as a mark of his Imperial Majesty's approbation of his distinguished services before the enemy during the late combined British and French operations against China.

FOREIGN OFFICE, Nov. 18.

The Queen has been pleased to approve of Mr. Heinrich Danelsberg as Consul at Singapore for his Royal Highness the Grand Duke of Oldenburgh.

ANNOUNCEMENT.

Mr. William Willis, M.D., has been appointed assistant and medical officer, Japan, and passed his examination.

CADETSHIPS AT HONG KONG.

The following notification was issued last week by the Vice-Chancellor of Oxford :—

"The Vice-Chancellor having been requested by His Grace the Duke of Newcastle, Her Majesty's Secretary of State for the Colonial Department, to select four members of this University who may be desirous of competing for 'Hong Kong cadetships,' will be happy to receive the names of candidates, together with testimonials and references, on or before the 5th of December. The Vice-Chancellor will then nominate the four gentlemen who are in his judgment most likely to succeed."

The following paper, on the subject of these cadetships, issued by the Colonial office, will serve to refresh the memories of our readers :—

"With a view to supply the Civil Service in Hong Kong with an efficient staff of interpreters, it is intended that a certain number of cadetships shall be established, the holders of which are to devote themselves for a certain time after their arrival in the colony to learning the language.

"Three gentlemen will be appointed at once to cadetships, after a competitive examination by the Civil Service Commissioners (at a time and place to be fixed by them, but not before the 1st of January next), from among candidates nominated for this purpose by the Secretary of State for the Colonies.

"Every candidate must, on the 1st day of January next, have attained the age of 20 and be under the age of 23.

"The following will be the subjects of examination :—1. Exercises designed to test handwriting and orthography. 2. The first four rules of arithmetic. 3. Latin, and one other foreign language. 4. English composition, including Précis writing. 5. Pure and mixed mathematics. 6. History and geography. 7. Constitutional and international law. 8. Natural science. 9. Any two of the following languages, not having been taken up under No. 3 :—French, German, Spanish, Italian.

"Candidates who cannot pass in the first two subjects will be rejected, but those subjects will not tell in competition.

"Every candidate must undergo a competitive examination in the third and fourth subjects, and in any two others which he may select.

"But any candidate who takes up the ninth subject may, if he chooses, be examined in five subjects instead of four.

"Each cadet will receive a salary of £200 per annum, to commence from the day of leaving England. The cost of his passage to Hong Kong will be paid, and quarters, teachers, and books will be provided for him at the public expense while studying the language.

"For two years after the arrival of the cadets in Hong Kong they shall apply themselves especially to learning Chinese.

"At the end of two years' study, or as soon afterwards as they shall be declared qualified by a board of competent examiners, they will be appointed Government interpreters, and be employed in such of the departments as may require their services at salaries of £400 per annum each, without other allowances.

"After two years' approved service as interpreters the salary will be increased to £500; and after three years' service they will be considered eligible by the Secretary of State for promotion to the higher offices in the Civil Service of Hong Kong.

"The cadets, while studying Chinese, will be under the control and supervision of the Governor of the colony, who will frame regulations for their hours of study and general government.

"The progress of the cadets will be tested by half-yearly examinations, and every cadet will be liable, at any time, to be dismissed if his progress or conduct shall be considered by the Governor and Executive Council to be so unsatisfactory as to render such a course desirable. The Governor and Council will decide, having regard to the ground of dismissal, whether the cadet shall be sent home at the public expense, or shall be left to find his own way home, or shall be, in addition, called upon to repay the cost of his passage out.

"A bond must be entered into by each cadet and two approved sureties with the Agents-General for Crown colonies, to secure that, in case of his dismissal, or in case he shall, within four years from the date of his arrival at Hong Kong, either quit the colony without leave or relinquish his appointment, he shall, if required by the Governor, repay to the colony the cost of his passage out, together with a further sum of £50 for each year for the cost of his teaching while in the colony."

IVORY FOR THE EXHIBITION.—A magnificent pair of ivory vases are in course of shipment from Canton to Messrs. Hewett and Co., of London, intended for the Exhibition, and are thus described in the *Friend of China*:—The vases are sexagonal, the larger panels measuring 8 and 9 inches by 6 or 7 inches on the wider sides; these, and the other panels and bars, exhibiting raised figures and foliage illustrating episodes from classic story. Over all, each vase measures, including ebony stand, about 3 feet 6 inches by 17 inches. The ivory was selected at Siam especially for the design, and is very pure.

THE PENINSULAR AND ORIENTAL STEAMER MOOLTAN.

This vessel, respecting the performances of which on an ocean voyage great interest has been felt in nautical and engineering circles, returned to Southampton on the 26th inst. from Alexandria. The *Mooltan's* launch and run round to Southampton, and also on occasion of her official trial at Stokes Bay, full descriptions of the improvements and mechanical peculiarities introduced in the machinery department, and of the results of her performances, were published in the *London and China Telegraph* of the 17th July. One of the most novel features is the smallness of her horse-power as compared with her tonnage, and the reduced size of her boilers, which are constructed on Mr. A. Lamb's patent, and which are only about half the size of the tubular boilers employed in ships of the Royal Navy for the supply of steam to engines of the same nominal horse-power. On the outward voyage she was 268½ hours under way, running 2.951 miles, with an actual consumption of 305 tons of coal, and coming home she was 286 hours under way, consuming 325 tons of coal. The total quantity of coal consumed, therefore, during a voyage of nearly 6,000 miles, has been 630 tons, against an expenditure of about 1,200 tons in other ships of the same tonnage employed on this line. This is a saving of very nearly half, while an average speed has been maintained out and home of 10.64 knots. The average expenditure of coal per hour was 2,574 lbs., and the average power taken by the indicator every watch 1,280 horses. During the voyage, the *Mooltan's* draught of water was 19 ft. 4 in.; average midship section at this draught, 558 ft.; and average displacement at same, 3,335 tons. The boilers supplied abundance of steam at 20 lb.; surface condensers, average vacuum, 27½ inches. These results must be very satisfactory to her engine-builders, Messrs. Humphrys and Tennant, and to the patentees of her boilers, and all others concerned, while they are of vast importance to every one interested in steamships, especially as serious doubts were entertained as to the sufficiency of the power of this vessel.

THE ROYAL GEOGRAPHICAL SOCIETY.

At the first meeting for the season of the Geographical Society, held on the 11th inst., Lieut.-Colonel Sarel's paper on his journey up the Yang-tse-Kiang towards India having been read, the chairman, remarked, in adjourning the meeting, that with reference to a letter, which, by direction of the council, Dr. Shaw had addressed to the Indian Government, recommending to its favourable consideration a proposed expedition from India into Chinese Tartary, a letter had been received from Mr. Baring, stating from Sir C. Wood that the Government of India had sanctioned the expedition, under the command of Captain E. Smyth, of the Bengal army, and had placed him under Lieutenant Jackson, of the Bengal Engineers, Dr. J. L. Stewart, an accomplished botanist, and Mr. Joseph Medlicott, of the Geological Survey. In conclusion, he drew attention to the Russian maps lying upon the table, and stated that he had the authority of the Grand Duke Constantine, for saying that no part of the geography of Russia which was known to him should remain unknown to the geographers of England.

NEW SHIP FOR CHINA—A splendid new vessel, constructed expressly for the China trade, was launched at Stettin on the 15th November. It was christened *The Dove*, in honour of the celebrated professor at the Berlin University. Captain Weiland, who has just returned from a voyage to China, presented Professor Dove with, on this occasion, a Chinese set of chessmen, which he had brought with him, as a sort of votive offering, the captain having saved his ship in a fearful typhoon in the China Sea by following the instructions contained in the professor's work—"The Law of Storms."

THE ARMSTRONG GUN.—Sir William Armstrong, in a long letter in *The Times* of yesterday, enters into an elaborate defence of his gun. He affirms that so far from the report sent home by Major Hay being condemnatory of the gun, as asserted in the *Mechanics' Magazine*, it was couched in the most favourable terms, and he subjoins Major Hay's letter written to that effect in the month of March.

RETIREMENT OF COLONEL H. P. BURN.—Colonel H. P. Burn, late manager of the Oriental Bank at Hong Kong, and now head of the Army Clothing Agency Department, is about to retire from the service, availing himself of the new rate of pension assignable to his rank in the scheme of bonus and retirement recently sent out from England by Sir Charles Wood.

AT the annual meeting of the parish school children in Demerara nearly one thousand were present from different plantations, and amongst them were a number of coolie and Chinese children dressed in their national costumes.

SIR JOHN BOWRING has been mentioned as an eligible candidate for Finsbury. It is not, however, at all probable that he will compete for that seat.

AN effort is making to cultivate the Chinese yam in England, and is strongly advocated by the Acclimatisation Society.

THE Manchester Chamber of Commerce will send a deputation to the Earl of Elgin, to submit to His Lordship the views of the Chamber with regard to our commercial relations generally with India.

Monetary and Commercial.

THE TELEGRAPH TO INDIA COMPANY.

Government have agreed to the resolutions passed by the shareholders of the Red Sea and India Telegraph Company, at their late meeting. The matter is now placed on a satisfactory footing. The directors of the new company fixed the 21st inst. for the final allotment of the shares, and the manufacture of the necessary cable has been entrusted to Messrs. Glass, Elliot, and Co., who will, it is expected, be able to despatch it in time for operations in the Red Sea before next May, when the heat may prevent further progress for the season.

The following calculations have been prepared by a professed

Digitized by Google

actuary of the value of the Red Sea Telegraph annuity, now that the new company is established :—

In February, 1862, when the next half-yearly payment becomes due, the value of Red Sea Telegraph shares will be as follows :—

	£	s.	d.
If computed at the rate indicated by the market price of the Annuities expiring in 1885—*i.e.*, 3¼ per cent., payable February, 1862	0	9	0
Value of Annuities to August, 1908	19	14	8
	20	3	8
If computed at 3½ per cent.—*i.e.*, the rate indicated by Consols assured at 92 3-10, payable February, 1862	0	9	0
£23. 5s. 10d. Consols, at 92 3-10	21	10	2
	21	19	2
If computed at 3½ per cent.—*i.e.*, the mean rate between 3¾ per cent. for Annuities to 1885. and 3¼ per cent. for 3 per cent. Consolidated Annuities, treated as perpetuities, payable February, 1862 ...	0	9	0
Value of Annuity to August, 1908	20	11	10
	21	0	10

The Mexican dollars brought by the West India packet have been disposed of at 59⅝d. per oz., showing an advance of ¼d. since the beginning of the month. Transactions to some extent have, however, taken place in the interval at 59½d.

The distribution to be recommended at the annual meeting of the Peninsular and Oriental Steam Company, on the 3rd of December, is a dividend for the half-year of 3½ per cent., and a payment from the proprietors' underwriting account for the year of 3 per cent.

A new bank has been established, called the "Mercantile," under limited liability. As one of the first efforts towards extending the principle of limited liability to banking, this undertaking will probably attract considerable notice. The capital is adequate, being fixed at £1,000,000, in shares of £100 each, but it is not intended to call up more than £30 per share. The marked success of the existing London Joint-Stock Banks is cited as holding out ample encouragement for the formation of the present enterprise. Among the list of directors is the name of A. Ellissen, merchant in the China trade.

A prospectus has been issued of the National Marine Insurance Company, with a capital of £1,000,000, in shares of £20 each. The undertaking seems to have been got up to meet a desire on the part of Dublin and Glasgow to have an office of their own. The board of direction is respectably constituted, and includes the names of G. P. Robinson, director of the Mercantile Bank of India, London, and China; John Costerton, late manager of the Mercantile Bank at Hong Kong; T. W. Bradley, Rowland Hamilton, Remi de Montigny, of Remi; Schmidt and Co., who are connected with the China trade; it is intended to extend operations to that quarter of the globe, and agencies will be opened at the leading ports in the East.

In the last accounts from California, it is stated that the amount of silver now produced in that State is estimated at £1,200,000 per annum.

Throughout the Lancashire cotton districts the spinners are now generally making experiments with Indian cotton, and the opinions expressed of the result are various, but that it is evident that, by a slight alteration in the machinery, this cotton may be made to enter, in various proportions, into much higher numbers than has hitherto been supposed likely. It is said that many of the leading Manchester manufacturers have resolved to make large pecuniary sacrifices rather than that their operatives should have to appeal to public relief.

One of the New Orleans papers, lately received, contains the annexed statement of the establishment of a mail service between the Confederate States and Europe, *vid* Mexico :—

"M. Antonio Costa has undertaken the establishment of regular monthly mail communication with Europe, for which he has the approbation of the Postmaster of New Orleans. The mails go by way of Mexico, and are transported in the regular English steamers, which carry the mails of Mexico and the West Indies. The first post left New Orleans on Thursday week, and contained 1,233 letters: the next leaves on the 10th of November. As soon as the necessary arrangements can be completed, it will leave every two weeks—on the 10th and 25th of each month. Letters of half an ounce and under will be charged as follows :—To Mexico, 50c.; to Cuba, 75c.; to Europe, $1."

The Cotton Supply Association of Manchester have sent a large sample of Chinese cotton to be valued at Liverpool. A well-known cotton broker's firm fixed the price at 13½d per lb., the quotations for American good fair Orleans being about 12¾d. The staple is represented as being long, and finer than the Surats usually used among the Chinese.

The French Government has eight steamers of 3,200 tons each building or to be built on this side of the Channel for the West India service, the individual cost of which is to be £118,000, with £12,000 additional for furnishing. The steamers for the East are to be of 4,000 tons each, and to cost £180,000. There is also to be a line of larger ships than those for the West Indies to go to North America.

A letter from Callao of the 14th ult., published in the *Panama Star and Herald*, says :—

"I learn that Mr. George Petrie, the agent of the Peninsular Steam Navigation Company, is now in Valparaiso, making arrangements for a new line of steamers for the South Pacific and South Atlantic coasts, *via* the Straits of Magellan. I understand that the English Government granted a subsidy of £30,000, and the company expect to receive an equal amount from Brazil, Buenos Ayres, Chili, and Peru."

The electric communication with Alexandria, opened on the 1st inst., continues to be successfully worked. A scale of prices, &c., will be found in our advertising columns.

It is stated that two of the steamers intended for the new French line to China have been launched, and that they will be ready for despatch in about two months.

FRENCH DOMINATION IN TUNIS.

At a meeting a few days since of parties concerned in the formation of a Bank of Tunis, an *exposé* was made of certain facts, which, if they are substantiated, will show such a predominance of French over British influence in the regency of Tunis as the public will scarcely be prepared to find.

It appears that a year or two since the Bey of Tunis, being desirous to link himself a little closer with this country, in order to have some support in case of need against the apprehended domination of France, resolved, as a means of strengthening his relations with England, to establish an Anglo-Tunisian Bank under an English direction, and to have a capital part English and part Tunisian. That the Government of this country were also desirous that such an arrangement should be effected. That at the urgent instance of the British Consul at Tunis and the Tunisian Government, Mr. Anderson, Managing Director of the P. and O. Company, having incidentally visited Tunis, was induced to accept a commission to establish such a Bank. That the Bank was properly established in London, under the Joint-Stock Company's Act, the capital subscribed, &c., but that when the arrangements for opening it to business at Tunis were in satisfactory progress, the French Chargé d'Affairs in Tunis interfered, and threatened the Bey that if the Bank was proceeded with, he would, on behalf of his Government, suspend diplomatic relation with him. This appears to have been enough for the Bey. The proceedings for opening the Bank were forthwith suspended. A pretext was set up by the Tunisian Government that a clause in the Statutes for regulating the Bank did not correspond with the Bey's commission to Mr. Anderson, and ultimately that Government refused to fulfil their engagement in regard to the Bank being established.

The British shareholders now claim indemnity through the interposition of the Foreign Office for the expenses they have incurred in the matter, and make it appear that the Government, or rather their representative at Tunis, is endeavouring to make the claimants the scapegoats of his defeated policy by refusing to support a claim arising from his succumbing to French domination.

The amount of bullion by the steamer *Pera* from Southampton on the 20th inst., was—To Alexandria, £300 in gold; to Madras, £4,230 gold, and £9,850 silver; to Hong Kong, £115,255; to Shanghai, £6,442. Total, £4,530 gold, £131,547 silver.

ARTICLES OF IMPORT.

TEA.—During the past fortnight the market has been very firm, and the amount of business has been considerable, at fully previous prices, for all descriptions of Black Teas, whilst Green Teas have given way in price to the extent of about 1d. to 2d. per lb., owing to the large quantity pressed for sale, both privately and at public auction. Low to fair Common, and the dusty kinds of Congou, have sold to some extent at former prices. Good Common is quoted 1s. 1d. to 1s. 1½d. per lb., with not much to be met with under the latter figure. Fair to good Flavoury kinds of old season's import remain much as before. There has been a good demand for all the blackish-leaf kinds of Congou, and prices are fully supported. Good and fine Monings and Wopaks, ex *Carribean* and *Golden Eagle*, met with a ready sale at full prices. The first arrivals of teas from Han-Kow, *via* Shanghai, were taken eagerly by the trade at prices ranging from 2s. 1d. to 2s. 4d. per lb., the quality being good but the leaf rather inferior. Further arrivals of Kaisow kinds, per *Veronica*, *Banian*, and *Shakspeare*, have nearly all been sold at former prices, the medium kinds being in great request; fine to finest remaining much as before. Tayshans show no material change. Further arrivals of new season Souchongs have been placed on the market, and have realised extreme prices. Common to good Oolongs show an advance of 1d. to 1½d. per lb., owing to purchases for export; the fine to finest kinds have sold readily at from 1s. 10d. to 2s. 2d per lb. Flowery Pekoes have met with a steady sale; some fine of recent import have been sold as high as 4s. per lb. Scented Capers and Orange Pekoes of common to fair qualities fully maintain the improvement quoted in our last circular; good and fine from Canton have sold readily at full prices. Foo-Chow descriptions have been taken to some extent, but at rather easier prices. Uncoloured Japan Teas show no alteration. Green Teas, owing to the large arrivals, amounting to about 1 000.000 lbs., have given way in price to the extent of about 1d. to 2d. per lb for all descriptions, but at this decline the great bulk have been sold. The export demand for Canada, owing to the lateness of the season, has become very limited. Some large parcels of Canton made teas, recently imported, have been readily taken at very high rates, some Gunpowders and young Hysons having sold as high as 2s. 2d. per lb. There have been three public sales, comprising 33,577 packages, of which 15,392 packages were sold, including 7,464 offered without reserve.

SILK.—The market still continues in a very quiet state, and the deliveries are also very small. Prices remain at about our last quotations.

SUGAR.—There is no material change in this market to notice; from the home trade there is very little general demand, and sales have been difficult to effect. The excess in stock, at this period of 1860, amounts to 20,000 tons. The sales of East India sorts have been: 1,740 bags Penang, which were disposed of at cheap rates; middling to fine fine brown, 31s. 6d. to 34s. 6d.; low to good middling yellow, 35s. to 38s. 6d.; good, 39s. 6d. 16,109 bags clayed Manila, meeting with scarcely any offers, were taken in at 37s. to 37s. 6d.; the washed, about 3,800 bags, sold cheap, 33s. 6d. to 34s. A floating cargo of 360 tons grey China sold at 25s. for the United Kingdom.

COFFEE.—The demand has not been so good the past week, and in most cases lower prices have been established. 722 bags mixed Singapore sold at 65s. 6d. to 66s. 192 bags black were taken in. 455 bags bold yellowish Java (sea damaged) brought 72s. 6d. to 74s.

RICE.—This market is still likely to remain in a dull state, operations having been on the same small scale as previously noticed, with a very light supply, and prices unchanged. Privately 6,000 bags Rangoon have been sold at 11s. 3d. cash.

PEPPER.—Black: The market has been very abundantly supplied, auctions having comprised 9,023 bags Singapore and 389 bags Penang; at a very slight concession a large proportion was quitted. Prices ranged from 3¼d. to 4¼d. per lb. for fair, rather greyish, to very good, and 3⅞d. the Penang. White: Rather cheaper; and 1,417 bags Singapore at auction, chiefly sold at 6d. to 6¼d. per lb. for middling to good.

SAGO is again 6d. to 1s. per cwt. dearer; and 643 cases at auction chiefly sold at 23s. 6d. to 24s. for fair small, and 22s. 6d. to 23s. medium. 114 bags ordinary Borneo retired at 20s. Fair trade privately. FLOUR: Steady, with moderate trade, upon fully former terms.

SPICES.—Cinnamon: Moderate business has been done at 1d. to 2d. advance on late quarterly sales. Cassia Lignea: Very quiet. Of 208 cases, about half sold at 86s. to 91s. per cwt., for 2nd to 1st pile. Cassia Buds: Good very scarce and wanted. Cloves: Quiet. Of 24 cases Penang, at auction, three-fourths sold at 1s. 0¼d. to 1s. 4¼d., for fair to fine. Mace: Has risen 2d. to 3d. per lb., and of 38 cases Penang, and 29 cases Singapore, at auction, two-thirds sold at 11d. to 1s. 4d. for ordinary to good bright reddish. Nutmegs: The medium sizes have risen 4d. to 6d. per lb. and the small 2d. to 3d., and of 313 cases Penang, 49 cases Singapore, and 4 cases Cochin, at auction, three-fourths sold at 3s. to 3s. 9d. for fair to good bold, and 11d. to 2s. 3d. very low to very good medium.

HEMP.—642 bales at auction, all retired; but a fair business has been done privately upon fully former terms.

COTTON.—Prices have further advanced fully ¼d. per lb., with large business. The market has become somewhat quiet lately, but not less firm.

JAPAN WAX.—250 cases good block sold at 60s. per cwt.; 75 boxes fine saucer, all retired, at 75s.

JAPAN RAGS.—The parcels lately received mostly consist of blue cottons, and the quality varies very much. They are advertised for sale on the 6th December, and are expected to realise from 8s. to 10s. per cwt.

TIN has maintained a slightly upward tendency, with moderate sales at 118s. to 119s. for Banca, and 116s. to 117s. for Straits, the latter of which the demand has been chiefly for.

GAMBIER.—Firm. 1,524 bales at auction all retired. Moderate trade by private treaty at 18s. per cwt. for good sound.

CUTCH has improved another 6d. per cwt.; and of 2,939 bags at auction, one fourth sold at 25s. per cwt. for good: fair business privately upon similar terms.

MISCELLANEOUS.—India Rubber: there is a good demand, and sales have been made at 1s. 3d. 262 baskets at Auction sold at 1s. 2d. to 1s. 2¼d. per lb. for middling Penang and Singapore. Camphor: Firm. 55 chests sold at 187s. 6d. to 190s. Sapanwood: Steady. 80 tons Siam sold at £8. to £8. 15s. for damaged wood of middling to fair quality. Soy: Nothing doing. Star anniseed: Very quiet. Sticklac: Good, scarce, and wanted; 45 bags low at auction retired. Gum benjamin: 32 cases Siam sold steadily at £26. 15s. to £28. 5s., for 1sts; £13 to £18. 5s. for 2nds, down to £6 inferior. Damar: Flat; 40 cases all retired. Gamboge: Of 21 cases three-fourths sold at £7. 5s. to £8. 12s. 6d. per cwt. for good to fine pipe. Ratans: Steady. Saltpetre: Immense sales, at a rise of 5s. per cwt. Gutta percha: Quiet. Of 7 tons 2 sold at 7d. per lb., for ordinary reboiled. Rape seed: Small supply, but prices well sustained. Vermilion: Very firm, at advanced rates. Galangal root: A few bags sold at 22s. to 22s. 6d. per cwt. for middling. Cubebs: Flat; 184 bags at auction all retired. Dragon's blood: Dull. Galls: Good Japan and China now quoted at 40s. to 50s., with some enquiry. Rum: In good request; 250 casks have been taken, chiefly Penang, at 1s. 6½d. to 1s. 7d.; a few Mauritius at 1s. 6¼d.; also 200 casks have been realised of Penang at 1s. 7d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5. 17s. 6d. to £6; nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £8. 15s. to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5 to £5. 5s.

STEEL.—Swedish keg, £15. 10s. to £16.

COPPER.—Sheet and sheathing, 11½d.; yellow metal, 9½d.

TIN.—120s. for block; 121s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to 29s. per box.

LEAD.—English pig, £20. 5s. to £21.; shot, patent, £22. 15s.; sheet, £21; spelter, £19; zinc, English sheet, £24; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA. &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£556,953
Foo-Chow-Foo	—	38,276
Hong Kong	—	403,328

MANCHESTER MARKETS.

There is no new feature in the market, but, notwithstanding the inanimate state of the market, as described in previous reports, there is some business offering in cloths for the Continent, at an approach to remunerative prices. These, however, are mostly for favourite makes of T-cloths and other goods which almost always command a market. There is also a little done for India, but nothing compared with what might have been expected from the favourable nature of late advices both from Calcutta and Bombay. In domestics very little business and all descriptions of printing cloths have been much neglected. Shirtings, both 40-inch and 36-inch, are dull, but the prices of all kinds of cloth are well maintained. The tone of the yarn-market is considered rather more favourable to buyers, but without yielding any advantage in price so far. Buyers continue to show as great a want of confidence in the present high rates. There is great irregularity, however, and the market is in a very irregular and anomalous position, some kinds of spinners and manufacturers working to order and keeping free of stocks, while the producers of other kinds of goods are unable to sell, and are stocking extensively.

COMMERCIAL POSTSCRIPT.

CITY, THURSDAY AFTERNOON.

At the public tea sales on the 26th 2,156 packages sold, and 4,905 passed at about current rates. Assams, 1d. to 2d. lower. On the 27th there were:—Sold, 3,996, passed, 11,867; boxes, 1,549; without reserve, 3,322. The sale was "flat."

From Mr. Mendel's circular of the 26th:—"There are few sales to-day, with more anxiety on the part of spinners and manufacturers to obtain orders. Prices remain unaltered, but chance purchases are practicably on somewhat easier terms."

Accounts from the silk-producing departments in France are all unfavourable. The price of raw silk still shows a tendency to decline. At the last market of Joyeuse torrents of rain prevented any business from being transacted.

A call of £2. 10s., making £5 paid, is to be paid on the shares in the China and Japan Steam Navigation Company by the 17th December.

ARRIVALS NOT INCLUDED IN TABLE.—Nov. 25, at Deal, from Rangoon, Wild Ranger; 24, from Akyab, Joseph Fish. At Falmouth, from Macao, Fadres Minde. 25, at Liverpool, from Whampoa, Chaa-Sze. 23, off Queenstown, from Manila, Marchioness of Londonderry. 25, at Falmouth, from Akyab, Gottorp.

From BATAVIA.—At England: William Simpson, Sarah. At Outports: Omega.

From BANKOK.—At Falmouth: Hannah Salkeld.

FREIGHTS AND CHARTERS.

High-classed vessels scarce and in request: rates are £3 per Register for China and £2. 5s. for Cape, suitable vessels placed without difficulty. There has been more activity in coal freights for China, and £52. 10s. has been paid from the North of England to Shanghai, while £44 per keel is offered to Hong Kong, with the in and out consignment. For Calcutta £30 per keel is offered. Americans are more out of favour, and the report of the destruction of a large American merchantman near our coasts tends to enhance the war premium.

The Peninsular and Oriental Steam Navigation Company have contracted for the delivery of 4,800 tons of coal at Hong Kong, and the Admiralty for 4,000 tons at Ascension. The amount of tonnage now loading for India, China, and the Cape of Good Hope is 38,000 tons.

Current Rates of Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s. to 60s.

CASUALTIES.

The Neuhof, Danish barque, Kros, from Hamburg to Singapore, parted her chain during the night of Nov. 7th, and got on shore on Kraut sand, near Cuxhaven. She was assisted off, and anchored in the roadstead, and has since sailed for her destination.

The Prompt, Whittle, from Rangoon to Liverpool, was thrown on her beam ends about eight to ten miles N. by E. of the Bell Buoy, Liverpool, and suddenly foundered in eight fathoms of water. Master, mate, pilot, man, and a boy saved; fifteen hands lost. Her cargo has been washing up.

The Indiana, from Akyab and Falmouth, bound to Liverpool, put into Queenstown on the 18th of November, with jibboom and heel of bowsprit gone.

BOTTLED ALES AND WINES, &c.
"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—"Melbourne Journal of Commerce," Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases, by using SEYMER'S BOTTLE PACKINGS AND COOLERS.
Price 7½d. per doz. Bottlers contracting for large quantities, effect so great a saving in labour, &c., that they can supply them at one-third less price to Shippers, who will find it most profitable to order their goods to be so packed in future.
SEYMER & Co., 37, Eastcheap, E.C.

TO CHEMISTS, STATIONERS, AND CONFECTIONERS.—AGENTS WANTED.
PLUMBE'S GENUINE ARROW-ROOT should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for invalids, and as the best food for infants.
REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL
"I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) ARTHUR HILL HASSALL, M.D."
Directions and testimonials with each packet, which bears the signature of A. S. PLUMBE, 3, Alie-place.
Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-st.; Starling, Islington; Weatherley, Peckham.

LONDON, MALTA and ALEXANDRIA TELEGRAPH. — SUBMARINE TELEGRAPH COMPANY. Offices, No. 58, Threadneedle-street.—The LINE from MALTA (through Tripoli and Bengazi) to ALEXANDRIA, having been successfully laid, is now OPEN to the public for the TRANSMISSION of TELEGRAMS.

The RATES for the TRANSMISSION of TELEGRAMS of 20 words, including Names and Addresses and all Instructions, have been fixed as follows, viz.:

*** When these dates fall on Sunday, the steamers start at 9 A.M.

English clerks have been placed at the principal Italian Offices (under a convention signed by the Italian Government) for the express purpose of facilitating the through transmissions, and telegrams should therefore, in preference, be written in the English language.

Due notice will be given of the extension of the telegraph arrangements from Alexandria to Suez.

By order, L. WALTER COURTENAY, Sec.
No. 58, Threadneedle-street, Nov. 16, 1861.

HOLLOWAY'S OINTMENT AND PILLS.
NERVOUS PAINS, TIC.—These painful affections may afflict any part of the body, and seem to spring up without any assignable cause. Relief is soon obtained by rubbing Holloway's soothing Ointment well over the affected parts. From whatever cause the neuralgia arises, this cooling Ointment will at once procure some ease, and by perseverance, gradually removes the ailment. Holloway's Pills should be taken at the same time to purify the blood, and cleanse away all morbid results, which are always generated by acute pain. The treatment of nervous diseases by Holloway's [illegible]es is safe and certain, whether the disorders [illegible]m sympathy or spring from some change in the condition of the nerve itself.

FOR PEARL AND SPONGE DIVING.

First Class Medal in the English Exhibition, 1851.
First Class Medal in the French Exhibition, 1855
Submarine Engineer to the English, French, Russian, Spanish, Portuguese, Sardinian Canadian, Peruvian, Brazilian and Indian Governments

*** To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

KEATING'S COUGH LOZENGES.

JUDGED by the IMMENSE DEMAND, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

KEATING'S COD LIVER OIL just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the Fish being unusually fine, and the Oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St. Thomas's Hospitals, have analysed and pronounced the Pale Newfoundland Oil the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. No higher price need be paid than the following:—Light Brown, 1s. 8d. per pint, or 3s. per quart; Pale, 1s 6d. half pints, 2s. 6d pints, 4s. 6d. quarts, or in 5 pint bottles 10s. 6d. imperial measure.

THE "SHANGHAI TIMES."

THE Editorial Department of the "Shanghai Times" will be under the charge of a gentleman who for many years connected with the Eastern press, and latterly as editor and managing proprietor of the "Straits Times" at Singapore—has acquired considerable experience in newspaper management.

The "Shanghai Daily Times" will be of the same size as the "North China Herald," and will be published at thirty taels per annum in advance, or three taels per month.

The "Shanghai Weekly Times" will be double the size of the North China Herald, and will contain all the reading matter of the six preceding daily issues. It will be published every Saturday evening, at fifteen taels per annum in advance, exclusive of postage.

W. WYNTER and CO.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street Piccadilly, London.
Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.
The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.
Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
THE WORK SOLD BY HINNAM, QUEEN'S ROAD HONG KONG.

Summary of News from the Far East.

THE EVACUATION OF CANTON.

On the 21st October, after an occupation of nearly four years, the Allied troops evacuated Canton. The occasion ws one of great interest, and was rendered duly impressive by a variety of ceremonies. On the morning of the 19th all the chief authorities, we are told, headed by the Viceroy, called at the Allied Commissioners' Yamun to take leave of the Commanders and Commissioners. They were received in state, with English and French guards of honour and the band of H.M.'s 99th Regt., together with salutes from a battery of Royal Artillery. The reception-hall of the Allied Commission was draped with flags, and chairs were arranged securing due order of precedence. In the absence of Brigadier General Crawford, C.B., detained by illness at Hong Kong, the French *commandant superieur* took the lead in receiving the authorities, while Captain Borlase, C.B., and Colonel Dowbiggin, H.M.'s 99th Regt., represented the British forces, followed by Mr. Harry S. Parkes, C.B., and M. de Tanouarne, the Allied Commissioners. The Viceroy expressed his gratification at the mark of confidence displayed by the contemplated rendition of Canton; and after some conversation the authoritics withdrew, shaking hands with the assembled officers. In the afternoon the visit was returned, the Allied Commanders and Commissioners, with their suites, proceeding to the Viceroy's Yamun, the courtyard of which was lined with the troops of his brigade of guards; and in his reception-hall they found not only the authorities assembled, but also a collation in the European style, laid out with the utmost elegance. This unexpected feature was acknowledged as a delicate mark of attention, heightening the friendly effect of the farewell visit. While formal leave was being taken of the Viceroy, his Excellency is said to have made special allusion to the Consuls of England and France, as being delivered into his care, with a promise to watch over their safety.

The final ceremonies took place on the 21st, when a battery of Chinese artillery saluted the allied flags with twenty-one guns, which were returned by Captain Twiss's battery, under Lieut. Hanmen; and as the last shot resounded, the flags of England and France were lowered from the pinnacle they have occupied since 1857, and at the same moment the British Consular flag was hoisted. The commanders, then rising, announced to the Viceroy that the occupation of Canton had ceased, and that from that moment they resigned into his hands the civil and military government of the city. In reply, the Viceroy, rising with all his suite, expressed with evident feeling his gratitude for the confidence shown in the good intentions of his Government, and his conviction that friendly feelings between the three nations must be cemented from that hour. While the formal rendition was taking place, the Chinese banner, of yellow silk decorated with an Imperial dragon, was hoisted from the English flagstaffs on the Heights, and at the landing place, as well as at the mainmast head of H.M.S. *Sphinx*, from which vessel a Royal salute to the Chinese flag was fired, in response to which the Imperial junks likewise fired twenty-one guns. After this the Allied officials proceeded to the place of embarkation in the following order:—1st. Commandant Superieur of French Forces, M. Coupvent des Bois. 2nd. Senior Naval Officer, Captain Borlase, C.B., R.N. 3rd. Senior Military Officer, Colonel Dowbiggin, H.M.'s 99th Foot. 4th. French Commissioner, M. de Tanouarne. 5th. British Commissioner, Harry S. Parkes, Esq., C.B. 6th. British

Digitized by Google

Consul, D. B. Robertson, Esq. 7th. French Consul, M. le Baron de Trenqualy. 8th. French Bishop of Canton. 9th. British Chaplain, the Rev. J. H. Gray. 10th. Captain the Hon. G. Keane, R.N., H.M.S. *Charybdis*. 11th. Captain Day, V.C. &c., H.M.S. *Sphinx*. 12th—14th. 3 Staff (British). 15th—17th. 3 Staff (French). 18th. Interpreter to Allied Commission, Wm. S. Frederick Mayers, Esq., H.M.C.S.

At the landing place the Native authorities were again present, and the embarkation took place, during which another salute was fired. This ended an important chapter in the history of British and French relations with the Celestial Empire.

The following is the proclamation which was issued on this occasion by the Chinese authorities :—

Mu, General, commanding the Eight Banners of the Manchou and Chinese garrison of Canton, and the marine battalion of Manchou troops, General-in-chief of the forces in the province of Kwang-tung :

Laou, bearer of a button of the highest class, a President of the Board of War, a member of the Board of Censorate, Viceroy and Commander-in-Chief of the Kwo-kwang provinces, and Comptroller of Supplies :

Ke, of the Imperial kindred, a Vice-President of the Board of War, an associate member of the Board of Censorate, Governor of the province of Kwang-tung, commander of the forces, and Comptroller of Supplies :

Jointly proclaim, for public information, that the Allied Commissioners of England and France have personally arranged with the Viceroy, that on the 21st of October, the Allied Commanders will withdraw the whole of the troops now garrisoning Canton, together with the Allied Commission, and restore possession of the city.

This action of the two nations, in withdrawing their troops and restoring the City before the completion of the payments of indemnity, establishing proof of the mutual relations of sincere good faith and of perpetual devotion to concord and friendship, is a subject of high gratification to the Tartar General and Viceroy, which is equally shared by the Governor, in his residence at Shao-chou-fu.

On their own part, the Tartar General and Viceroy have likewise determined that, on the 21st of October, they will together proceed to the Hall of Assembly on the Heights, in order to conduct the arrangements for the restoration of the City, with the Allied Commanders and Commissioners, on a footing of mutual courtesy. Salutes will be mutually fired, and flags exchanged, to develop the element of joy, in order that the admirable intention of cordial harmony between the Chinese and foreign nations may be auspiciously illustrated.

This proclamation is accordingly issued, that the inhabitants of the City and its neighbourhood may be thoroughly informed. Men of all descriptions within and without the City are accordingly hereby notified, that, on the day aforesaid, on the restoration of Canton by the Allied nations of England and France, the firing of salutes and exchange of flags will take place, in mutual manifestation of courtesy and respect.

Furthermore, during the occupation of Canton by the Allied troops of England and France, during a period of four years, their conduct has never been otherwise than friendly towards the military people of the whole City, and ye military and people, having also corresponded with courtesy and friendship, harmony has been maintained from first to last. Now that the troops are being withdrawn, the Consuls of England and France will continue to reside within the city, while the merchants and people of all nations will constantly pass in and out, or reside therein at their pleasure. It remains the duty of yourselves, the military and people, to continue to them the same respectful and courteous relations that have prevailed during the occupation, and then perpetual amity between our respective nations will be secured. The Tartar General and Viceroy sincerely hope that henceforward, by firmly adhering to the Treaties of Peace, both Chinese and foreigners will enjoy together the blessing of prosperity and peace.

Let all be thoroughly informed hereof, and act obediently.

JAPAN.

HAKODADI.

The news from Japan by this mail is of very slight importance. The European representatives are awaiting instructions from their respective Governments.

The head quarters of the British minister are still at Yokuhama.

A letter from this place, dated September 18, reports :—

"The Japanese Government has purchased an American barque, the *Althea*, from the Amoor Company, for $24,000. The Russian war steamer *America* leaves this day for the Amoor. A corvette is also in the harbour, and the Commodore (now Admiral) awaits a mail from Shanghai, when he will leave for that place *en route* to Europe by Suez.

"We have had two typhoons here, one on the 28th of August, and 9th of September. The latter was experienced at Nagasaki about the 7th, showing that the storm travelled northwards. Both passed to the westward of Hakodadi, but not very far off."

CHINA.

PEKING.

Dates from the capital are to the 13th October. Tsai-Ch'un, the youthful Emperor, was to make his public entry into Peking about the end of the month, and preparations were making for his reception. The roads were being repaired, and large quantities of provisions had been despatched to the halting-places along the Zehol route, at which mat-houses had been erected for the Imperial *cortege*. Many of the ladies and courtiers who followed the late Emperor to Zehol, have already returned. This seems to promise well for the future; for with the Court at Peking, our own position there will be materially improved. Another favourable omen is the manner in which Prince Kung has been received at Zehol. He is said to have returned to Peking highly gratified with the result of his journey. On the proposed return of the Court, the *North China Herald* writes :—

"While at Zehol, the Council of Regency is strongly supported by the numerous adherents of its three more powerful members; its policy, did it dare to act, would be essentially anti-foreign, and its position as a ruling body is really less under control than that of an emperor. The return to Peking will cause a great change; there, their supporters will be in the minority, the Governmental policy will be guided by the counsels of Prince Kung, and their action will be under a wholesome control. The Prince accepts the situation; seeing that foreign intercourse must be tolerated, he is convinced that it is worthy of careful attention and of more liberal treatment than it has received heretofore. It is the policy of the Council to damage the Prince in the public estimation, by stigmatising him as truckling to foreigners; his views are not likely to be altered by their opposition, and the high estimation in which the people hold him is protected to a great extent by the popular ill feeling that exists towards most of the Council. The only fear of the Prince's friends is, that some indiscretion on the part of foreigners visiting Peking may give rise to reports which, magnifying as they travelled, would have the effect of delaying indefinitely the Emperor's return."

The remains of the late Emperor were to be brought to the capital on the 3rd or 4th of November.

Shing-paou having returned to Peking after a successful campaign against the rebels along the south-west borders of Shantung, has been again despatched to co-operate with San-ko-lin-sin along the east coast of that province.

The following case is another proof of the refusal of our minister to allow Englishmen to visit Peking :—

"A gentleman has lately been desirous of penetrating to a large trading city in the North West of China, which we believe foreigners are permitted to visit after having obtained permission of our Minister: his object in going thither was strictly commercial and specific, and he carried with him a passport from our Consul at Shanghai, but it was only for a port below Peking, and therefore not available at the capital itself; however, Peking lay in the route to the city this gentleman wished to go to, and he therefore went to the Imperial city direct himself, and immediately made application at our Embassy for permission to remain, and facilities for viewing the interior of the city, and for making inquiries as to the selling price there of goods which had been sold to the Peking traders at Tientsin, &c., and also for permission to proceed to his further destination beyond Peking; but what was the result of his application? Not only was he not allowed to remain in Peking more than two days, but he was told it was not even any use asking Mr. Bruce for permission to go further north, as he would be sure to refuse; the Chinese authorities had not raised any objections to this gentleman's presence in their city, but it was simply a caprice of the Minister's because he had not written for the permission, and waited for the answer, before he ventured to approach the Celestial City."

TIEN-TSIN.

It is stated that Tien-tsin will not be evacuated for a year's time. The Taku Forts will then be garrisoned by half a battery of artillery, and half a battery will proceed to Shanghai, as will also one wing at least of the 5th B.N.I. In a year's time there will be two European regiments at Hong Kong; and one native regiment will be always stationed here, as, during the summer season, natives are better adapted constitutionally to bear the heat and burden of the day.

The Shanghai *Daily Shipping and Commercial News* says :—"By late advices it appears that the attempt at building substantial hongs upon the land conceded to the foreigners by treaty, is likely to be a dead letter. It appears that the cost of filling up the marsh allotted for that purpose is greater than was anticipated."

SHANGHAI.

The Rebels have approached within a few miles of Shanghai, and the civil and military authorities have taken energetic measures for the safety of the community. That the Taipings would attack the settlement was considered doubtful, but as they were so near that the sound of their guns could be heard, and the flames of burning villages seen, it was necessary to be prepared for defence should they venture to attack the settlement. It is stated that the available force for this purpose, including soldiers, marines, and volunteers, comprises 4,500 men.

We gave in our last a copy of the protest addressed by the Shanghai Chamber of Commerce to Earl Russell. It was forwarded by the secretary to Mr. Bruce for transmission, who, in his reply, dated September 24th, writes as follows :—

"I think it desirable to mention that instructions with reference to the attempt to charge transit duties on Hankow exports and imports, and on produce *via* Ningpo to Shanghai, have been forwarded to Mr. Medhurst, and their substance communicated to the Imperial Government, as the rule by which I shall abide. I trust they will be effectual and stop the attempts complained of, though the death of the Emperor and the poli-

Digitized by Google

tical crisis consequent on that event have for a time arrested the progress of business.

"With reference to the creation of a tribunal to decide cases in which penalties or confiscations are demanded for breach of the Custom-house regulations, I agree in the expediency of such a tribunal, but the real difficulty lies in constituting a board which will be satisfactory and fair to both parties; and on that point I should like to be furnished with any suggestions you may be able to offer.

"On the subject of 'Ship's stores,' it is to be observed that many of the articles for which exemption is now claimed are inserted in the tariff as subject to duty, from which it would appear, that they were not considered to fall properly under that description. It appears to me that in all cases where an article does not fall exclusively within the term of "Ship Stores," and may be applied to other purposes, the utmost that can be asked for under Treaty, is that drawback should be allowed them when it is *bona fide* put on board ships as stores. The list given by the storekeepers of Shanghai, and printed in the Report inclosed by you (which I now see for the first time), is more reasonable than that which was furnished to me some time since from Canton, which contained pretensions utterly unreconcileable with the Treaty, and I shall endeavour to have the benefit of exemptions further extended than it is by present practice.

"The privilege of sharing in the coasting trade which was granted under different conditions at different ports—exemption certificates being recognised at some, and not at others—is not a right which, according to my construction, can be claimed by Treaty; nor can the Chinese Government be debarred from putting it under general regulations. If Her Majesty's Government decides that my reading of the Treaty is erroneous, an arrangement more favourable to shipping may be made; but unless I am entitled to it as of right, I think the question is settled on terms as favourable as at present can be obtained.

"As your address will bring these and other topics under the notice of Her Majesty's Government it is unnecessary for me to discuss them further. You are sufficiently acquainted with the history of our intercourse with China to know the difficulty of preserving trade from exactions in the interior at a time when the Government is straining every nerve to provide funds for the suppression of a formidable rebellion; and when by treaty it is debarred from the usual resources of Governments in such cases—namely, that of raising revenue by increased Customs impositions. The transit duty clause was devised to relieve the foreign trader from arbitrary internal exactions without imposing upon Her Majesty's Government the hopeless task of interfering between the Chinese authorities and their Chinese subjects; unfortunately the general anarchy that prevails, and particularly the disturbed condition of the country in the neighbourhood of Shanghai, render at present the benefit of the arrangement almost nugatory, and greatly enhance the difficulties of any one, who has at one and the same moment to carry out the provisions of the Treaty, and to place the relations of the two countries on a permanent and more friendly footing. The same causes together with local interests are at work in thwarting the attempts of the foreign *employes* to introduce a more honest and better system of administration into the Chinese Custom-house. I can speak however from personal knowledge as to the soundness of the advice given by Mr. Hart to the High Officers of the Chinese Government at Peking and to the perseverance with which he has urged upon them enlarged views in commercial matters.

"Though I have pointed out above some of the obstacles to be encountered, I wish it to be understood that I thoroughly concur with the memorialists in desiring to free trade from the trammels and impositions under which it labours and in proportion as I acquire influence with this Government, it shall be made use of to that end."

The following notification was issued at the British Consulate on the 17th October, and signed by Mr. Medhurst:—"John Markham, Esquire, H.M.'s Vice-Consul, will take officiating charge of this Consulate from the present date until further notice." Mr. and Mrs. Medhurst have since left for Japan.

Another expedition to India has been proposed to start from Peking, and travel by the northern frontiers of China to India. Long ago Mr. Parkes proposed such a scheme to Colonel Sarel, but the present plan appears to have originated with Captain Malcolm of the Royal Engineers, and Captain Blakiston. These gentlemen intend to follow the land route, and will not venture upon the Yang-tse.

A curious letter, describing "the Taipings at Home," appears in the *North China Herald*. Here is a lively description of Kan Wang and of his "effects:"—

"Kan Wang is, I should say, about 45 years old, rather fat than otherwise, and has an open and very pleasing countenance. He is an extremely pleasant companion, can drink a glass of port wine, and, if necessary, make a dinner of *bifstick a l'Anglais*, with a knife and fork. I must confess that he is the most enlightened Chinaman I ever saw. He is perfectly acquainted with geography, moderately with mechanics, acknowledges the superiority of Western civilization, has books of reference with plates on all imaginable subjects, is generous, and very desirous of doing good—*Per contra*, he is indolent, and consequently takes but little trouble to see his theories put into practice. . . . . Kan Wang's Yamun is hung round with satin scrolls, and is dreadfully dusty. I don't think it is ever used. In one corner are a dozen solar lamp glasses, and on the table two canisters of gunpowder in Curtis and Harvey flasks, the one made at Ningpo, the other in Britain. In a large press are a multitude of picture-books, done up in cloth covers. His Highness will take them down and show them to you, and you can't deny that some of the Soochow flower paintings are exquisite. Turning through a small door to the left you come into Kan Wang's own sanctum, which is quite a museum in its way. It is a large cheerful room facing a garden of flowers. The principal article of furniture is a large bed of Soochow manufactrue, covered with jade and other ornaments, and hung with yellow curtains. The Wang takes a siesta in this now and again. Tables line the sides of the chamber, and support a most extraordinary conglomeration of different articles. There is a telescope on a moving pedestal (broken), a gun box (gun gone), three Colt's revolvers (all useless from rust), a box of gun caps, ditto of Vestas, two solar lamps that can't be made to light, and a cake of brown Windsor soap; the Woolwich Manual of Fortifications, a book on military tactics, and the Holy Bible; any amount of Chinese books, comprising all those valuable works published by foreign missionaries, quires of yellow paper, five or six clocks, an alarum, broken barometer, heaps of proclamations, ink stones, gold pencils, and dirty rags. On the other side piles of books suffering from moth, a hat box with the dragon hat inside, fans mounted in silver, jade stone drinking cup and saucers, gold and silver cups, platters, chopsticks and forks, three English Port wine bottles, and one ditto of Coward's mixed pickles. At various places are suspended an English naval sword, some dragon caps, a couple of Japanese knives, two French plates, and an old engraving of the Holy Well in Flintshire. Lying on the bed is a mass of silver ingots tied up in a cloth. Chairs and stools with marble seats are placed round a marble table, and an attendant dressed in a spotless white crape, with blue jackets pulls a punkah, and so keeps you beautifully cool. Here Kan Wang will give you a pretty dinner and lots of wine. He told me that T'ien Wang prohibited wine; he applied for a dispensation asserting that unless he drank he could not eat, and that the dispensation was immediately granted."

There is no news of any interest from the ports on the Yang-tse, but by the shipping reports it is evident that great activity exists in the employment of foreign vessels. A notice of these movements will be found in another column.

Mr. Samuel Mossman has assumed the management and editorship of the *North China Herald*.

A case has been settled in favour of Messrs. Lindsay and Co. against the captain and owners of the *Imperial* for commission (£300) on a charter, procured by the captain after closing accounts with Messrs. Lindsay and Co., but before leaving the port. It is important that shipowners should know that such is the custom in China, and instruct their captains accordingly.

CHEFOO.

The news from this post is up to the 15th October, and comprises very melancholy intelligence. It had been attacked by the Rebels; and the French Admiral who hastened to the rescue in the *Feiloong*, landed in time to save the place, not from the Taipings, but from Junksmen who had landed to protect the hongs, but eventually took to looting. On the following day the Rebels appeared in force and proceeded to set fire to some of the adjacent villages. They were eventually driven off by the English and French, not, however, before they had committed the most atrocious cruelty on the defenceless inhabitants. The saddest part of the story has yet to be related. Messrs. Parker and J. L. Holmes, American missionaries, rode out into the country to hold a parley with the Rebels, and were by them brutally tortured and then murdered. Fortunately Mr. Consul Morrison had brought in to Yentai the children and female members of their families the night before. Both these missionaries have widows, but Holmes' brother, who was coming overland from Tien-tsin, heard that two white men had been killed by the Rebels, and on his arrival he went out with a party of foreigners and recovered the bodies. All trade is for a time at a stand-still.

The following items serve to show the activity in shipping movements at this place:—

The French Admiral (Protch) left Chefoo on 16th October in the chartered steamer *Feloong* for Tientsin. H.I.M.S. *Dryade* left on 15th for same place.

The *Andromache*, *Vengeance*, French, and the gun-boats *Insolent* and *Drake* are lying at Chefoo.

The Prussian frigate *Ancona* arrived at Chefoo on 15th October with the Ambassador on board and started for Japan the same night.

H.M.'s transport *Hesper*, with a gun-boat and two water-boats in tow arrived on 17th Oct.

There are about seventy merchant vessels loading peas and beans, &c., from junks in Chefoo.

FOO-CHOW-FOO.

The French Minister at Peking has appointed Mr. M. A. Macleod, of Messrs. Jardine, Matheson, and Co., the Vice-Consul for France at Foo-Chow.

FORMOSA.

It appears that the port of Tai-wan, named in the treaty for our trade with Formosa, has no harbour nearer than Takow, about 30 miles distant. It is rumoured that Mr. Swinhoe, the British Consul, who has been duly installed there, will be shortly transferred to Tam-sui, which has a good harbour, and is a place of considerable trade.

Digitized by Google

HANKOW.

The Imperial cause is stated to be gaining ground, and it is confidently anticipated that in a few months Hankow will be the emporium of a very large trade "in consequence of the gradual dispersion of the Rebels, and the opening of several large and important towns between that city and Nanking."

HONG KONG.

The French troops which have evacuated Canton proceed to Cochin China.

H.M.S. *Simoom* was to leave on the 10th for England with the 60th Rifles. The *Urgent* and *Vulcan* had arrived with part of the garrison from Tien-tsin.

The scheme of Sir John Bowring for establishing public gardens at Hong Kong is about to be carried out by Sir Hercules Robinson. In the Government *Gazette* of the 12th Oct. a notification was published, appointing Messrs. Chas. St. George Cleverly, J. J. Mackenzie, and W. Walkinshaw, a garden committee. The ground fixed upon by Sir John was that in front and to the eastward of the Albany, and extending across the ravine in rear of Murray Barracks. A practical gardener and botanist from Australia has been engaged to superintend the work. The proposal to establish Turkish baths for the use of the colony has also been mooted.

Major Brabazon, who proceeded to Peking for the purpose of ascertaining the fate of his son, Captain Brabazon, who was said to be murdered by the Chinese during the last campaign, is a passenger by the present mail. We fear that his journey has proved, so far as his immediate object is concerned, quite fruitless.

The Hon. Mr. Anson Burlingame, the American Minister to China, arrived at Hong Kong on the 24th Oct., *en route* for Peking.

On the subject of the Kowloong cession the *China Mail* writes as follows:—

"The decision about the Kowloong claims is now known. The authorities at home had, very properly, no hesitation in giving the first claim to the army, the next to the navy, and what remains to the colony. They took the correct view of the matter and said that the place was acquired for strategic purposes, and that no intention was ever likely to exist of otherwise devoting it. The small brain of a certain colonial functionary may not be able to foresee the requirements of English policy in the Far East for more than a few years, but those who view affairs from a higher platform know that very many years must elapse before this colony can ask the military to go to the wall."

Mr. S. Odell has joined the firm of Deacon and Co., of Hong Kong, and Mr. Albert Deacon's interest ceased on the 31st March.

"The interest and responsibility of Mr. Frank de Silver in our firm ceased on the 16th of March last, and that of Mr. George P. de Silver on the 15th inst. Mr. T. D. Tillinghurt is authorised to sign our firm per procuration, and will manage the affairs of the same in China. Mr. Chas. de Silver, jun., was admitted a partner in our firm on the 15th inst. Signed, De Silver and Co. Hong Kong, 30th Oct., 1861."

Mr. A. N. Shearer has been admitted a partner in the firm of Howard and Co., of Shanghai, and Mr. F. Jenkins will sign the firm by procuration.

Mr. Caldwell has published a letter in the *China Mail*, which the editor recommends the Governor and Chief Justice not to read.

A fire occurred on the premises of Mrs. Hurst's millinery establishment, and great bungling occurred in the efforts to extinguish it. The soldiers and sailors who assisted, of course, got drunk first, and then went in for a smash. In addition to the heavy loss sustained by Mrs. Hurst, and which her insurance will not indemnify, Mr. Petter, the photographer, has lost his all—some $6,000 worth of apparatus and material, and is much to be pitied, for, having only moved in to the premises a day or two before, he had not had time to effect an insurance. By the assistance of several amateurs, however, who have, with great liberality, placed their stocks of chemicals, &c., at his disposal, he intends to resume business as soon as he can find suitable premises, and we hope will be well patronised. Mr. Woodruff's loss is estimated at $1,500 or $1,800; but we presume that will be covered by the insurance. We fancy the insurance offices will put a heavy premium on "milinery" for the future, seeing that all the shops in the place have in the last two years been burnt out.

Arrangements are being completed for obtaining the next year's supply of ice from Tien-tsin, instead of paying a heavy freight on the quantity shipped in the United States, and losing fully half of it during the passage. A small freight will be paid from the Peiho, and, as the passage can be made in ten days, the quantity lost on the way will be trifling.

Actions have been entered by Messrs. Walker, Borradaile and Co., against the owners of the British ship *Childe Harold* for $4,527, by Messrs. Bourno and Co. for $1,870, and by S. P. Hall for $11,320. The editor of the *Daily Press*, who has seen Canton under all circumstances, says:—"There appears some prospect of old Canton partially recovering itself, although the Custom-house is a great drawback. We do not think much of the Shameen site though. There are many houses to be let at Honam, and we should say that the property-holders there will prove powerful opponents to the progress of Shameen; because, should foreigners quit Honam, the property there will be valueless, to avert which the proprietors will surely improve it and make it fully adapted to the requirements of the port, and thus indispose foreigners from expending large sums in building at Shameen. Still we hardly see how Canton, with that wretched Custom-house, can compete with Hong Kong until its capacity for the consumption of imports shall become greatly enhanced.

The following notification appears in the *Gazette*:—"The Hon. William Thomas Mercer, Esq., Colonial Secretary, having obtained six months' leave of absence from the colony, His Excellency the Governor has been pleased to appoint William Hastings Alexander, Esq., to be Acting Colonial Secretary, Charles May, Esq., Acting Chief Magistrate, and Julius Charles Power, Esq., Acting Assistant Magistrate of Police, Sheriff, and Coroner, till further orders."

A severe typhoon has again been committing ravages in the China Sea, off the south end of Formosa, about 19th October. A list of shipping casualties will be found in our shipping columns.

Mr. Harry S. Parkes, who was on the point of leaving for England after the evacuation of Canton, has been unexpectedly ordered to proceed to Shanghai, in consequence of the approach of the Rebels to that settlement.

Mr. John Dent, head of the firm of Dent and Co., takes his departure for England, after a residence of twenty years in China.

His Excellency the Governor has been pleased to appoint Dr. John Ivor Murray to be Chairman of the Committee of the International Exhibition, 1862, in the room of the Hon. W. T. Mercer, Esq., absent on leave.

CANTON.

The property of the London Missionary Society at Pok-loe has been imperilled. It is stated by a Native reporter that on the 11th Oct. a band of men entered the chapel and arrested the Evangelist Chae, intending to put him to death. The magistrate endeavoured to obtain his release, but So, the leader of the band, refused. The Prefect then determined to arrest So, but the man collected a number of followers and determined to arrest the magistrate. This, however, he failed in doing, but he placed the magistrate's family in durance vile, and hoised a Rebel flag. For the rest of the story, and some editorial intelligence about Pok-loe, we extract the following from the *Friend of China*:—

"The trouble at Pok-loe has been satisfactorily settled, and the agents of the London Missionary Society firmly seated in the house which the disaffected threatened to pull down. This result is due in chief to the promptitude and address of the Rev. Dr. Legge, who, accompanied by a guard supplied by the Governor-General, left Canton, and on arrival found that his announced advent had had the effect of making the refractory elders more willing to come to terms. The difficulty originated, it transpired, on secular rather than on spiritual motives; one rapacious individual of the community being desirous of getting some kind of hold on the property. After some negotiation, Dr. Legge was at last successful in charming all parties into a good humour, and before he left had quite an ovation, the occurrence being taken advantage of to give the elders a few lessons in Christian doctrine.

"As before stated in these columns the way in which Christianity was planted at Pok-loe, in the heart of the province of Kwang-tung, is deserving of more than a passing remark. Chae, after being baptised by Dr. Legge in Hong Kong, proceeded to his native village, where, imbued with an enthusiasm which sober people will term fanatical, he was wont to walk the streets with placards on his back and bosom—calling on those who saw him to turn from their sins and idolatry, and become Christians. Wild though this may appear, it had its effect on his neighbours, and when Mr. Chalmers, at Chae's request, afterwards went to Pok-loe, he found some scores more or less imbued with knowledge of Christian doctrine. Whilst Dr. Legge was in England, the native Christians in Hong Kong seeing the good which Chae was doing, agreed among themselves to provide him with a salary of five dollars a month, which sum he receives regularly from them, thus affording an answer to the allegation often made that Chinese are too cold-hearted to espouse a foreign doctrine and support its teachers from their own purses."

The British West Indian Emigration Agency have engaged the *Agra* for Demarara, and have three hundred emigrants ready to embark on the first despatch of the season. In another column it will be observed that the total number ordered is

Digitized by Google

3,100. The Customs authorities are in future to do the duty heretofore performed by the Allied Commissioners, in regulating with the Consuls the arrangement for inspection, embarkation, &c.

COCHIN CHINA.

SAIGON.

The French authorities at Saigon have recently promulgated a series of regulations for the Chinese population in Cochin China. The following are some of the principal provisions of these regulations :—"The Chinese residing on French territory, in Cochin China or arriving there, are to group themselves in clans or Kongsies, there being as many of such Kongsies as there are distinct clans or sehs in each of the principal centres of the Chinese population. Each clan or Kongsie is to be under a chief or headman, elected by the influential members of it, subject, of course, to confirmation by the civil authorities. No Chinese can reside in the French territory without a permit of residence from the Director of Native Affairs, and none can leave without a passport. Every Chinaman must be enrolled in a kongsie, and those who refuse to join, or who shall be refused permission to enter, or who shall be expelled from, a clan or kongsie will be immediately removed from the French territory. Minor offences are to be adjudicated by the chiefs of Kongsies, while the graver crimes will be tried by the French Courts, the chiefs of Kongsies assisting as assessors."

The latest news is to the 29th October.

The French man-of-war transport *Rhone* sailed from Saigon on the 22nd, and reached Singapore on the 29th, having on board 475 invalids, on their way to Suez for France.

Reinforcements were expected from Canton, but there is nothing to confirm the telegrams which appeared yesterday in the daily papers that hostilities were to be resumed at Saigon.

The captain of the French ship *Osiris*, has, it seems, for want of ballast, actually paid a bonus, or gratification, of $100 to the charterers of his vessel for the privilege of taking a cargo of rice. This he has done in preference to paying some $300 or $400 dollars for ballast, which has been and still continues so difficult to be there procured, that many vessels have been detained months at Saigon on this account. This has become a serious drawback to the commerce of the place.

SIAM.

BANGKOK.

Several improvements have been made lately at Bangkok. Land having been granted free by His Majesty the First King a church is now in process of erection. A public road has also been commenced, which will be completed at the sole expense of the Siamese Government. The King of Siam has also agreed to erect a Lighthouse on each side of the river's mouth.

The Siamese appear to have imbibed a passion for shipbuilding, and at the present time several steamers and gunboats are being built under the superintendance of a European.

There has been little business doing in produce. The recent advices from China regarding rice have been unfavourable, and buyers are restricting their operations in that article considerable. Tonnage is in less demand. Money continues scarce.

BORNEO.

By the last accounts from Sarawak we learn that Captain Brooke had been visiting Bintulu, and the other places recently placed under the jurisdiction of Sarawak, and that everywhere the inhabitants were rejoicing at the change of government, and preparing to visit Muku, Sarawak, &c., for trading purposes. The only person likely to give trouble was the veteran pirate Rentaub, who, perched on the top of a mountain strongly fortified, has hitherto set at defiance all attempts to bring him to submission. Means, however, are being adopted which will probably overcome his resistance, and by his fall the complete control of the dependent territory belonging to Sarawak will be assured.

JAVA.

BAVAVIA.

The *Straits Times* states that "thefts, robberies, housebreaking, and murders, are now ripe in Batavia."

Preparations were making to receive the new Governor-general, but of their character we are not informed.

The news has reached Banjermassing that Demang Lehman, one of Antasari's chiefs, had given himself up with thirty followers. A correspondent of the *Java Bode*, sarcastically remarks that it took three years to subdue Master Lehman and it will take six more to catch Antasari.

From Banjermassing an expedition consisting of 200 bayonets, one howitzer and two mortars, under Captain Van Vloten, had started to beat up the quarters of Antasari. The rebel stockades at Roumanio on the Kuran river were destroyed by this force. The stockades were very strong and held by about 150 men who offered a determined resistance. The Dutch troops had 21 killed by musket balls and 17 wounded by ranjus. Amongst the killed was Lieut. van der Hoek, of the artillery. The loss of the enemy was also considerable. The further proceedings of the expedition had not been reported.

The *Javasche Courant* reports that the pirate Aboe, one of the principal followers of Pa Ranti, who had formerly been caught, but who, after having been convicted in November 1861, had escaped from Banjermassing, has been again caught.

The *Launceston*, Captain W. H. Hayes, has put back from sea leaky.

The *Java Courant* contains a review of the trade and navigation of Java and Madura during 1860.

MALACCA STRAITS.

SINGAPORE.

The present Post Office is shortly to be pulled down to make way for the building of a new Court House. The plans have been completed, and the building will be on a very magnificent scale.

A quantity of gunpowder has been seized on board the *Sagoff* and brought back to harbour, the powder having been entered upon the ship's manifest simply as merchandise.

From Timor advices have been received that the revolt of the natives against the Portuguese Government on that island had been completely put down, and that the rebel chiefs had made submission.

His Prussian Majesty's steam frigate *Thetis*, Captain Jachmann, proceeded to Bangkok on the 5th current.

Another tea ship has put into Singapore in distress, being the Danish brig *Ceres*, which left Foo-Chow on the 26th August, with a cargo of tea bound to Melbourne.

PENANG.

The *Penang Gazette* says :—

"There can be no doubt whatever about the exceeding richness of the tin deposits on the opposite coast of the Malay Peninsula, more especially in the territory of Pera, where, indeed, the deposits seem to be practically inexhaustible. The ore is found in the form of fine gravel, deposited in a thin layer over extensive tracts of country, and usually only a few feet under the surface of the soil. The process of mining is, therefore, exceedingly simple, and is carried on almost exclusively by Chinese. Large pits are made by removing the surface soil until the layer of ore is reached, and this is carried to a neighbouring *parit* or watercourse, where the ore is washed, and it is then ready for the smelting process. The implements employed are the *chungkol* or native hoe, baskets for removing the ore, buckets for baling the water from the pits when flooded, and *dulangs* or wooden trays for washing the ore. Nor is any particular skill required up to this point either on the part of the labourers or overseers. The ore is now transferred to the Towkay of the smelting department, generally an old hand, and always a leading member of one of the Chinese Secret Societies. The furnaces are of a very primitive character, although the cost of erection is great, the material having generally to be carried overland for many miles on men's backs through swamp and jungle. The Chinese box-bellows supplies the wind necessary to raise the heat to the smelting point; and as the ore is placed in the furnaces in its crude state without any attempt to reduce it to powder, it will readily be conceived that a great loss must be sustained, which, indeed, has been estimated to amount sometimes to nearly 50 per cent."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

FELLOWES—On the 5th inst., at 42, Castle-street, Edinburgh, the wife of Captain Charles Fellowes, Royal Navy, H.M.S. *Revenge*, of a son.

HOUGHTON—On the 6th inst., at King's Close, Barnstaple, Devon, the wife of A. J. Houghton, Esq., of a son.

INNOCENT—At Tien-tsin, on the 22nd September, the wife of the Rev. J. Innocent, of a daughter.

MACTAGGART.—At Batavia, on the 21st Oct., the wife of William Mactaggart, Esq. of a son.

STILL.—On the 3rd inst., at Brussels, the widow of Thomas Walter Still, Esq., formerly Captain King's Dragoon Guards, of a son.

TURNER—At Canton, on the 3rd October, the wife of the Rev. F. S. Turner, of th London Missionary Society, of a son.

MARRIAGE.

NOYES—BAUMGARTEN.—At Malacca, on the 19th Oct., 1861, by the Rev. W. Hackett, Officiating Residency Chaplain, Charles E. Noyes, Esq., Commander H.M.'s steam gunboat *Tonze*, to Agnes eldest daughter of William Baumgarten, Esq.

Digitized by Google

DEATHS.

CLARKE - BRIGHT—At Hong Kong, on the 18th October, George Clarke, H.M.S. *Pearl*, and Luke Bright, Sergeant of Police.

FENWICK - At sea, on the 8th Oct., 1861, on board the barque *Margaret Dundas*, of Sunderland, Mrs. Ann Fenwick, wife of Captain Fenwick.

KEENAN—MAINE—At Hong Kong, on the 21st October, James Keenan, U.M.S. *Urgent* corporal, Royal Engineers, aged 25 years; Edward Maine, private, R.M., H.M.S *Vulcan*.

O'BRIEN—At Hong Kong, on the 17th October, T. O'Brien, publican, Victoria Hotel.

PARKER—HOLMES—Near Chefoo, on the 7th October, murdered by a body of Rebel marauders, the Rev. H. M. Parker, Missionary of the Board of Foreign Missions of the Protestant Episcopal Church, U.S.A., and the Rev. J. L. Holmes, Missionary of the Baptist Mission, U.S.A.

SANFORD—On the 2nd inst., at Wimbledon, Maria, daughter of the late John Sanford, Esq., aged 76.

SMALE—On the 2nd inst. in the Marylebone-road, Mr. William Hurst Smale, in his 51st year, late of Upper George-street.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—SHANGHAI.—Black: Arrivals from Hankow have been considerable, and a large business on this market is reported. The desire of some of the holders to realise and get their accounts closed up, together with depressing advices by the 10th August mail, has had the effect of causing another decline of fully Tls. 2 on medium and lower qualities. Fine kinds still remain very scarce; one or two settlements have been made at rates fully up to previous quotations. Settlements and shipments for the fortnight amount to 15,600 chests, making a total to date of 95,860 chests against 30,500 chests at same period last season. Stocks, 12,000 chests Oopack and Oonhams, 1,000 chests Hoochows, and 15,000 chests Old Common tea. There has been a fair business in Flowery Pekoes at about previous rates. Stocks are now reduced to 200 chests Old. Greens: There have been large transactions in this description, and settlements for the two past weeks amount to 14,700 half-chests China and 1,400 half-chests Japan, making to date 57,090 half-chests against 32,900 half-chests respectively last season. Prices are decidedly firmer, especially in lower qualities, for which a good demand for Canada and America has existed. Stocks here are 10,000 half-chests Pingsuey, 4,500 half-chests Fychows, 2,300 half-chests Hoochow, and 1,100 half-chests Japan kinds.

FOO-CHOW.—Buyers for England continue unwilling purchasers, The American firms have entered the market for Oolong, but exhibit great caution, and consequently there is a total absence of the usual competition. The teamen continue very firm indeed, but in the face of the steadiness of foreigners prices have yielded a shade, and close with a downward tendency, especially for the common descriptions. The total arrivals of Congou for the season amount to 406,000 chests, against 420,000 chests at same time last season. Considerable purchases continue to be made for Australia, which tend to keep up rates. Scented Teas, 4,000 boxes at 23 to 26 taels for mid. to fine. The unsold stock upon the market is estimated at 140,000 chests Congou, 1,000 chests Souchong, 60,000 half-chests Oolong, 3,000 chests Flowery Pekoe, and a few thousand boxes of Scented Teas in various stages of manipulation.

AMOY.—Two vessels have been despatched for New York. The settlements of the fortnight have been small and are reported as under (short price):—Oolong, 4,500 packages at $15½ to $22; Ankoi, 150 half-chests at $10; Congou, 500 half-chests at $12½ to $17; Orange Pekoe, 500 half-chests at $13½; Caper, 200 boxes at $12. The unsold stock upon the market is stated at 13,000 packages Oolong, 8,000 packages Congou, 500 packages Orange Pekoe, and 2,000 boxes Caper.

CANTON.—The market was dull during the early part of the fortnight, and prices for Congous gave way about one tael for the middling classes and half a tail for the fine teas. The assortment of Congous on this market, though small, contains a much larger proportion of the better description than any of the other markets. On the receipt of the news therefore by the London mail of 16th Sept., buyers entered the market and did business at the above named reduction. In Canton-made Greens a large business has been done both for London and New York at slightly advanced rates. In scented Tea little has been done and rates have fallen fully one tael. The following are the settlements of the fortnight:—Congou, 18 chops Oonams and Oopacks at 25 to 27½ taels for the former, and 28 to 30½ taels for the latter. Scented teas, 2,303 boxes Or. Pekoe at 26 to 29 taels, and 3,000 boxes Caper at 16 to 24 taels. Canton greens, 8,000 boxes Gunpowder at 17 to 28 taels; 200 boxes Imperial at 20 taels; 2,000 hf. ch. and 6,000 boxes Young Hyson at 10½ to 18 taels; 200 ch. 400 hf. ch., and 1,000 boxes Hyson Skin at 12 to 14 taels.

RAW SILK.—SHANGHAI.—Notwithstanding the gloomy accounts from Europe by the 26th August Mail, a very large business has been done, principally, however, in barter for imports. The dealers submitted to a reduction of about Tls. 10 per picul on last quotations, and this has led to the settlement of some 5,000 bales during the fortnight, principally of medium and inferior silks, which are relatively the cheapest. The export dompares unfavourably with last season's but it is nearly identical with that of the previous year. Considerable discrepancy is shown in the estimate of stocks, and opinions vary between 18,000 bales as the lowest, and 30,000 bales as the highest estimate. Probably the medium of 25,000 bales is not far from the mark. Japan and Ningpo have contributed largely to the supply, and receipts from the interior show little sign of decrease. Transactions since last mail are estimated at 5,000 bales, making total settlements for the season to date 28,500 bales, against 40,000 bales last season, and 28,500 bales the season before. The unsold stock is estimated at 25,000 bales, against 10,000 same time last year, and 11,000 the year before. Tsatlees, No. 1, 445 to 455 taels per picul; Taysaams, No. 1, 340 to 350 taels.

CANTON.—The settlements of the fortnight are reported at 40 piculs, the quotations being:—Kumchook, rereeled, $415 to $420; usual reel, $375. Loonkong, $500. Gowkong, $365.

DRUGS, &c.—Cassia Lignea: Sales 1,000 piculs at $15 to $15¼, stock 800 piculs. Cassia Buds: Scarce and wanted at $32 to $33. Cassia Oil: Sales 100 piculs at $210, stock still ample. Star Aniseed: No sales reported, stock 200 piculs, quotation $14½ to $15. Aniseed Oil: Sales 60 piculs at $140 to 143, stock 40 piculs. Galangal: Good is wanted at $4; there is a small stock of inferior. Camphor: Very scarce at $32.

CHINA—IMPORTS.

Prices have improved at Shanghai, and deliveries of grey shirtings drills, and woollens have been large, principally for re-export to the Peiho before it is frozen over; there is a good demand for T-cloths, brocades, chintzes, and velvets, and as there have not been any arrivals during the fortnight, stocks have been much reduced. There is not any change to notice in metals and Straits produce, which continue in a very depressed state, mainly owing to the very heavy stocks. At Foo-chow a small business is reported, principally in barter against tea.

At CANTON sales have only been made to a moderate extent, but probably the ceremonies attendant on the evacuation have been a great stoppage to business. The amount of transactions in Imports in Hong-Kong has not increased, but things are firmer, and an idea appears to be gaining ground that there will, ere long, be an advance in prices, indeed, already for some manufactured goods a very slight rise may be obtained. Yarns, grey shirtings, and lastings are in most demand.

At HONG KONG American beef is quoted $5 to $6 per barrel, no demand. Pork $10 per barrel, also dull. Flour: Gallego good is quoted $12 to $13 per barrel, and Coals are tending upwards, the stock for sale on the market being very small. The quotations afloat may be $12 for English steam and $9 for Sydney. The Shanghai quotations are—English, 12½ to 13 taels; American Anthracite, 13 to 13½ taels; Formosa, 5 to 5½ taels; Japan, 6 to 6½ taels.

NEWCHWANG, YING-TSZE.—During the past month a fair business has been done in imports against paper sycee. It has been resolved at a general meeting of the community that for the future all transactions in paper money shall be discontinued on account of its invalidity. The quotations, therefore, being in Ying-tsze Sycee, appear to be about 15 per cent. lower than before, but the prices of exports are lower in the same ratio. American drills, heavy. T cloth and grey shirtings and opium are in good demand, and the dealers say they will be saleable during the winter. In exports, bean cake (on board), per cake of 30 catties, T.m.c. 2.5.5.; peas, per 3 picul, 2.4.7. to 2.5.7.; pea oil, per picul, 3.8.0.; cow oil, none; wool, 6.0.0, to 12.0.0.; melon seed (on board), 3.4.0. indigo, 4.0.0. to 4.2.0.; tallow, 5.0.0.; ginseng, 82.8.6. Bullion.—Gold, per tael weight, Tls. 15.4.0. Mexican dollars, Tls. 72. Cash, per Tl. 1,510. Sycee, 100—95 Shanghai

HANKOW.—IMPORTS: Goods are slightly more in demand for money, but in the face of heavy freights no great advantage is seen in the apparently improved quotations. When this great charge shall be reduced, the gradual rise of Hankow into an important market may be confidently looked for.—EXPORTS.—Tea: A good business continues to be done, rates consequently keep firm, and an advance of 1 tael may be quoted. Settlements since the 28th ult. are 15 chops at 18½ to 21½ taels for third crop Oopacks. The total arrivals have been 200 chops, of these 189 have been sold and shipped, and 11 remain on the market.

MANILA.—The scarcity of available tonnage still affects the market for produce, in the prices of which there is little change to report. Sugar.—Current clayed: Some 15,000 to 20,000 piculs have been placed at $4 62½c. per picul, and dealers are less anxious to press sales Coffee: The market has been cleared at $14 57c. per picul, and some small parcels now arriving can be placed at $14 85c. per picul. Hemp: Last sales at $2 87½c., but $3 is now demanded. M. O. P. Shell: 900 piculs on the market, for which $22 50c. per picul would be accepted. Cigars: No. 2 cheroots procurable at $8 per mil, but No 2 cigars were in demand at $8 to $8 11c. per mil.

BATAVIA.—The season is now getting far advanced, and the rainy monsoon commencing. Business, as usual at this time, is very dull for most of the staples, and we can look for no improvement until early next year. The arrivals of manufactures continue moderate. The *Emma Mathilde* has arrived from Liverpool *via* Rio, and the *Martha Jacoba*, *Eliza Thornton*, and *Vrede* have arrived; the two first from London, the last from Liverpool, bringing 2,772 packages piece goods.

SINGAPORE.—The business done in European manufactures has again been on a limited scale. There is a slightly improved demand for most descriptions, but the higher prices demanded for Twist and Plain Grey goods of all kinds has had the effect of checking the inquiry to a certain extent. The native traders have not as yet commenced to purchase to any extent, and it is expected that they will invest largely in Opium, which, if it proves to be the case, will lessen their transactions in manufactured goods. There has been a good inquiry for Tin since arrival of the mail from Europe, and the price has advanced slightly. Gambier remains steady, and has been taken to fair extent at a few cents. over last quotations. Black Pepper is rather scarce, and is readily taken at last quotations; White is without change.

JAPAN.

YOKUHAMA.—Tea: The transactions have been very small, holders being unwilling to make any concession in their demands. In barter a fair business has been done at former rates. Settlements for the month are estimated at 600 to 800 piculs; stock about 200 piculs. Silk: At fair business has been done, the great inquiry being for fine parcels, for which full rates are freely paid; for middling and inferior there is less inquiry, and as the stock consists principally of those descriptions, the dealers are less firm in their demand for them. Of Edas' only a few small parcels have come to market, but supplies are daily expected. Quotations:—Mybash, 1 and 2, $490 to $520; 2 and 3, $460 to $480; Eda, 1 and 2, $530 to $550; Oshio, 1 and 2, $450 to $460; Sodai, 1 and 2, $480; 1, 2, and 3, $400 to $450; Cotia, $390 to $420. The comparative export is as follows:—From 1st July, 1861, to London, 777; to Shanghai, 1,824; total, 2,612—from 1st July, 1860, to Shanghai, 3,821.

Digitized by Google

NAGASAKI.—IMPORTS.—The improvement in the import market before advised is confirmed. Large transactions have taken place in barter against Tea at fair rates. Cash sales are difficult to effect, but inquiries have lately been made for goods which have been entirely neglected during the past six months. Tea.—Large supplies arriving; holders becoming anxious to realise, but buyers holding out for lower rates. Stocks estimated at 5,500 to 6,000 piculs of new, fair to good quality, at from $12 to $22; 2,500 to 3,000 piculs common and bad, at from $1. 50c. to $5. Settlements in the past month 1,750 piculs, fair to good. Silk.—Only a few parcels of the new crop, of inferior quality, have arrived. No settlements reported.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.

EXPORTS FROM JAPAN.

Per Empress of India, from Kanagawa, October 23, to London.—Tea, 461,076 lbs.; silk, 389 bales.

EXPORTS FROM CHINA.

Per Wellington, from Shanghai, October 23, to Liverpool.—Tea, 471,200 lbs.

Per Solent, from Shanghai, October 23, to London.—Tea, 812,900 lbs.; silk, 529 bales; silk-waste, 30 piculs.

Per Spirit of the Deep, from Kanagawa and Shanghai, October 24, to London.—Tea, 685,540 lbs., being 44,040 lbs. from the former, and 644,500 lbs. from the latter; silk, 258 bales.

Per Ocean Mail, from Foo-chow-Foo, October 15, to London.—Tea, 760,100 lbs.

Per Britannia, from Foo-chow-Foo, October 17, to London.—Tea, 683,200 lbs.

Per Foam, from Foo-chow-Foo, October 24, to London.—Tea, 732,500 lbs.

Per Mermaid, from Foo-chow-Foo, October 24, to New York.—Tea, 431,900 lbs.

Per P. C. Kinch, from Foo-chow-Foo, October 11, to Hamburg.—Tea, 408,800 lbs.

Per Metaris, from Foo-chow-Foo, October 21, to Melbourne.—Tea, 289,300 lbs.

Per Georgiana, from Amoy, October 24, to New York.—Tea, 547,533 lbs.

Per Asia, from Amoy, Oct. 28, to New York.—Tea, 346,984 lbs.

Per Amazone, from Macao, Oct. 26, to the Continent.—Cassia, 858 piculs; fire crackers, 1,000 packages; cassia buds, 40 boxes.

Per Sea Snake, from Macao, Oct. 13, to London.—Tea, 501,500 lbs.

Per Columbian (mail steamer), from Hong Kong, Oct. 15, to London.—Silk, 3,210 bales. To the Continent, 550.

Per Fortuna, from Hong Kong, Oct. 23, to San Francisco.—Tea, 1,270 packages; sugar, 2,511 piculs, rice, 9,000; oil, 30; opium, 14,625 taels; China goods, 3,472 packages; peas, 617 bags; sheetings, 30 bales.

Per Samuel Fales, from Hong Kong, October 9, to Sydney and Melbourne.—Tea, 150,000 lbs.; sugar, 4,000 piculs; oil, 750; China goods, 7,025 packages; prepared opium, 6,000 taels; rope, 74 coils.

Per Pamella, from Hong Kong, October 21, to Melbourne.—Tea, 150,000 lbs.; sugar, 1,720 piculs; oil, 1,500; China goods, 8,869 packages; opium, 33,000 taels.

EXPORTS FROM MANILA.

Per Oscar Vidal, to Cork, October —.—Hemp, 3,420 piculs; sugar, 10,044; sapanwood, 460; coffee, 8; cigars, 15 mil.

EXPORTS FROM SINGAPORE.

Per Oryx, to London, Nov. 2.—Gambier, 837 piculs; tin, 1,085; tea, 38; sticklac, 160; pearl sago, 1,404; coffee, 1,375; mother-o'-pearl shells, 200; buffalo hides, 71; rattans, 148; gutta percha, 375; personal effects, 4 packages; China ware, 1 case; preserves, 1; soojee, 1.

Per Vellore, to Bordeaux, Nov. —.—Sticklac, 168 piculs; damar, 20; gambier, 5,206; sapanwood, 293; india rubber, 22; shells, 71 packages; deers' horns, 1; tortoise shell, 1 case; stuffed birds, 1; gum copal, 59.

Per Franziska, to Hamburg, November —.—Buffalo horns, 111 piculs; apanwood, 109; rattans, 107; India rubber, 59; black pepper, 3,103 white pepper, 59; tapioca, 41; pearl sago, 1,003; gambier, 6,000; specimens of Natural History, and sundries, 53 packages.

Per Norma, to Bremen, October.—Gambier, 3,000 piculs; black pepper, 2,273; pearl sago, 999; white pepper, 296; sapanwood, 142; rattans, 36; sundries, 11 cases.

Per Myrtle, to London, Nov. 5.—Gambier, 3,331 piculs; Pearl Sago, 1,566; india rubber, 420; tin, 492; coffee, 3,863; black pepper, 682; white pepper, 330; hides, 126; gum benjamin, 14; sapanwood, 347; rattans, 210; gutta percha, 104; essential oil, 90 cases; merchandise, 5; spices, 40 packages; private effects, 11 cases.

Per Constance, to Liverpool, Nov. 5.—Gambier, 7,894 piculs; sago flour, 9,318; pearl sago, 814; black pepper, 50; gutta percha, 288; sapanwood, 520; india rubber, 46; buffalo hides, 813; coffee, 208; mother-o'-pearl shells, 204; rattans, 718; cigars, 10,000; sundries, 36 packages.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From San Francisco: Oct. 12, Santa Cruz.

At HONG KONG, MACAO, and CANTON.—From London: Oct. 29, Millbrook. From Liverpool: 29, Koh-i-noor. From Hamburg: 31, Magnus, Bredeneck. From Boston: 25, Palmette.

At MANILA.—From San Francisco: Oct. 10, Mephista; 23, Otto.

At SINGAPORE.—From Sunderland: Oct. 28, Albert Borsig; Nov. 1, Blondel; 2, Minna. From Newcastle: Oct. 24, Minerva. From Rotterdam: 26, Jan van Galard. From Bordeaux: 29, St. Luce. From New York: 28, Alaena.

SAILED.

From JAPAN.—For London: Sept. 8, Eloise; 13, Empress of India. For San Francisco: 17, Carrington.

From SHANGHAI.—For London: Oct. 23, Mallard, Solent. For Liverpool: 23, Wellington.

From FOO-CHOW FOO.—For London: Oct. 13, Ocean Mail; 14, Britannia; 24, Foam. For Falmouth: 12, P. C. Kinch. For New York: 24, Mermaid. For Melbourne: 24, Metaris.

From Amoy.—For New York: Oct. 26, Georgiana.

From HONG KONG, MACAO, and CANTON.—For London: Oct. 13, Sea Snake; 16, Keepsake. For Europe; 26, Amazone. For New York: 19, Christopher Hall. For San Francisco: 23, Fortuna.

From MANILA.—For Europe: Oct. —, Oxar Vidal.

From SINGAPORE.—For London: Nov. 2, Onyx; 5, Margaret Dundas Myrtle. For Liverpool: 5, Constance. For New York: Militus.

LOADING.

At SHANGHAI.—For London: Anglo-Saxon, Cyclone, Drusus, Kate Carnie, Lansdowne, Mirage, Queen Bee, Spirit of the Deep, Wagoola. For New York: Queen of May. For Sydney or Melbourne: Ngapuhi. For San Francisco: J. D. Rogers.

At FOO-CHOW-FOO.—For London: Hanover, Magna Boria. For Havre: Taffarette. For New York: Cossack. For Sydney: Juverna. For Australia: Isis.

At HONG KONG, MACAO, and CANTON.—For London: Albuera, Millbrook, Etheralda, Dunmail. For Liverpool: Patna. For Clyde: Osnabruck. For New York: Haddington. For Demerara: Margaret Mitchell. For Sydney: Agincourt, Formose, Margaret Eliza. For San Francisco: Dictator, Mary Whitridge, White Swallow.

At MANILA.—For Liverpool: Casas, Clementina. For Cadiz: Margarita. For San Francisco: E. Cushing.

At SINGAPORE.—For London: Coromandel, Napoleon III., Recruit, Spirit of the North. For Liverpool: Wayfarer.

At PENANG.—For London: Ceylon, Ecliptic. For Liverpool: Greyhound.

FREIGHTS AND CHARTERS.

At YOKUHAMA.—To England: Silk, $2. 50c. to $4. 50c. per picul.

At SHANGHAI.—To London: Teas, £3 to £3. 10s.; silk, £4 to £5. To New York: Teas, $14 to $15; silk, $25. The amount of tonnage in port has been considerably reduced, and nearly all of it is engaged. Only a limited inquiry has been made to the South or Japan, and to the Northern ports the lateness of the season will deter further transactions. The charters reported are—Geelong to Foo-chow-Foo and Amoy, 30 lay days, $1,600; Dennis Hill, from Foo-chow-Foo to New York, $17 per ton, for teas; with $5 extra, if to Quebec, and $8 if to Montreal. Wavelet to Nagasaki and back, $1,350 per month. The following vessels have been sold: Fenella (British steamer), $35,000 Mex.; Chusan (British steamer), 44,600 taels; Santa Cruz (Amsterdam), 60,500 taels; Emperor (British), $7,500, Mex.; Madras (French), 15,000 taels.

At FOO-CHOW-FOO.—For London, £3 10s. For New York, $16 nominal.

At HONG KONG, MACAO, and CANTON.—Rates generally have advanced, and have an upward tendency, the remarks made in our last having been fully confirmed. In reference to the steam fleet now employed on the coast, the rates of freight are never quoted, owing to the firms either loading them themselves or making advances to the Chinese shippers on their cargo. The charters since our last have been:—Patna, from Canton to Liverpool, terms not known. John Scott, Manila to England, £3,300 guaranteed. Cleveland, from Java Coast to Europe, £3 15s. to £4 15s. Agincourt, to Sydney and Melbourne, £2,500 in full. Ten vessels are also reported to Bangkok and back, at 50c. to 60c. per picul. Rheine to Ningpo, $2,000 in full. Water Witch, to Shanghai, $1,700 in full. Maria Phillipine, $775 per month. Odin, $900. Pet, $975.

At MANILA.—To London, £3 to £4 5s. Tonnage continues scarce. The President Plate goes to Batavia for 8,000 guilders.

AT SINGAPORE.—To London £3 to £3 5s. The charters for the rice ports having commenced a fair inquiry has been made for ships, of which but few remain disengaged. This will most likely continue for some months. Amongst those chartered are: Recruit and Coromandel for London, and Wayfarer for Liverpool. Overmann to Bangkok and back at $1,000 per month. Benares, from a rice port, at £3 per ton for Great Britain, £3. 5s. to the Continent. Douglas, to China, at $1,200 per month.

AT BATAVIA.—The large arrivals of seeking tonnage have caused rates to decline, and three large ships (Am.) have accepted low rates. The Deutschland, Jorgan Bruhus, Martha Jacoba, Manila and Julie Claire load for Holland at about £5 per ton. Elizabeth to the United Kingdom at £4. Scargo to Holland, at £3. 10s., and Wild Rover, privately.

CASUALTIES.

A severe typhoon has again been encountered by several vessels in the China Sea, off the south end of Formosa, about 19th Oct., of which they all give the same account. The following is the Zingara's report:—Sailed from Hong Kong 24th Sept., bound to Shanghai, and on the 18th Oct. encountered a very heavy typhoon, blowing from 8 A.M. to 6 P.M. with terrific violence, during which time she lost all her masts, sails, rudder-head, and the quarter boat, which was blown to pieces. The ship had also made a good deal of water, which they succeeded in freeing her of, and anchored at Hong Kong on the 25th Oct.

The W. H. Chandler, from Hong Kong, on the 8th Oct., bound to Swatow, met with very heavy weather as far as 15 degrees N., when her decks were swept, and they had just time to get the boats out when the vessel disappeared. H.M.S. Simoom picked them up after being w elve hours in the boats.

The Albis has been lost on the Amherst Rocks, and the Coromandel rescued one man from the top of the galley two days after the wreck.

The crew of the Norma have been traced to the St. Augusta Island, where they had left a record stating that they left there on the 17th August for the Pellew Islands.

Thirty one Japanese have been picked up in a small boat, by the Laertes, in which they had been driven off the coast by a heavy gale.

The Benjamin, reported as having been wrecked near Wanchew Bay, we are happy to say is incorrect, she having safely anchored at Shanghai, and is now discharging her cargo.

The Morning Star, when in the typhoon (in which she lost her sails and boats), observed a Danish ship, of about 600 tons, go on shore, which was taken possession of by the natives.

The Pacific, bound to Shanghai, was totally lost on the 13th of October, in the harbour of Kielung. There were only two men saved.

The Agnes went on shore on the 16th Oct., and became a total wreck. All hands were saved, but they were obliged to ransom themselves before the natives would allow them to go to Chefoo.

Several other vessels were more or less damaged with the typhoon; amongst which were, Marie, loss of sails, boats, and one man; Jane, sails and boats, and Margaret Mitchell.

The St. George reports having passed forty-three dead bodies (Chinese) off Chimini Bay, and that 200 fishing-boats had been lost.

The Hamburg barque Hendrik left Tien-tsin on the 15th of August, bound south, and has not since been heard of. Mr. William Allanson, of Macao, left Tien-tsin in the Hendrik.

NAVIGATION OF THE YANG-TSE-KIANG.

The following notices from the *Shanghai Shipping List* will serve to show the traffic already established on the Yang-tse, and from our advices we can assure shipowners there is room for more steamers :—

Per HELLESPONT.—Experienced strong N.E. winds, accompanied with rain during our stay in Hankow. 23rd, passed Willamette and Beaver at anchor off Poyang Lake. 24th, passed Fire Dart abreast the Rajah; Dutch barque at anchor off Hen Point; steamer Jeddo on shore close Fitzroy Island, schooner Frank at anchor close to her. 25th, passed the Cosmopolite in Wild Boar Reach. 26th, passed Nankin, Canton, and Snake at anchor, Danish brig at anchor ten miles below them; same day passed H.M.S. Renard and Ta-Yung bound up off Eching, also the steamer Scotland below Chusan Pagoda. 27th, passed gun-boat Starling off Lyang-yin; 2 P.M., passed steamer Surprise on shore on the Actæon bank. 28th, passed steamer Niemen off the Red Buoy. South Bank Buoy gone, also the Centaur and Actæon Buoys gone. Experienced strong N. E. winds all the way down the river.

Per steamer WILLAMETTE.—Left Hankow at 8.25 A.M., September 18, steamer Hellespont in port. 20th, passed a raft at Kewkian, flying Mr. Dudley's flag. 23rd, H.M.'s gunboat Snake, Oliphant Island. 24th, steamer Fire Dart near Nganking. 25th, Dutch barque dropping down. 26th, lorcha flying British flag, and four junks flying Dudley's flag; passed the Nanking at 4.30 P.M.; in port, H.M.'s Centaur, gunboat Snake and despatch-boat Renard; brig flying Danish colours about nine miles below Nanking. 27th, Tayung at anchor (Ching-king-Foo), lorcha flying British colours, gunboat Starling. 20th, steamer Surprise under weigh about five miles above Lang-shan, steamer Niemen at Lang-shan crossing, and steamer Fernandez anchored below the shipping at 5.30 P.M.

Per H.M.S. SNAKE.—Sept. 23, passed Willamette and Beaver at anchor off Hu-kau, Rajah ashore, Jeddo ditto. 24th, passed B. F. Van Dambenoy anchored off Lang kiaug-ke and Fire Dart, Cosmopolite off Tei-kyang bound up. Left Nanking on the 27th. Left H.M.S. Renard there and passed Scotland bound up. Vessels in harbour—H.M.'s gunboats Havoc, Nymph, Hellespont, and Heron.

Per LY-EE-MOON.—Experienced heavy N.E. gales the whole of the passage, passed the Resolute at anchor off Swatow, wished to be reported at Shanghai.

Per str. FIRE DART.—Left Hankow on the 30th September at 6 A.M. The steamship Cosmopolite arrived there on the 29th at 7 A.M. About twelve miles below Hankow passed the lorcha Prince Kung. Eight miles above Hwangchow passed a large wooden raft with Dent and Co.'s flag. Hwangchow taken possession of by the Imperialists. Oct. 1, ten miles below Dove Point passed a houseboat with Lindsay and Co.'s flag; 2 P.M., abreast Jocelyn Island, passed steamship Scotland, the steamer Yeddo hove off to her 3rd and is now at anchor in three fathoms water at 4 P.M., abreast Fitzroy Island passed steamer Surprise. Oct. 2, 0 A.M., abreast Wuhoo passed a brig sailing up the river; 2.30 P.M., in Elgin Reach passed steamship Niemen; 5 P.M., six miles above Nanking, passed the steamer Fernandez towing a barque. Oct. 3, 10.20 A.M., abreast Fantao, passed a brigantine sailing up the river; above Langshan Hills passed a Dutch barque at anchor. Oct. 4, 10 A.M., passed barque L. E. Ashby going up.

CHINESE EMIGRATION TO THE WEST INDIES.

(From the *Hong Kong Daily Press.*)

There cannot be a question that this Demarara Emigration business has been extraordinarily well managed, and that its success has been the result of such good management. The abuses of coolie emigration had been rife for years, and had placed so many obstructions in the way, that the trade had actually become disreputable. Yet all difficulties were overcome by the observance of good faith and kind treatment. The records of emigration will, we are sure, present no parallel to the brilliant and rapid success of this Demarara scheme. Two seasons only have passed, and the question is solved. The subject of free labour to the West Indies has been settled. It has been proved that Chinese labour can be procured by fair means, and that the frightful mortality which has characterised the coolie slave trade was not caused by any peril or consequence of the transit, but actually by the despondency natural to people who have been kidnapped from the homes they love and revere. We say that as figures cannot lie without detection, so does this Demarara Emigration scheme prove the appalling fact, that all the coolie tragedies which have excited our indignation—the revolt of the victims in the vain hope of obtaining their liberty, the unheard-of and unaccountable mortality on the voyage, have simply resulted from *kidnapping!*

Are we saying one word too much? Need we go through the thrice-told tale of the coolie horrors which have for years disfigured foreign relations with China? We are sure that every one of our readers will admit that side of the case without a recapitulation of all that is revolting and tragical. What is the other side? Why, the Demarara agent in two seasons sends about six thousand coolies—the mortality on the voyage is less so far than half of *one per cent.*, and not a single tragedy or attempt to revolt has ever disfigured his records. He employed bill stickers instead of man stealers, and on arriving at Demarara the coolie was fairly placed upon the labour market, and, not as at Cuba, brought to the hammer.

Three things are conclusively proved—one, that Chinese coolies can be had by fair means if the *bona fide* intentions of the parties engaging them be reliable. Another, that satisfactory labour can be performed by them in the West Indies—that is to say, service for wages, satisfactory to employer and employé. And finally, that the horrors of the coolie trade are attributable to the crimes of foreigners.

What the end of this movement will be it were futile to predict. That that great *desideratum*, labour, has been found for our West Indian possessions is certain, but it is not the labour of the volatile negro, of the frail, enervated Bengalee, or of the listless, heart-broken Indian. No, it is the labour of an astute, athletic, vigilant race, whose intelligence and nationality make them dominant over all Asiatics; whose frugality, greed, and powers of endurance stamp them as traders *par excellence* from their cradles. Such a race becoming legion, as they soon must in the West Indies, under such mild, equal, and firm laws as ours certainly are, will surely soon despoil the voluptuous creole. They will, they must, soon attain a status in the Spanish Main, which will materially alter the existing posture of affairs. They will treble the value of our West India Possessions; they will drive slave labour off the field, and they will open the Continent of South America to trade, as sure as they opened the Eastern Archipelago.

THE CASE OF MR. MOSS IN JAPAN.

WE have received the copy of a notification issued by Mr. ALCOCK, our Minister in Japan, in reference to the case of Mr. Moss, which we publish. Our readers will remember that the decision of the Foreign Secretary on Mr. Moss' case, viz., that the fine imposed on him should be remitted, and that he should be invited back to Japan, was transmitted to Mr. ALCOCK. No doubt it was unwelcome to that gentleman to have his decision so unceremoniously reversed, but having committed a great injustice to Mr. Moss, it does not improve his case to repeat these acts. It appears that the instructions of Earl RUSSELL, instead of being promptly intimated to Mr. Moss from the Embassy, were garbled into a despatch to Capt. VYSE, the Consul at Kanagawa. The intention was, of course, to save our Minister from himself eating the leek thrust on him from head-quarters, from which many a good official has received a similar unpleasant rebuff. The worst feature of the case has, however, to be noticed, and that is, that Capt. VYSE has not acted on the instructions, but, like his superiors, has acted on his own discretion. Up to the time of the mail leaving Hong Kong Mr. Moss had not received any instructions from Capt. VYSE, and in addition to this piece of injustice, Mr. Moss is also suffering from the unreasonable postponement of the trial of his action against Mr. ALCOCK, having been kept six months for this purpose in Hong Kong, and, of course, his expenses will have now to be added to the damages already claimed in the action.

The following is the despatch alluded to :—

"Her Majesty's Legation, Yedo, August 28, 1861.

"SIR,—The proceedings against Mr. Moss, under the indictment of the 12th of December, 1860, having been considered by her Majesty's Principal Secretary of State for Foreign Affairs in communication with the law officers of the Crown, it appears that the conviction was illegal from certain defects in the procedure, and cannot, therefore, be legally enforced. I have to instruct you under the circumstances to apprise Mr. Moss, who, I believe, is now in Hong Kong, that, so far as the proceedings against him under the said indictment are concerned, there exists no impediment to his return to Japan; and that the fine of a thousand dollars will be at once remitted to such person as he may duly authorise to receive the same in his name.

"At the same time that you take this step, I think it desirable—to prevent misapprehension on the subject, which could not fail to be mischievous in its effects to the persons who might be misled by any supposition of impunity for offences committed in Japan—to state that the failure of justice in this case has been mainly the result of inadvertence on the part of Her Majesty's Consuls in giving effect to the provisions of the 4th and 5th section of the Order in Council of January 23, 1860, which empowers them with the approval of the Consul-General to make and enforce, by fine and imprisonment, rules and regulations for the observance of the stipulations of treaties, and for the peace, order, and good government of Her Majesty's subjects being within the dominions of the Tycoon of Japan.

"I take some blame to myself for this omission, since it was my duty to see all necessary provision was made for these essential objects; as also full blame for a defective reading of the Order in Council, in relation to my award on your judgment.

"The power conferred upon Her Majesty's Consuls under those sections ought undoubtedly to have been exercised; and the Rules and Regulations might very properly have included a prohibition against shooting, carrying fire-arms on the person, otherwise than for self defence, and other dangerous violations of the municipal law of Japan, provided that such law be not in itself unjust or unreasonable.

"It only remains now to supply this deficiency, and prevent further mischief in the same direction. It is the more imperative since the correspondence between the British residents at Yokohama and yourself, arising out of the affair of Mr. Moss proves, in the opinion of Her Majesty's Principal Secretary of State for Foreign Affairs, the necessity of a well-considered code of rules and regulations by which a breach of such Japanese laws and usages as are reasonable in themselves should be made punishable to a moderate extent, and in express and legal terms by the consul.

"You will accordingly proceed at once to frame such regulations as upon full consideration, may appear to be required, and submit the same to me for approval, to be subsequently published and made effective in the manner provided by the Order in Council, with as little delay as possible. Until such a code is published, mere breaches of Japanese laws and customs, however calculated to produce collisions and mischief, will not be *pso facto* offences for which British subjects can be punished; and no mere notification or prohibition of a consul can render them so. When these rules and regulations have been duly framed, I will then come to some understanding with the Japanese Government as to the circumstances under which British subjects shall be held liable to arrest by Japanese officials, for what specific offences, and in what manner this power may be exercised.

"Her Majesty's Principal Secretary of State for Foreign Affairs, in a recent despatch on this subject, makes the following remarks :—

Digitized by Google

"'The growing importance of British trade with Japan renders it of the utmost consequence that every precaution warranted by law should be taken to prevent, or to punish, any act on the part of British subjects which may threaten to alienate the good-will of the inhabitants of the country, to excite the animosity of the authorities, and to disturb the amicable relations which it is so much the interest of all parties to maintain unimpaired.'

"It is important that this conclusion of his lordship should be generally known, and you are at liberty, therefore, to make this despatch public, for the information and guidance of all under your jurisdiction.

"I have, &c.,

(Signed) "RUTHERFORD ALCOCK."

To Capt. Vyse, H.M. Consul, Kanagawa.

CHINESE POLITICS.

In the *Times* of yesterday (Dec. 13) appeared the following communication "from a correspondent very well versed in the subject he discusses":—

"The last mail may have taken home, but I am not sure, the news that the Emperor had named his only son, Tsai-C'hun, heir apparent to the throne, and had given him a council of seven or eight nobles and Ministers to assist him in the administration, the child being at this moment but some five or six years of age. The inclusion of three of those who were known to be his prime favourites, and reputed this worst advisers in what seemed a council of regency, created no little alarm among our Chinese gossips, who are wont to attribute to one of these men, named Sushun, all the immorality with which the Emperor's private life has been charged, and much of the maladministration for which his reign has been unhappily remarkable. For foreign affairs it did not look well either that the Prince of Kung, the Emperor's nearest brother, the chief of the new Foreign-office, and since the Emperor's flight last autumn his representative in Peking, should have been left out of this powerful committee; and the circumstance was evidently regarded as ominous even by natives interested more about the domestic condition of China than her external relations. The last news from Peking, however, was more favourable. It would seem that the actual Regent, the voice that issues the decrees which the Administrative Council reverently receives, is the Empress proper of the late sovereign, who, like the mother of the present, has by decree of the Imperial bantling, been elevated to the dignity of Empress Dowager; but, as wife of the monarch, takes precedence of the new ruler's mother, who was but one of the many ladies of the harem. Report speaks well of the character and abilities of both. To the Regent, it is reported, the Prince of Kung addressed himself for permission to visit Zehol, which is still the seat of the Court, being moved to this step by a rumour that the Opposition were endeavouring to instil into the Regent's mind a suspicion that the presence of foreigners, whose numbers they were magnifying, in Peking might render it unsafe for her to return thither, otherwise it had been expected that, according to one of the earlier formal decrees, the coffin of the late Emperor would have been accompanied to the capital by his son a few days after his accession. Whether this be true or not the Prince of Kung has without doubt started for Zehol, and, as to have gone at all, he must have obtained the Regent's permission to quit his post, his proceeding must be held to promise good rather than evil. Had the Opposition been all-powerful with the Empress, she would not have consented to a proposal, the aim of which is to the Chinese mind apparent. The Prince may not be without secret desire to shift his foreign affairs, burden to other less illustrious shoulders, or, at all events, to get shared by one or more a responsibility which must be irksome to a young man not much used to business. But there can be no doubt that he, in common with nine out of ten of his countrymen, is sincerely anxious to see the Emperor back in the place, his absence from which so much dispirits the well-disposed of his subjects and that at a moment when loyalty in the provinces is by no means a drug in the market. The return of the Emperor, who is, of course, a most precocious infant, will for certain do much good in Peking and the provinces.

"Much about the time the new reign was commencing, one of the Imperialist armies, operating against rebels up the Yang-tse-Kiang, has contrived to retake Nganking, the capital of Nganhwui, and Wuhu, lower down the river, in the same province. Both are places of much importance, and have been in rebel hands since the first descent of the Taipings in 1853. It is too soon to pronounce whether their recapture is due to unusual energy on the part of the Government, or to a deliberate purpose, or the want of one, on the part of the Rebels. They may be simply scrambling away to the centre of a new circle of depredations. Any way, if Government can hold these cities, it will improve its position on the Yang-tse much, and cannot fail to spare our trade a certain amount of complication."

THE FAR EAST AT THE EXHIBITION.

From a paper by Mr. P. L. Simmonds, read on the 27th ult. at the Society of Arts, we extract the following notice of the Far East:—

"Passing eastward, we find that Siam has been opened up to British trade since the last Exhibition. Sir John Bowring concluded a new English treaty there in 1855, and my friend, Sir Robert Schomburgh, a gentleman distinguished for his scientific attainments, and his explorations in British Guiana, his valuable 'History of Barbados,' and other works, has been the Consul-General at Bangkok for the last four years. Sir Robert, who was then Consul for the Dominican Republic, sent to the Exhibition of 1851 a very interesting collection of products from St. Domingo, comprising woods, new starches, vegetable wax, copper, and other ores. To show that he still regards with interest these competitive Exhibitions, and desires to develope the indigenous resources, and further the trade of the countries with which he is officially connected, I may state that, in a letter I have received from him, dated Bangkok, Aug. 18, he says:—

"'MY DEAR MR. SIMMONDS,—I am making a collection of Siamese raw produce, tissues, fancy works, &c., for next year's Exhibition. Col. Cavenagh, the Governor of Singapore, wrote, wishing me to incorporate the Siamese collection with that of the Straits Settlements, but I should rather like it to be separate. If, therefore, you can keep a space open, I shall place it under your care, and shall be glad if you will accept of it after the Exhibition is over.'

"The last consular reports of Sir Robert furnish much valuable information as to the trade and resources of that country, and its products are becoming better known in Europe. These embrace rice, sugar, sapan, and other dye-woods, dragon's blood, dammer, gamboge, benzoin, stick-lac, ground nuts, til seed, cardamoms, fibres, teak, and other useful woods, such as rosewood, satinwood, ebony, and krachi wood. Sir Robert remarks, that a number of woods, the produce of the forests in the interior, might become of importance were their qualities for naval or civil architecture, or as woods proper for ornamental purposes, sufficiently known. Among others he especially mentions a wood called takieng, which, as far as regards size and quality, might become a rival to teak, possessing, moreover, the great advantage that it can be easily bent by artificial means. He noticed in the king's building-yard a log of this wood, 135 feet long, perfectly sound and without a flaw. Most of the ornamental woods of Siam are entirely unknown to cabinet makers, although their colour and high polish would render them valuable additions to the articles of export.

"The King of Siam intends sending articles forward. Siam is a rising and prosperous State, with which our trade is likely to become more extensive, if not direct, at least through, the great eastern *entrepot* of Singapore. It is fast increasing its mercantile marine, and now owns upwards of 30,000 tons of shipping, a dozen of the vessels being above 500 tons, and 30 of them steamers; several of the latter have been built at Siam.

The Dutch and Spanish Colonies of the Eastern Seas will no doubt be duly represented. The Dutch Colonial Government formed a collection of objects for Paris in 1855, intended to exhibit the natural products and the industry of Java, and the other Dutch islands of the Archipelago. A trophy of boxes, barrels, woods, &c., formed the most conspicuous object in the Annexe, but it was undescribed, and unlabelled, except as 'musters of various plants.' A Borneo company, with a capital of £200,000, has been recently formed at Amsterdam, to develope the resources of that great island. It is under the patronage of the Dutch Government, which takes one-tenth share in the concern.

"In 1851 there were two or three specimens of Japanese products incidentally shown, consisting of copper, vegetable wax, varnishes, and coarse silk: but now that the trade has been opened up with that empire there will be a most magnificent collection exhibited.

"The treasures of art, nature, and industry of Japan, will, through the efforts of our minister and consuls there, be well displayed, and the collection be especially rich in large and fine specimens of porcelain, bronzes, and lacquer ware, in which the Japanese especially excel, in a way to rival the finest works of the same character in Europe. There will also be a good variety of raw and manufactured commercial products, and Her Majesty will doubtless exhibit the Tycoon's presents, which will serve to illustrate Japanese progress in arms, armour, harness, screens, and other manufactures.

"Although China will directly, as a foreign State, take no part in the Exhibition, yet, indirectly, there will be a very interesting collection of products and manufactures of this industrious nation shown, through the Hong Kong Committee, the consular establishments at the northern ports, and by merchants and others at home. Especially will there be magnificent trophies of the spoils from the Emperor's Summer Palace, in rich silk hangings, gold and velvet embroidered carpets, bronzes and vases, ivory carvings, and such like."

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

The annual meeting of this company was held on the 3rd inst. at the offices, Leadenhall-street; Mr. WILLCOX, M.P., in the chair.

Mr. HOWELL, the secretary, read the report, which stated that the company stood possessed on the 30th of September last of stock in ships, less the amount set apart for depreciation, amounting to £2,189,700; also of freehold and leasehold property in England, and docks and premises at Calcutta, Bombay, and other stations, £122 868; and stock of coals, naval and victualling stores, amounting to £430,421; also cash at bankers', investments, bills receivable, balances in agents' hands, and debts due to the company, £552,681, making the total assets £3,295,670. The capital received from the proprietors amounted to £2,100,000, and on debentures to £500,000; total capital, £2,600,000. The liabilities of the company, in bills payable or otherwise, amounted to £338,943, making the total capital and liabilities £2 938,943, showing a surplus of £356,727. This surplus was represented by the balance at the credit of the guarantee insurance fund. The gross revenue from freight, passage money, postal service contracts, charter money, and other sources, amounted for the twelve months ending the 30th of September last to £2,288,289, and the expenditure, including interest on debentures, reserves for insurance, wear and tear, and depreciation, to £2,131,432, leaving a net profit of £156,857. To this was added £1,033 from the preceding year, making a disposable sum of £157,890. From this was deducted £143,500 for the dividend of 7 per cent. for the year, leaving a balance of £14,390.

The proprietors' underwriting account showed a balance of £89,941, out of which £61,500 was deducted for a payment to the proprietors at the rate of 3 per cent., leaving £28,441 to be carried to the guarantee insurance fund, which would then amount to £356,727. The directors had recently accepted tenders for the construction of three new iron steamers —namely, two of 1,900 tons each and 400-horse power, and one of about 2,600 tons and 500-horse power, to replace four ships which had been sold. The last new ship, the *Mooltan*, had completed two trips between Southampton and Alexandria, and the result had been such as not only to justify the expectations held out, but to warrant the directors in the further adoption of the principles introduced in her machinery for the purpose of effecting economy in the consumption of fuel. The *Formosa*, *Granada*, and *Shanghai* were still under charter to the French Government in the East. The *Haddington*, since her conversion to a sailing ship, had added fairly to the general profits of the company, and had gained a high character as a fast and safe cargo-ship in the

Digitized by Google

Bombay trade. She was despatched from Southampton on the 19th of May last with new sets of boilers for no less than five of the company's steamers on the Eastern stations, and arrived at Hong Kong in 101 days. The freight of these boilers in ordinary sailing ships would not have cost less than £10,000. Since the last meeting the China mail service was, at the request of the Government, restored to its original condition of a fortnightly communication. The two new ships of 1,900 tons referred to above were destined at present to reinforce the company's fleet engaged in this branch of their operations. The whole postal service between England and India and China was being carried on subject to a termination on twelve months notice, either from the Government or the company, the original term of the contract having expired. The necessary notice of twelve months had not been served on or by the company, and the detailed time-table of the operations of the mail service for the year 1862 had just been agreed to between the directors and the Postmaster-General. The whole service, including that with Australia, had never been worked with greater efficiency and punctuality than during the last twelve months. During the past year no casualty creating a charge on the underwriting account had occurred to any of the company's ships; and when it was borne in mind that the distance annually traversed by the fleet amounted in the aggregate to no less than 1,261,350 miles, and that much of the navigation was of a peculiar and intricate character, the shareholders might, as underwriters, fairly congratulate themselves on such a result. An instalment of £5 on the new shares was paid on the 1st of April last—£30 had consequently been paid on those shares, leaving £20 on each—in all £400,000, available as capital. The sum borrowed on debentures had reached its limit of £500,000, and the directors did not experience any difficulty in the renewal or re-issue of the bonds as they fell due. The commercial operations of the company during the year had been on the whole satisfactory; and while in recent reports the directors had had, in advertising to a progressive advance in the receipts, to point with regret to a proportionate increase in the expenditure, due chiefly to the enhanced cost of coals, they were enabled in the accounts of the present year, which exhibited a slight falling off in the receipts, to show that there was a more than corresponding diminution in the expenditure. They were consequently enabled to recommend the usual dividend of 3½ per cent., making, with the 3½ per cent. already paid, 7 per cent. for the year. The amounts payable under the present report would therefore stand as follows:—Dividend, 3½ per cent.; underwriting account, 3 per cent.; in all, 6½ per cent.; and these payments would be made, free of Income-tax, in one warrant, on the 27th of December.

The CHAIRMAN, in moving the adoption of the report, said they had 40 ships on distant stations, some of them having a difficult and intricate navigation to perform, not one of which he was happy to say had met with any casualty during the year. He might also congratulate them on a diminution in the cost of coal to distant stations, but they could not rely for any length of time on the fluctuations in the shipping market. A diminution in the consumption of coal had arisen from the general introduction of the superheating principle and other mechanical appliances. This had been shown conspicuously in their last new ship the *Mooltan*, of 2,600 tons burden, having engines of 400-horse power, and, although the proportion of power to tonnage was small, it was important that those results were obtained, after giving a very satisfactory speed. During the trial trip those engines consumed rather less than half the usual amount of fuel. They would readily perceive the importance of a reduction in the consumption of fuel when he reminded them that they had paid as much as £800,000 for fuel in one year. Great credit was due to Messrs. Humphrey, who built those engines, and also great credit was due to Mr. Allen, one of their managing directors, who superintended those improvements, and, having been brought up an engineer, he was enabled to do so satisfactorily. He (the chairman) knew the anxiety Mr. Allen felt in having undertaken a most unnecessary responsibility to benefit the company—he feared a failure, and achieved a success. As to their revenue, there was no falling off in the general traffic; the falling off was confined to the specie freights, which they all knew were fluctuating items, and depended on the exchanges.

A SHAREHOLDER seconded the motion for the adoption of the report, and said he thought it very satisfactory in every respect.

Mr. GLIDDON contended that the directors had not furnished sufficient materials in the statement of accounts to enable the proprietors to form a sound judgment as to whether the utmost revenue had been obtained, and as to whether the expenses were no more than they should be. He wanted a variety of details—the average number of passengers per voyage, the expenses of each station, the number of men employed in each ship, the cost of maintenance, and so forth. He said the fares charged were higher than those of any other company, and recommended a reduction in the fares with a view to secure a greater number of passengers.

Dr. BEATTIE thought the report was highly satisfactory. It was very gratifying that none of their ships had been lost during the year, and that the consumption of fuel had been reduced successfully, as shown by the voyages of the *Mooltan* to Alexandria and back. The success of this operation was entirely due to the exertions of the managing directors, and to their engineer, Mr. Humphrey. He believed that about 40,000 tons of coal had been saved by these improvements, and when they were more extensively adopted in their fleet the sum available for dividend would be increased.

Captain COFFIN wished to know whether the Australian route was a paying one.

The CHAIRMAN said it was, most decidedly. The directors had taken care that it should pay them even without traffic.

Mr. JONES thought the objections of Mr. Gliddon were groundless, as the accounts had been on the table in the office several days prior to the meeting for the inspection of the shareholders. He had exercised his privilege, and had obtained all the information he required.

Mr. ANDERSON, one of the managing directors, replied to the various observations. If all the details that had been spoken of were to be given at a general meeting it would occupy two or three days instead of as many hours. The number of passengers by each ship was stated in the newspapers. The operations of the company had been always conducted with the utmost economy consistent with efficiency. The coals and stores were supplied by tender from fifteen or twenty different firms, and the best provisions were obtained at a moderate rate. Instead of 7 per cent., their dividend for the past year was actually 10 per cent. Their fares were quite as low as those of any other steam navigation company. The fares of the Peninsular and Oriental were all round at the rate of 3d. per nautical mile. The Royal Mail Company charged 3½d. per nautical mile, and Cunard's Company 2¾d. per nautical mile, being only a farthing less than their company charged, although Cunard's Company obtained their coals at 14s. per ton, while the Peninsular and Oriental Company had to pay five times that amount for distant stations. Cunard's Company found no wines, but their company did.

The report was then unanimously adopted, and a dividend at the rate of 3½ per cent. was declared for the six months ending the 30th of September last, and 3 per cent. for the year ending at the same date from the insurance fund, both payable on the 27th inst.

The retiring directors, Captain W. H. Hall, R.N., and Mr. T. M. Weguelin, M.P., were re-elected; and also the retiring auditors, the Earl of Leven and Melville, and Mr. A. Mackenzie.

Mr. HADOW, the Deputy-Chairman, stated that there was not a single item in the accounts that could not be fully and satisfactorily explained to any shareholder.

The proceedings concluded with a vote of thanks to the chairman and directors.

THE NEW STEAMERS FOR CHINA.

Messrs. Lyall, Still, and Co.'s steamer *Express* left Glasgow on the 3rd inst. for Hong Kong. She is intended to make the voyage under canvas, and is under the command of Captain Castilla. Messrs. Gibb and Co.'s steamer, *Jin Kee*, late *Celestial*, Captain Macdonald, will have her trial trip next week, as also Messrs. Dorobjee Norojee and Co.'s *Nurgis*. Messrs. Jardine's steamer *Reiver* will make an extended trial shortly. The *Chevy Chase* is proceeding with her repairs.

In consequence of the favourable accounts for the employment of steamers on the Yang-tze, we hear of offers being made for the purchase of suitable steamers to be despatched forthwith.

The China and Japan Steam Company have advertised for a commander for one of their steamers, which will be shortly ready to proceed to China.

Naval and Military.

Indomitable, sailing ship, arrived at Spithead yesterday morning from the Cape of Good Hope, with the right wing of the 59th Regiment on board. The left wing of this regiment will, it is expected, come home in the *Boanerges*.

The *Orpheus*, 21, screw, Commodore Burnett, C.B., will convoy the *Melbourne*, screw transport, laden with troops, arms, and stores, to the St. Lawrence or Halifax. This duty performed, so far as existing orders go, the *Orpheus* will then proceed on to the South Australian station, for which she has been fitted as flagship.

An order was received in camp at Aldershot, from His Royal Highness the General Commanding-in-Chief, calling upon the division to furnish three non-commissioned officers per regiment to proceed to Canada forthwith, for the purpose of assisting in the organisation of the Militia in that country.

The *Hero*, 89, screw, Captain Ryder, at Spithead, has taken her departure to join Vice-Admiral Sir Alexander Milne's squadron on the North America and West India station.

The Secretary of State for War, with the concurrence of His Royal Highness the General Commanding-in-Chief, has decided that when batteries belonging to brigades of Royal Artillery serving at home proceed abroad they should continue to render their pay-lists to the brigade paymaster, who will incorporate them in his quarterly brigade accounts; or, if the station at which the battery is serving be so distant as to cause delay to the brigade accounts, then the paymaster will render a separate quarterly account for such battery. The Secretary of State also directs that officers in command of batteries of the 7th and 12th Brigades shall send pay-lists in future direct to the War-office, with the exception of batteries in China, where there is a special paymaster. The appointments of acting paymasters in these brigades will, therefore, cease.

The Spanish expedition, which is being organised at the Havannah, destined for Mexico, is to be composed (according to the *Constitutional*) of twelve war vessels, and among them eight of the first class, with Government and merchant transports sufficient to convey the *personnel* and *materiel* following:—6,000 men of infantry, 300 artillery, 200 engineers, 150 horses, and three batteries.

The Cunard steamship *Persia* has been chartered by Government for the conveyance of reinforcements to Canada. She will sail, along with the *Australasian*, in about four days. The destination of both vessels will probably be the Riviere du Loup, or the Island of Bic.

NAVAL AND MILITARY INVALIDS FROM CHINA.

The hired transport *C. S. Lemon*, Capt. Campbell, arrived from Hong Kong on the 26th ult., at Spithead, and proceeded to Woolwich. Her naval invalids, twenty-eight in number, were landed from her by Government steamer. The military invalids are 190, from various regiments. The officers on board comprise—Mr. Parkes, R.N., Admiralty agent; Capt. Baldwin, 31st regiment, in military charge; Mr. Lloyd, 67th regiment; Quartermaster Ketyles; Dr. Kinahan, 44th Regiment; Mr. White, Military Store Department; and Assistant-Surgeon Mackay, 1st Royals, in medical charge. Fourteen deaths occurred on the passage home, which has been much retarded owing to a predominance of light winds.

LONDON, SATURDAY, DEC. 14, 1861.

THE RETURN OF RAJAH BROOKE.

SIR JAMES BROOKE has once more returned to England. After nearly twenty years of arduous labours, of energetic administration, of vigorous and courageous policy, the Rajah of SARAWAK resigns the staff of office in search of rest and health on his native shores. Sir JAMES BROOKE, like all men of strong will and earnestness of purpose, like all men who have a single aim in view, and who are heroic enough to over-ride all obstacles in order to obtain t, has gained many warm friends in the course of his career, iand many hearty enemies. In Parliament he has been opposed by some of our ablest members, and the frequent paper wars which have merely sufficed to test his metal would have crushed any man with less self-reliance and decision of character.

We are no indiscriminate admirers of the Rajah of SARAWAK. The very virtues which have won him a conspicuous place in modern history have sometimes drawn him into unfortunate positions, and led even to the commission of serious faults. Nevertheless we do believe, and we are sincerely glad to say so while giving him an English welcome, that throughout his long and varied career Sir JAMES BROOKE has honestly striven to ameliorate the condition of the Dyaks, and at the same time to promote the legitimate interests of his countrymen. Lord DERBY once styled Sir JAMES BROOKE'S government of Sarawak a "half-political, half-commercial speculation," and said that what he had done had been for his own purposes and objects. These remarks are not just to the character of the Rajah. A speculation for private ends, however honourable it may be, assuredly demands no public recognition. If Sir JAMES BROOKE assumed the reins of government at Sarawak to gain a position for himself, and to put money in his purse, we should hereby regard him as a clever adventurer; but no one who reads what he has written, or knows what he has done, can believe that a man highly gifted, thoroughly educated, fond of literature, and with a keen sense of social enjoyment, would have exiled himself during the best portion of his life from all that makes life dear, would have incurred almost constant peril and no small amount of obloquy, to gain a precarious income in a semi-barbarous country, or to enjoy the petty luxury of chieftainship over a miserable people. Never, surely, did any one choose a less enviable post, or one which demanded more bodily privation and more constant anxiety of mind. "I work," he says in a private letter, "like a galley slave. I "fight like a common soldier. The poorest man "in England might grumble at my diet. Luxuries I have "none, necessaries are often deficient." Still he resolved that no obstacles should daunt him, and that while GOD gave him life and strength he would never abandon the task he had undertaken until his efforts were of no further use. Twenty years ago this vow was made, and it has been bravely fulfilled. In the farewell greeting which Sir JAMES BROOKE received from the merchants of Singapore, a notice of which appeared in our last number, he was told, and told truly, that while the position of British interests on the N.E. coast of Borneo would have been far different had his measures been carried out in their integrity, yet that he had succeeded in establishing good government, order, and prosperity in Sarawak and its dependencies; that he had won the affection of his people, and had rendered the character of an English gentleman in the Far East brilliant and renowned. Such a testimony is all the more valuable as coming from Singapore, and we do not wonder that Sir JAMES BROOKE was gratified by the kindly feeling manifested at this meeting.

At some (let us hope) distant day, when Sir JAMES BROOKE shall be gathered to his fathers, the story of his extraordinary career may be told more fully and impartially than it can be at present. It will read like a tale of old romance rather than of modern history, a tale of which a DRAKE or a FROBISHER might have been the hero, and which deserves a place beside those marvellous adventures of the ELIZABETHAN era which have done so much to extend the name and fame of England. Yet to Sir JAMES BROOKE'S career there attaches a peculiar interest which scarcely belongs to the doings of the brave old heroes whose figures stand out so prominently in our British Walhalla.

OUR POLICY TOWARDS JAPAN.

OUR Foreign-office is evidently perplexed as to the course to be adopted by the Government in relation to Japan. With the expedition to Mexico on hand, and the possibility of a war with the United States before them, her Majesty's Ministers may not be disposed to regard the Japanese imbroglio as of quite so much importance as it naturally assumes in the eyes of those of Her Majesty's subjects who are located, under peril of their lives, at Yedo and Yokuhama. The dread, too, of another war in the Far East, expensive and profitless as it would be likely to prove, may well make any Ministry hesitate before deciding on the steps to be taken in consequence of the recent assault on the British Legation. Every one feels that "something" should be done, but nobody ventures to say what we ought to do, for on every side the subject is surrounded with difficulties. It would be fatal to our prestige if we were to allow the assault to pass unnoticed; but the Foreign Secretary is at the same time well aware that the conduct of our representatives in the "Land of the Rising Sun" has not been entirely blameless. Mr. ALCOCK is a very able man, and in former days proved himself a very useful official, but in Japan his natural good sense has been overpowered by arrogance and obstinacy. Every allowance should be made for a gentleman placed in a position so difficult as that which he occupies; but when we find him more than once rebuked by the Government which he represents, when we see his continual misunderstandings with the Japanese, and that he is in even worse favour with his own countrymen in Japan, it is only a mild judgment to conclude that neither his temper nor his administrative capacity fit him for the post which he holds, and from which he has lately had the good sense to ask to be relieved. In taking upon himself to threaten the Imperial Government with war, upon insufficient grounds, and without any authority for so doing, Mr. ALCOCK placed himself in an awkward and undignified position. In lecturing the English merchants at Yokuhama in very lengthy and oppressive circulars, which would have come more fittingly from a college professor than from a diplomatist, he showed a want of that tact which is absolutely necessary to success in the service to which he belongs. There may be a difference of opinion as to whether he was right or wrong in leaving Yedo on the occasion of the murder of Mr. HEUSKEN; but it is undeniable that if he was right in leaving he was wrong in going back, when there was no real change in the position of affairs; and that if he was right in going back he was utterly wrong in leaving; and it is far from unlikely that his vacillation on that occasion may have given encouragement to the recent attack upon him.

If Mr. ALCOCK, the head of our diplomatic and consular service in Japan, has thus misrepresented his country, his principal subordinates have not been behindhand in following his example. There are only three ports open in Japan, and at each of these ports the consular officer has managed to make himself notorious. At Hakodadi the Consul has been altogether superseded, it being found that his lax conduct led him even beyond the latitude which has been allowed in that new country. The Japanese Ministers for Foreign Affairs formally charged another Consul with an attempt at outrage, and the facts alleged were at least sufficient to induce the British Minister to remove him from the capital. Of Captain VYSE we do not desire to speak severely. That gentleman possesses a comical reputation for the unique character of his literary attainments. Certainly he never underwent the ordeal of a competitive examination, nor could he ever have received a single lesson in English composition. Imagine a man holding a responsible position under Her Majesty issuing an offi-

Digitized by Google

cial notification in such language as the following:—"British subjects are requested to be careful how they walk about during the next week, the undersigned having heard that the streets of Yokuhama are likely to be exceedingly crowded, and to remain at home during the evening." We need scarcely wonder after such a specimen of Consul VYSE'S capacity, that he is liable to a certain obfuscation of intellect, and that British subjects under his fatuitous jurisdiction are often puzzled by his conflicting orders. Need we wonder if we are now feeling the effects of the injudicious appointments which have been made in Japan, and if we feel it especially at this moment, when it is of vast moment that the Government and the public should be able to place thorough reliance upon the wisdom of their diplomatists in Japan?

It is evident that the greater number of the Damios, or territorial princes, are bent upon the exclusion of foreigners, whether by open violence or by a system of discouragement and annoyance. Foreign trade threatens to destroy the elaborate social and political arrangements of the country, and it may be questioned whether we have anything to offer to the Japanese which can compensate them for the disorganisation which our presence can scarcely fail to produce. The value to ourselves of trade with Japan is a far broader question, and one on which, at present, we do not propose to enter. This only we will say, that if our commercial relations with the country cannot be consolidated, except by force of arms, it is very questionable whether it will be politic to resort to such an expedient. That it would be wrong in a moral point of view we have no doubt whatever.

FRENCH POSTAL LINE FROM SINGAPORE TO COCHIN CHINA.

BY an arrangement between the English and French Governments, all French mail matter is received at and forwarded from Singapore for France, or the French settlements, by a special mail agent, appointed by the French Government; and all mail matter designed for or received from France or French colonies is, on its arrival, first delivered to the mail agent, and by him transmitted to the Post-office here.

The French line of steamers to Saigon consists of the *Formosa*, *Granada*, and *Shanghai*, together with the *Echo*, for supplemental or occasional service. All French vessels of war in passing are to serve, if required, in aid of this line. They admit no cargo, but take passengers free of charge, except for table money, &c., on a permit to embark granted on application to the French Consul.

MR. OLIPHANT AS CONSUL-GENERAL IN JAPAN.

WE have authority for stating that the post of British Minister in Japan, which Mr. Alcock is anxious to resign, has been offered to Mr. Oliphant. At present, however, that gentleman has not accepted the office, and it is probable that the unsettled state of our relations with Japan, and the severe injuries he has recently received, have combined to make him hesitate before entering on a position which is alike pregnant with difficulty and danger.

THE MALTA AND ALEXANDRIA CABLE.

The non-arrival of the usual private telegrams and those through Reuter's agency on the 8th inst. caused some anxiety as to the condition of the Malta and Alexandria Cable. It appears that there has been a temporary suspense of five days in the operation of the lines through Italy, owing to the process of re-insulating a large portion of the line which the engineers have considered expedient, in order to give greater efficiency to the transmission of messages. These renovating movements are now completed, and on the 12th a message came through in eight hours from Alexandria.

London Gazettes.

The Queen has been pleased to give and grant unto Colonel the Hon. St. George Gerald Foley, C.B., Her Majesty's Royal licence and permission that he may accept and wear the insignia of the Imperial Order of the Legion of Honour of the Third Class, which His Majesty the Emperor of the French has been pleased to confer upon him as a mark of His Imperial Majesty's approbation of his distinguished services before the enemy during the late combined British and French operations against China.

A correspondent of *The Times*, on the 10th inst., calls attention to the French having awarded the indemnity to the families of the victims in the Chinese campaign, while our Treasury has given no intimation on the point.

Continental Intelligence.

FRANCE.

The *Moniteur* of Dec. 5 publishes a report to the Emperor from the Ministers of Foreign Affairs and War on the subject of the indemnity paid by the Chinese Government for the fourteen persons who were the victims of a treacherous attack made on some French subjects, civil and military, at Yang-Tchéon, on the 18th September, 1860, and of whom eight were killed and six injured, but still living:—

"The amount paid by the Chinese Government was 200,000 taels, of 1,539,919f., which has been apportioned as follows:—To the widow of Colonel Grandchamps, 125,000f., and to four other relatives of the deceased, 12,500f. each, making 175,000f.; to the brother of Victor Debut, sub-military intendant, 160,000f.; to the brother of J. Ader, officer attached to the military hospitals, 130,000f.; to the father, mother, and sister of the Abbé Deluc, a Jesuit missionary, 140,000f.; to the father, mother, brother, and two sisters of J. A. Blanquet, hospital attendant, 100,000f.; to the father, mother, brother, and two sisters of N. Bouichot, a private in the Waggon Train, 100,000f.; to the aunt of L. Faurien, a private in the 102nd Regiment, 40,000f.; and to the mother, brother, and two sisters of P. Ouzouf, a private in the Foot Chasseurs, 100,000f. The ollowing are the sums awarded to those who are still living:—To M. d'Escayrac de Lauture, charged with a scientific mission, 100,000; L. F. J. Bachelet, private in the 101st Regiment, 90,000f.; C. Roger, private in the African Chasseurs, 90,000f.; J. Ginestet, private in the Waggon Train, 93,000f.; J. Petit, ditto, 106,811f. (this man received four wounds in defending himself), and F. Novalm, private in the same regiment, 90,000."

All these sums are to be paid with interest, and without any deduction for legal or other dues.

General Montauban, late commander of the French troops in China, has been admitted a member of the French Senate.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, Dec. 5.

The merchants at Kiachta are making strenuous exertions to maintain their ground in the face of the gradual measures of reform taken by the Russian Government, and their provisional steps towards the future introduction of the free-trade principle which peculiarly characterises the reign of the present Emperor. In addition to what they have already done to cement and increase their relations with the interior of China—their trade having been hitherto confined to the Chinese frontier-town of Maimatschin—they have now subscribed amongst themselves the sum of 15,500 silver roubles to be devoted to the following purposes:—

"1. To send J. A. Nerpin, a merchant of the Third Guild, accompanied by an experienced secretary as assistant, to Peking, to watch the course of trade as their agent there.

"2. To send the former Chorunshi, P. R. Koffriggin, who understands and speaks fluently both the Russian and Mongolian languages, to Ourga, with the view to consolidate and improve the amicable relations between the two countries, as well as to make the needful preparations for the reception and comfort of the caravans on their arrival, and watch the events connected with trade.

"3. To establish a postal service between Kiachta and Peking.

"4. To send five young men of capacity and intelligence with Mr. Nerpin, for careful instruction in the Chinese language."

The above sum is intended to defray these expenses for one year, the merchants reserving to themselves the right to subscribe further supplies for the purchase of houses for a factory and warehouses at Peking and Ourga, if found advisable at a later period.

A plan has been brought out for the greater development of the metallic riches of the Ural Mountains, which attracts much notice, both from the source from which it emanates and the importance of the subject itself. It is proposed to construct a railway from Perm, on the river Kania, across the Ural chain of mountains to Djumen on the Tura, one of the tributaries of the Yrtisch, a distance of 554 wersts (about 400 English miles), the expense of which is estimated at not more than 45,000 roubles per werst. In the absence of this facility of communication coals, provisions, and of course wages, have risen within the last few years in a most alarming ratio. The price of corn at Nischky-Tagitsk, which, no further back than 1857, was 27 kopecks per pood, was 36 kopecks in the following year; in 1859 it rose to 68 kopecks, the average price in 1860 was 95 kopecks, and now it is considerably more than 1 rouble. The statistical tables show that the mining interest of that district paid last year 6½ millions of roubles more than in 1857 for wages to their workmen. By the execution of this project not only would the price of provisions and coals be materially lowered, but it would enable the owners of mines to send their produce with greater facility to distant markets, and enter into competition with the metals of other countries. The proposal has been favourably received by the Emperor and the Govern-

Digitized by Google

ment departments, and it is not unlikely that, in the course of this winter, a joint-stock company will be formed for the execution of this grand project, which in the end cannot fail to facilitate and increase the communication between European Russia and Siberia, and reduce to a minimum the most dangerous and difficult part of the journey. The line has already undergone a provisional survey, and the difficulties to be surmounted are not so great as might have been expected.

The frost having set in for the winter, the navigation of this port is entirely closed. During the time it was open the number of vessels that arrived here was 2,142, whilst the departures amounted to 2,128. The frost set in so suddenly at Cronstadt as to freeze up unexpectedly fifty-six loaded lighters, but the nineteen outward-bound steamers loading were just able to get away, some half freighted and others empty.

Count Putiatin, who so successfully negotiated and concluded the late Treaties with Japan and China, appears to be a better diplomatist than Minister for Public Enlightenment, which office he has held for the last year or two, but which he has now resigned, having failed to give satisfaction to the Emperor, and finding himself naturally quite out of his element, which is the sea. In no other country in the world would an admiral of the navy be considered eligible to such a totally different department, and be appointed "Minister for the Enlightenment of the People."

Even in this distant country the difficulty of obtaining raw cotton is beginning to be seriously felt, and manufacturers are casting about to see from what new quarters supplies can be obtained. The *Northern Bee* points out the importance and even necessity of cultivating closer commercial bonds with the cotton markets of Central Asia as the most natural sources of supply for the Russian manufacturers, as they produce more than enough for the requirements of this country, and would have the advantage of making us independent of cotton from North America. Chiva, Bokhara, Kokand, Turkestan, and China, whose supplies of this useful article are all available in this country, not only produce it in sufficient quantities, but the quality is very superior, and might even be considerably improved by paying a little more attention to the cultivation of the plant itself, and particularly the cleaning it from the pods and seeds.

PRUSSIA.

(FROM AN OCCASIONAL CORRESPONDENT.)

BERLIN, Dec. 9.

Despatches and private letters from the Prussian Embassy to China have been received here, the latest dates being the 15th of September from Che-foo. The treaty with China was signed by the late Emperor, it being one of the last acts of his life. The Prussian Ambassador, Count Eulenburg, went to Peking on the 10th of that month, and intended to embark with his suite for Hong Kong about the middle of October. A report had been current for some time that Prince Kung had been murdered by the famous Tartar General San-ko-lin-sin, who had seized the reins of Government. It now appears that there is no foundation whatever for the report, nor for another one to the effect that the late Emperor had been poisoned by Prince Kung, though it must be confessed that both rumours sounded plausible and in conformity with our ideas of the traditional policy of Asiatic dynasties. But the simple truth is, that the Emperor Hien-fung died of an attack of *delirium tremens*, brought on by his addiction to Sam-chu, a Chinese spirituous liquor resembling arrac. As he was also well known to have an extensive harem, and to be a great consumer of opium, it was no wonder that he did not pay much attention to the affairs of state, but abandoned them to his Ministers. Prince Kung had gone to Tartary to attend the funeral of his brother, the late Emperor. It was generally expected that on his return he would, through the influence and representations of the Ambassadors of England, France, and Russia, be admitted as a member of the Regency, that being considered the only step for the future security of the Mant-choo dynasty, as the European Powers would then be more likely to support the Government against the rebels. At first it was supposed that greater advantages would be derived in the way of commercial facilities from an alliance with the latter, the more so as they seemed favourable to the cause of Christianity. But this illusion appears now to be dispelled. It is true the ports on the Yang-tse-Kiang are open to foreign trade, and ingress afforded to the tea and silk districts; but after all it is felt that the real producers of these two staple articles of the country are not the restless Taepings, but the loyal and peaceable cultivators of the soil. It is scarcely to be expected that even if the French Emperor were in favour of it, England would support him in what could not fail to be considered an unpopular war in China; but a reinforcement of the naval forces, or even the arrival of a couple of regiments, would have a great moral effect on the future destiny of that country.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Dec. 6.

In my last letter I stated the general currency of a rumour that in future the Government no longer intended to advertise for tenders in this country for the supply of military stores for the army in India, preferring in future to make their purchases on the spot. Owing to the prevalence of the report, a great number of letters have been addressed to the Colonial Department by parties interested in the question to inquire if there is good foundation for the truth of the rumour. These inquiries have become so numerous as to induce the Minister to insert as an answer the following paragraph in the official *Staats-Courant*:—

"The Minister for the Colonies hereby informs all parties who have written to the Colonial Department for explanation of the notice published by the Superintendent of the Military Administration of the East India army in the *Java Courant*, under date of the 2nd of August last, concerning tenders for military requirements for the army in India, that orders were sent out from this country by the Colonial Department in 1859, and again in the beginning of the present year, empowering the Governor-General to purchase provisions for the troops, and other needful articles, such as oil, nails, leather, yellow metal, English and Swedish iron, steel, lead, tin, white-lead, and zinc-white, and window glass, on the spot, provided such articles can be purchased at acceptable prices; but that orders were sent out the beginning of last month to the Governor-General of Netherlands India not to extend the list of articles required for the military service, to be purchased on the spot, without first writing home for further instructions."

A numerously attended public meeting was held a few evenings since in the great saloon of the building belonging to the Netherlands Yacht Club to hear an address delivered by Dr. J. J. van Limburg Brouwer, of Java, on the cultivation of cotton in the Archipelago of Netherlands India, and the best means to be adopted for its further extension and improvement. After giving an account of the present system of cultivation followed in the East, the learned lecturer proposed the establishment of a company or association for the increase of cotton cultivation, so as to render the manufacturers in this country comparatively independent of American cotton. The company he proposed to be domiciled in this country, and the direction in India confided to local agents, one to be appointed in each of the cotton-producing districts and new localities where the soil and climate may appear to be more especially adapted for the cultivation of this useful and important plant. The statutes and bye-laws of the company would be published as soon as possible, the capital to be subscribed to be in accordance with the interest taken by capitalists in this country. In the course of his address the learned Doctor stated that many attempts had been made to introduce the cultivation of the perennial cotton plant in Netherlands India, but it had not succeeded, as it was found to be more exposed to the ravages of insects than the annual plant; besides, in Java the natives were strongly opposed to it, whilst in Jamaica they find it more profitable to cultivate coffee and tobacco. It was not intended that the Company itself should embark in the cultivation of cotton, but rather to give advice on the subject to the natives and purchase from them their produce. Experience proves that most foreign plants deteriorate quickly in Java, as is known to be the case with tobacco. The question then arises, what course ought to be adopted with cotton? Should fresh seed be imported every year? The answer to this must be decided by practical trials. The lecturer stated that he had sent some samples of cotton out of the Company's last sale to Manchester, a part of which was produced from Javanese native seed and partly from seed imported into Java from New Orleans. A comparison of the yarns spun from each was favourable to the native seed, but further trials were required to test the problem to the utmost. Formerly a higher quality of yarn than No. 24 could not be spun from Surat cotton. To produce No. 28 it was found needful to add from one-third to one-fourth the quantity of New Orleans cotton, but of late such improvements have been effected that No. 38 is now produced exclusively from Surat. At the conclusion of the address, which was received with the deepest sympathy and interest by the audience, on the proposition of the chairman, Mr. Joost van Vollenhoven, a vote was unanimously passed, recording in the most flattering terms the cordial thanks of the

Digitized by Google

meeting to the learned Doctor for his interesting and important communication.

In my letter of Nov. 8,* I mentioned the disagreement that had taken place between the professors of the Oriental languages at the Royal Academy at Delft and the director of the institution, and that the former had forwarded an address of complaint to the King. The students unanimously sided with their professors, and as they refused to conform with the new regulations, the establishment has been closed for two months, and the pupils sent to their respective homes. The following circular has been forwarded to the parents and guardians of the students:—

"I have the honour to inform you that H.M. the King, on the recommendation of the Minister of the Interior, after consulting with his colleague the Minister for the Colonies. and in accordance wtth the sentiments expressed by H.R.H Prince Henry of the Netherlands, in his capacity of Patron of this Royal Academy, has been pleased to ordain, by Royal Decree of yesterday's date (X No. 9), to close the Royal Academy of Delft from this day for the space of two months, on the ground that the students refuse to obey the regulations contained in the Royal Decree of the 7th of September last."

Against this measure the students entered a formal protest, and forwarded also a formal address containing a statement of their grievances to both Chambers of the States General. The Municipal Council of Delft has also sent a petition to the King in favour of the rescission of the new regulations, which are generally considered harsh and tyrannical.

The Dutch clipper *Noach*, Capt. Wiercks, of 892 tons register (belonging to the eminent house of Fop Smit, of Kinderdyke) which sailed from Brouwershaven on the 1st of May last for Batavia, made a splendid run out in 72 days, and returned to the above port on the 27th of November, making the passage home in 84 days. When it is considered that the vessel remained 53 days at Batavia, discharging and taking in cargo, it may be recorded as the quickest voyage out and home ever performed by a vessel of this country, the whole time occupied being five days less than seven months.

Arrangements have been made in this country also to send telegrams to India eight days after the departure of the bi-monthly mails, so as to catch them at Alexandria.

To facilitate the execution of the Royal Decree mentioned in my last for increasing the number of men as reinforcements for the army in Netherlands India to be sent out this year from 1,500 to 1,900, orders have been given to offer a bounty of 120 florins for each well-conducted private of the infantry, and 150 florins for troopers, as an inducement for them to exchange from the Home Service into the East India army.

Major-General Meiss, of the East India army, late Governor of the West Coast of Sumatra, has just died at a very advanced age.

Owing to the short supplies of cotton, which are beginning to be severely felt in this country, the great cotton spinning establishments at Twente have reduced their daily working time by two hours, and it is even contemplated by some to effect a still greater restriction of work.

There has been an election at Rotterdam to fill two vacancies in the Chamber of Commerce and Manufactures in that city. The one terminated in favour of Mr. J. R. Mees, with an absolute majority (114 out of 128 votes). In lieu of Mr. G. Obreen, appointed Managing Director of the Netherlands Trading Company, the votes were divided between six candidates, the highest number being obtained by Mr. J. C. Burlage, who polled 57 votes, whilst 40 were given for Mr. J. G. de Bruyn. Consequently a second competition will take place between the two last-named gentlemen.

Mr. D. Boes Lutjens is appointed Assistant-Resident Magistrate and Commander of the local militia at Amboyna, and Mr. J. B. Malherbe to be Government Secretary of the Molucca Islands.

The medical treatment of the sailors belonging to the steam frigate *Evertsen* at the Naval Hospital at Willems-oord does not appear to be attended by the favourable results expected, as the number still there is stated to be one hundred and thirty-four.

A letter from Harderwyk mentions that a detachment of supplementary colonial troops, consisting of a hundred and fifty non-commissioned officers and privates, under the command of Captain B. J. Bosstraeten, of the East India army (returning to India from leave of absence to this country), accompanied by the Second Lieutenants of Infantry, A. Verbrugh and F. de Cock-Bruning, and the Second Lieutenants of Engineers, J. C. Dory and H. G. Derx, as well as H. Greve, medical officer of the Third-class, embarked at Nieuwe Deep on board the chartered transport *Cheribon*, Captain W. J. Coers, for Java, on the 30th November.

The Netherlands Trading Company invites tenders for the conveyance of five hundred tons of steam coke from Birkenhead to Onrust in Java.

H.N.M. screw corvette *de Linge*, commanded by First-class Lieutenant van der Hack, left the port of Helvoetsluys on the 1st of December for Batavia, to reinforce the squadron in the Eastern Archipelago. She has on board a mail from this country for Netherlands India.

Professor H. W. de Vriese, of the Leyden University, has commenced a course of lectures in the large saloon of the chemical laboratory in that university, on the agricultural and vegetable produce exported from Netherlands India.

His object is to demonstrate the necessity of the application of scientific discoveries and improvements for the due development of the intellectual faculties of the different native races inhabiting the Indian Archipelago, and he gave a most interesting account of his late official tour in the East, connected with the Government examination of the state of the cultivation of all the different articles of native produce.

The Dutch steam corvette *Princess Amalia*, Lieutenant A. J. Kroef, commander, which sailed from Batavia on the 15th of August last, after stopping for a few days at the Cape of Good Hope, arrived at St. Helena on the 29th of October. All well on board.

PASSENGERS ARRIVED.

Per *Elise Henriette*, Capt. Detering, at the Texel, from Batavia: Mr. and Mrs. W. Putter and child, Mrs. M. Kuhn.

Per *Rodbertus Hendrikus*, Capt. Mulder, at Brouwershaven, from Java: Mr. and Mrs. Klein van der Poll, two children, and Japanese native servant; Mr. and Mrs. Hempenius and three children, Mr. and Mrs. Tergan, Mr. Wolf van Westerode, and 14 passported soldiers.

Per *Ferdinand Brumm*, Capt. Voss, at Nieuwe Deep, from Batavia: Mr. and Mrs. H. Wittich and family.

Per *Staatsraad van Ewyk*, Capt. de Winter, at Nieuwe Deep, from Java: Mr. J. C. van Gabauer, E.I. Civil Service; Capt. and Mrs. D. L. Immink, Messrs. Huisman, Van Daveren, and H. Strengnaerts, officers in the E.I. Civil Service.

Per *Noach*, Capt. Wierck, at Brouwershaven, from Batavia: Capt. and Mrs. W. B. van Zip, Mrs. Ernst and son, 32 passported soldiers.

Per *Ternate*, Capt. Cars, at Brouwershaven, from Java: Capt. Zwaanshals, of the Dutch navy; W. Scholler van Aschat, naval officer; Mr. Liefting and family, with native attendants, two children of Mr. Lourens, 25 passported soldiers and 2 marines.

PASSENGERS OUTWARDS.

Per *Broedertrouw*, Capt. Rotgens, from Amsterdam, to Batavia: Mr. and Mrs. W. E. van Charante and three children, Miss S. Haexman, Messrs, J. H. de Riemer, W. Diemont, J. G. Hunger, and — Wynoldi.

Per *Wassenaer*, Capt. Hoffstee from Amsterdam, to Batavia: Capt. W. J. Visser, E. I. Army, Mr. H. Daarnhouwer, Mr. and Miss Hoffstee.

Per *California*, Capt. de Wyn, from Amsterdam, to Batavia: Mr. and Mrs. J. A. van Dissel and two children, Mr. T. G. King.

Per *Johanna Catharina*, Capt. Besseling, from Amsterdam, to Samarang: Miss J. Tulliken and A van Wurden.

Per *Johanna Catharina*, Capt. Burhoven Junius, from Amsterdam, to Batavia: Mr. and Mrs. H. Ravenswaay and son, Mr. and Mrs. A. Bruinsteede and daughter, Mrs. M. G. Soeterik, Mr. A. Fuezen, Mrs. H. Nelis-Thierbach, Mrs. H. Simons-Nelis and four children, Miss A. C. Miltenburg, Mr. J. van der Linden, and Mr. A. Engelten.

COMMERCIAL.

COFFEE continues in favour, the demand being greater than the supply, and the shortness of stocks beginning to be seriously felt. Under these circumstances holders demand 45½ cents. for good ord. Java, which has been paid in some instances, and the transactions would have been much larger if the market was better assorted. At Rotterdam a parcel of 7,100 bags Padang ex *Tryntje Fenna* was sold in a lump to one house, but the price did not transpire.

SUGAR.—Market rather firmer; about 10,000 bags private trade Java changed hands at from ¼ to ¾ fl. under September sale prices. The company's sale went off as follows, and the whole was sold:—

Kranjangs.	Colour.	Standard.	Average Sale price.
515	Yellow	No. 9	29½ fl.
470	"	10	31½
950	"	11	34¼
1138	Grey	12	34¾
762	"	13	35¼
257	Half-white.	14	37
1511	Half-white.	15	38¾ fl.
4667	White	16	38¾
2730	"	17	39¼
687	"	18	39¾
75	"	19	40

The greater part was taken for exportation. According to the official tables the stock of raw sugar in bond in this country on the 15th Nov. amounted to 38,166,595 kil., against 45,518,950 kil. on the 15th October, and 50,137,148 kil. on 15th September. Refined market remains active; a good many large contracts for crushed B & H and W & Z have been concluded for delivery in February and March. Several of our principal refiners are unable to undertake further contracts. There is a brisk demand for candy.

RICE.—Owing to the large sales during the last two months stocks are rapidly decreasing, and as but few supplies are known to be on the road the market is in a very buoyant state, and higher prices again demanded, which, however, tend greatly to impede business operations.

SPICES.—Some sales of nutmegs, No. 1 and 2, are reported at a trifling advance on last sales prices. Other articles calm.

* *London and China Telegraph*, No. 72.

Digitized by Google

Tobacco.—Some large sales of Java went off with animation, and at prices far above the estimated market value. Amongst the lots sold may be mentioned the following:—

1680	packages	Temayang	from	35½c. to	114½c.	average	55 cts.
370	„	FF	„	27	33½	„	30½ „
1232	„	Tempeh	„	31	137½	„	57 „
41	„	L	„	31½	..	„	31½ „
177	„	BT	„	31½	38	„	34½ „
1065	„	DMvo	„	28½	110	„	52 „
826	„	AFH	„	32½	84	„	46 „
411	„	JV	„	28½	91½	„	56 „
284	„	M	„	41	120½	„	77 „
147	„	CP	„	39	73½	„	51½ „
66	„	D	„	40½	56	„	43½ „
37	„	JWB	„	45	50½	„	46½ „
67	„	GG	„	37½	48	„	43 „
1052	„	CBA	„	35	108	„	52½ „

Indigo exhibits a very lively market. Of Java about 300 chests were sold at prices fully establishing the late rise.

Tin.—Banca gradually improving. In my last report I stated that purchases could not be effected under 71 fl. Since then 72 and 72½ fl. have been paid, and 73 fl. is now demanded, some small parcels having even been taken at that figure.

Hides.—Java ox and buffalo in good request; 1,942 of the former, 465 ditto damaged, and 79 buffalo, taken at decidedly higher rates.

Tea.—Market calm, but prices steady and stocks low.

Sundries.—400 chests gum damar sold at stiff prices; 7,102 bundle rattans taken at higher rates.

Literature.

Personal Narrative of Two Years' Imprisonment in Burmah. By Henry Gouger. John Murray. Second Edition.

A review of this interesting narrative has already appeared in our columns,* and we are not at all surprised to see that Mr. Gouger's interesting volume has reached a second edition. The story of his imprisonment is so full of startling incidents, of picturesque details, of pathetic touches, that it possesses all the charm of fiction, yet, at the same time, the style of the volume, simple and straightforward as it is, bears the strongest evidence of its truth. Mr. Gouger is no longer living, and the present edition is brought out by his brother.

In the preface he explains how it came to pass that the author retained so clearly the memory of events, and how, after so many long years had passed away, he was enabled to record them with accuracy. For those who demanded such an explanation, it will prove satisfactory; for our part we consider that the volume carries its own credentials with it. Of the present edition, the last chapter is new, and contains a condensed and graphic account of the present favourable condition of Burmah. If any of our readers have not yet seen Mr. Gouger's extraordinary narrative, we recommend them to take it up at once, and we are certain they will thank us for the advice.

Flora Hong Kongensis: a description of the Flowers, Plants, and Ferns of the Island of Hong Kong. By George Bentham, V.P.L.S. Lovell Reeve.

The small island of Hong Kong, which in size is about one-fourth of the Isle of Wight, and which is usually noted for the barrenness of its soil and the want of vegetable beauty, is here brought before us in an aspect which will astonish those who have not studied the botany of the locality. In a future number we shall return to this volume and gather from it several novel and interesting facts relative to the floral history of Hong Kong. At present we can only draw attention to the publication of a valuable work.

FEDERAL PRIVATEER FOR THE CHINA SEAS.

The *Boston Daily Advertiser* gives the following account of a steamer fitted out at that port, which is to operate as a Federal privateer in the China Seas:—"The propeller *Pembroke*, Captain John A. Cunningham, proceeded on a trial trip down the harbour and to the north-eastward on Wednesday last, with her new boiler, which proved that with steam enough she can go as fast as a vessel of her size ought to go—say ten miles an hour. She has been rigged anew as a topsail schooner, or a hermaphrodite brig, and when under all sail proved to be very stiff. She sails on Monday for Java, where she will ship her propeller, and proceed to Shanghai under steam and canvass. She is armed with two Schenckel rifle guns, and carries a commission, under the late law as a letter of marque. It is understood that, at the suggestion of her owners, several similar commissions have been forwarded by the Government to our Minister in China, and that measures will be taken by the next Congress to enable Mr. Burlinghame to adjudicate on pirates or recaptured vessels in the ports of China. This is probably the first American steamer destined for China going out under such a commission."

The following letter will show that the idea originated with Mr. R. B. Forbes, a merchant in the China trade:—

"Navy Department, Washington, Oct. 1, 1861.

"Sir,—In relation to the communication of R. B. Forbes, Esq., a copy of which was sent by you to this department on the 16th ult., inquiring whether letters of marque cannot be furnished for the propeller *Pembroke*, which is about to be despatched to China, I have the honour to state that it appears to me there are objections to, and no authority for, granting letters of marque in the present contest. I am not aware that Congress, which has the exclusive power of granting letters of marque and reprisal, has authorised such letters to be issued against the insurgents; and were there such authorisation, I am not prepared to advise its exercise, because it would, in my view, be a recognition of the assumption of the insurgents that they are a distinct and independent nationality.

"Under the Act of Aug. 5, 1861, 'supplementary to an Act entitled an Act to protect the Commerce of the United States, and to punish the crime of Piracy,' the President is authorised to instruct the commanders of 'armed vessels sailing under the authority of any letters of marque and reprisal granted by the Congress of the United States, or the commanders of any other suitable vessels, to subdue, seize, take, and, if on the high seas, to send into any port of the United States any vessel or boat, built, purchased, fitted out, or held,' &c. This allusion to letters of marque does not authorise such letters to be issued, nor do I find any other Act containing such authorisation. But the same Act in the 2nd section, as above quoted, gives the President power to authorise the 'commanders of any suitable vessels to subdue, seize,' &c. Under this clause letters permissive, under proper restrictions and guards against abuse, might be granted to the propeller *Pembroke*, so as to meet the views expressed by Mr. Forbes. This would seem to be lawful, and, perhaps, not liable to the objections of granting letters of marque against our own citizens, and that, too, without law or authority from the only constituted power that can grant it.

"I have the honour to transmit herewith a copy of a letter from Messrs. J. M. Forbes and Co. and others, addressed to this department on the same subject.—I am, very respectfully, your obedient servant,

"Gideon Welles.

"Hon. W. H. Seward, Secretary of State."

SIR JOHN BOWRING ON FREE TRADE.

Mr. Henry Star, an American, has written a letter to Sir John Bowring, in reply to some remarks of his on the Customs' policy of the United States, in which he states that—"America upholds a moderate scale of duties on general imports, while England lays an excessive rate on a few articles producing twice the revenue, and then calls on all the world to admire her wisdom and liberality." And that "it would be no difficult matter to show that the course taken by England in respect of her foreign trade has been dictated entirely by self-interest." Sir John Bowring writes in reply:—"We, in England, were long the slaves of prejudices, favourable to what is called 'protection'—its true name is robbery of the many for the benefit of the few—but we are mending our ways, and France and Italy, and Germany and Russia—ay! and even retrogade Spain are following our example—and so will the United States when truth becomes stronger than error—and the general good is preferred to the partial and the privileged. You say we raise 25 millions by the Customs, but if we taxed home produced articles by the excise, at the same as we tax the foreign articles of competition—if we levy duties on articles not produced at home, as tobacco (whose cultivation is prohibited)—or tea, which our climate will not allow us to cultivate, that is no anti-free-trade principle, though it may not be wise. Our direct taxes are far heavier than yours, but I would increase them if I were able, I shall rejoice in the day—which assuredly will arrive—when custom-houses shall be deemed curses and free-transit be national, as it is now provincial. I believe the most enlightened *self-interest* is that which confers benefits on others, and that it is our true policy to enrich our neighbours—to share their prosperity and to communicate our own. We free traders have not all our own way; but at all events we have done something, and should do a great deal more if *you* would work with us."

THE BISHOP OF LABUAN'S LECTURE ON BORNEO.

At a meeting last week of the Ethnological Society, the Bishop of Labuan delivered a lecture descriptive of the race of the Dyaks, with a history of the sovereignty of Sarawak. He had not, he said, prepared a regular paper, but would give the audience a little talk upon Borneo. He had been located on the N. W. point of Sarawak, which, owing to recent events, had been extended half way from the old northern boundary to Tunki. It was in a complete amphitheatre of mountains, and was so much under water that they had to go about from place to place in boats. The mouths of the rivers generally formed good harbours, and one of them, the Rajan, 150 miles from its mouth, was half a mile wide, and seventeen fathoms deep. Near the sea there was a sandstone formation, which, at the coast, passed into volcanic and primitive rocks. At that part of the river were the antimony and gold mines, worked by the Chinese, who having been allowed too much of their own way, attempted to take possession of the whole country. Along the coast, too, there were signs of coal, and that found up the river was excellent for steam purposes if used when fresh. The people—the Dyaks—were the second wave of the southward emigration, and were, judging from some of their religious rites, of Hindoo origin. Until the rule of Sir J. Brooke, the sea Dyaks were pirates, and the land Dyaks lived in villages raised upon a platform supported on posts. They were, in their own way, an industrious people, and were always labouring at something or another, such as making mats or cutting instruments for agricultural purposes. The women, too, employed their time in making cotton cloths, which were very strong. The men fashioned swords out of a rich iron ore, and were most expert in the use of it. His lordship having given an interesting account of the escape of the Christian population from the hands of the Chinese, and impressed upon the meeting the necessity of her Majesty's Government supporting Sir J. Brooke, and preventing the Dutch taking the country into their possession, as they threatened to do at his death, concluded his address by describing the dress and ornaments of the people.

Military Sanitarium at Victoria, Vancouver's Island.—A correspondent of *The Times* writes as follows from Vancouver's Island:—"The great portion of a sanitarium for soldiers has arrived from the Cape of Good Hope at Victoria. The materials are being stored here, but it is not intended to erect the building at present, nor am I well informed as to the object with which they have been sent; but if the intention of the Home Government is to establish a sanitarium on Vancouver Island for soldiers invalided in China or

* *London and China Telegraph*, January 12.

Digitized by Google

India, their choice of a station is a wise one. There is no healthier climate in the world than that of this island. Warm in summer without being oppressive, and bracing in winter without any severity of cold, I have tried all sorts of climates, and find this the best—the perfection of a temperate climate, to which is superadded natural scenery of the most varied and attractive character. I cannot recal at this moment a more accessible place in our own dominions than this island to India and China. The passage from Hong Kong to Victoria is, on the average, only 40 days; from Bombay it is more, say 60 days; and from Calcutta about 80 days by sailing vessels."

Monetary and Commercial.

Already the effect of a war with the Northern States is demonstrated in the refusal of employment to American tonnage, and should such be the case American ships in the Eastern seas will be in a most deplorable condition, for even the few Men of War which the United States generally have on the China station have been withdrawn in consequence of the rebellion. The teas and other produce which may be now on the way to New York and Boston will be materially affected also; as there is no doubt but that the British Government will act very promptly in blockading all the Northern ports of the States should the answer to its demands—due in three weeks—not be satisfactory. As the export of tea for the present season is already much below the average, and the stocks in America consequently small, the rise in prices will be very considerable. It is probable that if the war feeling gather strength, speculative shipments of tea and other Eastern produce will be made from this to New York before war is actually declared.

The following extract from the *Economist*, on this important subject, will be found to include the ground which principally affects the interests of our readers, and we give it precedence to more extended remarks of our own:—

As far as the money market is concerned, no time has occurred so favourable, or rather so little unfavourable, as this for an American war in the recollection of men of business. Ordinarily no incident could be more disastrous. The usual course of our direct trade gives a vast credit to America, and we are likewise, for the most part, largely under acceptance for her on credits drawn from India and China. Neither of these is the case now. We have sold little to America for months past, and that little has been mainly for cash. America has bought so little in the East, and we have been so cautious with respect to that little, that we are scarcely under acceptance for America at all. The great houses who mostly conduct the credit business are said, we believe truly, to have now scarcely a fifth of the American liabilities which they had in 1857.

These are but fortunate accidents of the moment. What is, under ordinary circumstances and under the present laws of warfare, the harm which we can inflict on the Federal States, and what is the harm which we must expect to suffer from them? If we refer to the history of the last war, it would appear that we could almost wholly destroy their commerce, without their materially impairing ours. The years of war were 1813 and 1814, and we may at once draw our own conclusions by comparing them with the adjacent years:—

	Imports into the United States.	Exports from the United States.
1812	£16,047,916 ..	.. £8,026,506
1813	4,584,375 ..	.. 5,813,322
1814	2,701,041 ..	.. 1,443,216
1815	17,308,349 ..	.. 10,959,531

The returns of our Custom-house for 1813 were destroyed by fire, and those for 1814 are so largely affected by the peace with France, that no exact comparison with others can be satisfactorily made; but it is certain that neither six-sevenths of our exports nor six-sevenths of our imports were taken from us by the American war.

The nature of the American trade explains why we were able to do so much harm. The commerce of America is greatest with Great Britain—then with Europe, which is very near to us and very far from them,—then with Cuba, which is close to our West India Islands,—then with India and China, one of which is a dependency of ours, and near to both of which we have places of resort and coaling stations, most important now-a-days in these days of war steamers, and near to which they have neither. If we had wished for an enemy's commerce in an exposed position, we should have placed it where the American commerce now is. If the laws of warfare were now what they were in 1813, we could, if so disposed, annihilate the whole trade of the United States.

But the laws of warfare are not the same. We have consented to modify and ameliorate them; and although the United States declined to participate in these humane efforts, it seems that they will derive much benefit from them. We engaged at Paris to acknowledge the rule that neutral ships should make neutral goods; and though the Americans have never yet covenanted to do so, such will probably be the rule on both sides in a future struggle. French ships will therefore be able to carry the grain of North America to Europe, and to carry the silks of France to North America; and we shall not seek to prevent them. We have abandoned, for good and wise reasons, the mode of warfare which we pursued forty years ago; and though a war may in consequence be more prolonged, it will be less painful, both to ourselves and to the enemy.

But what was formerly true of American commerce is still true of their shipping. The Congress of Paris illogically and unwisely, as we have often pointed out, did not give the same security to an enemy's ships which it gave to an enemy's goods. Why that distinction is made we need not now inquire; it is enough to know that it has been made. We shall, therefore, by our cruisers be able, if we choose, to exclude American vessels from most of their own trade. As we have shown, *it* is peculiarly exposed and open to attack, and neutral vessels will, therefore, be selected in preference to carry it on. One consequence is remarkable. The trade between California and New York—the trade by which almost all of the gold of the former is usually conveyed, first to the New York banks, and then through the world, will be arrested. The Americans have insisted that it is a coasting trade, and have declined to throw it open to foreign nations. If they persist in that policy, neutral vessels will not be able to carry gold from California because of the legal prohibition, and American vessels will not be able to carry it because of the war.

The bar silver brought by the Mexican packet has been sold at 61¼d. per ounce, showing an advance of ¼d. on the price obtained for the last arrival. Transactions to some amount have, however, taken place in the interval at 61½d. A portion of the Mexican dollars have been sold at 59¼. It is announced that the late remittances to India have been for the purpose of buying up Manchester goods, in consequence of the advanced rates here.

The number of coolies ordered by the West India Colonies for the present season is 3,100 from China and 500 from India.

The steamer *Sir James Duke* has been chartered to convey the 200 miles of cable for the repair of the Red Sea Cable, and it is expected that she will be despatched on the 25th inst.

Messrs. Newall and Co. are preparing about fifty miles of cable to be sent to Batavia for the repair of the Singapore and Batavia line.

The directors of the China and Japan Steam Navigation Company notify that they are desirous of engaging the immediate services of a commander, well acquainted with the China seas and rivers, and thoroughly conversant with the machinery and navigating of a steam vessel, for the purpose of receiving charge of a steamer now being completed, taking her out to China, and thereafter retaining command of her when in the China waters.

The directors of the Agra Bank have opened a branch at Edinburgh, in consequence of the large and steadily increasing number of shareholders and constituents of the Bank in Scotland. A Board of Directors of high character and standing has been nominated. Mr. Robert Hunter, late Secretary of the Bank of Madras, has been appointed the Manager.

A meeting of ship-owners was held at the Jamaica Coffee-house, on the 11th inst., to form an association to insure vessels against war risks, should war be declared against America. One per cent. was proposed, and an entrance fee of 5s., from all owners joining. Claims to be settled on the same terms as at Lloyd's.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of October show less depression than in the same month of last year, when the American troubles had barely begun to tell on our trade with that country. Considering that the *monthly* exports of British goods to the American States is certainly diminished by at least the value of a million sterling, the following return shows a considerable rally in the British trade to the other nations:—

DECLARED VALUE OF EXPORTS.

Month ending 31st Oct.			Ten months ending 31st Oct.		
1859.	1860.	1861.	1859.	1860.	1861.
10,717,873	11,232,181	11,684,910	108,755,184	112,956,567	105,480,242

This shows that, in spite of a falling off on the month of at least a million to America, the total value of our exports has risen by nearly half a million as compared with the same month last year—a not unsatisfactory result. The main source of compensation during the year has no doubt been the gradually increasing trade with a great number of customers, of whom France and Italy are the most important specimens.

MANCHESTER EXPORTS TO CHINA, ETC.

The exports to HONG KONG and CANTON of plain cottons for 12 months ending Nov. 17, 1861, are 88,873,981 yards, against 59,442,878 in 1860, and 50,300,738 in 1859. Of coloured cottons, in 1861, 4,170,790, against 5,503,912 in 1860, and 5,752,983 in 1859. Of printed cottons, 772,996 in 1861, against 1,263,935 in 1860, and 2,471,916 in 1859. Of twist, 8,498,510 lbs. in 1861, against 7,625,610 in 1860, and 9,240,239 in 1859.

To SHANGHAI.—Plain cottons, 173,475,408 yards in 1861, against 112,134,832 in 1860, and 119,349,608 in 1859. Coloured cottons, 9,895,902 yards in 1861, against 21,039,042 in 1860, and 13,124,306 in 1859. Printed cottons, 2,490,758 yards in 1861, against 2,711,915 in 1860, and 3,901,115 in 1859. Twist, 22,240 lbs. in 1861, against 1,000 in 1860, and 55,100 in 1859.

To SINGAPORE.—Plain cottons, 39,735,001 yards in 1861 against 58,964,524 in 1860 and 43,354,318 in 1859; coloured cottons, 7,095,880 yards in 1861, against 9,640,476 in 1860, and 9,785,772 in 1859; printed cottons, 2,314,707 yards in 1861, against 3,239,432 in 1860, and 3,503,024 in 1859; twist, 1,830,504 lbs. in 1861, against 3,400,937 in 1860, and 3,702,373 in 1859.

To BATAVIA.—Plain cottons, 28,258,676 yards in 1861, against 32,866,155 in 1860, and 28,225,115 in 1859; coloured cottons 13,930,259 yards in 1861, against 20,270,106 in 1860, and 12,008,670 in 1859; printed cottons, 12,406,386 yards in 1861, against 11,710,174 in 1860, and 7,397,010 in 1859; twist, 802,365 lbs. in 1861, against 1,503,950 in 1860, and 1,162,240 in 1859.

To MANILA.—Plain cottons, 14,954,142 yards in 1861, against 22,554,571 in 1860, and 17,477,188 in 1859; coloured cottons, 11,760,315 yards in 1861, against 17,255,036 in 1860, and 9,058,400 in

Digitized by Google

1859; printed cottons, 692,495 yards in 1861, against 363,279 in 1860 and 421,070 in 1859; twist, 127,940 lbs. in 1861, against 200,897 in 1860 and 292,540 in 1859.

The amount of bullion by the steamer *Ceylon* from Southampton on the 4th inst. was:—To Alexandria, £28,100; to Ceylon, £7,000; to Madras, £1,631—all in gold; and in silver, to Madras, £19,402; to Calcutta, £41,500; to Hong Kong, £14,200; to Shanghai, £17,325—total, £36,731 gold; £92,427 silver.

ARTICLES OF IMPORT.

TEA.—Until within the last few days the market continued to show great activity, and prices for all kinds of Black Teas were fully supported, whilst Green Teas, owing to large arrivals, although freely taken, suffered a decline of 2d. to 3d. per lb. There has, however, been a complete change in the tone of things during the last week, in some measure owing to the position of our relations with America. The arrivals of new teas have been heavy, and they have been freely offered; large quantities of old teas have also been brought to public sale without reserve, whilst the trade, as is usual at this period of the year, have been less disposed to buy, and the result has been to establish a general decline in prices of ½d. to 1d. per lb. on common and medium kinds of Congou, and of 2d. to 3d. per lb. on finer kinds of Moning and Wopak, as well as Green Teas and fine Scented Teas. The low to fair common Congous, as also the broken leaf kinds, have declined fully 1d. per lb. Good common has been in demand, and but little on offer, but we quote it 1s. 0½d. to 1s. 1d. per lb., owing to the general decline in prices. Fair to good flavory kinds of old import are rather easier. There has been a good demand for the fair to good Ho-How and Ning-Chow kinds, which until the last few days were rather dearer. There have been large transactions in the new season's good and fine Monings and Wopaks. The first arrivals ex *Glenclune* and *Challenger* were chiefly sold from 2s. 1d. to 2s. 4d. per lb., but those ex *Northfleet*, *Maiden Queen*, *Prince Alfred*, and *Chrysolite*, having been freely offered, prices have declined 2d. to 3d. per lb. from the opening rates, at which they are difficult of sale. Kaisow kinds, owing to supplies being moderate, have been firmly supported, but they are rather more difficult of sale, owing to the general dulness. Common Tayshans are 1d. per lb. lower, other sorts without material alteration. Common to good Oolongs, owing to purchases for export, had risen 1d. to 1½d. per lb., but, owing to the American news, the demand has become quiet, and they are more difficult of sale; fine of new season's have sold readily at fully former prices. Common to good Souchongs, of old import, are rather lower. Good to fine, of new import, have been pressed for sale, and prices show a decline of 3d. to 4d. per lb. Flowery Pekoes have been in good demand, and former prices fully maintained; superfine, of new import, have sold at about 4s. per lb. Common to fair Scented Capers and Orange Pekoes until lately have been readily saleable at former prices, but the public sales of the 6th and 7th have established a decline of 1d. per lb. Good and fine qualities have sold readily; the earlier sales were at very extreme rates, from which latterly there has been a re-action of 2d. to 3d. per lb. Foo-chow kinds have sold rather lower. Uncoloured Japan Teas show no material change, but prices rather tend downwards, owing to the decline in Green Teas. The market for Green Teas has been much depressed: the quantity arrived during the month has been over 1,000,000 lbs., and, being freely offered, prices have given way from 3d. to 6d. per lb., there being no demand for export to Canada, which has hitherto helped to keep up our market. Some inferior kinds of Twankay have sold at 9d. to 10d. per lb. in public sale; the better descriptions are about 3d per lb. lower. Hysons have been taken freely for export, but latterly there has been less demand, and prices have given way about 2d. per lb. Young Hysons show a reduction of 3d. to 4d. per lb. Fine Moyune Gunpowders have declined 2d. to 3d. per lb., and the medium kinds about 3d per lb. The first arrival of Ping Suey Teas have been placed on the market, and a fair proportion sold at reasonable prices, in comparison with the other kinds offering. Canton Young Hysons and Gunpowders during the early part of the month commanded extreme rates, but the better kinds have since declined 2d. to 3d. per lb., owing to the fall in Country Greens. There have been six public sales during the month, comprising 66,040 packages, of which 31,100 packages were sold, including 20,171 packages without reserve. The stock on the 1st December of all descriptions of Black was, in London, 44,219,034 lbs., and of Green, 3,690,632 lbs. The total delivery was, of Black, 69,625,284 lbs., and of Green, 9,399,571 lbs. The stock at Liverpool was, of Black, 3,513,546 lbs., and of Green, 45,001 lbs. The total delivery was, Black, 7,744,868 lbs., and Green, 547,973 lbs. The imports in London to the 1st of December have been, of Black, 67,733,746 lbs., and of Green, 6,928,746 lbs.; at Liverpool, of Black, 9,147,360 lbs., and of Green, 561,987 lbs. The amount of Tea afloat at the present time is 31,873,211 lbs., against 25,511,786 lbs. at the same period in 1860.

SILK.—We have, unfortunately, no change to report in the character of the silk market; still the same dulness of demand, limited amount of business, and most unsatisfactory deliveries. In China Silk the arrivals have been comparatively small, hence probably it is that the pressure upon the market has been nothing of moment: still prices continue to have a drooping tendency. In Japan Silk, too, the arrivals have been small, but even this class suffers from the general quiet. Bengal Silk may be said to be almost entirely neglected. In Italian Silk we have still very little doing, although prices may be considered decidedly lower. According to accounts from Messrs. Arles, Dufour and Co., of Lyons, there has been no improvement in the silk trade during the past month. Under the continued pressure of the American crisis a general dulness has prevailed, the limited wants for European consumption being insufficient to give rise to any sustained activity. It is thought, however, that, with the present low range of prices, no further notable depression can be anticipated.

SUGAR.—Great heaviness continues to exist in the market, and the prices have declined 6d. to 1s. per cwt. 98 bags low to good white Siam sold at 42s. to 44s. Privately 1,500 bags claved Manila have been disposed of, at 35s. 6d. The Dutch Trading Company's sale of sugar on the 26th ult. comprised 17,853 baskets Java, which went off readily at the full valuations to half a guilder advance.

COFFEE.—A quietness has existed in this market for the last week, and prices have been barely sustained. 1,150 bags Singapore were chiefly realised at 65s. 6d. to 67s. 100 bags even pale Java, at 73s. 6d. 200 bags mixed Singapore have since been withdrawn.

RICE.—More inquiry has been observable, and it has been well maintained, resulting in a good business at rather stiffer rates. 4,000 bags Rangoon have been sold privately at 11s. 3d., and 13,479 bags since, at 11s. to 11s. 6d. for good middling to very good, and 9s. to 9s. 6d. for ordinary heated.

PEPPER.—Black: Singapore is the turn cheaper. Auctions have combined 5,256 bags Singapore, with 1,163 bags Penang; upwards of three-fourths sold at 3¾d. to 4d. per lb. for the former, and 3¾d. the latter, with Trang at 3⅞d. to 4d. Privately a similar reduction has prevailed. White: Flat, and again rather cheaper; and of 1,057 bags Singapore at auction, only one-fourth sold at 6d. to 6¼d. per lb. for fair to good.

SAGO.—Generally steady; 850 boxes offered at auction, and two-thirds sold at 22s. to 24s. 6d. per cwt. for fair to good small. FLOUR.—No auctions; good business privately upon former terms.

SPICES.—Cinnamon: A fair business done at an advance of 1d. per lb. on last quarterly sales. Cassia Lignea: Quiet. 100 cases at auction all retired. Cassia Buds: Good very scarce and wanted. 90 boxes drawn have been sold at £6. 15s. to £7. Cloves: 612 bags at auction chiefly sold at 3¾d. to 3¾d. for ordinary to good. Mace has lost 1d. to 2d. per lb. of the recent advance; and of 90 cases Penang and 8 cases Singapore at auction three-fourths sold at 9d. to 1s. 3d. per lb. for ordinary dark to middling palish. Nutmegs have gone back 2d. to 3d. per lb., demand having subsided; and of 154 cases Penang, 36 cases Singapore, and 137 cases Batavia at auction two-thirds sold at 3s. 8d. to 3s. 9d. per lb. for very good bold, and 1s. to 1s. 8d. ordinary small to good medium.

HEMP.—No auctions of importance, and privately transactions of a fair extent have been made upon former terms.

COTTON.—The past week opened with a serious panic in the cotton market, induced by the seizure of the Confederate Commissioners on board the *Trent*. A sudden decline took place in prices of 1¼d. to 1½d. per lb., and in some cases 1¾d. per lb. In the last few days partial recoveries have several times occurred, and corresponding relapses to the lowest range, prices varying within twenty-four hours to the extent of ¾d. to 1d. per lb. Our closing quotations are ¼d. to ½d. above the minimum rates for American. Long-stapled kinds have been much neglected, Egyptian especially unsaleable. East India have suffered a decline, varying from 1d. to 1¼d. per lb., but cannot now be bought at the extreme depression.

JAPAN WAX.—Saucers are quoted 70s. to 75s.; block, 54s. to 62s. per cwt.: but there are no good saucers here, and quotations are nominal; they are much in request. 1,000 cases block offered at auction, and a small portion sold at 60s. per cwt. for good.

TOBACCO.—The large arrivals from Holland of Java sorts have caused buyers to hold back, but sales to a fair extent have been made at former prices. In Manila Cheroots there have been large importations, but they are not yet placed on the market.

TIN.—The improvement noticed in our last has again changed, and Straits is now quoted £118, without buyers, and a heavy market.

GAMBIER has fluctuated 6d. per cwt., but closes firm at 18s. per cwt. for best. 2,183 bales at auction sold at 17s. to 17s. 9d. for fair to good, rather heated. CUTCH has become quiet, and prices have suffered an adverse reaction of 6d. per cwt. 2,029 bags offered at auction, and half sold at 24s. 6d. per cwt. for good. Arrivals and sales advertised.

Digitized by Google

MISCELLANEOUS.—India Rubber: Large inquiry, but no business. 120 baskets Penang sold at 1s. 2½d. per lb., and 29 baskets Singapore at 1s. 3d. Camphor: More inquiry, and firm at 190 shillings. Sapanwood: Nothing of consequence doing. Soy: Inquiry, but not obtainable at 2s. to 2s. 3d. Mother o' Pearl Shells: 108 cases Manila at auction all retired. Star Anniseed: Very quiet. Sticklac: Good scarce and wanted. Gum Benjamin: Steady; 21 cases Siam at auction retired; 5 cases Sumatra sold at £6. 10s. to £6. 12s. 6d. per cwt. Damar: Flat, and not in any demand. 137 cases at auction all retired. Gambouge: Firm, and of 30 cases at auction three-fourths sold at £7 to £7. 2s. 6d. per cwt. for good pipe. Ratans: Steady. 30,232 bundles Singapore and 4,617 bundles Bassein chiefly sold at 1s. 6d. to 7s. 8d. per 100. Saltpetre: Very active, and prices have closed 2s. more than our last. Gutta Percha has sold at a reduction of 2d. to 3d. per lb. Rape Seed: Very scarce, and small trade. Vermilion: Dearer; single cases selling at 2s. 8d. per lb. Galangal root: 75 bags at auction sold at 23s. for fair. Cubebs: Flat; of 123 bags at auction, one-fourth sold at £6. 10s. for fair but stalky. Dragons' blood: Quiet; sales at £5. 10s. to £5. 12s. 6d. for middling lump. Galls: 54 cases Japan sold at auction at 41s. to 42s. 6d. for good. Rum: No sales of East India are reported.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6; nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £8. 15s. to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5 to £5. 5s.

STEEL.—Swedish keg, £15. 10s. to £16.

COPPER.—Sheet and sheathing, 12d.; yellow metal, 10d.

TIN—120s. for block; 121s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to 29s. per box.

LEAD.—English pig, £20. 5s. to £21.; shot, patent, £22. 15s.; sheet, £21; spelter, £18; zinc, English sheet, £24; quicksilver, £7 per bottle.

The total export of metals from London and Liverpool to China for the first eleven months of 1861 has been:—Iron—rails, 77 tons; pig, 566; bars and nail rods, 5,660; hoops and sheets, 534. Steel—English, 39; foreign, 131. Copper—cakes, ingots, and tiles, 1; sheets, rods, and nails, 103. Yellow metal, 244. Lead—pig, 4,791; sheets and pipe, 134. Spelter, 429; zinc, 21; tin plates, 9,204 boxes; quicksilver, 620 bottles.

MANCHESTER MARKETS.

MANCHESTER.—The uncertainties of war have caused a serious fall in the prices of our leading staples, and quite put a stop to business in the great mass of other articles. The influential classes of sellers have, however, quite refrained from even naming a price, and it is only in the last day or two that a few buyers are beginning to test the stability of holders generally, by making offers at a very low rate indeed. A partial recovery, or at least greater uniformity of value amongst those who must or will sell, cannot, therefore, fail to be arrived at ere long. The economy of production so far, and to be yet further practised, has arrested a considerably greater fall. Spinners and manufacturers feel it their only source of stability in this crisis, and so abide the issue. Shirtings have fallen about 9d. per piece, having been largely held on speculation; printing cloths scarcely 1½d. to 3d. Yarns have been too irregular to quote, but sales of all sorts have been small.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

Mr. Mendel's last circular states since the 3rd inst. this market has, in some measures, recovered from the then existing stagnation; prices having again assumed a tendency to harden, with more enquiry both for yarns and goods.

THE Bank of Amsterdam has raised its rate of discount from 3½ to 4 per cent.

THE steamer *Express* put into Waterford from Glasgow, *en route* to Hong Kong, on the 9th inst. and left again on the 10th.

At the sale of Japan rags, half were withdrawn from the market; the remaining half sold at 10s. 6d. to 11s. for blues, and 7s. 6d. to 8s. for washed colours.

ARRIVALS NOT INCLUDED IN TABLE.—Dec. 9, at London from Akyab, Equinox; from Singapore and Bassein, British Empire. 8, from Akyab, Montrose; At Deal from Padang, Sirocco; At Plymouth from Bassein, Arracan; at Liverpool from Akyab, Inconstant. 9, at Queenstown from Maulmain, Justyn; at Deal from Penang, Mary Ann. 8, at Falmouth from Manila, Chatham. 7, off Folkestone from Zjilatjap, Eensgezindhead. 5, at Texel, from Sonrabaya, Waalstroom, at St. Nazaire from Batavia, Nicolas Cezard. 9, at Falmouth from Batavia, Omega. 10, at Queenstown from Rangoon, Governor Pickman (?). 11, at London from Singapore and Penang, Sirocco. 9, at Queenstown from Rangoon, Celuta; at Texel from Zjilajap, Jan Henrick. 11, at London from Bassein, Tweedside; at Falmouth from Bankok, Southern Cross; off Queenstown from Rangoon, Englishman. 10, at Texel from Batavia, Kykduin. 10, at Brouwershaven from Batavia, Nederland and Oranji.

FREIGHTS AND CHARTERS.

Berth freights to India and China are steadily advancing; the tonnage loading outwards is small compared to previous months, while the shipments of contract beer, which have to be made during the next four months, will employ full 10,000 tons of shipping.

Current Rates of Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s. to 60s.

CASUALTIES.

The Glencoe, Hutton, from Sunderland, Nov. 18, for Shanghai, put back to Deal Nov. 25.

The Macao, for Java, which sailed from Cardiff Nov. 18, had to put back 27th Nov. with considerable damage, having encountered heavy weather to the westward of Lundy.

The Cannata, Hodgson, for Singapore, which sailed from Liverpool Nov. 23, was towed back from Holyhead Nov. 28, leaky, making eleven inches water per hour. She will discharge part of her cargo for repairs.

CAPE TOWN, Oct. 22.—The coast has been visited with severe gales from S. E. In Simon's Bay, the Drie Gebroeders, Kramer, from Batavia to Amsterdam, parted from 2 anchors last night, and was almost on shore. This morning she was receiving assistance from the dockyard.

ELSINORE, Nov. 28.—The Bride of London, Gibson, from Cronstadt to the Amoor River, with Government stores, has put in here leaky, and must discharge, having been ashore on the Swedish coast.

LIVERPOOL, Nov. 29.—A telegram received at New York from San Francisco stated that the privateer schooner Neva, from China, had been seized by the captain of the revenue cutter May.

The Ocean, Reddan, which arrived at Plymouth Dec. 2, from Batavia for Hamburg, had lost foretopmast, and had foremast sprung.

At ST. HELENA.—Oct. 2, from Penang, Sirocco, Winchester, and sailed for London. 11, Souburg, Zwart, from Java, and sailed for Rotterdam. 13, Waalstrom, Mellink, from Sourabaya, and sailed 14 for Amsterdam. 18, Alexander Baxter, from Hong Kong, and sailed 20 for New York. 19, Jan Hendrik, Lelyrelt, from Java, and sailed for Amsterdam. 20, Krimpenerwaard, Heyenga, from Padang, and sailed 24 for Amsterdam. 23, Koerier, Roteans, from Batavia, and sailed 24 for Amsterdam; Ashmore, Woollacott, from Manila, and sailed 24 for Liverpool. 25, Alcor, Van Oppen, from Batavia, and sailed 26 for Rotterdam. 27, Pepita, de Garro, from Manila, and sailed 28 for Liverpool; Circe, Carballo, from Cadiz and Ascension, and sailed 29 for Cape of Good Hope and Manila. 29, Princess Amalia, Kraf from Batavia and Cape of Good Hope, and sailed for Flushing. 30, Hafis, Bendixen, from Macao.

At ALGOA BAY.—Sept. 27, Caroline, Hemnesholm(?), sailed for Singapore.

Off ASCENSION.—Oct. 18, No. 6,129, 3rd d.p., from Canton for Liverpool.

The steamer *Dalmatian*, which has for some time been building in the yard of Mr. E. I. Harland, for Messrs. Bibby and Co., of Liverpool, was launched on the 19th of November. Her tonnage is 3,600 tons; length 355 feet, being equal to that of the *Himalaya*. Mr. Harland has on the stocks another steamer of equal size, and two others of 1,000 tons.

The P. and O. Company have contracted for the building of two steamers, each of 2,000 tons, with Messrs. Samuda, of Blackwall, and for one of 2,500 tons, with the Thames Iron Ship-building Company.

The *Caduceus*, Captain Cass, arrived from Canton on the 6th inst., after a passage against the Monsoon in the China Seas of one hundred and four days, being the best of the season. She passed Gravesend in company with the *Unrivalled*, which sailed nearly a month before her.

THE Peninsular and Oriental Company's steamer *Indus*, Captain J. Weeks, is preparing to take out the mails for Calcutta, China, Mauritius, Australia, and New Zealand, from Southampton, on the 20th inst. The Peninsular and Oriental Steam Navigation Company's steamship *Mooltan*, Captain E. Cooper, left Southampton on the 12th, with the Mediterranean and Bombay mails.

P. ACKLAND BOYLE, Shipping Agent.

HOLLOWAY'S OINTMENT AND PILLS.
FOREWARNED, FOREARMED.—During the late autumn and early winter months these inestimable remedies will prove themselves the best preventives of disease. Much danger lies in neglecting even a common cold, many a month's agony is consequent on the overlooking rheumatic pains. Both may be eradicated by rubbing this inflammation-quelling Ointment upon the skin and taking Holloway's purifying Pills. The experience of twenty-five years has incontestably proved these twin medicaments can never be wrongly used or applied without advantage. The Pills and Ointment mutually assist each other. They purify the blood, regulate the circulation, and exercise the most beneficial influence over every external and internal organ. Unlike deleterious drugs or mercurial preparations, Holloway's medicaments are innocuous.

NOTICE.
DELFINO, NORONHA, PRINTER, OSWALD'S-TERRACE, VICTORIA, HONG KONG (Established 1847), begs to inform the community that being amply provided with printing materials of all kinds, from the best London tradesmen, he can undertake every variety of job-printing, and execute the same with neatness and despatch, upon moderate terms.
Overland prices current, embracing tabular work, executed on the shortest notice.

DR. J. McGRIGOR CROFT, M.R.C., Physician, London, Fell. E.S.; Fell. O.S.; late Staff-Surgeon and Medical Officer of H.M. Ceylon Rifles in China, and Ceylon (retired), may be consulted by his China and Eastern friends returning home suffering from tropical disease. Address, Mandarin Villa, 8, Abbey Road, St. John's Wood, London.

CHINA AND JAPAN.
CAPTAINS and MERCHANTS trading with these countries may have SMALL CASES of MORISON'S VEGETABLE UNIVERSAL MEDICINES, ready packed, to send to Storekeepers up the country, upon liberal terms.
(Signed) MORISON and CO.

—	20th	„	Bombay .	26th	24th
—	28th	„	Calcutta, China, & Australia	4th or 5th	2nd
Trieste, (Austrian Lloyds Co.) ...	5th	10a.m.	...	9th	7th
—	12th	„	...	16th	14th
—	20th	„	...	24th	22d
—	28th	„	...	1st or 2nd	30th

* When these dates fall on Sunday, the steamers start at 9 A.M.

English clerks have been placed at the principal Italian Offices (under a convention signed by the Italian Government) for the express purpose of facilitating the through transmissions, and telegrams should therefore, in preference, be written in the English language.

Due notice will be given of the extension of the telegraph arrangements from Alexandria to Suez.

By order, L. WALTER COURTENAY, Sec.
No. 58, Threadneedle-street, Nov. 16, 1861.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. Combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all, in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and Co., 172, New Bond-street, London; and sold by all respectable Chemists throughout the Empire.

Submarine Engineer to the English, French, Russian, Spanish, Portuguese, Sardinian Canadian, Peruvian, Brazilian and Indian Governments

*** To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

KEATING'S COUGH LOZENGES.

JUDGED by the IMMENSE DEMAND, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

KEATING'S COD LIVER OIL just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the Fish being unusually fine, and the Oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St. Thomas's Hospitals, have analysed and pronounced the Pale Newfoundland Oil the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. No higher price need be paid than the following:—Light Brown, 1s. 8d. per pint, or 3s. per quart; Pale, 1s. 6d. half-pints, 2s. 6d. pints, 4s. 6d. quarts, or in 5 pint bottles 10s. 6d. imperial measure.

CAUTION.

NO KALOS GEUSIS SAUCE is Genuine unless it has my Trade Mark upon each label and capsule, also my name and address upon each bottle. Price 1s. per Bottle. CALEB SOUL (the only successor to the late H. Trinder), 85, Queen-street, Cheapside, London. Can be ordered through any of the India Agency Houses; also of Messrs. CROSSE and BLACKWELL, London.

12, Old Broad-street, London, Dec. 5, 1861.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG, and may be obtained through any of the Agents of this Paper.

FOR SHANGHAI, the well-known clipper ship FALCON. A 1 13 years, 794 tons register, JOHN KEAY, Commander; lying in the East India Docks. Has superior accommodation for passengers.

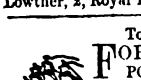
For freight or passage, apply to Phillips, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

REGULAR LINE OF PACKET SHIP.

FOR HONG KONG and WHAMPOA, the well-known clipper ship, BANIAN, A 1, 14 years, 760 tons register, GEORGE GRAHAM, Commander; lying in the London Docks. This fine ship has good accommodation for passengers, and is well-known in the China trade.

For freight or passage, apply to Phillips, Shaw and Lowther, 2, Royal Exchange-buildings, E.C.

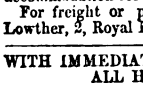
To follow the BANIAN.



FOR HONG KONG & WHAMPOA, the Workington-built clipper ship INVINCIBLE, A 1 13 years, 657 tons register, C. ROLLASON, Commander, will load in the London Docks. This well-known ship has good accommodation for passengers.

For freight or passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange-buildings, E.C.

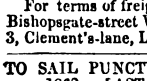
WITH IMMEDIATE DESPATCH, HAVING NEARLY ALL HER CARGO ENGAGED.



FOR BATAVIA and SOURABAYA, the fine Dutch clipper barque HENRIETTA, 5-6ths 1. 1. = A 1, 400 tons register. Loading in the West India Dock.

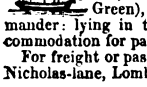
For terms of freight apply to Cloid and Routledge, 124, Bishopsgate-street Within, E.C.; or to E. and W. Arnold, 3, Clement's-lane, Lombard-street, E.C.

TO SAIL PUNCTUALLY ON THE 4TH JANUARY, 1862. LAST SHIPPING DAY—THE 2ND.



FOR SHANGHAI DIRECT, the well-known clipper ship CHALLENGER, A 1, 12 years, (built by Messrs. R. and H. Green), 699 tons register. T. MACEY, Commander: lying in the East India Docks. Has good accommodation for passengers.

For freight or passage, apply to Killick and Martin, 29, Nicholas-lane, Lombard-street, E.C.



FROM LIVERPOOL, for HONG KONG and WHAMPOA, the Aberdeen clipper ship ROBIN HOOD, 852 tons, A 1 for 13 years. Will be despatched on the 18th instant.

For terms of freight or passage apply to McDiarmid and Greenshields, 2, Drury-lane, Liverpool.

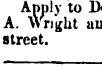
Will sail on the 18th December, having nearly all her cargo engaged, and in course of shipment.

FOR BATAVIA and SOURABAYA, the splendid British built barque, AUGUSTA MAY, A 1 11 years, 392 tons register, loading in the West India Dock.

For terms of freight or passage apply to Cloid and Routledge, 124, Bishopsgate-street Within, E.C.; or to E. and W. Arnold, 3, Clement's-lane, Lombard-street, E.C.

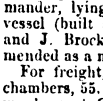
FOR SHANGHAI, the splendid British clipper ship LAUREL, A 1 13 years, loading in the St. Katharine Docks. This fine vessel, celebrated for her fast sailing qualities, will have quick despatch, and has superior accommodation for cabin passengers.

Ellis, Son, and Fickling, 132, Leadenhall-street, E.C.



FOR SINGAPORE and PENANG, with immediate despatch, the regular trader PILGRIM, A 1 12 years, ARCHIBALD HUTTON, Commander, 327 tons register, loading in the St. Katharine Docks. This fine ship, which has just returned from Penang, and discharged her cargo in perfect order, is the best opportunity for shippers, and has good accommodation for passengers.

Apply to Douglas and Mills. 23, Billiter-street; or to A. Wright and Co., 19, St. Helen's-place, Bishopsgate-street.

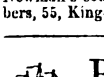


FOR HONG KONG and WHAMPOA direct, with quick despatch, the superior clipper ship MAIDEN QUEEN, A 1 14 years, 814 tons register, — SMITH, Commander, lying in the West India Dock. This beautiful vessel (built at Workington, and owned by Messrs. T and J. Brocklebank, of Liverpool), is strongly recommended as a most desirable opportunity to shippers.

For freight, &c., apply to Robertson and Co., York-chambers, 55. King-street, Manchester; or No. 5, Newman's-court, Cornhill, London, E.C.

FOR HONG KONG and WHAMPOA, with immediate despatch, the magnificent Cumberland-built ship VERONICA, A 1 14 years, 333 tons register, RICHARD ROBINSON, Commander; West India Docks. This well-known vessel, built under special survey, and owned by Messrs. T. and J. Brocklebank, of Liverpool, presents a most favourable opportunity to shippers.

For freight or passage apply to Robertson and Co., 5, Newman's-court, Cornhill, London, E.C.; or York-chambers, 55, King-street, Manchester.



ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks.	To Sail.
Shanghai	Jubilee	W.I.D.	With des.
HongKng. & Whampoa	Veronica...	W.I.D.	With des.
HongKng & Whampoa	MaidenQn.	W.I.D.	With des.
Singapore	Petchelee .	W.I.D.	With des.
Kurrachee	SirRalph Abercrnb	W.I.D.	Dec. 20th.
Colombo	Nightw'tch	L.D.	With des.

London, 5, Newman's-court, Cornhill; or York chambers, 55, King-street, Manchester.

NOTICE.

THE Partnership heretofore existing between CHAS. GRANT and HY. MELLER, at Tien-tsin, is dissolved this day by mutual consent.

Tien-tsin, September 15th, 1861.

WITH reference to the above, the undersigned begs to notify that he has established himself at this Port as GENERAL COMMISSION AGENT and AUCTIONEER.

HENRY MELLER.

Tien-tsin, September 16th, 1861.

NOTICE.

THE Undersigned will carry on business from this date as heretofore under the name of GRANT and Co.

CHARLES GRANT.

Tien-tsin, September 15th, 1861.

TELEGRAMS FOR INDIA, CHINA, AUSTRALIA, and the EAST generally, are received at REUTER'S TELEGRAPH OFFICE, and transmitted by telegraph direct from London to Alexandria, and through all the existing telegraph lines in India and Australia.

For particulars apply at REUTER'S Telegraph Office, 1, Royal Exchange-buildings, E.C.

THE LONDON AND CHINA TELEGRAPH.

THE THIRD Volume of this JOURNAL was completed on the 14th Nov. 1861. The Subscriptions is 18s. per annum, or 5s. per quarter, not including Postage, and to the Export Supplement 12s. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

Subscriptions and Advertisements received abroad by the following Agents:—

The P. and O. Co 's str. Bombay, with the London mails of 10th October, broke her shaft near Penang, and was towed back by H.M.'s gunboat Mhor. The mails were taken to Singapore by the Mhor, which arrived on the 17th Nov., and the China portion was forwarded on the 19th, via Saigon, by the French chartered steamer Granada, which was courteously offered for that purpose by the French Admiral. Considering the small power of the Granada to contend with the north-east monsoon, and her deviation by calling at Saigon it is probable that the mails will not reach Hong Kong until the 1st Dec., or about six days over the due date. Answers, therefore, to correspondence cannot be received by the mail leaving Hong Kong on the 30th Nov.

List of Passengers.

PASSENGERS INWARD.

By this mail from Hong Kong.—For Southampton: Lieut. Crawford, A.D.C., Capt. Hornby, Dr. Gordon, C.B., Mrs. Parker and child, Mr. R. Fortune, and Rev. Mr. McGhee, Capts. Weissenheim and Schneider. For Marseilles: Mr. and Mrs. J. L. Man, Mrs. Tulloch and two children, Mr. G. P. de Silver, Don A. S. Ocano, Capt. Partridge, and Mr. M. A. Caym. For Gibraltar: Capt. Goodall, Military Train, and Don Manuel Bastilho. For Malta: Brigadier-General and Mrs. Crawford and servant, and Lieut.-Col. Dowbiggin. For Alexandria: M. and Madame Bidau. For Suez: Major Brooke. From Singapore to Southampton: Mr. Voss, Mr. Hay, Mr. Winter.

PASSENGERS OUTWARD.

Per P. and O. str. Indus. 20th Dec., from Southampton to Shanghai: Mr. Gibbon. To Hong Kong: Mr. Stewart, Mr. R. H. Payne, Mrs. Hamilton, Mrs. H. D. Browne, Comdr. Moresby, R.N., Mr. G. R. Taite. To Singapore: Mr. Paterson, Mr. Littledale, Mr Sinclair. From Marseilles, 28th Dec., to Shanghai: Madame Cordier, infant, and two servants; Mr. E. Fierz, Mr. G F. Seward, Mr. and Miss Seward. To Singapore: Mr. D. Rodger, Mr Wolterbeck, Mr. Malherbe. To Hong Kong: Mr. J. Togore, Mr. R. L. Collier, Mr. and Mrs. Humberts. From Suez to Singapore: Mr. C. Lehmann. From Alexandria: Mr. and Mrs. Ottenhoff.

Per P. and O. str Pera, 4th Jan., 1862, from Southampton to Shanghai: Mr. Moffatt and friend, Mrs. Markham, infant, and native female servant, Dr. and Mrs. Parker. Dr. W. Willis. To Singapore: Mr. and Mrs. F. C. Valck, Mr. P. Lucassen, Mr. D. K. Mason. From Marseilles, 12th Jan., to Hong Kong: Mr. and Mrs. T. K. Ashton and friend. To Singapore: Mr. and Mrs. Hennikens and child, Mr. Van Kerkwyn.

Per P. and O. str. Ceylon, 20th Jan., 1862, from Southampton to Hong Kong: Mr. T. J. Newton. From Marseilles, 28th Jan., to Hong Kong: Mr. G. Moul, Mr. P. Jenny, jun., Mr. Ormiston. To Shanghai: Mr. and Mrs Tudo- Davies, Mr. Monnier.

Per P. and O. str., 4th Feb., from Southampton to Hong Kong: Mr. and Mrs. G. N. Michel and infant. From Marseilles, 12th February, to Hong Kong: Mr. and Mrs. T. L. Larken, Mr. Vacher. To Shanghai: Mr. and Mrs. E. Schmidt. To Singapore: Mr. A. G. Lehmann.

Per P and O. str., from Marseilles, 28th Feb., to Singapore: Mr. Cazavan.

Per Jin Kee (str.) from London, Dec. 23, to Cape of Good Hope: Mr. and Mrs Mackenzie.

PASSENGERS ARRIVED OUTWARDS.

At Hong Kong.—From England, &c., per Ottawa: Mr. Dixwell Mr. Robbins, W. B. Rock, W. J. Robinson, J. Flintoff. W. H. Keats. From Singapore: Mrs. D. Almoida, two children, and servant, C. J. Carpenter, Mr. A. D. Almeida, Mr. and Mrs. Morgan, Capt. C. Morton, and Mr. M. Woodward. Per Prussian frigate Ancona, from Singapore: Count Eulenberg.

Summary of News from the Far East.

JAPAN.

There is an inquiry among the Japanese for foreign vessels. The American barque *C. E. Fulton*, 448 tons, has been sold at $28,000 in barter for produce. Offers have been made for the American steamer *St. Louis*, 700 tons. It is somewhat remarkable that this inquiry should be confined to American tonnage, especially when we consider the unfriendly attitude assumed by the American Minister, Mr. Harris, towards our Minister, Mr. Alcock.

There is no news of any interest from Japan. We may, therefore, presume that, for the present, the "question" now at issue between us is suspended, and that no fresh effort has been made to rid the country of the foreigners.

In the *Nagasaki Shipping List* of the 1st November, the editor announces his intention of shifting his establishment to Kanagawa, and of changing the name of the paper to that of the *Japan Herald*.

CHINA.

PEKING.

The news from Peking by this mail is to the 27th of October.

The new Emperor was to leave Zehol on the 26th, and the funeral rites for Hien Fung would then be performed. Meanwhile very few foreigners are admitted into the capital, and this policy on the part of the Mr. Bruce is stated to be in deference to the wishes and advice of Prince Kung "who would promote foreign interests as cautiously as he can, and in a such way as to avoid giving needless offence to the Court.

Mr. Bruce has suffered severely from a fall from his carriage, but is now recovering.

SHANGHAI.

We hear nothing by this mail of any alarm from the proximity of the rebels. but it is stated that great numbers of the inhabitants of Ningpo are flocking into Shanghai for safety. The rebels are reported to have invested Hangchow, after having taken Shaon-shing-foo.

We stated in our last that Mr. Mossman had become the editor and proprietor of the *North China Herald*. It appears that he has undertaken the management of that paper in conjunction with Mr. Pickwoad, a gentleman from Australia.

Mr. Compton, the late proprietor and editor has left for England, and is about to commence business as a commission merchant in London.

The following notification of the Revised Customs' Regulations has been issued from the British Consulate, under date of October 30 :—

I. TRANSIT DUES.

1. It is at the option of the British merchant to clear foreign imports to an inland market, or native produce to report of shipment, either by payment of the different charges demanded at the inland Custom-houses, or by one payment of a half tariff duty, as provided in Tariff Rule 7.

2. In the case of native produce, the memorandum to be presented at the first inland barrier may be there deposited by the merchant himself, or his agent, native or foreign. But whereas it is alleged that both native and foreign transit dues have been totally evaded by the sale of produce *in transitu* after entry at a barrier as for shipment at a treaty port, the me-

Digitized by Google

morandum tendered must be in the form of a declaration, signed by the firm or merchant interested, and to the effect that the produce therein specified and entered on (date) at (barrier), for shipment at (port), is the property of the undersigned firm or merchant, and that the said firm or merchant engages to pay the half tariff transit dues thereon.

This form will be provided *gratis* by the Maritime Customs at every treaty port, and issued on the Consul's application by the Superintendent of Customs.

3. Native produce carried inwards from a port cannot be cleared by a transit duty certificate, whether in charge of native or foreigner. It is liable to all charges imposed on goods *in transitu* by the provincial Governments through whose jurisdiction it passes.

4. Foreign imports not protected by transit duty certificates are liable to the same charges.

5. No transit duty is leviable on foreign imports or native produce carried up or down the Yang-tse-kiang between Shanghai and the ports on that river now open under provisional rules; but foreign imports, carried inland from either of these ports, or from the interior to either of these ports, pay foreign or native transit dues according as they are certificated or uncertificated.

II. EXEMPTION CERTIFICATES.

The exemption certificate protects duty-paid foreign imports re-exported to any port in China against all further exactions of duty by the maritime Customs.

Native produce carried coastwise must be accompanied by a certificate that the export duty has been paid at the port of shipment, and on leaving the second port for a third or fourth port, by a certificate that the coast trade duty, as below defined, has been paid at the second port. This latter certificate will be granted by the Customs if the condition of the produce imported remains unchanged, and will exempt the produce it covers from all further exaction of duty by the maritime Customs.

III. COAST TRADE DUTY.

1. Native produce carried coastwise pays full export duty at the port of shipment; and at the port of entry, coast trade duty, the amount of which is declared to be half import duty.

2. If the produce in question be entered at the second port as for re-exportation to a foreign market, the payment of the coast trade duty is to be regarded as a deposit during a term of three months, before expiry of which the produce must be re-shipped for foreign port, and the merchant will thereupon immediately recover the amount of the coast trade duty lodged with the Customs. If the term expire without shipment of the produce, the said amount will be carried to the account of Customs Revenue; and the produce, if subsequently shipped to a foreign port, will pay a full export duty.

3. If the produce, though shipped within the term allowed, be found to have been subjected to unauthorised changes of quality, condition, &c., the coast trade duty lodged will not be returned, and an export duty as upon all other produce leaving the port will be levied.

4. If on arrival of the produce at the port of entry loss of the export duty certificate be alleged, the export duty can be lodged with the Customs until the Customs authorities shall ascertain the fact from those of the port of shipment.

5. Native produce accompanied by a certificate that the coast trade duty has been paid at the second port, may be carried to any other port or ports in China without payment of further duty to the maritime Customs.

6. Native produce carried from Shanghai, or Hankow, or Kiu-kiang, or *vice versa*, pays a full import or export duty and coast trade duty. While the river trade continue under the provisional rules now in force these duties will be levied at Shanghai. If the produce in question be entered for re-export to a foreign port, the coast trade duty will be deposited and refunded as provided in clause 2 of this rule.

REVISED PROVISIONAL REGULATIONS FOR BRITISH TRADE IN THE YANG-TSZE RIVER.

Of the Ten Articles drawn up in March last, I. to VI. stand as before.

Article VII. is modified as the Prince of Kung proposes.

Articles VIII. and IX. stand as before; the latter being made the last but one of the regulations.

Articles X., XI., XIII., and XIV., proposed by the Prince, are rendered unnecessary by the notification respecting transit dues, exemption certificates, and coast trade duties.

Article XV. is in part only adopted; British trade in oil, steel, iron, provisions timber, and copper cash, and the hire and purchase of native vessels, being authorised under the following rules:—

A. Oil, hemp, steel, iron, provisions, timber, and copper cash may be transported under the following conditions:—The shipper shall give notice of the quantity he desires to ship, and of the ports of its destination, and shall bind himself by a bond, such shipper being agent of a mercantile firm established in China, or, if not so, by a bond, with two sufficient sureties, to the value of the quantity shipped, to return within three months from the date of shipment, to the collector at the port of shipment, a certificate to be issued by him with an acknowledgment thereon of the discharge of the cargo, specified at the port of destination subscribed, and sealed by the collector of the latter port, or failing the due return of this certificate, to forfeit a sum equal in value to that of the goods shipped; and the vessel concerned will be deprived of the river pass, and prohibited from further trading on the river.

B. In the case of native junks chartered or purchased by British subjects to convey produce to or from ports on the Yang-tse-Kiang, the Customs at the port of departure shall, on application of the Consul, issue to the party concerned a special junk pass. But the said party must deposit with the Customs a bond, such party being agent of a mercantile firm established in China, or, if not so, a bond with two sufficient sureties, to the value of the vessel and cargo, to return, within two months from the date of his bond, to the collector at the port of departure, the junk pass issued by him, with an acknowledgment thereon, subscribed and sealed by the collector of the port of destination, of the arrival of the junk and discharge of her cargo, or failing the due return of this certificate, to forfeit the sum specified in the bond or desposited with the Customs.

Article XVI. corresponds with the original Article X., and will stand.

ARTICLE 7.

The payment of duties due by vessels trading up and down the Yang-tsze under these regulations being duly provided for by Articles I., IV., and VI., of the said regulations, Articles XXXVII., XXXIX., XL., and XLI. of the Treaty of Tien-tsin will not apply to any such vessels, and they are, accordingly, authorised to load or discharge at Hankow or Kiu-kiang without applying for Custom house permits, or paying duties until her return to Shanghai.

Some translations of correspondence between Prince Kung and the late Emperor, regarding the Foreign Customs, has lately been published, and it appears from those documents that the subject has engaged a great deal of attention on the part of the Chinese authorities. These translations, which are of great length, are published in the *North China Herald* of November 2nd, and are prefaced by the following remarks:—

"The first memorial evinces considerable unwillingness on the part of Prince Kung and his two colleagues to undertake the sole adjustment of questions that affect not only foreigners but the Chinese revenue. While displaying a desire to do nothing that shall cause the foreigners to complain, the Prince evidently prefers to meet his countrymen supported by an old institution, the Board of Revenue; the Foreign Office would seem too new to willingly risk its influence by making enactments that might give umbrage to the Board and high provincial authorities.

"The Imperial edict, in reply to the first memorial, is worded in evident recognition of the importance of the foreign question, but it nevertheless shows that the wish of the Court was to throw the responsibility of everything that concerned intercourse with other countries upon the prince and his party. The task before the prince, from a Chinese point of view, is not an enviable one; good management will bring him neither thanks nor reward, and any mistake or misconstruction will by no means pass unnoticed. In the second and third memorials the prince reports on the consultations held at the Foreign Office relative to the revenue administration, and comments upon the memoranda furnished by Mr. Hart. The Emperor, in the final decree, in a very business-like manner, refers the questions brought up and the various suggestions to the high authorities concerned, directing them to report on the feasibility of what had been proposed. From these documents it would appear that Foreign trade has been minutely discussed at Court, where the recognition accorded to the Foreign Inspectorate is unmistakeable.

Another steamer has been launched here named the *Fei Hun*, or Heavenly Bird. Her dimensions are 102 feet by 16 feet beam and 5 feet depth of hold. Her draft of water on launching was sixteen inches; and with all her machinery, boilers, and coal-bunkers filled, it is expected that her draft will be under twenty inches. She was modelled by her owner, Captain Gough, and built by Messrs. Hawkins and Co., of the Shanghai Dry Dock. Her boilers and machinery were designed and built by Muirhead. Her propelling power is sidewheel worked by horizontal high pressure engines, each of 17-horse power nominal, to work up to 80-horse power. There are other steamers now being built here, some for imported machinery, and others for machinery to be constructed by Mr. Muirhead.

The rebels are said to have surrounded Hangchow, cutting off all communication. They are also reported to have taken Shaou-shing-fou.

A long and interesting account of Colonel Sarel's expedition up the Yang-tse appears in the *North China Herald* of October 26th. Those of our readers who wish for additional information concerning this expedition, will do well to refer to that journal. Advices from Newchwang are to the 9th October. The social relations between the inhabitants and foreign residents continue satisfactory. Business appears to be quiet.

There has been a question raised between our merchants and the native traders, who are endeavouring to introduce their paper currency, so as to supersede payment in dollars, silver or gold. A meeting was therefore held for the discussion of this monetary grievance, particulars of which are given on page 66.

Admiral Hope is said to have visited New-chang.

At Hankow, the braves in the service of the Imperialists are giving much trouble. They have attacked foreigners in their houses as well as in the streets; and have posted placards declaring their intention to massacre the barbarians if they do not quit Hankow. The Viceroy was in communication with H.M.'s Consul on the subject, at the date of the latest advices.

The Brem. bark *Clemens*, 306 tons, was sold by auction on the 27th October for 6,500 taels. The Port. steamer *Fernandez* has been sold for Mex. $80,000, and is now called the *Antelope*, and under the Br. Flag.

SWATOW.

It is stated by the *Daily Press* that both the leading firms of Hong Kong have withdrawn their receiving ships from Swatow.

Digitized by Google

The reasons for this step are—"that some of the Chinese merchants of that place prefer coming to Hong Kong to make their purchases—and that the opening of Swatow to foreign commerce, together with the legislation of the opium trade, has caused firms to be established at Double Island, who land their drug and thereby dispensing with the use of receiving ships, can of course sell ashore cheaper than the large firms could sell afloat."

A boat's crew of H.M.'s gunboat *Firm*, engaged in surveying the river, had been assaulted by the villagers, stoned, and two of the seamen wounded.

HONG KONG.

The annual regatta took place at Hong Kong on the 5th and 6th November. From the account of the proceedings which appears in the *China Mail* we extract the following:—

"The regatta days were fine: there was a splendid breeze, and a tide which was all the better for the sailing, all the worse for the other, craft The race for the 'Garrison Cup' on the first day was not very exciting; but of course the favourite did not win, and an oar was broken on the start by an over-vigorous amateur waterman. The *Pearl's* launch and cutter were in high spirits—came into collision with a sampan, and actually ran into the *Cowper*; but fortunately little damage was done and the accidents heightened the general excitement, while they doubtless 'astonished the natives.' The race for the 'Ladies' Purse' was at once fortunate and unfortunate, Mr. Dodd, who ought to have won triumphantly, did not through a very natural mistake, and Mr. Baldwin must have thanked his opponent for the error. We said that the race was fortunate, and must explain. It was, we believe, after a considerable amount of pressure, that Mr. Baldwin was induced to make his appearance on board the *Cowper* and receive the purse. Miss Forth made a pretty speech on behalf of the ladies, and presented the purse Mr. Baldwin had now an opportunity of gaining greater credit than if he had accepted the prize; for, while thanking the ladies for the compliment, he returned it, as, owing to the misapprehension respecting the winning point, it was not considered to have been fairly won. The race for the 'Single Pairs" was therefore repeated on the second day, and Mr. Dodd was the victor. To our mind the race for 'Houseboats' was one of the best races, if not *the* best. Thirteen boats started, and they kept capitally together until the last. Next to the race for Houseboats came decidedly the race for 'Waterboats.' Nothing could be more splendid than the view of these craft (four belonging to Messrs. Bowra and Co. and one to Messrs. Lane, Crawford and Co.) when they first got under sail. The first day's race was won by Mr. Bowra's No. 4, the second day's by Mr. Lane's."

It is now stated that the case of Mr. Moss is to be tried "very shortly;" but not a word is said of the fact, to which we alluded in our last number, that Mr. Moss had received no official communication from the Embassy, or even from Captain Vyse, to whom Mr. Alcock wrote on the subject.

The Prussian frigate *Ancona* has been at Hong Kong with Count Eulenburg and the other members of the embassy on board. The intelligence now received corroborates the statement made by our occasional correspondent (page 57) that the Count has arranged a treaty between Prussia and Siam.

The Governor has been pleased to appoint Francis Chomley, Esq., to be a member of the Legislative Council of this colony pending Her Majesty's pleasure, in the room of John Dent, Esq., resigned. Also William Hastings Alexander, Esq., to be a member of the Executive and Legislative Councils of this colony, during the Colonial Secretary's absence in England on leave.

The British steamer *City of Nantes*, which left this for the purpose of trading between Bangkok and the Straits and China, was sold at Hong Kong on 12th Nov. by Messrs. Thomas Hunt and Co., and bought by Messrs. Walker, Borradaile, and Co. for Messrs. Dow and Co., of Shanghai, the price given being $60,500.

The *Daily Press* affirms that owing to the annexation of Annam by the French, the growing importance of the China trade, and the state of anarchy into which the Celestial Empire has fallen, a large military depot will be established at Hong Kong. The following remarks on the subject are from the colums of that journal:—"We believe that the entire face of the cession opposite Hong Kong running as far back as Napier's range, has been appropriated to the military. The naval people will have a large slice allotted to them on the shore facing the Westward. They would have much more but for the circumstance of Admiral Hope disliking the place. The interests of the colony are certainly but dust in the balance when weighed against the interests of Great Britain. If it be essential for the development of British policy that troops should be stationed upon this coast, it is very clear that they must be quartered in this colony. And if the military authorities consider that the best portion of the Kowoon cession is the spot where the troops will enjoy the best health, why of course they are right in using their influence to obtain the appropriation. Still, on behalf of the colony, we cannot help lamenting it, and we are still of opinion that a better arrangement could have been made without that sacrifice of commercial intersets which the contemplated appropriation must certainly cause.

In consequence of the instructions of the Home Government, the indemnity, as described in our issue of August 27th was about to be distributed amongst the claimants,—one, half in cash, and the other half in a warrant, payable in twelve months. No arrangement had as yet been made respecting the surplus, the amount of which is considerable, though the sum becomes greatly diminished if interest is allowed for the five years' delay, which has so unnecessarily occurred. The great injury thus inflicted on the claimants deserves a generous compensation.

CANTON.

Mr. Burlingame, the American Plenipotentiary, visited his Excellency Laou, the Governor-General of the Two Kwang, on the 5th Nov.; he was accompanied by three missionaries and two merchants, and was very well received. The Governor-General returned the visit on board the *Hankow*. It is understood that the United States Minister addressed a body of merchants on board after the Governor-General of the Two Kwang had left that vessel. Mr. Burlingame has gone to Shanghai, on his way to the capital. After this interview Mr. Burlingame left for Shanghai and Peking.

The *Friend of China* is publishing an account of the foundation of Hong Kong as a British settlement, and the various appointments made by Government, not of course omitting the last Lieut.-Govenor, Colonel Caine.

The following notice for the dealers in opium has recently been issued by the Viceroy:—

"The Governor-General of the two Kwang, and Acting Hoi-kwan, proclaims as follows with regard to foreign medicine i.e. opium. The Emperor has already permitted the foreign merchants to sell foreign medicine in the ports; and that each hundred catties shall pay thirty taels duty. The Hoi-kwan (Hoppo) and I issued a proclamation informing the people to this effect and telling them to abide by it; which proclamation is on record. But lately some people have been falsely saying that the Hoi-kwan, in addition to his thirty taels, is also collecting ten taels extra, and some say more than ten taels. When I heard this I was much astonished, and have closely and secretly investigated the matter; now issuing this proclamation, that the opium dealers may certainly know—Know then, all of you who carry opium it is your duty to go to the Custom-house, state plainly the quantity you have, and, after examination, pay thirty taels on each hundred catties, and do not pay a cent. more. And if any person shall attempt to extort more than that, you are at liberty to report his name. If, however, there is nothing of this kind, except idle reports, let each trader obey the regulations, and do not let the sake of gain lead you to break the rules, and incur punishment. Let all reverently obey, &c."

The following items of intelligence are from the *Friend of China*:—

"News has reached Canton of a large tract of country near Leen-chow-foo in this province having caved in. This occurred on the 13th Oct., at a place about a mile from the town of Ni-tam. A field of ten races was the first to exhibit tremulous symptoms; and after a few admonitory shakes to the people in the neighbourhood to be off, it went down gently for a good depth, drawing towards its vortex many tens of acres, though no part of the town. A more than ordinary degree of heat was experienced in the locality, but no other phenomenon on the occasion."

"It is ascertained for a fact that when the Imperialists, under an officer of the name of San-qui, a native of Honam, took Ngan-king, a walled city on the Yang-tze-kiang, about 150 miles from Nanking, they made prisoners of 3,000 men, whose heads they deliberately cut off in cold blood. The fall of Ngan-king, beyond exasperating the rebels, has no serious effect on the Taiping cause; nor would the place have succumbed but for the unfortunate floods on the river and the adjacent country, so keeping the Taipings wit in the city from getting out for provisions, and those without from throwing them in, the city holders being literally starved out."

"It has transpired that about two months ago, a boat carrying a cargo of silk from Sha-tow in this district was stopped when *en route* to Canton by a revenue cruizer under the acting Commodorship of an officer, said to be a great favourite with the Governor-General. Whilst they were wrangling, some other cargo boats came up, and at once determined to seize the revenue men, take them to Shou-chow-foo and deliver them to the authorities as robbers. No sooner thought of then done, and the Foo-tai, as a good governor should, took the heads off of twenty-three of His Imperial Majesty's servants."

"About two weeks ago, in Pok-lo district, Wai-chou city, the evangelist Chae, native assistant of Dr. Legge, was seized by the people, who took him to an idol temple, subjected him to a mock examination, then commanded him to worship the idol, and when he positively refused to do so, they killed him, in the presence of the idol, by ripping open his bowels."

"A doctor of reason—Ching yat Tao-le—having reference to the literary examination about to take place, publicly notifies that there are thirteen verses in the Books of Confucius the exact sense of which he cannot comprehend; and he offers to give any one who will enlighten him to his satisfaction a house of the value of Taels 1,500."

"On the 12th November the new literary examination hall will be opened, the ceremonies on the occasion being as follows:—At an early hour the candidates will assemble around the gate, each man having two

Digitized by Google

baskets, one containing pens, ink, paper, &c., the other food and clothing. The Fotoey, Grain Superintendent, Treasurer, and an Instructing officer, having arrived, and being seated within the gate, the candidates are called one by one from a list prepared beforehand, their person and baskets being rigidly searched for books of papers that might be of assistance in the studies to which they are directed. The search over, each candidate is given a slip on which is written, with his name, the number of the cell he is to occupy—the cell in question being some four feet long by under three feet wide. When all are entered, the outer doors are locked, and slips of paper pasted over them, police being stationed outside and soldiers within to prevent communication. The students go through three courses—first, they are given passages from the books of Mencius Confucius, or other great writers, on which they are required to dilate, in some such way as a clergyman amplifies on a text from Scripture. The next course is that of explaining some point in each of the five classics; and third, he has again five subjects to exhibit his knowledge more;—these being geography, astronomy, the art of government, ancient history, and modern history. When the thesis is written, it is taken to a special officer, who thereupon marks and enters it. It is then transcribed, so that the hand-writing may not be known by the examiners. These examiners are—first, the Officer and his Assistant specially appointed by the Emperor, with whom are associated Ten District Magistrates selected by the Governor of Canton—these ten being called rulers of departments. The papers being first looked over by the ten, the best in their opinion are taken from the mass, and sent in to the chief examiner, who, with his assistant, then decides on the superiority of this or that; the writers of the approved papers being eligible for office under Government, and designated at this examination Sui-tsai. Two days and two nights are given to each student to prepare each paper, so that it takes just a week to complete the business; during which time the candidates cook their own food, and have rather a hard time of it. During the time of this examination, people living in the neighbourhood are not allowed to go on the tops of their houses, and if they do they are liable to be shot at.

The officers of H.M.S. *Sphynx* have started a number of athletic sports on the Shameen site, which appear to have excited considerable amusement. Hurdle races, single sticks, a boy's race, throwing the hammer, &c., are among the games announced.

The following is from the *Daily Press*, headed "A Christmas Piracy:"—"We recommend the following petition to the best consideration of our readers. It is now going the rounds of the colony. It will be seen that the Hoppo admits the legitimacy of the trade between this colony and all ports and places upon the Canton river in all and every article of merchandise saving and except opium. We ask the best friend the Chinese Customs mercenaries have, whether they can conceive a more cruel robbery, or a fouler case of piracy than this case presents? The management of the Chamber of Commerce has fallen into the hands of an impracticable set of sanctified toadies and nincumpoops, or that body would take the matter up and settle the vexed question. We argue that upon such a case as this being urged, the establishment would be dealt a death blow.

"To the British and Foreign community of the Colony of Hong Kong.

"The humble petition of Kum Yoke and Wong Achee respectfully showeth:

"That they were the charterers of the boat called the *Tai-chong*, which plied between Hong Kong and Kong-moon, and as such charterers are responsible to the owners for the value of the boat.

"That on the 7th June last past, the above-named passage-boat sailed hence for Kong-moon with the undermentioned cargo:

"1,980 bags rice, shipped by Tam Achoy and Sam Yek.
"130 baskets of salt fish for sundry parties.
"259 buffalo horns for Woyune.
"20 bags of rice.
"27 do. broken rice.
"90 do. paddy husk.
"400 empty jars.

"And a quantity of cotton cloth belonging to the passengers, of whom there were forty.

"That, as the foreign merchants must see, from the very description of the cargo and nature of the voyage, no smuggling or other illicit object was intended. If it be illegal to take passengers and cargo from Hong Kong to Kong-moon, most certainly the authorities of neither the one place nor the other have notified the circumstance. On the contrary, whilst the Hong Kong authorities extend the fullest protection and accommodation to passage boats plying from the colony to the adjacent towns, the Custom-House authorities of Kong moon have always received the regular duties upon goods imported. Your petitioners would ask the foreign merchants to test the veracity of this statement by seeing for themselves the traffic which occurs off the Western bazaar of this city every evening.

"That whereas two days after leaving Hong Kong, namely, on 9th June, whilst duly prosecuting the voyage, your petitioners were boarded by the steamer *Camfa*, which vessel was manned with foreigners, who commenced examining and turning over the cargo. They succeeded in finding three balls of opium which belonged to the passengers, who, seeing them coming, concealed it amongst the rice. These passengers did not deny the ownership of the opium, but said that they had brought it for their own use and not for sale.

"That the steamer *Cumfa* nevertheless seized the passage boat *Tai Chong* and towed her to Canton, sending the passengers on shore, and placing four European watchmen on board. After waiting eight days, during which your petitioners were never apprised of the law or regulations under which the boat was seized, the *Tai Chong* was sold with all her cargo.

"Your petitioners being thus utterly ruined are induced to solicit contribution from the foreign community of this colony, for whom, as in duty bound, they will ever pray.—Signed by Kum Yoke and Wong Achee."

The *Boletim do Governo* of the 2nd Nov. contains the plan of a lottery for the benefit of the new school at Macao. Of 2,000 tickets at $2 each, 221 will carry prizes, as follows:—One of $1,000, one of $400, two of $100, seven of $50 (the last blank carrying one), twenty of $25, twenty of $10, seventy of $5, and one hundred of $4 (double stakes). Should all the tickets be sold by that time, the drawing will take place on the 20th of next month; and in a letter in the same paper the Baron de Cercal, whose name foots the lottery plan as director of the school, says that he has much satisfaction in announcing that the school will open on the 1st of January, 1862. Mr. A. Marques Pereira is authorized to sell the lottery tickets; fifteen per cent. of the proceeds realized, or $600, being for the school fund.

The Allies presented Governor-General Laou with three brass cannon, which he had placed on the old city wall at three points. Some rascals, secretly ascending the wall, stopped up the touch-holes of these cannon with iron nails; and the Governor, inferring from the act that there must be rebels in the city, increased the number of guards, and himself personally, on the night of the 15th, inspected both the old and new cities.

The fruit merchants at Kwo-lan petitioned the Governor to remit the extra tax which has been levied on their sales, and as the Governor would not grant their petition, they suspended business.

We (*Frirnd of China*) have been taken to task by a gentleman for whose opinions we entertain high respect, for not, in our last number, dwelling more strongly on the corruption of the Manchou Government—the principal justification for the rebels now in arms. Our censor, who is well versed in the vernacular, says that Chinese in conversation with him continually refer to the fact that it is impossible for a man without money to get an approach to justice at any of the Yamuns; and even if he be acquitted it is equally impossible for him to get out of the fangs of the court unless he has money to pay the customary fees—people for want of such fees being often left in the hands of the gaoler even for years.

Another friend comments on the rabidity with which our China contemporaries rush forward to denounce all operations by the rebels involving the shedding of blood; and he pertinently asks why should we look for more forbearance in the Chinese than we have been in the habit of seeing exhibited by parties in our own Civil wars? Read, for instance, he says, the conduct of the English in the north during the reign of the first George. The *Chester Journal*, 1727, to wit, has the following passage:—

"A private soldier received 900 lashes yesterday, and was drummed out of his regiment, with a rope about his neck, having been found guility of being a Papist."—*Chester Journal*, 1727.

And we are continually meeting stories of Jesuits and Frenchmen being ducked to death, or hung by the mob, for the simple crime of being of a different religious persuasion from their tormentors.

Having particular reference to the doings of the mob at Chefoo, in killing Messrs. Holmes and Parker, we have an apt allusion to the feelings of Westerns under similar circumstances of excitement in the speech of Mr. Turner, on the 10th of August last to the electors for South Lancashire:—

"As respected their kinsmen in America, he had been long in America, and had a very great regard for the Americans, but he should be very glad to know in what position Mr. Bright would find himself, if, either in the North or in the South of America, he expressed his opinion against

Digitized by Google

the will of the majority. He believed that Mr. Bright's term of life would be curtailed to the time it would take to convey him to the very next tree, on which he would be hung up as a warning to any man who chose to express himself strongly against the will of the majority during any excitement of the people.

Speaking of Mr. Holmes, we find, from a gentleman recently returned from Shanghai, that the unfortunate deceased's proclivity for operations in "the peas and beans line" was generally talked of up there, the motive inducing the visit to the rebel camp being of a twofold nature, and not proceeding solely from philanthropy. It is certainly amusing to find the French setting themselves up as expositors of humanity in the East, and more amusing to find such an one as the editor of the *Daily Press* puffing them for their great kindness in rushing to the rescue.

JAVA.

From Banjermassing we learn that Demang Lehman and a number of lesser chiefs have submitted to the Dutch Government. To prove the sincerity of his submission, Demang Lehman visited the other rebels in order to persuade them to yield. Several attacks have been made upon the enemy by the Dutch, but not always successfully.

MALACCA STRAITS.

SINGAPORE.

It appears that some misunderstanding existed in reference to the willingness of the French Admiral to convey the mails to Hong Kong, which were taken out of the disabled P. and O. steamer *Bombay*, at Penang, and his Secretary consequently wrote the following letter, which contains some other items of interest, the most important being the announcement that dry docks are to be constructed at Saigon. When will the Straits be transferred to the local authorities, who doubtless feel the necessity of erecting docks, &c., and only wait for emancipation from the Indian authorities :—

(To the Editor of the *Straits Times*.)

SIR,—I have the honour to address you for the rectification of the notice given in your journal yesterday in regard to the steamer *Granada*.

The following information I, therefore, wish to lay before your readers. In order to favour the interests of commerce, and in compliance with the request of the agents of the Peninsular and Oriental S. N. Company, Admiral Bonard has consented, for the time necessary to make the voyage to Hong Kong and back, to deprive himself of the use of the steamer *Granada*, chartered by the French Government, and has authorised this steamer to proceed with the English and foreign mails to Hong Kong.

The notice inserted in your journal yesterday appears to give the impression that the French Admiral would prefer his own interest to that of commerce, which is very far from the fact, as he with the greatest pleasure avails himself of this opportunity to show at once his earnest desire to promote the interests of commerce and of the community, which he now for the first time has the pleasure of visiting.

I seize the opportunity to inform you, if you have the courtesy to insert my letter, that the Admiral is about to erect on Cape St. James, near Saigon, a lighthouse, the materials of which are now on their way thither. The lighthouse is to be in communication with Saigon by the electric telegraph.

A large dry dock is to be shortly erected, and a steam *atelier d'outillage* for the repair of steam engines and machinery of the largest dimensions and with all the necessary accessories for vessels.

The engineer for the construction of the work accompanies the present expedition, as well as the Director of the Company for the line of French steamers from Marseilles *via* Suez to Saigon direct.

The *Granada* will leave this afternoon about five o'clock Saigon and Hong Kong.

In conclusion of this communication, I can assure you, sir, of the most earnest disposition of Admiral Bonard to favour in every possible way the interests of this community and of the commerce of the East.

Sir, be pleased to receive the assurance of my most distinguished consideration, LOUBERE,

Aide-de-Campe del'Amiral, commandant en Chef en Cochin Chine.

November 19, 1861.

The French steamer *Calvados*, Captain Riche, from Point de Galle, arrived at Singapore by the 13th November, and proceeded to Hong Kong on the 16th. The French steamer *Rhin*, Captain Aiguer, from Galle, arrived on the 17th November, *en route* for Saigon, having on board 130 troops. Her Majesty's steamer *Simoom*, Captain Pollard, sailed for Cape Town and England on the 16th November. The American steamer *Shantung*, Captain Peile, proceeded to Hong Kong on the same day.

PENANG.

The Saturday half-holiday has been established in Penang, and will be given for the future by Government and by merchants ; the latter, however, subject the grant to the contingency of a steamer arriving on that day.

The *Penang Argus*, on the accident to the P. and O. steamer *Bombay*, carrying the London mails of 10th October, says :—"The crippled *Bombay* remains *in statu quo*, viz., anchored off Pulo Jerajah, anxiously awaiting aid from Singapore to help her on to that port. Meanwhile, some few of the passengers are ashore here, enjoying the picturesque scenery of Penang, and devising jaunts in various directions. The Bishop of Victoria and his family are on the Hill under the hospitable roof of the Resident Councillor, and the captain of the vessel, with some of her officers, the Dutch Admiral and others, have paid a visit to the Batu Kawan Sugar Estate, with which they expressed themselves highly delighted. The majority of the passengers — M. Theo among the rest, are pent up on board, with a magnificent, but we fear, monotonous view of Pulo Jerajah, the South Channel, and the opposite coast, and we are surprised to hear that the great necromancer has declined to blunt the tedium of the detention by his legerdemain unless he is guaranteed a purse of £20."

A list of the passengers on board the *Bombay*, who left England on the 4-10th October, will be found in our issue of the 17th October.

The following items are from the *Penang Argus* :—

The Chaplain of St. George's announced on Sunday last from the Communion Table that it was the intention of the Lord Bishop of Calcutta to hold a confirmation in Penang on the 5th of January next.

We learn, on inquiry, that, on the whole, the paddy crop in Penang in likely to prove a good average one, the late heavy rains not having seriously affected it,—the beneficial result of rapid drainage. October, 1859, gave us 22·6 inches of rain ; the same month, in the following year, gave only 10 inches ; and the fall last month was 17·9. In some parts of Penang the late heavy rains have, we hear, been slightly injurious to the crops. In the province again, speaking generally, there is promise of a fair average crop. These data are interesting and valuable, — not only in respect of a cereal produce which forms the chief food of the mass,—but, as "a wet yule makes a fat churchyard" at home, so a deficient paddy harvest here swells the calendar of crime.

We mentioned in our last that some excellent bags of snipe had been recently made in the province. They were very satisfactory on the whole, the best being that of Mr. Waller, who bagged 31 couple (precisely the same bag he made in Penang) in four hours' shooting, in which there were several double shots in succession. Considering the time in which it was done, and the intense heat of the day, (some of the "guns" succumbing to it) perhaps the bag is a better one than the 41 couple in six hours to which we alluded on a former occasion, but the latter still remains the "cock-score" of the season, and is, we opine, likely to remain so.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BENEDICTSEN—At Tien-tsin, on the 24th October, the wife of James Jacob Benedictsen, Master of the Danish brig *Wilhelmine*, of a son—the first child of European parents born at that place.

HOUGHTON—On the 16th inst., at 3, Denbigh-road, Bayswater, the wife of Arthur Houghton, Esq., of a son.

PADDAY—At Sree Menanti, Singapore, on the 19th November, the wife of Reginald Padday, Esq., of a son.

MARRIAGES.

CLARK—WINSLOW.—On the 29th Oct, at Haward Church, Charlestown, U.S.A., by the Rev. Geo. E. Ellis, D.D, David Oakes Clark, of China, to Catharine Elizabeth, eldest daughter of the late George Winslow, of South Malden, Mass., U.S.A.

ROBERTS—MOORE.—At Trinity Church, Shanghai, by the Rev. W. Pownall, on the 19th October, Mr. J. L. Roberts, of Shanghai, to Miss Emily Moore, of Sydney.

STANFORD—MORRIS.—At St. John's Cathedral, Hong Kong, on the 5th November, by the Rev. George Wylde, military chaplain, Capt. William Kent Stanford, to Mrs. Isabella Frances Morris.

DEATHS.

BAILLEY.—Drowned, off Deep Water Bay, on the 8th November, Edward Bailley boarding-house keeper, Queen's-road West, aged 33 years.

JONES—Drowned, off Deep Water Bay, on the 8th November, Daniel Jones, proprietor of the London Tavern, Queen's-road, aged 34 years.

LEE—At Hong Kong, on the 31st October, William B. Lee, aged 18 years.

NORWOOD.—On the 22nd Nov., on board the steamship *Orissa*, on her voyage from Aden to Suez, Robert Norwood, Esq., Capt. H.M.'s 3rd Dragoon Guards.

ROBINSON—At Hong Kong, on the 31st October, Captain Robinson, British barque *Omar Pacha*.

ROWE—On the 14th inst., at Bellevue Cottage, Newlyn, near Penzance, the Rev. R. M. Rowe, M.A., Fellow of Exeter College, Oxon, and late British Chaplain at Alexandria, aged 32.

SCHWABE.—On the 3rd inst., at Scarborough, Henry Schwabe, Esq.

STUCKEY.—At the Royal Hotel, Macao, on the 5th November, William Stuckey, ship-carpenter, lately of Hong Kong.

TINDALL.—On the 18th inst., at his residence, Scarborough, Richard Harris Tindall, in the 38th year of his age.

COMMERCIAL REPORT.

CHINA—EXPORTS.

SHANGHAI.—TEA (Black).—Prices show no change, but to tempt buyers a still further decline would have to be submitted to. Shipments for the fortnight amount to 12,900 chests, making for the season to date 108,760 chests against 37,800 chests last year. Stocks are estimated at about 17,000 chests Hankow Teas, 1,000 chests Hoochow, and 1,500 chests old Common Congou, new Flowery Pekoe 500 chests and old 200 chests, making a total of 20,200 chests against 8,600 chests last season. Prices at Hankow are very firm, and they are paying Tls. 18 to 20 for third crop Oopacks and medium Ningchows, higher rates than were given at the beginning of the season for finest Oopacks. Greens.—The steady rise in the home markets reported last mail has caused a further advance here, and settlements have amounted to 13,313 half chests China and 570 half chests Japan, principally for America. Stocks continue very small. Settlements to date. China 70,403 half chests against 42,200 half chests last year. Japan 10,200 half chests against 16,500 half chests last year. Stocks: China 9,000 half chests; Japan 1,500 half chests.

FOOCHOW.—Congou: Settlements 26,000 chests and 2,000 half chests, say—Low and dusty kinds at 5 to 9 tls. 8,240 chests and 17,000 half chests. Ordinary to good Ordinary at 10 to 13 tls. 6,920 chests and 4,300 chests. Mixed leaf kinds at 14 to 17 tls. 5,640 chests and 3350 chests. But middling to middling at 15 to 20 tls. 3,600 chests and 2,250 chests. Medium Kaisow kinds at 20 to 23 tls. 1,600 chests and 1,100 chests.

AMOY.—Plain Orange Pekoe settlements for the month comprise 799 half-chests of common quality, at 13 to 14 per picul, short price. Arrivals to date are, market 9,331 half-chests, settlements 8,571 half-chests, sent coastwise on native account 118 half-chests, stock 642 half-chests, contract 1,914 chests; total, 11,245 half-chests against 16,582 half-chests and 2,384 boxes last season. Congou: Transactions since the 10th ult. reach 1,364 half-chests at $8 to 17.75 for low ordinary to good common cargo. Arrivals to date are—Market 21,200 half chests and 100 boxes, settlements 115,658 half-chests, sent coastwise on native account 1,635 half-chests, stock 7,995 half-chests, contract 1,163 half-chests; total, 22,451 half-chests and 100 boxes against 20,197 half-chests last season. Oolong and Ankoi. The business done, in both Oolongs and Ankois, shows a considerable falling off as compared with last month, the settlements of the former amounting to only 10,901 half-chests a 15 for low mixed kinds, to 20, 50 for rather preferable to good common cargo and $25 for good cargo trade. 342 half-chests comprise the settlements of Ankois at $9,25 a 14 per pil., for common to good clean tea.

CANTON.—Holders of Congou are so extremely firm that very little business has been done, and that at the high rates previously ruling. In Scented Teas considerable settlements have taken place at fully previous rates. Canton Green Teas also continue in active request at previous rates.

SILK.—Shanghai: The receipt of further depressing news from Europe has had the effect of reducing our quotations about 5 to 10 taels per picul, at which some 3,500 bales found buyers. Tsatlees: No. 1, 445 taels per picul; No. 2, 420 do.; No. 3, 385 to 395 do.; No. 4, 350 to 370 do.; No. 5 and com., 300 to 325 do. Taysaams: No. 1, 340 to 350 taels per picul, nominal; No. 2, 310 to 320, do., do.; No. 3, 265 to 285 do.; Nos. 4, 5, and com., 210 to 250 do.

CANTON.—A very small business continues to be transacted, the business of the fortnight being reported at 50 piculs only. The quotations are—Loonkong, No. 1 and 2, $385 to $405. Gowkong, $365 to $375. Cumchook, rereeled, $435.

DRUGS.—Cassia: $15; sales, 3,000 piculs; stock, 2,000 piculs. Cassia buds: none offering. Cassia oil: $210 to $215; sales, 125 piculs; stock, 50 piculs, lately arrived. Anniseed oil: $140 to $145; sales, 70 piculs; stock, 250 piculs. Star anniseed: $15; no sales; stock, 400 piculs. Galangal root: $3. 80c.; no sales; stock, 700 piculs. Vermillion: $32. 50c. Ginger preserves: best, $2. 62c. to $2. 80c.

CHINA—IMPORTS.

The followiug is from the circular of Messrs. Walker, Borradaile, and Co., of Hong Kong:—The improvement in prices, and firmness of holders, noticed in our last, have been fully maintained, and the continued unsatisfactory news from America causing the advance in cotton in Liverpool and necessitating the "short time measure" to be adopted in the manufacturing districts is having its effects on holders here. No decided improvement can be noticed in the actual settlements, but the firmness shown, and the impossibility of replacing goods disposed of at present, quotations will no doubt ere long have this effect. Woollens: Enquiry is made for Camlets at $17 to $18. Lastings are likewise in demand. Metals continue dull without enquiry, and in heavy stock. We give our quotations and sales reported since our last, including Canton and auction sales:—Cotton Yarn: 16-24, $97 to $99; 28-32, $105 38-42, $112 to $115; sales, 335 bales. Grey Shirtings: 5¼ to 5½, $190 to $195; 6 to 6¼, $2-25 to $2-30; 6½ to 7, $2-35 to $2-40; 7¼ to 7½, $3-10 to $3-20; sales, 4,800 pieces. White Shirtings: 60 to 64, $2 to 2-30; 66 to 70, $2-40 to 2-65; 72, $2-75; sales, 500 pieces. T-cloths: 4¼ to 5, $1-70 to $1-80; 5¼ to 5½, $1-90 to $1 95; 6, $2-30; sales, 17,000 pieces. Span Stripes: scarlet, $1; assorted, $0-92; sales, 204 pieees. Long Ells HH: scarlet, $9-20; assorted, $8-25. Ditto H: scarlet, $9; assorted, $8. Lastings: $15 to $20.

COALS.—HONGKONG.—The article is becoming scarce. Cargoes afloat may be quoted, English steam $13; Sydney $9. At Shanghai, the demand is being supplied from the native mines. English steam are quoted 10 taels; Japan 4½ to 5 taels; Sydney 11½ to 12 taels.

MANILA.—There is very little of interest to notice, and the import market continues excessively dull, though it may be hoped that the dry season having now commenced, more activity may shortly spring up, and a reduction of the stocks held by both importers and dealers. With the exception of hemp, on the late low quotations, for which an advance is noted, prodnce remains much as last quoted, the scarcity of tonnage assisting to restrict business.

TIEN-TSIN, October 15, 1861.—Business has been rather slack during the last two or three weeks, but prices have varied very little from the last quotations. The inland traders will be leaving with their winter supplies about the middle of November; a brisk demand for goods may therefore be looked for up to that period, after which it is expected that business will decrease and remain inactive during the winter. It is reported that the Customs will permit goods to be bonded next year at Tien-tsin. This will be a great accommodation to importers, who otherwise have to pay duties, to allow the departure of the ships bringing large quantities of goods for four or five months consumption before the port is closed by the frost.

NEWCHWANG (YING-TSZE), October 9, 1861.—During the past month a fair business has been done in imports against paper Sycee. It has been resolved at a general meeting of the community that for the future all transactions in paper money shall be discontinued on account of its invalidity. The following quotations, therefore, being in Ying-tsze Sycee, appear to be about 15 per cent. lower than before, but the prices of exports are lower in the same ratio. American drills, heavy. T-Cloth and grey shirtings and opium are in good demand, and the dealers say they will be saleable during the wiuter.

SINGAPORE.—In white shirtings the demand noted by last mail continues, more especially for the fine qualities, of which sales to fair extent have been made at slight advance in rates. The lower descriptions are less enquired for. Madapollams continue very dull, and cambrics are also moving less freely, while white figures are quite out of demand in the mean time. Dyed and fancy goods generally are dull. Turkey red cloth is moving slowly at a slight advance in price, but prints, sajongs, &c. are still very dull and in heavy stock. In metals generally there is no change to be noted. Gunpowder is in much request and stocks nearly cleared. Beer both in wood and bottle, is still very dull. Coals without inquiry.—In exports there has been little variation in prices of produce during the fortnight, and an average amount of business has been done in most articles for the Europe markets. Tonnage is moderately plentiful, and the rising exchange has scarcely as yet begun to effect prices. Tin is not quite so much wanted, but prices have undergone little change. Gambier has been taken to fair extent, latterly at a few cents under last mail's rate. Coffee has continued in brisk demand, and although considerable arrivals have taken place, full prices have been obtained. Sago flour is rather scarce, and latterly slightly higher prices have been paid. In pearl sago little business has been done. Black pepper is still rather scarce, and is readily taken at last rates, and white, which is also coming to market slowly, has been purchased at advanced rates. India rubber has been purchased at lower prices, and the market is now cleared. Gutta percha of first quality is scarce, and in good demand at last quotations. Rice is still in fair enquiry and without change in price.

BANKOK.—Since last report no alteration of note occurred until within the past few days, when symptoms of improvement began to manifest themselves by an increased demand for rice and several other staple articles of export. Recent advices, both from China and Singapore, report more favourably of the prospects for rice and other produce in these markets, and buyers are now more eager to make shipments. The great scarcity of money prevailing, however, tends to check operations materially, and but for this, we believe prices of the articles most in demand would have advanced. Tonnage is in moderate demand.

JAPAN.

YOKUHAMA, OCT. 18, 1861.—IMPORTS:—Since last report trade in imports generally has been less active, and some forced sales have been made by holders anxious to realise. About 1,000 pieces of camlets have been sold at quotations. Deliveries of shirtings are estimated at 8,000 pieces. Brocades and spots can only be quitted in barter for tea, stocks in the hands of natives being excessive. The late demand for cotton yarn has entirely subsided.—EXPORTS.—Silk; Transactions have been very limited, principally on account of the inferiority of the parcels brought to market and unfavourable reports on Japan silk received from home. Settlements in the past month have been but 100 or 200 piculs, and for the season, to date, about 2,400 piculs. The price, which advanced $15 before the arrival of the mail, has again declined to the same extent. The following are about the current quotations:—Hanks, best parcels, $495 to 510, middling to fair, $470 to 485, common $440 to 460. Ida, good parcels, $530 to 550. Sodai, $480 to 485 nominal. Cotia and Oshio parcels are so much mixed that actual quotations cannot be given. The stock is about 300 piculs. The export to date from 1st July is to London 777, Shanghai 2,344, Hong Kong 11 bales. Total, 3,132 bales.—Tea: Medium kinds have been in demand, and an advance has taken place. Finer kinds are less in request on account of unfavourable reports from the home market. Settlements 1,000 piculs, stock 500 to 600 piculs.

NAGASAKI, OCT. 18, 1861.—IMPORTS:—Grey shirtings are saleable for cash at about 5 per cent. less. There is a moderate inquiry for white shirtings, dyed spots, Turkey reds, chintzes, damasks, and dyed brocades; all other goods are in little demand.—EXPORTS.—Silk: The parcels offering are of so mixed and inferior a character that classified quotations can-

Digitized by Google

not be given. Prices still compare unfavourably with the home rates. No. 1 Ida is quoted at $500.—Tea: Lower rates would be accepted for the very common descriptions.—Exchange: Drafts on Shanghai 1 per cent. discount; Itzebor 233 per Mexican $100.—Freight: For Shanghai, $4 per ton of 40 feet; for Hong Kong, $8.

HANKOW, OCTOBER 28, 1861.—TEA.—Settlements 10 chops at tls. 18.5 to 21.0 for 3rd crop Oopacks; arrivals 15 chops making total to date 161 chests; contracts, 56 chests; sold and shipped, 201 chests; stock 16 chops.

CHEFOO (YENTAE), SEPTEMBER 10, 1861.—Trade is all but suspended.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 0¼d. to 6s. 0½d.	6s. 1d. to 6s. 1¼d.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: Oct. 26, Merse. From Liverpool: 29, Celestial. From Cardiff: 26, Volunteer. From Sydney: 31, Veloz. From San Francisco: 28, What Cheer.

At HONG KONG, MACAO, and CANTON.—From London: Oct. 29, Millbrook; Nov. 9, Red Riding Hood. From Liverpool: Oct 29, Koh i-noor. From Sydney: Nov. 2, George Lee. From Melbourne: 11, Joshua Bates. From San Francisco: 3, Benefactor.

At MANILA.—From Cadiz: Nov. 2, Guadalupe. From Melbourne: 1, Julia.

At SINGAPORE.—From Hamburg: Nov. 18, Rhenie.

SAILED.

From SHANGHAI.—For London: Oct. 29, Spirit of the Deep; 30 Kate Carnie; Nov. 2, Druses.

From FOO-CHOW-FOO.—For London: Nov. 8, Magna Bona, Hanover. For Havre: 8, Tafarette. For Continent: 5, Richard.

From AMOY.—For New York: Nov. 10, Mansfield.

From HONG KONG, MACAO, and CANTON.—For London: Nov. 5, Dimmrail. For Cork: 10, Osnabruck. For Liverpool: 14, Patna. For England: 3, H.M.S. Simoom. For Sydney: 10, Marguerite Eliza. For Melbourne: 12, Formose. For San Francisco: 6, Dictator.

From MANILA.—For Liverpool: Oct. 28, Casas, Clementina, Valdivia. For Sydney: Great Britain. For San Francisco: Nov. 2, E. Cushing, Mephista.

From BANGKOK.—For Falmouth: Oct. 22, Orestes. For New York: 31, Sunda.

From SINGAPORE.—For London: Nov. 8, Harmonia.

From PENANG.—For London: Nov. 11, Ecliptic; 22, Ceylon. For Liverpool: 18, Greyhound.

LOADING.

At SHANGHAI.—For London: Anglo-Saxon, Cyclone, Lansdowne, Queen Bee, Rapido. For Liverpool: The Cedars. For New York: Mary Lee, Queen of May. For San Francisco: What Cheer

At FOO-CHOW-FOO.—For London: Coeriemulzie. For New York: Cossack, Dennis Hill, Mirage. For Sydney: Inverna. For Australia: Dispatch, Jupiter.

At HONG KONG, MACAF, and CANTON.—For London: Albuera, Koh-i-noor, Milbrook, Etheldreda, Margaret Michell. For Continent: Richard. For New York; Haddington. For Cape of Good Hope: Maggie Miller. For Demerara: Earl of Windsor, Agra. For Sydney and Melbourne; Agincourt, Joshua Bates. For San Francisco: Benefactor, George Lee, Mary Whitridge.

At MANILA.—For London: Constance, John Scott. For Liverpool: General Churrerea, La Foi. For Cadiz: Duque de Tetuan, Margarita. For Sydney: Cornelis Smith. For Melbourne: Julia, Otto.

At BANGKOK.—For London: Lavinia. For Europe: H.I.M.'s steamer, Marne.

Digitized by Google

At Singapore.—For London: Allendale, Coromandel, Recruit, Spirit of the North For Liverpool: Wayfarer. For Europe: Cecilia. For New York: John Jay.

At Penang.—For London; Golconda.

FREIGHTS AND CHARTERS.

At Shanghai.—To London: Tea, £2 10s. to £3; silk, £4 to £5. To New York: Tea, $14 to $15; silk, $25. A better demand has been experienced during the past fortnight, it being chiefly for the Yang-tsze Rivers, as sailing vessels find but little difficulty in reaching Hankow at this time of the year, and nearly every ship in port is engaged at full rates. There is nothing doing to Japan, and very little to the South. The following charters are reported: The Vickery and Canton, both on the Yang-tsze, for six months; the former at $1,275, and the latter at $1,500 per month; Macao to Nagasaki and back, $1,300 per month; Borderer to Foochow and back, 45 lay days, $4,000; Adriatic to Swatow and back, 50 lay days, $3,400; Nordstern Greta, and Saturnus to Newchwang and South, at $1,450, $1,000, and $1,300 per month respectively; Caprolani from Foochow to New York, at $15 per ton. The Clemens (Brem) has been sold for 6,500 taels, and the steamer Fernandez (Port), for Mex. $80,000, and is now called the Antelope, and under the British flag.

At Foochowfoo.—The rates at this port remain without any alteration.

At Amoy.—A considerable business has been done, but not at such satisfactory rates, in consequence of the dull demand. The amount of seeking tonnage in port is very small. The following are amongst the charters:—Lady Amherst, to Singapore, Samarang, and Sourabaya, 50 days, $3,800. Aallotai, to Hong Kong and Macao, 25 days, $2,000. Lebanon, same journey, 10 days, $1,800. Kate Hastings, 4 months on coast, at $1,450 per month.

At Hong Kong, Macao, and Canton.—To London: £3 to £4. 10s. The shipping prospects in these waters still continue good, the amount of disengaged tonnage being still further reduced. A large quantity of produce awaits shipment at Foo-chow-Foo and Manila, and vessels must be supplied from these ports. For San Francisco and Australia a good business also continues. For the rice ports the Chinese are also offering charters at advanced rates. Those reported are—Millbrook and Koh-i-noh to London at £3. 10s., and £3. 10 to £4. 10s. Jura from Manila to United Kingdom at £3. 5s. to £4. 10s. Padel from Batavia to Europe at £4 to £5. 10s. Benefactor to San Francisco $8,000 in full. Peyche, Susan Douglas, Nabob, Magnus to Bankok and back, at 65c., and 4 vessels to Saigon and back at 55c. to 60c. The following ships have been sold - Admiral Baudin for $10,000, City of Nantes (steamer) for $60,540, Cowper (steamer) for $50,000, Waterman (steamer) for $20,000, Albuera, chartered by British Government to convey troops and cargo to England, at terms unknown.

At Manila.—The following are the rates for the ships loading for the home ports:—Constance, £3 12s. 6d. to £4 7s. 6d.; John Scott, at £3 5s. to £4 10s., both for London; La Foi, at £2 5s. to £2 5s.; General Churruca, at £3 10s. to £4. 5s., both for Liverpool; Otto, at £4 to £5 for Melbourne; and Cornelis Smit, at £3 to £3 10s., for Sydney.

At Bangkok.—Tonnage is in moderate demand, and freights are rather lower. The Nautilus while seeking obtained $10,000 in full to carry a cargo of teak logs to Shanghai.

At Singapore.—The shipping prospects here are still good, and the rice charters having commenced, many large-sized vessels will find employment which might have experienced some difficulty in obtaining a charter. Those reported are:—Cecilia, to load from two ports in Java at £4 per ton to Gottenburg, £4. 5s. to a port in the United Kingdom, or between Havre and Hamburg, or £4. 10s. if to a port in Sweden not further north than Stockholm; George West, from one of the rice ports, at £3 per ton to Great Britain, or £3. 5s. if to a port between Havre and Hamburg. The Allendale has taken the berth for London at £3 per ton for dead weight, and £3. 10s. for light freight and measurement, and has nearly a full cargo engaged.

At Penang.—The Golconda is the only vessel on the berth for England, and she loads at £3. 10s. dead weight, £4 light freight, and £4. 5s. measurement.

CASUALTIES.

The St. Paul, Regina, and Thorwaldsen, were driven aground on a sandbank, on the 19th of October, near Takao, during a very severe typhoon, and were obliged to cut away their masts. The two former lost both fore and mainmasts, topmast yards &c., and received other injuries to the hull. A great number of native craft were driven to sea, and many lives lost.

The Kossuth run on shore close to Joss Islet on the 27th Oct., and was quickly boarded by wreckers, who threatened the captain and crew with death, and only escaped by jumping overboard, and proceeding on foot to Taiwanfoo, and from thence to Takoo in a Chinese boat, where they arrived on the 30th Oct.. She had a full cargo of deals and other general freight; and the Wild Wave when she passed the spot observed the Kossuth on fire.

The Amr. ship Tsar is reported as having been totally wrecked off the bar at Newchwang.

The Sea Belle was also ashore on the west bank of Tien-tsin at the entrance of the river, in charge of a Chinese pilot, but having a smooth sea she was likely to get off.

PASSED STRAITS OF SUNDA.

From England and Continent to China: Oct. 27, Granger; 31, Ocean Gem; Nov. 6, Lion. To Batavia: Oct. 27, Eliza Thornton; 31, Eagle; Nov. 7, Eleonora. To Singapore: Nov. 10, Congo. From China to England and Continent: Oct. 25, Wynaud; 26, Charlotte Ann; 27, City of Carlisle; 28, Empress of India, Blohm; 31, Mischief, Raleigh; Nov. 1 Clara Novello; 6, Lord of the Isles. To New York: Oct. 29, Leichhardt; Nov. 9, Prince of Wales. From Singapore: Oct. 24, Electric. From Manila: 26, T. E. Lemon; Nov. 9, Cervantes. From China to Sydney: Oct, 27, John Stephenson.

Continental Intelligence.

RUSSIA.

(from our own correspondent.)

St. Petersburg, Dec. 16.

The latest numbers of the *Peking Gazette* arrived in this city overland *via* Siberia. It contains a string of new Decrees published by the Council of Regency in the name of the young Emperor, which serve to throw a significant light on the benighted state of the Chinese, who affect to sneer at Western civilisation, and consider all the nations of Europe as incorrigible barbarians. Among these curious documents are the following:—

"A decree appointing a Commission to find a proper and becoming posthumous name for the first wife of the late Emperor Saigne-fine.

"A decree to forbid commanding officers and high official functionaries to quit their posts in order to repair to the capital.

"A decree to add posthumous names to former Emperors and Empresses.

"A decree confirming a former edict of the late Emperor, releasing his uncle Houi-Tzigne-Vane from the ceremony of genuflexion in the present reign.

"A decree releasing the six uncles of the present Emperor from the ceremony of genuflexion on all ordinary occasions, in which he says:—'As we should not feel easy in our conscience to see them fall on their knees in our presence like other common mortals we therefore dispense with their genuflexion on all ordinary occasions, restricting it only to the great days of ceremony four times a year in the 1st, 4th, 7th, and 10th month'.

"A decree on the important subject of Court mourning says:—'The princes and dignitaries of the capital charged with the affairs of mourning, conjointly with the Director of the Ministry for Ceremonies, having duly presented their reports, ordaining among other things that the Empresses and the feminine half of the Court, after wearing white mourning for twenty-seven days, should then change to middle mourning (grey), we hereby give notice that the Empress Mother and the Empress-Consort, of the defunct Bogdochan are pleased to ordain that they and all the other women of the late Emperor shall continue to wear the costume of white mourning for the space of a hundred days.'"

And lastly, I may mention an Imperial publication concerning the denomination of the reign of the new Emperor, in which it says:—"The princes, dignitaries, and governors of the Supreme Council have personally received our Imperial orders to employ in future as a proper and befitting designation of the years of the new reign the two letters *tai-siame* (the Happy Augury."

From the opening of the navigation on the 26th of April, O.S., till its close on the 1st of November this year, the number of vessels of all descriptions that arrived at St. Petersburg, including those from the interior loaded with country produce, was 17,680, bringing goods to the value of 33,219,486 silver R., whilst the goods exported this year down to the 1st Nov was 46,747,433 S. R., against 51,720,691 S. R. in 1860.

PRUSSIA.

(from an occasional correspondent.)

Berlin, Dec. 22.

I am sorry to have to report the total loss of the Prussian sailing corvette *Amazone*, First-class, Lieutenant Hermann, on the Dutch coast, with all hands on board, and under very distressing and peculiar circumstances. It appears that the ill-fated vessel, in obedience to orders from head-quarters, sailed from Dantzig at the end of October, and arrived at Elsinore on the 2nd of November, from whence the Commander sent a telegram to the Admiralty at Berlin, announcing his safe arrival there, and intention of proceeding to sea on the next morning, which he carried into effect, as was learned from a subsequent despatch from the Prussian Consul at that port. As the corvette was ordered to cruise off the coast of Portugal during the winter months it caused at first no uneasiness that a long time elapsed without any accounts of her being received, as she might easily have run down the Channel with a fair wind and got out to sea without having had any opportunity of communicating with an English or French port; but when a month and even six weeks had passed without bringing the expected telegram of her arrival at Lisbon, great fears began to be entertained for the safety of the corvette—the more so as it was well known that, in addition to her regular crew, she had on board twenty-seven naval cadets and a similar number of sailor boys for practical instruction in the duties of the profession. It was only about a week ago that any intelligence tending to corroborate the loss of the *Amazone* has come to hand, when a despatch was received from the Prussian Consul at Amsterdam to the Admiralty here, stating that a Prussian Royal standard had been washed ashore and picked up on the

Digitized by Google

coast at a village called Zuerig, near Harlingen. Orders were immediately telegraphed to the Consul to send the flag for inspection; and sure enough, from the private mark in it, there remained no doubt that it did belong to the *Amazone*. As this is a flag but very seldom used—in fact, only when a member of the Royal family is on board—it is carefully stowed away down below, and therefore could not have been accidentally washed overboard by a heavy wave rolling over the vessel. But in addition to this indirect proof of the wreck, a very handsome boat, of the finest workmanship, and lightly copper-bottomed, with the name "*Amazone*" painted on the inside of her stern—in all probability the Commander's gig—was since picked up on one of the outlying islands to the north of the Texel, so that there can now be no doubt of the fate of the luckless vessel, and that all on board have met with a watery grave. This unfortunate occurrence has thrown a deep gloom over the whole country, and particularly this city, suddenly plunging many of the first families into the deepest affliction and mourning, as just at present the greatest exertions are making to organise and extend the already formed nucleus of a German navy under the direction and command of Prussia, and the service has become so popular here that many noble families had enrolled their sons as naval cadets, and had fondly hoped to see them in time distinguish themselves as much at sea as the Prussian armies are respected on land.

In connection with this unfortunate affair it is just a twelvemonth since a similar case occurred in the total loss of the schooner-of-war *Frauenlob*, which accompanied the Prussian expedition of last year to China and Japan, and was lost in the Sea of Japan, with all hands, in the same typhoon in which H.B.M.'s brig-of-war *Camilla* foundered; nothing having ever been heard of either of these two unfortunate vessels.

In the case of the *Amazone* there can be no doubt that great blame attaches to those officers who selected her for the performance of a duty requiring especially a well-found and seaworthy vessel; whereas it is well known she was an old rotten tub, built more than twenty-five years ago, of primitive construction, very short of beam, and not fitted with a steam engine. When she was at Hamburg with the flotilla of Prussian gunboats, in the month of September last, and was inspected by the nautical men of that city, there was but one opinion of astonishment expressed that she should be sent to sea at all, or used for any other purpose than a coal hulk or a guardship. Indeed, the Grand-Admiral, Prince Adalbert, who went down there to inspect the squadron, seems to have been impressed with the same apprehension, and though the *Amazone* was by far the largest vessel of the flotilla, he was unwilling to risk his own life in her, even in so short a trip as round to the River Weser, but preferred hoisting his flag on that occasion on board one of the gunboats.

What tends to make this case still more melancholy is the following episode, which is well known here as an undeniable fact, and as such freely circulated in this city:—"Lieutenant Hermann, the Commander of the *Amazone*, is known to have been perfectly aware of the unseaworthiness of the vessel committed to his charge, and has several times made representations to his superiors on the subject. Only as lately as September last, when he received his orders to make preparations for the voyage, he again ventured to urge the Admiralty to give him some other vessel, as the *Amazone*, he said, might possibly bear a squall in the Baltic, but could never outlive a storm in the North Sea or Atlantic. In answer to this he received the following telegram:—'Officers of the Prussian navy are not required nor allowed to give advice to their superiors unless specially asked for. Fulfil the instructions given you to cruise in the Atlantic during the winter, occasionally putting into a port on the coast of Portugal.'"

In England a strict inquiry would be made into the circumstances in a similar case, and the result be made known; but here no one is responsible—the newspapers are afraid to speak out—and the whole affair will be hushed up.

The result of the general elections for the House of Representatives, which have just terminated, is found to be as follows:—112 Progressionists, 140 Liberals, 21 Conservatives, 51 of the Ultramontane or Clerical party, 23 Poles, and 5 who have not yet made up their minds. Three of the Ministers—General Roon for War, Schleinitz for the Royal Household, and Bethmann-Hollweg for Education—were defeated, and have lost their seats. One hundred and fifty-four (out of 352) members of the last Parliament were re-elected, sixty-eight of whom belong to von Vincke's party—all the rest are new members.

Intelligence has been received that Count Eulenburg, the Prussian envoy, after succeeding in signing a treaty of commerce between his country and China, has settled the bases of one between Prussia and Siam.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Dec. 23.

The debates in the Second Chamber of the States General have been confined to the discussion of the Budget for 1862, and offer but little interest to readers out of the kingdom. Both Chambers have now adjourned till after the holidays.

In the face of the serious complications that threaten a rupture between England and the North American Union, the question of increasing the navy of this country has not been lost sight of, and debates on the subject have taken place in both Chambers, the result of which is to leave it with confidence in the hands of the Government. At the beginning of this year the state of the navy was as follows:—5 steam frigates, with 243 guns, and of 1,950-horse power; 2 steam corvettes, 38 guns, and 300-horse power; 38 screw steam vessels, 421 guns, and 4,814-horse power; 12 paddle-wheel steam vessels, 75 guns, and 2,300-horse power; and 1 ditto (colonial), 4 guns, and 150-horse power; showing a steam force of 38 ships and 781 guns. Besides these are the sailing vessels, consisting of 6 floating batteries, of 178 guns; 2 line-of-battle ships, with 148 guns; 3 first-class frigates, with 156 guns; and 4 second-class ditto, with 128 guns; 1 raséed frigate, 22 guns; 4 first-class corvettes, with 88 guns; 2 second-class ditto, 70 guns; 7 brigs, with 108 guns; 1 transport, 10 guns; 13 other defensive vessels, with 65 guns; to which must be added 34 large gunboats, with 68 guns, and 11 small ditto, with 11 guns; together, 88 sailing vessels, with 1,052 guns; thus showing a grand total of 146 steam and sailing vessels, with 1,833 guns. During the course of the present year several valuable additions have been made to the navy, amongst which are the new steam frigate *Adolph of Nassau*, 51 guns, and various smaller steamers, as reported in my previous letters. The above-mentioned frigate and the new steam corvette *Medusa* are ordered to be brought forward for immediate service, and will be commissioned early in January. It is reported in naval circles that they are to reinforce the squadron in the West Indies, the greater number of the vessels belonging to which have repaired to Laguayra to seek redress for some imaginary or real insult to the Dutch flag on the part of Venezuela.

The King has conferred the insignia of the Grand Cross of the Luxemburg Order of the Crown of Oak on his Excellency C. F. Pahud, ex-Governor-General of Netherlands India, as a public mark of the Royal approbation of that gentleman's administration of the affairs of the Eastern colonies. It is reported that he is to be created a Minister of State without a department, but with a seat and a vote in the Cabinet, but I have reason to believe there is no foundation for the rumour.

Count E. F. von Bentheim-Tecklenburg-Rheda, one of the superior officers in the East India Civil Service, now on leave of absence to this country, has received from the King permission to accept and wear the insignia of an Honorary Knight of the Order of St. John of Jerusalem, conferred on him by the King of Prussia, who is Grand Master of the Order. This is, perhaps—with the exception of the Golden Fleece—one of the most aristocratic orders of knighthood in existence, requiring unequivocal proof of sixteen noble descents, both on the paternal and maternal side.

Government has laid before the Second Chamber of the States General twelve Bills for the naturalisation of foreigners, among whom are the following gentlemen connected with India:—W. C. von Schierbrandt, of Batavia; C. A. Bunsen, E. C. Heydorn, and H. Kaula, in Netherlands India; Mackartis Johannes, of Tagal, in Java; G. W. Oppel, B. G. Trompheller, C. P. Kauffman, C. D. Huseman, and E. F. Helmkampf, in Netherlands India; and J. Hartzfeld, of the Island of Java.

The mail edition of the *Batavian Handelsblad* states that the preliminary works for the construction of the railroad between Samarang and Voorstlanden are definitively settled in the Netherlands, and that the concession is granted to Mr. Poolmann. As this is the first intelligence of the affair that has transpired in this country, it has naturally caused great surprise to receive it from such a quarter, and it will probably form the subject of an interpellation in the Second Chamber when the Colonial Budget comes on for discussion.

Digitized by Google

At a general meeting of the members of the "Indian Association" held last week at the Hague, the Board of Directors under the new organisatisn were constituted as follows:—Mr. G. M. van der Linden, President; G. de Serriere, Vice-President; J. Th. Canter-Visscher, Th. F. Schill, D. van Aalst, Dr. P. J. Veth, D. Fransen van der Putte, H. Bekking, and J. Boudewynse.

The afflicting intelligence of the death of H.R.S. the Prince Consort was received everywhere in this country with the most profound sympathy, and all the vessels in the port hoisted their flags half mast high. The Court has gone into mourning for sixteen days; the first eight days half-mourning is to be worn, and then light mourning for the succeeding part of the term. The Court of Prussia goes into mourning for three weeks, and that of Belgium—as more nearly related to the deceased Prince—for two months.

A letter from Vliessingen states that Rear-Admiral Vogelpoot, late Commander-in-Chief of the naval forces in Netherlands India, and who was succeeded by Rear-Admiral May, as mentioned in a former letter, will return to this country in January next, in the war steamer *Ardjeono*, Captain-Lieutenant Siedenburg.

The steam corvette *Princess Amalia*, Captain-Lieutenant de Kroef, has arrived at Vliessingen, from Batavia, and proceeded to the Texel, where she will be put out of commission for the present, and then go into dock to undergo repairs, so as to be ready for further service in the spring, should circumstances require her to be re-commissioned.

Another detachment of supplementary troops, consisting of a hundred and fifty non-commissioned officers and men, under the command of Captain L. F. Donleben, of the East India Infantry, who is returning from leave of absence to this country, accompanied by the second lieutenants G. A. Van Steenfelt and A. A. Gewin, of the East India Infantry, the second lieutenants of cavalry F. K. van Walderen and J. H. Stoeffken, and second lieutenant of engineers C. de Vos, as well as F. J. de Ruyter, medical officer of the third class, have received orders to embark, on the 28th inst., at Rotterdam, on board the chartered transport *Sliedrecht*, Captain Y. Feenstra, for Batavia.

A commission has been appointed by the King to investigate the affair of the Royal College at Delft. The president is Mr. Borret, member of the Council of State; and the other members of the commission are Baron Schimmelpenninck van der Aye, member of the First Chamber, General Delprat, and Mr. Gevers Deynoot, members of the Second Chamber, and Mr. Junius van Hemert, of the E.I. Civil Service.

The papers relating to the concession granted to Mr. de Jaeger for the navigable great ship canal from this city to the sea have been returned to the Minister of the Interior duly signed and sealed; so that the preliminary operations for the execution of this important national undertaking will commence immediately, and be continued all through the winter, if the weather permits.

By the last Overland Mail a circular has been received here, signed by thirteen of the principal mercantile houses at Batavia, stating that in consequence of numerous complaints from Amsterdam and Rotterdam of the quality of Java sugar made by centrifugal machinery, and exported from Sourabaya and other eastern ports of Java, a searching inquiry has been made respecting that mode of manufacturing the article, the result of which is that it is now fully ascertained that the quality of the sugar deteriorates very considerably during the voyage, in consequence of which they have resolved unanimously to establish a difference of two florins per picul in favour of sugars not made by the centrifugal process.

At the second and final election of a member of the Rotterdam Chamber of Commerce and Manufactures, vice Mr. Obreen, who has accepted the appointment of managing director of the Netherlands Trading Company, the contest was between Mr. C. Burlage and Mr. J. G. de Bruyn. The former gentleman had ninety-three votes, whilst his antagonist polled only sixty-one, and Mr. Burlage was declared to be duly elected.

Captain Wiercks, of the clipper *Fop Smit*, whose extraordinary quick voyage to Java out and home I noticed in my last letter, has been created by the King a Knight of the Order of the Crown of Oak.

Lieutenant Kreytenbrouwer, of the East India Artillery, has received orders to rejoin his corps, and embarked at Nieuwe Deep on board the *Cornelis Wernard Edward*, for Batavia. Similar orders were given to Lieutenant J. A. Boellaard, of the E. I. Infantry, and he proceeded from the same port by the *Cortgene*, Captain Dunlop, for Java.

The King has granted to Captain F. G. Steck, of the E.I. Infantry, now in this country on leave of absence, the Royal license and permission to accept and wear the insignia of a Knight of the First Class of the Order of the White Falcon, conferred on him by the Grand Duke of Saxe-Wiemar-Eisenach.

Capt. G. F. Ommeren, of the Dutch brig *Minerva*, of Rotterdam, has just received from the British Government a handsome silver-mounted telescope, as a reward for his services in saving and humanely treating the crew of the English brig *Charles Brownell*, when in a sinking state.

PASSENGERS ARRIVED.

Per *Netherland and Orange*, Capt. van Ruyven, at Brouwershaven, from Batavia: Mrs. and Miss Guise, Messrs. van Dort, E. Weiss, C. Michaeles, and J. Michaeles.

Per *Krimpenerwaard*, Capt. van Heiningen, at Nieuwe Deep, from Batavia: Mr. G. J. Cochius and daughter.

Per *Alcor*, Capt. van Oppen, at Brouwershaven, from Java: Mrs. Verenet and two children, Mr. J. C. van der Zweep, Capt. Weber, of the E. I. Artillery, Mr. G. van Davelaar-Cnopius, and Baron van Boecup, naval Lieutenant of the First-class.

PASSENGERS OUTWARDS.

Per *New Holland*, Capt. Tuk, from Amsterdam to Batavia: Mr. and Mrs. Salomonson, Mr. and Mrs. Hardsteen and family, Mr. and Mrs. Hupscher and child, Messrs. Arends de Wolf, Maurenbrecher, van der Weide, and Arendsen.

Per *Cheribon*, Capt. Koers, from Amsterdam to Batavia: Capt. van Bosstraeten, of E. I. Infantry, A. Verbruk, Second Lieut. of E. I. Artillery, J. de Cock-Bruning, Lieut. of Sappers and Miners, J. C. Dozy and H. G. Gerx, Lieuts. of Infantry; 150 men supplementary troops.

Per *Ortelius*, Capt. Groote, from Amsterdam to Batavia: Messrs. P. E. Kleyn van Willigen, J. G. van Kessel, H. J. Ankersmit, J. F. van der Hagen, G. Roovers, A. van Meert, W. Cranen, G. Metz, and C. van Stein.

Per *Sourabaya Packet*, Capt. Olivier, from Amsterdam to Sourabaya: Mr. A. J. Rombout.

Per *Jason*, Capt. van Bueren, from Rotterdam to Batavia: Seven nuns, Messrs. Kostermans, J. van Hengst de Graaf, and three native servants.

COMMERCIAL.

Coffee.—Market very calm, and no alteration to report in prices. If good ordinary Company's Java is wanted, full prices must be given. A parcel of 6,600 bags private trade Java has just arrived, but not yet been sampled. At Rotterdam good ordinary Java, clean taste, has been paid with 45 cents. As there is no reason to anticipate a fall in prices, purchasers are turning their attention more towards Brazil, which is cheaper, and several parcels have been sold by importers at prices varying from 36½ to 39½ cents, according to quality.

For raw Sugar there is not much inquiry, and the business of the fortnight has been limited. There is, however, no anxiety to sell displayed by importers, and prices remain in a healthy state. The refined market is also calm, the principal orders for exportation having been executed.

Rice commands an easy sale at stiff prices, and a considerable business has been done. Among other sales, a lot of 635 bags Java was sold at Rotterdam at 10¼fl. 12,000 bags of Bassein, just come in, were previously sold for arrival.

Tobacco.—In consequence of the threatening aspect of affairs between England and the United States all descriptions of American tobacco are held for higher rates, and in many cases altogether withdrawn from the market. Java, consequently, becomes more inquired for, and a fair deal of business has been done at stiff prices. Amongst others, 676 packages Java TP, 92 ditto Karan, and 65 ditto PP TR.

Indigo and Cochineal are in firm hands, but prices are so high that no business is done, but for the execution of the most pressing orders.

Tin neglected. A few hundred blocks have been taken at 72fl., at which price more might be obtained.

Spices and Drugs decidedly dull, and the market wears a drooping aspect.

Rattans.—A parcel of 2,953 bundles was sold at a trifling reduction on previous rates.

Tortoiseshell.—A few lots of Macassar out of the Company's August Sale have found purchasers at 9½fl.

Tea.—But little business done. Prices without alteration.

On the whole, the market for Colonial produce in geneaal is in a rather torpid state, as is usually the case just before Christmas; nor is it likely that it will show any great animation till after the holidays.

Subjoined is the result of a sale of East India tobacco at Rotterdam:—

UNITED STATES.

THE PRESIDENT'S SPEECH.

SURPLUS OF CLAIMS AGAINST CHINA.

"I repeat the recommendation of my predecessor in his annual Message to Congress in December last, in regard to the disposition of the surplus which will probably remain after satisfying the claims of American citizens against China, pursuant to the awards of the commissioners under the Act of the 3rd of March, 1859.

"If, however, it should not be deemed advisable to carry that recommendation into effect, I would suggest that authority be given for investing the principal over the proceeds of the surplus referred to in good securities, with a view to the satisfaction of such other just claims of our citizens against China as are not unlikely to arise hereafter in the course of our extensive trade with that empire."

TRIAL TRIP OF THE "JIN KEE."

This vessel, which was at first called the *Celestial*, has been built by Mr. Lungley, at Deptford, for Messrs. Gibb, Livingston and Co., of China, under the superintendence and from the designs of Capt. Robert Durham.

Her dimensions are—Length between perpendiculars, 225 feet; beam, 27 ft. 3 in.; depth, 15 ft. 6 in.; burthen, 800 tons; and she is classed A 1 at Lloyd's. Her engines are on the oscillating principle, and of 185-horse power, constructed by the Messrs. Dudgeon, of Millwall, and are fitted with all the late improvements and appliances useful in a hot climate. The cylinders are 52-inch diameter, and 4½ feet stroke. The boilers are improved tubular, with expansion gear and superheaters. The paddlewheels are also on a patent principle. Her bunkers are capable of holding 270 tons of coal; and when fully loaded, her draft will be only 9 feet, a great desideratum in the China waters. She is brig-rigged, and is one of the finest models combined with a smart-looking craft. She is armed with one of Clay's breech-loading wrought iron rifled guns, having a range of four miles, and at 2,500 rounds putting every shot into a circle of five feet diameter. One of her boats is fitted with a small screw, which will be found of great service in the strong tidal rivers of China.

On the 18th this vessel made her trial trip, and attained a speed of 18 miles per hour, having run the distance of nine miles from the Nore to the Mouse Light in 27 minutes with the tide and in 33 against it, the engines making 35 revolutions. In all respects her trial was most satisfactory, and there is no doubt but that she will acquit herself well in her proposed employment on the coast of China, at a moderate cost for fuel and general wear and tear.

A number of gentlemen accompanied her on the trial, among whom were Mr. W. P. Livingstone, Mr. G. Gibb, Mr. H. B. Gibb, Captain Grainger, Captain Durham, and a number of scientific engineers and shipbuilders, who were all highly pleased with the performance of the vessel. A very elegant lunch was served on board, and altogether it was a most agreeable day.

On the 23rd inst. the *Jin Kee* took her departure for Hong Kong, *via* the Cape and Mauritius, under the command of Capt. Macdonald, having been (excluding Sunday) only four days out of dock, and from the time of water being first placed in her boilers. This shows an amount of expedition and good workmanship in her machinery almost without precedent.

EVACUATION OF CANTON.

The intelligence which arrived by last mail from China contains several items of more than usual importance and interest. The evacuation of Canton, after our possession of it for four years, the torture and murder of two American missionaries by the rebels in Shantung, the manner in which Prince Kung and the peace party have held their ground, and the probable rectification of some errors committed by the Chinese Customs, are all subjects deserving of special notice. How changed is the "City of Rams," and the whole Eastern hemisphere from what they were when the unfortunate *Arrow* affair occurred in 1856! We have seen India reconquered by prodigies of valour, the flags of England and France fluttering in sight of the Forbidden City, where the Son of Heaven and Earth was wont to dream in unthreatened seclusion; vast tracts of territory added to Russian Siberia, and the waters of Japan opened up to foreign trade. The errors and injustice we may have occasionally committed in the far East are now things of the past; they cannot be rectified, and to deplore them would avail little. But dubious as our course has too often been, it has not been unaccompanied by beneficial results. In the proclamation issued on the occasion of the evacuation of Canton the Chinese authorities say:—"During the occupation of Canton by the allied troops of England and France their conduct has never been otherwise than friendly towards the military and people of the whole city, and the military and people having also corresponded with courtesy and friendship, harmony has been maintained." This overlooks the little fact that, owing to conflicts between the people and the Allied troops, nearly a quarter of the city was destroyed in 1858, but it still expresses much truth, and the effect of the occupation has been on the whole to develope friendly feelings between the Chinese and the soldiers of Great Britain. Though the occupation has ceased, Canton will continue open as a place of residence for foreigners, officials, and merchants, and the people are invited by Laou, the Viceroy and Governor-General of the Two Kwang, "to continue to them the same respectful and courteous relations that have prevailed during the occupation." These are very different words and very different relationships from those which were held in the good old time of Commissioner Yeh. It is fervently to be hoped that our merchants and officials located in Canton will be at some little pains to preserve, by a conciliatory demeanour, the position which has been secured to them at the cost of much expense to England and dire destruction to China. If unable to do so, they will not find this country in any great hurry to back them up by entering upon another war. Turning to Chefoo, in the Gulf of Pechelee, it is gratifying to find British traders established there and at Tien tsin, instead of being forbidden, as they were by the treaty of Nanking, to sail above 32 deg. north latitude; but it is painful to find that the rebels in the neighbourhood have been putting into execution "the exterminating decree of Heaven," and justifying those who have ascribed to them the worst possible character. Their brutal torture and murder of the two American missionaries, Messrs. Parker and Holmes, who went out to remonstrate with them in a friendly spirit, is one of those acts which illustrate the debased and murderous policy indulged in by most of the followers of "the Great Pearl," as the rebels have audaciously styled themselves. Mr. Holmes had been among them, in the neighbourhood of Shanghai, and published a very interesting account of his visit; so he had some reason to think he would be well received, and might safely carry out his benevolent design of trying to mitigate the cruelties which they were inflicting on the defenceless population, and of saving the Taipings themselves from the discomfiture that awaited them at Chefoo, which was placed under British and French protection. As the rebels have always been extremely anxious to be on good terms with foreigners, the unfortunate result of his visit could hardly have been foreseen, but it will be a warning to missionaries in future to avoid placing themselves in the power of these peculiar aspirants to the Christian name, who regard their chief as together with Jesus Christ the co-equal Son of God the Father, and who will probably be our most cruel enemies when they find that their intercourse with foreigners is not answering their fond expectations, and that the hour of their suppression draws nigh with the liberty of the Imperial Government to devote itself to internal affairs. Tsai Chun, the youthful Emperor, who was to make his public entry into Peking about the end of October, had, under the direction of the Regency, received Prince Kung in a most favourable manner at Zehol. The return of the Court to the capital will place the Prince in a still stronger position; for it was the representatives of the anti-foreign party who accompanied the late Emperor into Tartary, and in Peking their influence will be counteracted. The people hold him in high estimation, as one of the few members of the Royal family who have the interests of the country really at heart, and as having saved their city by wise concessions when the foreign expedition was at their gates, and the courtiers had provided for their own safety by flight. It is interesting, and rather a novelty in China, to find that the actual Regent and *de facto* ruler of the country is now a woman—the first wife of the late, but not the mother of the present, Emperor. Until the Court is settled at Peking, and Prince Kung exercises the influence which is expected of him, it is not likely that any steps will be taken to correct the customs' irregularities of which the foreign merchants complain, and regarding which the Chambers of Commerce at Shanghai and Hong Kong have memorialized Earl Russell; but Mr. Bruce intimates that he has taken action in regard to the only important ground of complaint, and expresses the hope that his representations will be effectual. The inland transit dues have always been a grievance with British merchants in the Flowery Land, and the less they knew about the interior, these dues loomed the larger in their imagination. It has always been useless to point out to them the injustice and danger of interfering with the internal affairs of another nation, the necessity of a Government weak in its administrative capacity availing itself of those methods of revenue which are consecrated by usage, the probability that the inland dues were required to provide security of transit, and the known facts which indicated that they had only a trifling effect in increasing the price of goods. To such representations they always turned a deaf ear, and got Lord Elgin to insert a clause in the Treaty of Tientsin, giving them the privilege of commuting all inland transit dues by an *ad valorem* duty of five per cent. Besides being pressed by the indemnities which it is paying to England and France, it is understood that the Chinese Government is straining every nerve at present to put down the rebels, and it is not pleasant for it, in these circumstances, to be denied by its treaties with Foreign Powers the privilege which almost all other nations possess, of raising revenue by increased customs' dues. It is no wonder that the Customs department of the Government fell back on the ingenious but somewhat too barefaced expedient of charging both the inland transit dues and the commutation duty, which was specially intended to relieve traffic from the former burden. It is only natural for it to strain at any interpretation which will increase its funds; but we doubt not that expostulation is all that is required to bring it to reason on this point, and to keep it within the obvious intention of the Treaty. At the same time it would have been more for the real and lasting interests of the merchants to have allowed this infraction of the Treaty to pass unnoticed at the present crisis; and it is more than likely that all they will gain by the relief of transit dues will be more than counterbalanced by the increase of transit dangers.—*Daily News.*

IN a Consistory, held at Rome, the Pope expressed to the cardinals his desire to proceed to the canonization of twenty-three martyrs who fell in Japan.

THE week before last Dr. Macgowan gave a lecture on China, in the large room of the Whittington Club. The platform was decorated with a large number of Chinese relics.

LONDON, MONDAY, DEC. 30, 1861.

THE POSITION OF THE STRAITS SETTLEMENTS.

THERE is no possession of the British Empire of which, perhaps, less is known by the general public at home—and, indeed, we might almost include in that category many leading merchants and public men—than Singapore, and the other Straits Settlements; and yet, from their position, trade, and indigenous resources, they are of the highest importance to Great Britain. Many look upon Singapore as a mere place of call on the high road to or from China, but the commerce there has risen to an importance of which few have any conception, and will now increase even more rapidly still, owing to the extension of communication with China and the Archipelago, the numerous free ports opened on the coasts, and the enlarged trade with Siam, Japan, and other Eastern countries. For a long period Singapore has been utterly neglected. Looked on as a mere appendage of the Indian Government, its rights and privileges were overlooked, and its internal improvement completely lost sight of by the East India Company. Fortunately, however, the Straits Settlements have advanced despite numberless hindrances, and their great distance from the seat of Government, of which they were looked upon as mere subordinate posts. Their progress in population and commerce of late years is only equalled by the advance made by the Australian Colonies. From time to time we have chronicled in these columns the advances which the Straits Settlements are making, especially by the more general introduction of commercial intercolonial steamers in those seas. Then the kings of Siam are greatly increasing their mercantile steam fleet. The French have connecting Cochin China steamers. A line of steamers has been also established, touching at ports in Bintang, Banca, Sumatra, Biliton, Java, Borneo, the Moluccas, &c., which opens up a ready communication with all the leading islands of the Archipelago, from Singapore, in comfortable, well-found steamers. Steam is also carried on with Sarawak, and the local Government has laid on three steamers to ply regularly between Penang, Malacca, and Singapore. The commercial intercourse of Singapore is conducted with most of the European ports carrying on a distant foreign trade, with the ports of Continental Asia, from the Red almost to the Yellow Sea, including those of Arabia, Persia, Hindostan, Siam, Cochin China, and several of the Chinese empire; with all the ports of the Malay Archipelago, from Sumatra to New Guinea; with the capital of the Philippines; and with several of the ports of the east and west coasts of America.

In the public returns of imports and exports these places are classed under two-and-thirty different heads. The most important branch of the trade is with the United Kingdom, and then follow respectively the trades with China, with British India, and with Netherlands India. In 1860 our aggregate trade with Singapore, imports and exports, was of the value of nearly two and three quarter millions sterling, an increase of more than one million in the short period of four years. The staple imports from thence, gutta-percha, caoutchouc and other gums, pepper, sago, terra japonica and tin, all show a steady increase. In like manner there is an increased demand for our cotton, linen, and woollen manufactures in return, for distribution among the native tribes. Of late years the aggregate value of the external trade of Singapore has been about £12,000,000 per annum, or more than a third of that of Bengal. The tonnage employed in the trade there amounts to 700,000 tons annually; and more than 3,000 native and 1,600 square-rigged vessels frequent the port. The revenue of Singapore is advancing in proportion with its trade. In 1852 it only amounted to £44,234; in 1860 it reached £77,466. This sum is mainly derived from excises on articles of luxury, as opium, ardent spirits, palm wine, pawnbrokers, and the rents of public markets belonging to the Government. The Settlement has hitherto been saddled with the expense of a naval establishment for the suppression of piracy, in which India and the Empire generally are concerned; the maintenance of Indian convicts, and an increased expenditure for military purposes, entailed by the extensive system of fortification now in progress, which certainly ought not to be borne exclusively by the Settlements, as it is undertaken for Imperial and not local interests. There is a municipal revenue raised of about £10,000 for police and local improvements, derived from a ten per cent. assessment on house rentals, five per cent. on agricultural produce, and a tax on horses and carriages. It is generally asserted that the revenue raised, exclusive of military outlay, estimated at £50,600, is more than sufficient to defray the cost of a local corps of 1,200 men, which is considered ample to meet all the requirements of these Settlements. The aggregate population of the three Settlements now is between 250,000 and 300,000. No customs duties or any other charge on ship or cargo is levied, nor are the settlers disposed to tolerate any impost calculated to shackle the freedom of trade for which these ports have so long been proverbial; nor would they brook an income-tax, which has been mooted of late, and which is scarcely required, as the revenue can be raised from other more legitimate and easily levied sources, more consonant with the views of the people.

The Imperial Government must see the policy of maintaining a few war steamers at Singapore and about the islands of the East for the suppression of piracy and the protection of trade, without saddling the Straits with the cost. The Dutch Government never neglects this precaution. The continual appearance of steamers will do more to banish those marauders than anything else. The immense importance of the trade now carried on in Eastern waters, and the large number of native vessels on those seas with varied cargoes, demands protection at our hands, which will also command for us greater respect from the traders which throng to Singapore. The Administrator of the Government of the Straits Settlements has hitherto held office subject to the Governor-General of India, having under him a Deputy at each of the three settlements, styled a Resident Councillor. Malacca is distant about 90 miles, and the Island of Penang 400 miles, from Singapore. The transfer of the Straits Settlements from the India-office to the Colonial-office, which has been so long in abeyance, has led to much local discussion especially on the question of the self-government to be accorded—the position the Governor is to hold in future, coupled, it is to be hoped, with the appointment of Superintendent of British Trade in the Archipelago—and the proportion of the previous expenditure which is to be charged to the new colony. That the revenue of the Settlements will be amply sufficient to meet all legitimate expenses is generally admitted.

AMERICAN APPROPRIATION.

The inventive genius of Mr. GLADSTONE as a financier is but feeble compared with that displayed by President LINCOLN. We knew a father who was accustomed to whip his children every Sunday in anticipation of the sins they were likely to commit through the week; we have heard of a man who was oblivious enough to imagine that every new debt he contracted might be looked upon as an augmentation of capital; but we never knew or heard before of any statesman recommending an investment of surplus funds which do not belong to him, in order to satisfy claims which may arise in the future. Yet this is the sapient suggestion of the President of the United States. It seems there is a surplus over and above the amount awarded to the claims of American citizens against China. In the American treasury, therefore, at the present time, there is a sum of money which belongs to the Emperor of China. President LINCOLN does not dispute this fact; on the contrary, he states it broadly in his speech, and advises that it should be invested in good securities in order to satisfy any just claims against the Celestial Empire which may arise in the future. When the money is so handy there can be no doubt that claimants will be forthcoming. Such a case would surely try the virtue of any people, and we question whether that of America is likely to be proof against

Digitized by Google

the charms of a surplus which is only waiting for the "just claims" of her merchants in China. A misunderstanding, says the President, is sure to arise in consequence of our extensive trade with China, therefore John Chinaman's money shall be kept in our coffers and 'invested in good securities' until we are entitled to ask him for another indemnity. Any way, as we have the money we will keep it, since if we have no right to it now, we are certain to have a right hereafter. The logic of such an argument is irresistible.

THE EXPORTS FROM ENGLAND TO CHINA.

WE have received a proof of an interesting paper "On the Progress of the Trade of England with China," which was read by Colonel SYKES before the last meeting of the British Association, and which will soon be published in the transactions of that body. On the 16th September we referred to this matter. The gallant Colonel appears to imagine that the tax-payers of England are in danger of being brought into a fourth war with China, in order that opium may be forced upon the Tai Ping rebels; and holds that Britain should carefully abstain from the slightest interference between that party and the Imperialists. The danger of the rebels being attacked by Great Britain for the sake of promoting the sale of opium is, we think, purely imaginary. It is not so much the merchants as disinterested foreigners in China, well acquainted with the country, who long for the suppression of the rebellion, which they regard as an enormous evil, and one which has been chiefly caused by the fact that the conflicts of the Imperial Government with Russia, England, and France, have for a time, at least, paralysed its power. We do not much care for Colonel SYKES' opinions, but we have to thank him for his statistics, which appear to have been carefully compiled and skilfully arranged. Special interest attaches to the tables of the exports from England to China, which go back to the time of the East India Company's trade in 1833, and which are taken from documents not accessible to all, preserved in the archives of the London Board of Trade. In the year 1833 the value of the exports to China of the East India Company amounted only to £384,015, and of the privileged trade of the captains of their ships to £71,124. In 1860 the exports from ~~England had expanded to the enormous value~~ of £5,451,557, exclusive of the millions of the exports from India in the shape of opium. In 1844, after the trade had got into working order at the ports opened by the Treaty of Nanking, the exports from England had risen to the value of £2,305,617, but in the succeeding years they slightly declined, and in 1848 were as low as £1,445,959; and in 1855, £1,000,716. In 1856 they rose to £2,216,123, from which year they have gone on rapidly increasing, especially in 1859, when they rose to £4,457,573 from £2,876,447 of the preceding year. These are remarkable facts, as showing that our wars with China, whatever their ultimate effects, have had no immediate effect in preventing the expansion of trade. Doubtless, the increased demand in China for English cottons, woollens, &c., has been in great part dependent on the increased demand in Europe for Chinese silks and teas, but it seems as if the immediate effect of our wars with China was to enlarge the sale of exports from England. In the case of the first war, however, we see that the increased demand for these was not kept up; that the demand dwindled away until it was again increased by the stimulus of war. It is difficult to understand the meaning of these fluctuations. Probably the success of the rebels about 1855 may have had something to do with the depression of trade, but that cause has been in powerful operation in other years when the export trade was greater. Another explanation is, that after the opening of new ports by the treaties of Nanking and Tien-tsin, the China market was glutted with exports from England, which brought little profit and sometimes considerable loss to English merchants.

The following are the details of the produce and manufactures of the United Kingdom sent to China in 1860 :—

Apparel	£92,814	Stationery	£11,066
Malt liquors	99,493	Tin plates	4,167
Coals, &c.	68,655	Woollens (by price)	826,465
Copper	58,984	Woollens (by yard)	41,638
Cottons (by the yard)	3,157,359	Ditto (at value)	2,568
Ditto (at value)	2,746	Other articles	248,960
Cotton yarn	410,416		
Earthenware	6,903	Total	£5,318,036
Glass	29,864	Foreign and colonial produce and manufactures	133,521
Hardwares and Cutlery	25,735		
Iron, &c.	145,313	Total	£5,451,557
Lead and shot	114,035		
Linens	30,855		

BRITISH NEUTRALITY IN CHINA.

THAT Europeans in China are not justified in taking a part in the commotion now raging in the Empire is so true a political axiom, that it becomes almost common-place. As a general rule, we accept it at once, and never venture to question its validity. But at the same time it is evident that our complicated and increasing interests in the China seas may be injured greatly by the strife between Imperialists and Rebels, and that circumstances may occur in which, from sheer self-defence, we shall be compelled to doff our neutrality.

News reached us by the last mail that near Chefoo the Rebels had committed the most frightful devastation, that men, women, and children had been brutally murdered, some being burnt, others tied to stakes, and others, with ropes round their necks, dragged to death by horses. At this juncture, we are told, that the French landed 200 men and 3 guns to defend the place, and that HER MAJESTY'S gunboat *Insolent* opened fire on the rebels. Here then, the neutrality of which we justly boast may perhaps be said to have been violated. But it must be remembered that the lives of Europeans were at stake; that this attack of the Taipings, rather or of the local banditti which acknowledge the rebel Emperor, was followed up by a most frightful massacre; and strange indeed it would have been at such a time if with the power to interfere we had stood entirely aloof. The wretches who attacked the villages adjoining Chefoo were not satisfied with the diabolical acts they committed on the inhabitants, but actually murdered two noble-hearted American missionaries who went out to the rebel camp as ministers of peace. When such an event occurs in the neighbourhood of Europeans it may be easy to talk of neutrality, but it is impossible to act upon the principle. Thus it happens that we are compelled sometimes to set aside an unimpeachable theory since common humanity, and even self-defence, forbid the reduction of it to practice. Had the commander of the *Insolent* held aloof on the occasion to which we have alluded, he would unquestionably have failed in his duty to his country,

DESCRIPTION OF A VOYAGE UP THE RIVER YANG-TSE-KIANG, AUGUST, 1861.

A long but interesting account of a voyage up the Yang-tse appeared in *The Times* of ~~Dec. 20.~~ ~~It was written~~ by Mr. W. W. Palmer, and dated—Steamship *Fernandez*, at anchor off the Imperial City of Chin Kyang Foo, August 28. The following passages are worthy of transcription :—

"The *Fernandez* sailed from Shanghai on the 1st of August at 5 P.M., and as no ship had yet been up the Yang-tse-Kiang without grounding, added to which news had just been received of the total loss of the steamship *Manila* on her first voyage, and also that the steamship *Rajah* was on shore in a paddy field, it was with no slight feelings of anxiety that I saw Shanghai gradually disappear in the distance, as we swiftly proceeded on our voyage to cope with the dangers and difficulties of the mighty waters of the Yang-tse-Kiang. Anchored for the night off Woosung.

"August 5th.—To-day we arrived at that part of the river where for miles, through the rising of the waters, the country was all inundated. However I may try I am confident my pen is quite inadequate to give your readers even a faint idea of the appearance that was presented to my view. If they can imagine themselves on the deck of this ship, with a chart open before them and the river laid down some two or three miles from bank to bank, and then cast their eye from side to side to look at the expanse of water, where no banks are visible, but junks and boats of all sizes and description sailing over what in the chart is dry land, they may conceive my astonishment. The river between this and Hankow in many places exceeds twenty miles in breadth, and sometimes the land cannot be seen on either side from the deck, excepting the hills far inland. The houses up to the very roofs are under water, which adds very much to the strangeness of the scene. For many miles nothing but tops of houses and trees are visible. As for the banks of the river, they are just as imaginary to us as your readers being here. The most unaccountable thing is that many villages might be built (above the level to which the river rises) at the foot of hills, that in some places are situated close to the banks; but no, even their own Celestial brethren prefer to build on the low ground, although the hills are so near, and they must at the same time be perfectly aware that their houses will all disappear, or, if not washed away, be quite untenable for many months in the year. So soon as the water begins to rise the villagers put all their chattels into a boat (one is to be found at nearly every hut for some miles inland) and pull for the nearest hill, where they remain encamped in small mat hovels; when the water subsides they return and rebuild or repair their former habitation, whichever is necessary, and commence tilling the land, which is all along the river most fertile, yielding abundant crops. We now entered the rebel territory.

"Having this day, August 28, just read the *London and China Express* of June 26, I quite agree with the editor when he states, 'That the rebellion is an intollerable obstruction to legitimate trade.' It is not only so among our merchants, but also among the Chinese themselves. I am now writing only at a distance of some thirty-five miles from the rebel capital of Nankin, having seen, close too, other large cities in their possession,—Wuhu, Nganking, &c., having also landed at some of their villages. However we may sympathise with them as the ancient and legitimate owners of the soil, that must not prevent travellers from speaking of them as they find them. The difference between all cities in the hands of the Imperialists is most striking—magnificent pagodas, fine houses, beau-

Digitized by Google

tiful gardens, everything thriving, showing evident signs of an industrious and prosperous people; in fact, it requires the pen of a Russell, or some other illustrious writer of modern times, to describe an Imperial city for it to receive justice; but the pen of an humble individual like your present correspondent can describe not only the Rebel cities seen by him, but also all the villages held by them on the banks of this river by four words—mud, bricks, ruin, and desolation. Nankin, their capital, is one mass of ruins. One night, when anchored near it, it appeared like 'a city of the dead;' no light, not even a sound proceeded from it. What a contrast to one of the Imperial cities, where the thousands of lights vie with the very stars themselves in brilliancy! And the Chin-Chin joss of the inhabitants during their festivals, just now on, however edifying to them, and although not disagreeable to us, could be dispensed with, so far as we are personally concerned, with some comfort to ourselves; but our Imperial friends are as indefatigable in this as in the more serious avocations of life.

"Arrived at Hankow August 11, having stopped one day at Kewkiang. We accomplished the distance (about 730 geographical miles) in nine days, having at times a tide of seven to eight knots against us. Hankow is in lat. 30 deg. 33 min. N., and long. 114 deg. 20 min. E. The trade here is growing up fast; ten steamers, running hard, cannot take the teas and other produce down; many junks, some of 600 to 700 tons, are employed also, being towed or convoyed by the steamers. There can be no doubt from the depth and volume of water in the river at Hankow that it is navigable some hundreds of miles more inland, which I expect European enterprise will not be long in opening out. The water has risen this year at Hankow 38ft.; it fell a few days since 2ft. 3in., but on August 15, when we left, it had again risen a foot. I had this information from an officer of Her Majesty's ship *Snake*, stationed here, and on board which a register is kept. Steamers for this river must be powerful, and we must not be too proud to take a lesson from our Celestial friends. To insure a small draught of water steamers should be perfectly flat-bottomed, with a slight keel and two sister kelsons; then, if the ground is touched, little or no damage will be sustained; added to which great advantage may be reaped, when the river is swollen, by steaming near the banks and keeping out of the tide. Left Hankow August the 15th with six loaded junks to convoy.

"August 16.—Landed at Wuhuitsou, a large Imperial town on the left bank, the ship being at anchor about her own length off the shore in seven fathoms. I fancy I must have been the first European that had landed, for I was immediately surrounded by some 300 to 400 men, women, and children, the women keeping a little in the back ground, although not at all bashful or timid, and oh, such feet! I was not likely to see a female thus far in the interior with such an ugly appendage as a large foot. The feet of these beauties must have been capable of pleasing the most fastidious, lovesick Chinese swain, as they did not exceed four inches, shoe, stocking, and foot as well. My clothes were all examined with great minuteness, even to the taking off my hat, feeling my shoes, and the texture of my other garments, as well as smelling them as well as myself. The eagerness of all to have a sight of and touch me was so great that I was in anything but an enviable position, being surrounded on all sides, and the day very hot, I could scarcely breathe. Making my way close down to the water, I managed to keep my inquisitive friends at bay on one side. A cram at the opera for admittance did not beat our Celestial friends in their anxiety to catch a glimpse at me; they were civil though, with all their curiosity. When I got into the boat I made a sign for them to come on board; from that time till dusk we had hundreds of them backwards and forwards, and their eagerness to examine everything was so great that it was only by placing sentries we could keep them out of the engine-room and other forbidden places. But withal their behaviour was good, and in no instance did they endeavour to purloin anything. We take our meals on the poop, and when we sat down to dinner we had an admiring crowd watching our every movement. A sightseer, after paying 6d. to see wild beasts feed, never enjoyed the scene more than our Celestial visitors, and were you to land them in the remotest part of the United Kindom, the natives could not be more amused with them and their chop-sticks than our visitors were to see us using knives, forks, spoons, and glasses.

"August 20.—Landed at daylight on the left bank among the rebels, at a village opposite Niang-shan-ki, and walked about two miles along the bank of the river. The appearance presented by the people and all around was most pitiable; they had just migrated from the hills, the water had fallen about seven feet, and the land was now about two to three feet uncovered. The people had nothing but fish and herbs to live on, all their last year's rice being exhausted. Cultivation had just commenced. These people were not at all inquisitive, and looked upon my landing as a matter of course; they did just suspend operations for a minute or so to look at me, and then resumed their work.

"August 21.—Dropped anchor and landed at Nanking. Her Majesty's ship *Centaur* and gunboats 90 and 95 at anchor. Landed and had an interview with the rebel King, to obtain permission to pass through a creek adjacent to the city, and which shortens the distance very materially: he granted the request. Shortly afterwards he paid a visit to the *Centaur*, and the crew were exercised at gun exercise, long range, shelling, &c.

"August 22.—Passed the extent of rebel territory, and anchored at Chin Keang Fo. Here is stationed the 'Imperial Custom-house,' being a ship at anchor, named the *Swallow*. All steamers, junks, &c., have to send their clearances to be examined, whether proceeding up or down. The custom-house officers are all English or Scotch. There is an English consul stationed on shore (Mr. Adkins). This is a very picturesque part of the river. Chin Keang Fo, on the right bank, is a large walled city, with the usual amount of pagodas, houses, gardens, &c. Ahead we have Gold Island (having a fine pagoda on it), and astern is Silver Island. Both these islands are high rocks rising out of the bed of the stream, covered with trees and foliage, and having several very pretty buildings on them. I do not know from what they derive their name. Lots of game here, pheasants, partridges, snipe, &c., as there is also all along the river. Fish is abundant, and of very good quality; pears, peaches, apples and vegetables of every description; fowls $1 per dozen. This is applicable to all towns on the banks of the river, excepting where the rebels hold possession.

"August 23.—Left Chin Keang Fo, came into the dangerous part of the river again to-day, passed wreck of *Manilla* at 3.40 P.M.—she is stranded on a shoal north of Starling Island, with Chooshan Pagoda N.W. by W. Anchored for the night off Kyang Yin.

"August 25.—Proceeded at daylight and anchored about 30 miles lower down, the wind being ahead, and our convoy being some miles astern, and unable to make headway.

"August 26.—Still at anchor, our convoy not being in sight. Since the survey of 1858 many and great changes have taken place in this river. What were shoals then have now formed up into islands, in some instances covered with houses and brushwood, and in a high state of cultivation; channels then in existence are now filled up, while others then unnavigable have now water sufficient for a line-of-battle ship; many new banks and shoals have grown up. At the Langshan crossing and other places where beacons and buoys have been placed to facilitate the navigation, the tide runs so strong that several have already disappeared, and it will only be by constant care and watching that they can be kept in their proper positions. On the passage up to Hankow the thermometer ranged from 86 deg. during the night to 102 deg. to 105 deg. during the day, and this under double awnings. This last day or two the thermometer has been at times to 82 deg.

"Aug. 28.—Weighed. Proceeded as far as Plover Point.

"Aug. 29.—Steamer *Williamette* passed us at noon on her way from Hankow to Shanghae. At 12.30 P.M. she ran ashore on the Acteon Shoal, but as the tide was rising she was got off in half an hour.

"August 30.—Weighed anchor at daylight. Arrived at Shanghai at 1 P.M."

Literature.

Books at Christmas-tide are always plentiful, and generally pleasant. Old favourites come out in new dresses and reveal to us fresh charms in their festive attire. At this season, too, literary projects are manifold, and much that a few months since was in embryo, appears before us now in all its beauty and completeness. To keep pace with all that is doing in the literary world is out of our province, and, indeed, beyond our power. All we can do from time to time is to direct our readers' attention to such works of interest as may appear to us most worthy of their notice, and, at the same time, to catch up such stray waifs of literary gossip as seem best deserving of a corner in our columns.

To begin, then, at Albemarle-street. Mr. Murray advertises a number of valuable works as just published, or nearly ready. At his annual trade dinner, a month ago, the following copies of new works were sold to the booksellers:—2,700 Smith's "Lives of the Engineers;" 3,000 "Aids to Faith," a work intended as a reply to "Essays and Reviews;" 600 Dyer's "New History of Modern Europe," a valuable but heavy book; 700 Burgon's "Letters from Rome;" 500 Marryat's "Sweden," and several others. This Marryat, by the way, wrote a short time since a lively and very readable book about Denmark; and if he has as much that is curious to tell us about Sweden, we prophesy that his volume will be popular.

A very charming book has been published by Messrs. Smith, Elder, and Co., being a "Selection from the Writings of Mr. Ruskin." Such a book is certain to be welcomed. No man living, perhaps, has written more that is worthy of preservation, or more that is grotesque and extravagant. Here we have collected in one casket all that is most brilliant and beautiful in his writings, and quite as much, probably, as the general reader would ever care to possess.

A new poem, by the Hon. Mrs. Norton, is advertised by Macmillan and Co., yclept "The Lady of La Garaye." Mrs. Norton can write well when she pleases, whether in prose or verse, and always writes simply and in good English—a gift which is but too seldom cultivated in these days.

By Mr. Patterson, the editor of the *Press* newspaper, a volume is announced of "Essays in History and Art." One of these essays is on "The National Life of China," and we shall be curious to see how Mr. Patterson treats a subject which most literary men would eschew.

Mr. Bentley has just published "A Residence at Nagasaki and Hakodati in 1859-60," by Mr. C. P. Hodgson, and has nearly ready the second volume of "The Lives of the Archbishops of Canterbury," by Dr. Hook, Dean of Chichester. Mr. Hodgson's account of Japan is written with much simplicity and freshness. It abounds with repetitions and contradictions, but is none the less valuable on that account, as the writer has apparently jotted down the impressions of the moment. Mrs. Hodgson's letters add considerably to the liveliness of the volume. "A Journey to Great Salt Lake City," by Jules

Digitized by Google

Romy and Julius Brenchley, lately published in two volumes, is a book to be commended to every one who wishes for a full and distinct account of the most extraordinary movement of modern times.

Another shilling monthly is about to start on a race for which already there are too many competitors. We do not like the title—"The Planet"—but the advertisement promises fairly, and the periodical will occupy a distinct ground of its own, and take part "in the controversy now raging between faith and scepticism."

We conclude with a few literary *on dits*:—

Mr. Adderley is about to publish a letter to Mr. Disraeli on the "Relations of England with her Colonies."

Two manuscripts by Voltaire have been discovered, consisting of a comedy, and a second part of the famous satirical romance "Candide."

Du Chaillu's Gorilla-book has been translated into German. Not yet has the controversy ceased with regard to the author. Is he an impostor or a thoroughly honest man? Who shall decide when doctors, in science, disagree.

A new work by Dr. Guthrie is advertised, entitled "The Religion of Life, Illustrated and Applied."

Another translation of the "Iliad" is advertised by Messrs. Longman, the author being Mr. J. Henry Dart, M.A., of Exeter College, Oxford.

Flora Hong Kongensis: a description of the Flowers, Plants, and Ferns of the Island of Hong Kong. By George Bentham, V.P.L.S. Lovell Reeve.

This interesting work, which we briefly noticed in our last issue, is too scientific to be of much service to the general reader. The student will find that it fully exhausts a subject which, strange to say, has been previously taken up by two botanists. Nearly twenty years ago Mr. R. B. Hinds published his "Remarks on the Physical Aspect and Vegetation of Hong Kong," in Hooker's *London Journal of Botany*, and in 1857 an "Introduction to the Flora of Hong Kong" appeared from the pen of Dr. Seemann. Mr. Bentham tells us that both these writers represented the general aspect of the island as bleak and barren in the extreme, whereas he says that "the more sheltered valleys and ravines on the northern and western sides, which are never exposed to real drought, afford to the botanist who examines them in detail an extraordinarily varied flora." Mr. Hinds, it seems, made the first collection of Hong Kong plants which has reached this country; and although he was only in the island for a few weeks in the winter season, he procured specimens of nearly 140 species. Colonel Champion, who spent three years in Hong Kong, was also fortunate enough to discover several entirely new species; and on his return to England, in 1850, he brought with him "a fine collection of between five and six hundred species of phænogamous plants and ferns." Dr. Hance, now at Canton, has also zealously devoted himself to the flora of Hong Kong. The late Dr. Harland, Government Surgeon at Hong Kong, also distinguished himself as a botanical collector; and Mr. Bentham mentions several other gentlemen, from all of whom he received specimens. The materials at the disposal of the author were therefore ample, and his scientific fame is of itself a guarantee that he has fully availed himself of them.

Naval and Military.

The reinforcements to our Canadian possessions continue to be the leading feature under this heading. Several of our first-class mail steamers have been engaged for this purpose, including the Cunard steamers *Persia*, *Australasian*, *Asia*, and *Niagara*, *Canada*, the West India steamers *Parana* and *Magdalena*, the New York liner *Adriatic*, lately purchased from the Americans, the *Mauritius*, and *Melbourne*, lately employed as transports in China. The following are the troops now on their way or embarking:—

1st Battalion of Grenadier Guards—Col. the Hon. H. Percy, V.C.	2nd Battalion 17th Regiment—Lieut.-Col. M'Kinstry.
2nd Battalion Scots Fusilier Guards—Col. J. E. Dalrymple.	96th Regiment—Colonel Scovell.
1st Battalion 15th Regt.—Col. J. A. Cole.	1st Battalion Rifle Brigade—Col. Lord A. Russell.
1st Battalion 16th Regiment—Lieut.-Col G. J. Peacocke.	Eight batteries of Artillery.
2nd Battalion 16th Regiment—Lieut.-Col. Langley.	Three companies of Royal Engineers.
	Two Battalions Military Train.

Lord Clyde, Sir Richard Airey, Sir George Wetherall, and Sir John Michel (now in China) were named as likely to be appointed to the chief command in Canada, but it has been decided for the present that Sir W. F. Williams, who now holds the appointment, shall continue in it. Colonel Hon. R. Rollo has been appointed Military Secretary. The remaining officers at present appointed to compose the Staff are:—

Captain Grant, Royal Engineers, and Captain W. H. Earle, 17th Regiment, as Aides-de-Camp; Colonel E. R. Wetherall, C.B., Chief of the Staff; Major-Gen. G. T. C. Napier, C.B., Major-General on the Staff; Lieut.-Col. J. Conolly, Deputy Adjutant General; Colonel K. D. Mackenzie, Deputy Quartermaster General.

Guards Brigade.—Commanding Brigade, Major-Gen. Lord F. Paulet, C.B.; Aide-de-Camp, Captain W. F. E. Seymour, Coldstream Guards; Major of Brigade, Captain G. G. Gordon, Scots Fusilier Guards.

First Brigade.—Commanding, Major-Gen. R. Rumley; Brigade-Major, Major Pearson, Grenadier Guards.

Second Brigade.—Commanding, Major-Gen. D. Russell, C.B.; Aide-de-Camp, Captain Hardy, 84th Regiment; to be employed in the Adjutant-General's or Quartermaster-General's Departments, Lieut.-Col. G. J. Wolseley, 90th Regiment; Lieut.-Col. the Hon. W. Feilding, Coldstream Guards; Major Bellairs, unattached.

On Special Service.—Organising Militia, &c., Col. Lysons, C.B. *Cavalry:* Col. Low, C.B., late 4th Hussars. *Artillery:* Lieut.-Col Shakspear, R.A., Lieut.-Colonel Mountain, R.A. *Infantry:* Lieut.-Col. C. F. Fordyce, C.B., unattached; Lieut.-Col. A. H. Lane Fox, Grenadier Guards; Lieut.-Col. H. R. Browne, late 87th Fusiliers; Lieut.-Col. H. H. Crealock, late 90th Light Infantry; Lieut.-Col. T. Ross, late 73rd Regiment; Lieut.-Col. E. Newdigate, late Rifle Brigade; Lieut.-Col. A. Taylor, late 9th Regiment; Major C. F. T. Daniell, unattached; Major F. W. Hunter, late 47th Regiment; Major F. L. Mayne, unattached; Major J. W. Laurie, late 4th Regiment.

Commissariat Staff.—Deputy Commissary General, W. Tyrone Power, C.B., with local rank of Commissary-General; Deputy Commissary-Generals, Le Mesurier, Plant, Gardiner, Lundy, Cumming, Price, Waldron, Swain; Deputy Assistant Commissary-Generals, Ward, Rogers, Primrose, Winter, Festing, Brown, Snow, Estridge; Acting-Deputy-Assistant-Commissary-General, Dashwood.

Medical Staff.—Inspector-General, Dr. W. M. Muir, C.B.; Deputy-Inspectors-General, Dr. J. Fraser, C.B., A. Stewart, W. Rutherford, J. W. K. Innes, C.B.; Staff-Surgeons, J. L. Jameson, J. E. Moffatt, F. Cogan, E. Menzies, R. C. Todd, H. J. Schooles, A. Smith, D. D. M'Donald, A. D. Home, W. Snell, E. D. Banon, P. M'Dermott, J. W. Fox; Staff Assistant-Surgeons, A. K. Rickards, A. C. Robertson, T. B. O. O'Brien, W. P. Fraser, St. J. Killery, T. J. Murphey, E. L. Lundy, T. Collins, J. T. Milburn, G. L. Hinde, R. Atkinson, W. J. Mullan, A. Bryson, A. P. M. Cubitt, H. L. Randell; Apothecary, H. L. Harvey; Dispensers, D. W. Williams, W. H. Tessier, R. Downes, H. T. Luff; Purveyor's Clerk, Spencely, as Clerk to Principal Medical Officer.

The officers who have already proceeded with the regiments named above are as follows:—

Grenadier Guards.—First Batt.—Colonel Hon. H. Percy, V.C.; Lieutenant-Colonels M. Bruce, Lord F. Fitzroy, C. G. Ellison, A. Capel Cure, J. H. King, W. B. de Horsey, E. H. Cooper, and L. Anstruther; Captains Fitz Roy A. T. Clayton, Earl of Carrick, H. C. E. Malet, Hon. J. C. Stanley, E. W. L. Wynne, W. Earle, Viscount Hood, R. H. C. D. Lowe, A. W. Thynne, L. G. Phillips, T. F. Fairfax, and E. C. Nugent; Lieutenants C. W. Pakenham, J. T. R. L. Fox, L. R. Seymour, R. C. Vyner, C. J. Herbert, C. E. H. Stanley, Hon. C. F. Crichton, F. W. Duncombe, and E. G. P. Littleton; Quartermaster J. Hockey; Surgeon C. R. Nicoll; Assistant-Surgeons H. J. H. Lawrence and G. P. Girdwood.

Fusilier Guards.—Colonels J. H. E. Dalrymple, F. C. A. Stephenson, C.B.; Lieutenant-Colonels the Hon. R. Charteris, H. G. Wilkinson, W. Aitchison, E. Neville, F. Baring, and H. C. Fletcher (attached from the 1st battalion); Captains D. H. Blair, W. J. Rous, E. M. Beresford, J. Paynter, G. W. Beaumont, R. A. Cooper, W. S. Rooke, C. Shelley, J. F. Elphinstone, J. E. Ford, C. W. White, and R. A. Dalzell; Lieutenants Sir R. A. Cunliffe, A. A. Speirs, S. J. Ram, H. Farquharson, J. H. W. Thomas, F. St. J. N. Barn, Earl of Dunmore, and W. R. M. Wynne, Captain and Adjutant G. H. Moncrieff; Battalion-Surgeon F. Robinson; Assistant-Surgeons A. G. Elkington and H. Turner.

Royal Artillery.—The first three batteries of the 10th Brigade Garrison Artillery are commanded by Colonel Cleaveland. The officers who accompanied him were Majors Boothby and Field; Captains Orr, Hodson, Collingwood, and Johnson; Lieutenants Cooke, Dixon, Irwin, Robertson, Gordon, Williams, and Shiel; Lieutenant Kemmis, acting quartermaster; Lieutenant Simpson, adjutant; Lieutenant-Colonels Mountain and Shakspear have also embarked, to organise the Canadian Militia Artillery. No. 4 battery, with Captain Gabbett, Captain Elliot, Lieutenants King, Harman, French, and Bradley. Colonel Dunlop, C.B., embarked with the head-quarters, with Colonel Burrows, Captain Caimes (adjutant), Quartermaster Haines, Doctor Nash. No. 5 battery; Captain Tweedie. Lieutenants Baines, Ormsby, and Harvey. No. 6 battery of the 10th Brigade, with Colonel Mundy. No. 7, under Major Childs. The command in Canada will be divided between Colonel Eardley Wilmot and Colonel Dunlop, C.B. The latter officer has already seen good service in China, and it was confidently expected would have been nominated to the united command. Rumour, however, assigns this to a general officer, in the event of war being declared, and Sir Richard Dacres, K.C.B., is named for this honour.

Royal Engineers.—Captain Hewett, Lieutenants Tovey, Maitland, and Sivewright are the officers attached to the 18th company.

Military Train.—The first battalion, consisting of 300 non-commissioned officers and men, is under command of Major Hill, the other officers being Major Johns, Captains Buller and Harris, Lieutenants Lane, Williams, Clarke, Benthall and Roberts, Ensigns Crawford and Winckworth, Lieutenant and Adjutant Cummin, Paymaster Bryson, Quartermaster Mitchell, and Surgeon Fox, with two staff clerks. The third battalion is under Major M'Court.

Digitized by Google

THE 16TH REGIMENT.—Lieut.-Col. C. Langley, Majors J. Henderson and C. L. de Winton, Captains H. Ximenes, J. R. Helyar, G. C. S. Lambard, W. L. Ingles, J. H. Crosse, A. D. Thomson, and R. J. Evans, Paymaster M. Feversham, Surgeon J. R. Fennell, Staff Assist.-Surg. Saunders, Assist.-Surg. J. R. Kelroe, Quartermaster J. Winter, Adjutant and Lieutenant H. Kelsall, Lieutenants C. W Isdell, A. A. Pinson, A. Neame, C. M. R. Reyne, F. Grant, J. Pyne, R. W. M. Wetherell, A. G. Cooch, and C. F. Busfield, Ensigns C. Platt, W. C. Griffith, G. R. A. Denne, G. Griffiths, R. B. Bald, S. J. Pullin, and J. M. Howes.

In the midst of the heavy pressure on the Government, a large supply of many thousand unissued stores, consisting of great coats, cholera belts, &c., arrived from China in the early part of the week, and having been found in a perfectly sound state, they have been made available for immediate issue.

Rear-Admiral Rodney Mundy, C.B., who lately rerurned to the Mediterranean, where he has performed such valuable services to the country, has felt it incumbent upon him, from continued ill-health, to resign his command.

Admiralty instructions have been issued directing the whole of the screw gunboats attached to the first division of the steam reserve at Chatham, to be removed from the several ports on the Medway for immediate service.

Rear Admiral Sidney C. Dacres, C.B., arrived at Dent's George Hotel, Portsmouth, on Dec. 19, from London. At noon he hoisted his flag, as second in command on the North American and West Indian station, on board the Edgar, 89, screw, Captain Mends, anchored at Spithead. The salute from the flagship's guns, customary on such occasions, was omitted in the present instance owing to the decease of His Royal Highness the Prince Consort.

The screw steam corvette Satelite, 21, Captain O. Johnson, accompanied by the gunboats Sheldrake and Spider, left Plymouth Sound on the 22nd for the south-west coast of America.

The screw steam frigate Orlando, 51, Capt. Scott, C.B., in Plymouth Sound, will take out winter clothing for the squadron at Halifax. She will probably touch at Gibraltar.

Notice is given that the distribution of the bounty awarded for the destruction of pirates in the China Seas on the 26th of June and the 4th of July, 1855, by the ship Racehorse, will commence on the 23rd inst. Persons wishing to receive shares through collectors of Customs to send their certificates, or certified copies of the same, addressed—"On Prize Business, to the Secretary of the Admiralty, London." The shares are as follows:—Commander. £112. 12s. 7d.; third class, £31. 19s.; fourth class, £20. 10s. 10d.; fifth class, £11. 8s. 2d.; sixth class, £10. 5s. 6d.; seventh class, £6. 17s.; eight class, £3. 8s. 5d.; ninth class, £2. 5s. 7d.; tenth class, £1. 2s. 9d. Notice is also given of the intended distribution of the amount awarded for the destruction of pirates in the China Seas between the 26th of August and the 3rd of September, 1858, by the Magicienne, Plover, Inflexible, and Algerine; and of the intended distribution of the slave and tonnage bounties of a slave bark captured on the 30th of November, 1859, by the Pluto, of the commencement of which intimation will afterwards be made.

The half-yearly distribution of prizes to the gentlemen cadets at Woolwich took place at the Academy. In consequence of the death of Prince Albert, his Royal Highness the Duke of Cambridge did not attend, and the ceremony was performed by Lieut.-General Knollys, the Vice-President.

ARRIVAL OF THE 59TH REGIMENT.—The 59th Regiment, which served so long in China, has arrived from the Cape of Good Hope by the transports Indomitable and Boanerges. The head-quarters consisted of Lieut.-Colonel Burmester, Major Lloyd, Captains Chadwick and Clarke, Lieutenants Spofforth, Ffinney, Cuming, FitzGibbon, and Hutton, Ensigns Gunter and Herchmer, Paymaster Bennett, Quartermaster Cordue, Dr. McWharrie, and 339 non-commissioned officers and privates. The left wing of this regiment comprised Brevet-Lieut.-Colonel W. W. Lodder, in command, Captains C. S. Baker, H. Kean, and W. H. Thompson, Lieutenants James Lawson, J. Shephard, H. E. Harrow, M. S. Morgan, A. Hesilrige, and L. C. Brown, Ensigns C. S. W. Furlong and J. T. Rudd, Assist.-Surg. W. B. Ramsbottom, 16 sergeants, 5 drummers, 18 corporals, 234 privates, 23 women, and 24 children.

NEWCHWANG (YINGTSZE)

From the *North China Herald.*

We are in receipt of advices from this new port on the confines of Tartary, to the 9th of October. Nothing new of a political character has transpired since we last recorded advices from that quarter. The social relations between the inhabitants and foreign residents continue satisfactory. Business appears to be quiet, and in the absence of extensive trade and large profits, the English merchants there have combined together to regulate the more of payment by the native traders—Who are endeavouring to introduce their paper currency, so as to supersede payment in dollars, silver or gold. The question was brought before a full meeting of the entire resident mercantile community, whose names are appended to the report below. They discussed the monetary grievance, and resolved to put their veto on the negotiation of this objectionable "Chop Sycee."—our readers must not mistake this term for *chopped* Sycee, for the document in question, as it means a kind of Chinese bank note, to represent silver, which possibly the banker may not be possessed of. The matter is one of importance in a mercantile point of view, and should be checked in the bud.

MEETING OF MERCHANTS TO CONSIDER THE "CHOP SYCEE" QUESTION.

Present: P. F. Knight (in the Chair), J. Hanna, J. S. Robinson Thos. Platt, R. K. Maitland, and H. E. Bush (hon. sec.).—This meeting was called for the purpose of taking into consideration the "Paper Money Question." It was moved by J. S. Robinson and seconded by T. Platt—That. in the opinion of this meeting it will be necessary to ignore payment in what is technically termed "Chop sycee," or paper money, to accept for manufactures, which may be entrusted to our care, actual silver or gold. Provided always that should one feel inclined to part with goods against the produce of this country, the prices for imports demanded from the native merchant must be distinctly understood to mean payment in hard cash, but may, of course, be transferred on the same understanding against exports—such transactions being arranged by the comprador of the establishment. Carried unanimously.

CORRESPONDENCE ON TRADE IN CHINA.

In order to complete the correspondence on Custom-house matters and foreign trade in China, which has appeared in this journal, we (*North China Herald*) now publish the closing letters on the subject from the British Chamber of Commerce at this port—one to the Hon. F. W. A. Bruce, C.B., and another to the chairman of the East India and China Association, and sent to the Chambers of Commerce at Manchester, Liverpool, Leeds, Bradford, Glasgow, besides several M.P.'s, bankers, merchants, &c., in England who are interested in the question.

THE CAMPAIGN IN CHINA.

The following appeared in the *Army and Navy Gazette*:—

"TO THE EDITOR OF THE 'ARMY AND NAVY GAZETTE.'

"SIR,—When are the regiments that served in the China campaign to have some record of their services inscribed on their colours? Sir Hope Grant applied for this more than three months since, and the answer was favourable from the Horse Guards. Excluding the Marines and Artillery, the following will be found a correct list:—For the word 'China'—the Royals, the Queen's, Buffs, 31st. 44th, 60th, 67th, 99th, and the King's Dragoon Guards. For 'Taku Forts'—44th and 67th only. For 'Peking'—the Royals, the Queen's, 60th, 67th, 99th, and the King's Dragoon Guards. Trusting that you will put in a reminder of our successful and well-managed little campaign, I beg to subscribe myself

T.

EXTENSIVE SHAWL ROBBERY BY THE CHINESE.

A curious discovery was made a few days ago at the Southampton Docks involving an extensive robbery of China crape shawls, perpetrated, there can be little or no doubt from the circumstances of the case, in the country from which the packages were exported. It is, of course, well known that extensive shipments of China crape shawls and India silks are made by the Peninsular and Oriental Company's steamers, that they are landed at Suez, conveyed across the desert by railway, and reshipped at Alexandria on board the steamers which arrive at Southampton weekly with the mails from different parts of our Eastern possessions. Among the cargo brought by the *Delta* steamer were four cases consigned to Messrs. Dunlop and Schoales, shipping agents at that port, the distinguishing mark on each being a heart, and the cases numbered respectively from 716 to 719. Each of the four cases was supposed to contain 50 dozen China crape shawls, of the value of £320, making a total consignment of 200 dozen, worth £1,000. When these cases were opened in the dock warehouse, for the purposes of examination, by the Customs' authorities, it was found that not a single shawl was contained in either of them. The cases were filled with matting and other light material, with some heavy stones ingeniously wrapped up in the centre to make the cases the exact weight they would have been had the shawls been properly placed in them. The exterior of the cases presented exactly the usual appearance, and there was nothing what ever about them to indicate the fraud which had been perpetrated, which could not by any possibility be discovered till they were opened at the end of their journey.

THE LATE LADY CANNING.

The Times writes as follows:—"It is not usual to pay a tribut at their decease to persons who, having led a private life, were only known and appreciated by a circle of relations and friends. The lady, however, concerning whose premature death in a distant country, on the eve of a joyous and triumphant return, we elsewhere give details, was for the last six years placed in a sphere where she had an influence far above that which can usually be exercised by women. Lady Canning's beauty, when she left England, was great, and of a peculiar kind, and her refinement of thought and feeling was reflected in her manner—gentle and gracious, self-possessed and dignified. Never was a masculine mind more clothed with feminine charm. In her face there was that earnest look which is often seen in those who have thought much of death without fearing its approach. Her accomplishments were varied, and her love of art not only made her a distinguished artist, but embellished all the accompaniments of her life, and imparted a singularly graphic character to her correspondence, and to her descriptions of scenery, persons, and events. She professed little, and what she performed was kept in the shade. She was chiefly to be judged by her influence upon others—the grasp of her intellect was only appreciated by those who had opportunities of judging of its power when called forth. To such there was something remarkable in her intelligence—it seemed as a gift to lead her straight to truth in all things. With the simplicity of a child, she brought her mind to bear upon any subject she thought it right or useful to others that she should understand, learning willingly any lesson set before her. She was a fit companion for her husband in their hour of trial. Her calm and steady courage, her accurate perceptions of duty, her gentle patience under abuse and calumny, must have greatly helped to keep him in that frame of mind so essential to bear him through their prolonged agony of peril. She was a staff to lean upon to all who came within reach of her affection. Beautiful and prosperous as she was, all worldly temptations seemed to pass her by like evil things that must not approach a pure and holy nature, and there was that about her which disarmed worldly malevolence and softened selfish harshness. She was a rare instance of a woman admired without being envied, and reverenced without being feared."

MILITARY SANITARIUM AT VICTORIA, VANCOUVER'S ISLAND.

A correspondent of *The Times* writes as follows from Vancouver's Island: "The great portion of a sanitarium for soldiers has arrived from the Cape of Good Hope at Victoria. The materials are being stored here, but it is not intended to erect the building at present, nor am I wel l

Digitized by Google

informed as to the object with which they have been sent; but if the intention of the Home Government is to establish a sanitarium on Vancouver Island for soldiers invalided in China or India, their choice of a station is a wise one. There is no healthier climate in the world than that of this island. Warm in summer without being oppressive, and bracing in winter without any severity of cold, I have tried all sorts of climates, and find this the best—the perfection of a temperate climate, to which is superadded natural scenery of the most varied and attractive character. I cannot recal at this moment a more accessible place in our own dominions than this island to India and China. The passage from Hong Kong to Victoria is, on the verage, only 40 days; from Bombay it is more, say 60 days; and rom Calcutta about 80 days by sailing vessels."

A CHINESE ALDERMAN.

The following intelligence may possibly have missed the attention of our readers in glancing over their Australian papers:—A naturalised Chinaman, named James Chiam, has been elected an alderman of Maryborough, Queensland. After his election, the new civic dignitary addressed the electors in broken English, and a speech was also read for him, of which the following are portions:—"I am told by my friends that some are trying to make a tool of me. They tell you wrong. My reasons for coming before you were these:—I am now eleven years in the colonies. I found your Government good, and, not like all my countrymen, I have spent my money in your land, built houses, and bought property from you, and have been duly recognised and granted the benefits of the Queen's subjects, and cannot now go back to my own country; and as such subject I will do my best, by attention, industry, and *honesty* to attend to the true wishes of the ratepayers of Maryborough. My first point would be that we should not be in debt, and to show that I am true to this I will pay according to my means (if supported by my brother aldermen) such sum annually as may be necessary to carry out the most useful and immediately requisite public works, so that we incur no debts to banks or any others with money to lend at large interest. The working men—the true representatives of honesty and free labour—have returned me, and they well may be proud, for the honour is theirs, not mine; for by keeping together they can always have their own true man to represent them. Hurrah for the Queen!'

Monetary and Commercial.

THE RED SEA CABLE.

The steamer *Sir James Duke* has this day been despatched by Messrs. Glass, Elliot, and Co. with the 200 miles of cable for the repair of the Red Sea line, and it is expected she will reach her destination in March.

The Italian Government have determined to lay at once a submarine ~~telegraphic cable from~~ Trapani or Marsala to Cape Carbonata, in the Island of Sardinia, a distance of about 200 miles. This will obviate the necessity of messages from Alexandria and Malta for this country being despatched *via* Naples, Rome, Turin, &c., and will greatly facilitate messages.

The Metropolitan and Provincial and Mercantile Bank, recently established under the Limited Liability Act, have amalgamated. The Board will be composed of an equal number of directors from each company; and as this arrangement secures the necessary amount of capital, business will be shortly commenced. We have not yet heard the name of the manager to be appointed, but there will be little or no delay in this and other preliminary arrangements.

Several steamers on the Clyde have, we understand, been inspected lately with a view to purchase for the China coast and rivers.

A new set of boilers have been constructed for the steamer *Paoushan* under the superintendence of Mr. Lockhart and his partner, who have been resident in Shanghai, and are now preparing a complete set of engineering tools, including a steam hammer, for the establishment of a workshop in Shanghai capable of undertaking any description of work.

The National Provincial Bank of England have declared a half-yearly dividend at the rate of 8 per cent. per annum, together with a bonus of 5 per cent.

The greater part of the dollars brought by the Mexican packet has been sold at 59¼d. per ounce. This establishes a decline of ⅛d. from the price obtained for the arrival of the beginning of last month, but in the interval there have been large transactions at 59½d., and some small amounts have realised a still higher rate.

The Board of Trade Returns for the month ending the 30th of November and the eleven months show a further decrease in the exports. For the month ending November the total is £9,874,762, against £10,757,749 in 1860 and £10,858,001 in 1859; for the eleven months, 1861 represents £115,355,004; 1860, £123,714,276; and 1859, £119,613,185. The following are the items as regards China and other parts of the Far East:—

TO CHINA AND HONG KONG.—Cottons, cambrics, muslins, &c.: 292,961,077 yards, value £3,022,501, in 1861, against 187,395,734 yards, value £2,700,585, in 1860. Cotton yarn: 6,107,714 lbs., value £275,945, in 1861, against 6,812,864 lbs., value £324,639, in 1860. Woollens: 80,177 pieces, value £346,880, in 1861, against 74,563 pieces, value £384,720, in 1860.

TO JAVA.—Cottons, cambrics, muslins, &c.: 44,726,270 yards, value £697,252, in 1861, against 59,730,632 yards, value £911,352, in 1860.

TO PHILIPPINE ISLANDS.—Cottons, cambrics, muslins, &c.: 34,421,491 yards, value £596,167, in 1861, against 28,869,277 yards, value £476,890, in 1860.

The annual general meeting of the shareholders in the Liverpool Borough Bank was held on Dec. 19, in the Public Salerooms, Liverpool. The meeting was but thinly attended. Mr. J. B. Brancker, chairman of the liquidators, presided. The secretary having read the preliminary advertisement, Mr. Banner read the report and statement of accounts, of which the following is an abstract:—

"In presenting to the shareholders of the Liverpool Borough Bank the usual accounts, the liquidators have nothing upon which it is necessary specially to report. It will be seen that the collections during the year ending the 12th of November have amounted to £166,715. 1s. 10d., out of which the liquidators have completed the discharge of the original liabilities of the bank, with the exception only of £3,574. 12s. 6d. not yet claimed. They have also been enabled to make a first return of 10s. per share to the proprietors, which was paid on the 2nd of September last, and since the closing of these accounts they have made a second payment of 10s., which will appear in the next annual statement. There is no diminution in the estimated surplus, but rather an increase, although, of course, contingencies still exist affecting the ultimate realisation."

The Committee of the General Shipowners' Society have called the attention of Government to the necessity of despatching vessels of war to protect merchant vessels in the track of the Cape of Good Hope, St. Helena, and Western Islands.

The Union Steamship Company, under contract for the conveyance of Her Majesty's mails to the Cape of Good Hope, &c., have received instructions from the Government to arm their steamers forthwith.

At Lloyd's this week, on ships loading at New York for London, 40s. to 50s. war risk has been paid, while the rate from China has been 40s. As regards vessels loading here for India the quotation has been 20s. to 40s., according to date of sailing, and for Australia and China 30s.

Mr. Peter Northall Laurie has been elected governor of the Union Bank of London, in the place of the late Sir Peter Laurie.

A writer in the *Economist*, in reference to American trade in the East, says:—

"The civil war has curtailed American trading and purchasing power. Much of their long voyage commerce is for the moment carried on by English merchants (at great profit to themselves), and in British ships. Hence, comparatively few cargoes are now on their way to the United States from India and China for American account, and even those few are for the most part hypothecated to English houses in London and Liverpool. The well-known course of trade is to buy these cargoes by means of credits on England; the bills of lading are sent as security to the agents of English firms, and the American importer neither pays for nor gets possession of his goods till the ship arrives in America. The result of a capture will consequently be that the half-rotten ship will be delivered to the captors, while the comparatively valuable cargo will be claimed by and delivered up to some English house with whose money it can be proved to have been purchased. Nay, so general is the American habit of building and trading on English capital, that it may reasonably be doubted whether a bombardment of New York or Boston would not inflict losses on Englishmen nearly as severe as on Americans."

MANCHESTER MARKETS.

The excitement which has taken possession of the Liverpool cotton market on more hopeful views of peace, has induced holders here to advance their quotations and withdraw their prices, but has not induced buyers to come forward with more than mere inquiries as to the chance of finding acceptance fo old rates. Yarn alone, so far, has really established the advance, and only to the extent of ¼d. to ½d. on export qualities and of ½d. to 1d. on those for local manufacture. In cloth transactions have been utterly meagre, a character which has pervaded more or less each week of the month. In this respect, the bills of exports are pointed to, as showing that, notwithstanding the notorious poverty of business in Manchester, we are sending to foreign markets at almost our usual rates—in other words, that producers, finding merchants will not take the risks of high-priced goods on their hands, are consigning them to a distance on their own account, in the hope of reimbursing themselves for high-bought material. A limit is soon expected to this class of dealings, and next approaches the period of actual scarcity.

At the Conference held at Paris in 1856, the following articles in connection with maritime law were agreed to:—

"1. Privateering is and remains abolished.

"2. The neutral flag covers enemy's goods, with the exception of contraband of war.

Digitized by Google

"3. Neutral goods, with the exception of contraband of war, are not liable to capture under enemy's flag.

"4. Blockades, in order to be binding must be effective, that is to say, maintained by a force sufficient really to prevent access to the coast of the enemy.

"The Governments of the undersigned Plenipotentiaries engage to bring the present Declaration to the knowledge of the States which have not taken part in the Congress of Paris, and to invite them to accede to it.

"Convinced that the maxims which they now proclaim cannot but be received with gratitude by the whole world, the undersigned Plenipotentiaries doubt not that the efforts of their Governments to obtain the general adoption thereof will be crowned with full success.

"The present Declaration is not and shall not be binding, except between those Powers who have acceded, or shall accede, to it.

The Americans, as will be remembered by every one, refused to concur in these resolutions. How far, then, are they binding upon us?

The amount of Bullion by the steamer *Indus* from Southampton on the 20th inst. was:—In gold: To Madras, £3,308; to Ceylon, £2,000; to Alexandria, £1,000; to Melbourne, £209. In silver: To Madras, £9,500; to Singapore, £418; to Hong Kong, £13,461; toFoo-Chow-Foo, £678; to Shanghai, £11,947: total, gold, £6,517; silver, £36,004.

ARTICLES OF IMPORT.

TEA.—The market during the past fortnight has been inactive, although from a general determination on the part of importers to realise there has been a fair amount of business, but in nearly all cases at a further decline in prices. The low to fair Common Congous with leaf have been inquired for at the late decline, but the broken leaf and dusty kinds have been heavy of sale. Good Common is scarce, and remains quoted 1s. 0½d. to 1s. 1d. per lb. Flavory kinds of old import, as also blackish leaf kinds, are rather lower. Good second-class Monings and Wopaks have been in large supply, and from a pressure of sales show a further decline of 1d. to 1½d. per lb., at which there are now buyers, and with but few to be met with. Fine and finest kinds have likewise sold 1d. per lb. lower. Fair to good Kaisows show a reduction of 1d. to 2d. per lb. from the late extreme prices; for fine and finest fully former rates are maintained. Common Fayshans are again easier, the finer kinds are better supported. Common to good Oolongs show no alteration. Fine to finest continue in request. In Souchongs there is but little change to notice; the finer kinds are freely offered, and prices are rather lower. Flowery Pekoes have been in steady demand at about former prices. Common to fair Scented Capers and Orange Pekoes remain much as before. Fine Capers have been freely taken, and prices fairly maintained. Good and fine Orange Pekoes have been pressed for sale, and prices show a further decline of 1d. to 2d. per lb. Uncoloured Japan Teas show a fall of about 2d. per lb. Green Teas continue to show great depression, and prices for most kinds are even lower than those quoted in our last; but as the total shipments are moderate, we look to see some improvement in these, should the difficulty with America be brought to a peaceable solution, as that market must draw supplies from this should there be no war. There have been two public sales, comprising 14,500 packages, of which 3,500 packages were sold, including 1,600 packages without reserve.

SILK.—This market still continues in the unsatisfactory state mentioned in our last, and prices remain unaltered.

SUGAR.—A steadier appearance has prevailed, and a fair business in the home trade has been done. At the public sales there were 2,156 bags Penang, which chiefly sold at 35s. to 39s. 6d. for low to good yellow; and since, 3,828 bags Penang, at 30s. 6d. to 34s. 6d. for ordinary to fine fine brown, 35s. to 38s. for low to good middling yellow, 39s. 6d. to 42s. for good to fine fine yellow; and 1,792 bags Penang, partly sold, at 32s. 6d. to 33s. for brown, 34s. 6d. to 39s. for low to good yellow. Privately 50 tons clayed Manila have sold at 33s. for middling quality, and 850 bags Penang at 35s. 9d. for yellow, and 33s. for brown.

COFFEE.—A limited demand only continues, and a downward tendency has been felt in prices. The sales have been: 648 bags Java at the following prices:—Mixed good ordinary greenish, 67s. to 68s.; and pale yellowish, 72s. 6d.; as also 964 bags Manila; good ordinary dull greenish, 66s. to 68s. 6d.; black pickings, 30s. 6d. to 32s.

RICE.—The activity noticed in our last has gradually fallen, till the market is now in a dull state, and private business has been confined to small parcels on the spot. 5,408 Java were held for stiff rates and bought in, but about half has since been taken. Good White, 16s. 6d. to 17s. 6d.; low middling, 14s. 6d.

PEPPER.—Black: 1s. ½d. lower, and of 2,598 bags Sumatra at auction, about one-third sold at 3⅞d. to 3⅞d. per lb; of 4,950 bags Penang, one-half sold, at 3⅛d. to 3⅞d.; and of 840 bags Batavia, three-fourths sold at 3⅝d. to 3¾d. White: Meets with a little more inquiry: small sales are made privately at 6d. per lb. for fair quality.

SAGO is 1s. 6d. per cwt. dearer, and 1,081 bags at auction chiefly sold at 23s. 6d. to 25s. per cwt. for fair to good small, and 22s. 6d. to 24s. large.—FLOUR: Moderate business privately, on the spot and for arrival, upon previous terms.

SPICES.—Cinnamon: Steady, with moderate business at 1s. 4d. to 2s. 3d. per lb. for 1st, 1s. 1d. to 1s. 10d. for 2nd, 10d. to 1s. 3d. for 3rds, and Jungle 8d. to 10d. Cassia lignea: 700 boxes have been sold at 90s. for good quality. Cassia buds: 69 bags wild, destitute of flavour, sold at 16s. per cwt. Cloves: ¼d. per lb. cheaper. 2,363 bags chiefly sold at 3d. to 3½d. per lb. for ordinary to fair. Mace: A recent arrival of Tonquin, 87 caddies, all sold readily at auction, but at irregular prices; 24s. 6d. to 30s. 6d. per oz. for middling to good, and 21s. to 22s. 6d. pickings, being 2s. to 3s. lower. Of 4 tins grain, one sold at 45s. Nutmegs have again fallen fully 1d. per lb.; and of 59 cases Penang, and 58 casks Batavia, about three-fourths sold at 1s. to 1s. 6d. per lb. for middling small to good medium.

HEMP.—Rather improved demand. Of 1,452 bales at auction, three-fourths sold at £23s. 5d. to £24. 15s. per ton for middling to good roping.

COTTON.—There has been some revival of trade in this staple, and sales are not very far short of 2,000 bales, chiefly in Oomrawuttee, at 6d. to 7¼d. per lb. for ordinary to good; but the market is still unsettled.

JAPAN WAX.—No sales have taken place, and market continues firm at 70s. to 75s. for saucers; 54s. to 62s. for block.

TIN.—Market very dull, and scarcely any trade. Quotations nominal.

GAMBIER.—Very little doing; 736 bales at auction all retired; 1,894 small bags, chiefly free and in squares, sold at 20s. per cwt. CUTCH.—Flat; 2,147 bags at auction, all retired.

MISCELLANEOUS.—India Rubber: Rather dearer; of 691 baskets a few sold at 1s. 3½d. Camphor: 50 chests at auction sold at 185s. to 187s. 6d. per cwt. Sapan Wood: Of 24 bags Siam at auction the whole sold at £8. 5s. to £8. 7s. 6d. per ton; 8 tons Batavia at £8 to £8. 2s. 6d.; 41 tons Manila at £5. 17s. 6d. to £6, showing no change in value. Soy: 50 hhds. at auction, half sold at 2s. 3d. per gallon. Mother-o'-Pearl Shells: Cheaper; 54 cases of Manila sold at auction at 76s. to 78s. Star Anniseed: Very quiet, and no business. Sticklac: 215 cases sold at £6. 6s. to £6. 7s. 6d. for good. Gum Benjamin: Steady. Damar: Neglected; parcels retired. Gamboge: Quiet but firm; 53 cases at auction partly sold at £5. 12s. 6d. to £5. 15s. Rattans: Steady; 11,288 bundles Singapore, 4,400 of Penang, and 979 of Batavia sold at 2s. 3d. to 3s. 11d. per 100. Saltpetre: Less agitation, and fair business done. Gutta Percha Large business at improved rates; of 102 baskets and 30 tons at auction half sold at 1s. 3d. to 1s. 7½d. for good to very good genuine, and 7d. to 10d. reboiled. Rape Seed: No supply, and consequently business is unimportant. Vermilion: Firm, with retail sales. Galingal Root and Dragon's Blood: Nothing doing. Cubebs: Flat, and prices have declined 15s.; of 187 bags one-fourth sold at £5. 15s for fair but stalky. Galls: Good China and Japan quoted 40s. to 50s. per cwt., but no auctions. Rum: Increased business at firmer rates; 160 puncheons strong Penang sold at 1s. 7½d., and 300 hhds. Mauritius at 1s. 8d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6; nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £8. 15s. to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5 to £5. 5s.

STEEL.—Swedish keg, £15. 10s. to £16.

COPPER.—Sheet and sheathing, 12d.; yellow metal, 10d.

TIN.—120s. for block; 121s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to 29s. per box.

FREIGHTS AND CHARTERS.

Vessels still hold off, but shippers do not advance their rates for goods. There is very little doing in coal freights, but the only material advance in rates is from Cardiff for French account; 30s. per ton is offered for Point de Galle, 35s. Calcutta, and 40s. Aden; £45 per keel is offered from North of England to Hong Kong. Rice freights have taken a start upwards, and 90s. per ton is offered for ships on passage out. The Admiralty received tenders, on the 20th inst., for the conveyance of the following articles:—For Hong Kong: 30 tons naval masts, 14 tons naval timber, 131 tons naval common, 3 tons naval sails, 2 tons light boilers.

Current Rates of Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s. to 60s.

CASUALTIES.

Liverpool, December 16: The Finzel, Murray, from Hong Kong to the Clyde, which passed the Straits of Sunda on the 27th of October, experienced a severe typhoon on the 6th.

BY their process, which is patented, Pure Zinc Paint is cheaper than White Lead
It does not change colour with the London atmosphere.
Adulterations.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes from 10 to 30 per cent. No workman can produce good work with such material. Those who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.
Cheapness.—Not only is it cheaper per hundred weight, but two hundred weight of this Paint with six gallons of Oil, covers as much surface as three hundred weight of White Lead and twelve gallons of Oil. Each cask is stamped "HUBBUCK, LONDON, PATENT."
THOMAS HUBBUCK and SON, WHITE LEAD, OIL, and PAINT WORKS,
24, LIME-STREET, LONDON.

TO HOUSE PAINTERS, GRAINERS, BUILDERS, RAILWAY COMPANIES, SHIPBUILDERS, &c.

ONE of the Greatest Improvements of the age is KERSHAW'S PATENT GRAINING APPARATUS for producing an imitation of the various woods. They are very extensively used and with great success. They are very cheap, and will repay the cost of them in two days' working. They only require a trial; any person studying his interest would not be without them. A prospectus will be sent on receipt of a stamped directed envelope addressed to T. KERSHAW, Patent Graining Tool Manufacturer, 33, High-street, Marylebone, London, W.
N.B.—One of the Patent Graining Tools will be forwarded on the receipt of a remittance for 22s. These Tools are peculiarly well adapted for the Export Trade, and for use in India, China, Japan, and our foreign dependences
Orders can be sent direct to the Manufacturer, or through Messrs. JOHN ROBERTS and SON, Hong Kong.

PHOTOGRAPHIC APPARATUS, LENSES,
AND PURE CHEMICALS.

BENNETT'S WATCHES.—No. 65, Cheapside.—To Shippers, Merchants, Captains and other Wholesale Buyers.—J. Bennett solicits an inspection of his very large STOCK of both GOLD and SILVER WATCHES of every description, especially manufactured for the various foreign markets. He is ready to supply wholesale buyers with any quantity, at the shortest notice, and on the most advantageous terms. He always keeps on hand large stocks especially suited for the Spanish, Brazilian, and South American markets, for India, China, Japan, and Turkey, for the United States, Canada, New Zealand, and Australia. Pocket Chronometers, centre seconds, minute, half-quarter, and quarter repeaters, lever, duplex, and horizontal watches. J. Bennett also invites an inspection of a very large and choice assortment of gold and silver watches just received from his agents in Switzerland, manufactured expressly for him, of the newest designs. Every watch is skilfully examined, timed, and its performance guaranteed. A liberal discount to wholesale buyers.—Bennett, 65, Cheapside, Watch Manufacturer. Free and safe per post.

MANUAL OF HYDROPATHY for LADIES and CHILDREN. By Mrs. SMEDLEY. 1s. 6d. London: Job Caudwell, 335, Strand.

SMEDLEY'S PRACTICAL HYDROPATHY.—20th Thousand. 516 pages. 160 Anatomical cuts. 2s. 6d.

£10,000 HAVE recently been expended on the HYDROPATHIC ESTABLISHMENT, MATLOCK BANK. As a winter residence it is unequalled. Extensive saloons, bed-rooms, bath-houses—all connected and warmed with pipes—a summer temperature is kept up. Thorough ventilation. Mild treatment.—Mr. and Mrs. SMEDLEY.—Terms 3 Guineas per week. No fees.

LONDON MALTA and ALEXANDRIA TELEGRAPH.—MESSAGES from India, China, Australia, &c., addressed to the Telegraph-office at Alexandria, to be telegraphed homewards, will not be forwarded without pre-payment.
The Bank of Egypt will receive deposits of not less than £20, which they will apply to the payment of such homeward messages as the depositors may direct.
Deposits may be made with the Bank of Egypt, in London, for account in Alexandria.
No. 10, Cannon-street East.

MESSRS. DEBENHAM and TEWSON'S LIST OF ESTATES and HOUSES to be SOLD and LET, is published on the first day of each month, and may be obtained free of charge on application at the Auction and Estate Agency Offices, 80, Cheapside, or by post for one stamp; it contains particulars of town residences, country properties in most of the favourite residential counties, hunting and shooting quarters, ground rents, rent charges, and investments not elsewhere advertised.

TO CHEMISTS, STATIONERS, AND CONFECTIONERS.—AGENTS WANTED.

PLUMBE'S GENUINE ARROW-ROOT should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for invalids, and as the best food for infants.
REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL.
"I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) ARTHUR HILL HASSALL, M.D."
Directions and testimonials with each packet, which bears the signature of A. S. PLUMBE, 3, Alie-place.
Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-st.; Starling, Islington; Weatherley, Peckham.

HOLLOWAY'S PILLS.—HEALTH, VIGOUR.—These Pills are invaluable in stomachic derangements and bilious affections. They exercise in the strictest sense both alterative and tonic properties. Amongst all the medicines we possess Holloway's Pills stand first; universal experience warrants this assertion. They will remove many disorders which have defied every other treatment. These Pills are the best antagonists to all inflammatory action; they thoroughly purify the blood and regulate its natural distribution through the body, hence they prevent congestion and over-engorgement of any organ. Over many maladies their effects are almost specific. Holloway's Pills root out every vestige of disease without worrying the system. While eradicating the complaint they comfort and strengthen the nerves, and increase the vigour of the constitution.

RUPTURES.

HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS
DISPENSES ENTIRELY WITH THE LEVER SPRING.
A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia.
Measure required—circumference two inches below the hips.
Price—single, 12s.; double, 18s.
The absence of metallic springs renders this Truss especially adapted to warm climates.
Illustrated Circulars and the Truss can be obtained on application to Mr. E. HUXLEY, 12, Old Cavendish-street, Oxford-street, London.

*** To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

KEATING'S COUGH LOZENGES.

JUDGED by the IMMENSE DEMAND, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.
Prepared and sold in Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

KEATING'S COD LIVER OIL just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the Fish being unusually fine, and the Oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St. Thomas's Hospitals, have analysed and pronounced the Pale Newfoundland Oil the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. No higher price need be paid than the following:—Light Brown, 1s. 8d. per pint, or 3s. per quart; Pale, 1s. 6d. half-pints, 2s. 6d. pints, 4s. 6d. quarts, or in 5 pint bottles 10s. 6d. imperial measure.

SEWING MACHINES.

NEWTON WILSON and Co.'s CHAIN-STITCH, Lock-Stitch, and Knotted-Stitch SEWING MACHINES present the most varied adaptation for every use, family and manufacturing, to be met with at any house in the world. These machines are perfect in mechanism and noiseless in action, simple to learn, easy and light to operate, and free from liability to derangement. They are the best machines for quilting, and the only machines that will do braiding and embroidery in addition to all descriptions of ordinary sewing. In use by the Queen and the Ladies of the Court, and by thousands of the clergy and gentry, to whom references can be given. Free instructions to purchasers, and every machine guaranteed. Samples of sewing in running, hemming, felling, tucking, binding gathering, and embroidering, sent post free, with illustrated price list, from the great Central Depot, 144, High Holborn.

WILSON'S PATENT CARPET SWEEPER cleans a carpet thoroughly without raising a grain of dust—no damping before and no dusting after its operation—no kneeling on the floor, no use of dust-pan, and no labour required in its application. Invaluable for City Offices, Show Rooms, Chambers, Libraries, Hotels, Clubs, and for every dwelling-house.

Price 12s. 6d., 15s., and 18s. Prospectuses free by post. NEWTON WILSON and CO., 144, HIGH HOLBORN.

W. F. THOMAS AND CO.'S,
PATENT SEWING MACHINE.

TO TAILORS, SHIRT COLLAR, GLOVE, BOOT AND SHOE MAKERS SADDLERS, AND OTHERS.

FOREIGN, Colonial, and Country users of SEWING MACHINES, who cannot get them adjusted or repaired when imperfect or out of order, must necessarily rely on the respectability of the maker for obtaining a really servicable Machine, suitable to their requirements. The high reputation which during the last 14 years the Machines made by W. F. Thomas & Co., have acquired for the perfection of their workmanship, insuring uninterrupted action and non-liability to derangement, entitle the makers to the confidence of persons residing in the country and abroad, and of intending emigrants, to whom any disappointment in the quality of the Machines must be attended with serious inconvenience.

The MACHINES are made of various sizes, and adapted for every kind of work. The stitching produced is alike on both sides of the material; there is no cord or ridge, and the thread cannot be pulled out.

Lists of Prices and Specimens of the Work can be had from W. F. THOMAS & Co. (Original Patentees).

66, NEWGATE-STREET, LONDON.

FEVER AND FEVERISH SYMPTOMS.

THERE is nothing so Effective for FEVER, AGUE, DETERMINATION of the BLOOD to the HEAD, SUN STROKE, RHEUMATISM, and INFLUENZA, as THE GENUINE **Dr. JAMES' FEVER POWDER.** It is the safest, yet most potent diaphoretic known, leaving no after-depression, it quickens all the secretions and relieves the whole system; keeps well, and is so portable as to be carried in the pocket or smallest medicine chest. It will be found extremely easy of administration. No one subject to the effects of fluctuations of climate, or the vicissitudes of travel, should be without it.

PREPARED BY

F. NEWBERY and SONS,

45, ST. PAUL'S CHURCHYARD, LONDON.

SOLD IN BOTTLES AND PACKETS. ENGLISH PRICES 2s. 9d., 4s. 6d., and 11s.

The fullest directions are given. These and all descriptions of Proprietary and Patent Medicines can be obtained and ordered through

Messrs. JOHN ROBERTS AND SON,

HONG KONG, AND AGENTS FOR THIS PAPER.

QUINTESSENCE OF JAMAICA GINGER AND CAMOMILE.

GINGER has long been deservedly known as an Excellent Domestic Medicine, and combined with Camomile, it is the most efficient stomachic tonic known; for while the Ginger relieves the stomach from distension and flatulency, arising from impaired digestion, the Camomile strengthens the coats of the stomach, and by that means gives it a healthy and invigorating tone. So highly concentrated is this preparation, it is unimpaired by age or climate, and well adapted for exportation. In Gout, Spasms, Dysentery, Cholera, or those complaints incidental to tropical climates, it is invaluable, as in numerous cases a dose or two has checked, and frequently cured, most alarming attacks. No family should be without it. Sold in Half-pints, Quarter-pints, and One-Eighth-pints.

Agreeable Seidlitz Powder, in one bottle, protected by a case, with measure and spoon included. The advantage of this preparation is the perfect combination of the solid ingredients of the Seidlitz Spring in one compound powder. It is very cooling and refreshing, well adapted for Exportation, or Travellers by Land or Sea.

Aromatic Tincture of Quiniodine. For the prevention of fever, intermittent or remittent ague, and other effects of Malaria. No person exposed to the influence or predisposing cause of Fevers should be without it, for if taken in small doses daily, the system will become so thoroughly impregnated with its principles, as to be rendered proof against all attacks of contagion or Malaria. Sold in Pints, Half-Pints, Quarter-Pints.

Agents:—Bathgate and Co., Old Court-house-street. F. W. Browne, Old Court-house-street, Calcutta; Treacher, Bombay, Poona and Kurrachee; Rogers, Bombay; Oakes, Exchange Hall, Madras; Apothecaries' and Medical Halls, Colombo; Apothecaries' and Medical Halls, Kandy; Piters, Point-de-Galle; Little, Singapore Dispensary. DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a scale envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG, and may be obtained through any of the Agents of this Paper.
